About This Program

Looking to jump-start your career in engineering? The Associate of Applied Science in Mechanical Engineering Technology provides you with the technical skills and knowledge needed to succeed in a wide range of mechanical engineering roles. With hands-on training, experienced faculty, and industry-standard tools, you'll gain practical experience and be ready to hit the ground running in the industry. Read more...

Accreditation

The A.A.S. degree in Mechanical Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics'

Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, and the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the Coursework tab.

For more information on admissions, contact the Regional Campuses admissions offices.

Program Learning Outcomes

Graduates of this program will be able to:

- Apply the knowledge, techniques, skills and modem tools of mathematics, science, engineering and technology to solve mechanical engineering technology problems that require limited application of principles but extensive practical knowledge.
- Design solutions for well-defined mechanical engineering technology problems and assist with the design of systems, components or processes for solving broad mechanical engineering technology problems.
- 3. Apply written, oral and graphical communication in both technical and non-technical environments, and proficiently use technical reference material.
- Conduct standard tests, measurements and experiments and analyze and interpret the results.
- 5. Function effectively as a member of a technical team.
- 6. Understand and commit to address professional and ethical responsibilities, including a respect for diversity.

Full Description

The Associate of Applied Science degree in Mechanical Engineering Technology provides students with knowledge and skills in the manufacturing areas related to computer-controlled equipment and integrated manufacturing. Students learn drafting, materials testing, robotics applications and computer-aided design (CAD) and computer-aided manufacturing (CAM) software for design and design documentation.

The Mechanical Engineering Technology major comprises the following concentrations:

- The **General** concentration includes coursework in microprocessors and robotics, manufacturing processes, computer-aided tool design and professional ethics.
- The **Mechatronics** concentration is cross-disciplinary and provides students with skills in electrical and electronic devices, hydraulics and pneumatics and programmable logic controllers

The degree program articulates into Kent State's Bachelor of Science degree in Engineering Technology.
