### Clinical Setting

For any clinical practicum (on campus or off campus) in speech pathology or audiology that requires candidates to be placed within the on-campus speech and hearing clinics, school or agency setting, the SPA program requires candidates to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background check and submit the results to authorized personnel at their assigned clinic/school/agency before the beginning of their placement or the first day of the semester in which the practicum will take place. Authorized school/agency personnel will determine whether a candidate may participate in practicum in the off-campus setting. The BCII and FBI background checks are good for one year and the candidates will need to complete one each year that they are in graduate school.

Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed one month prior to clinical practicum. Candidates are responsible for fees incurred for this requirement. For more information on this policy contact the Clinical Coordinators for the Speech and Hearing Clinics. Visit the Ohio Department of Education website for more information about background check requirements for

those wishing to hold pupil personnel licenses in Ohio. Contact the Office of Professional Conduct at the Ohio Department of Education for specific information about the results of the background check.

## Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate knowledge of standards of ethical conduct.
2. Apply knowledge of the principles and methods of prevention, assessment and intervention for people with hearing impairments.
3. Demonstrate knowledge about certification, specialty recognition, licensure and other relevant professional issues.
4. Demonstrate knowledge of contemporary professional issues.
5. Apply knowledge of research processes by integration of research principles into evidence-based practice.
6. Demonstrate skill in oral and written and other forms of communication sufficient for entry into professional practice.
7. Apply knowledge of and experience with individuals from culturally/linguistically diverse backgrounds with client/patient populations across the lifespan.

## Full Description

The Doctor of Audiology degree is a professional doctorate that prepares students to be licensed clinical audiologists. The program emphasizes the principles and practices underlying evaluation, treatment and provision of hearing care services. Graduates are independent professionals who specialize in the diagnosis, management and treatment of hearing and balance disorders.

The Au.D. degree is a full-time, continuous, 45-month post-baccalaureate course of study designed to integrate classroom, laboratory and clinical experiences, culminating in the qualification for national certification and state (Ohio) licensure as an audiologist. All students attend full-time and take a fixed sequence of classroom- and clinic-based courses.

This program may be undertaken simultaneously or sequentially with the Ph.D. in Audiology.

The Au.D. degree in Audiology is offered in consortium with the Cleveland Clinic and the University of Akron.
