Description

The Unmanned Aircraft Systems minor introduces students to various types of unmanned aerial systems and their increasing role in today's society. Using a systems engineering perspective, students study roles and applications of unmanned aerial systems and apply their knowledge to the development of sensors, control, communications and flight operations. Students will also become an FAA certificated drone pilot.

Fully Offered At:

- Kent Campus

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes

Graduates of this program will be able to:

- Analyze various aspects of unmanned aerial systems operations, including safety, certification, applications, trends, regulations and performance.
- Analyze the system components of unmanned aerial systems.
- Determine the communication and control systems necessary for unmanned aerial systems platform operations.
