Description
The Ph.D. degree in Biomedical Sciences – Human Evolutionary Biology emphasizes a biological approach to research problems focusing on human and non-human anthropology. The program focuses on human anatomy and neuroanatomy, developmental biology, evolutionary genetics, mammalian physiology, paleontology, and experimental archaeology. Many students in the program take advantage of resources available to them through the Cleveland Museum of Natural History, the Cleveland Metroparks zoo, and other local, national, and international collaborative relationships.

Candidates for the Ph.D. are expected to engage, to the extent possible, in collaborative relationships. This includes those students on non-teaching scholarships or other activities that benefit their professional development. The teaching faculty in the program are drawn from the departments of Anthropology and the Biological Sciences at Kent State and the Department of Anatomy and Neurobiology at the Northeast Ohio Medical University (NEOMED). This inter-departmental and inter-institutional structure provides significant resources to the doctoral candidates, including the Hammon-Todd human and primate skeletal collection, state-of-the-art laboratories for neuroanatomy, anatomy, genetics, paleontology, biomechanics, and experimental archaeology. Additional resources are available to students through the Cleveland Museum of Natural History, the Cleveland Metroparks zoo, and other local, national, and international collaborative relationships.

Admission Requirements
- Master’s degree in anthropology or biological sciences from an accredited college or university for unconditional admission
- Minimum 3.000 GPA on a 4.000 point scale for unconditional admission
- College-level courses in statistics and computer science (Effective Spring 2020 no longer required)
- Official transcript(s)
- GRE scores

FULLY OFFERED AT:
- Kent Campus

Program Learning Outcomes
Graduates of this program will be able to:
1. Publish their research in peer-reviewed journals.
2. Demonstrate the ability to teach undergraduate students.
3. Seek employment after graduation in fields that reflect their area of training.

Human Gross Anatomy Electives, choose from the following:
- BMS 78610 HUMAN GROSS ANATOMY I
- BMS 78611 HUMAN GROSS ANATOMY II

Approved Human Gross Anatomy courses

Electives 4  4-9

Minimum Total Credit Hours:  60

1 Courses equivalent to those in the core may be substituted with the approval of the program committee.
Each doctoral candidate, upon admission to candidacy, must register for BMS 80199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for BMS 80199 and thereafter BMS 80299, each semester, including summer, until all requirements for the degree have been met.

May be satisfied by courses taken at NEOMED or any College of Podiatric Medicine. Students should consult with their advisory committee.

Cognate and elective courses in related departments (e.g., anthropology, biological sciences, chemistry, geology and psychology) will be selected and approved by the student's advisory committee.
