*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual degree option with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.
