HI 60411  CLINICAL ANALYTICS  3 Credit Hours
(Slashed with HI 80411) The use of well-defined and well-integrated
clinical analytics throughout the healthcare value chain can be
transformative. Through careful implementation of health analytics,
hospitals can transform unwieldy amalgamations of data into
information that can: improve patient outcomes, increase safety,
enhance operational efficiency and support public health. Given the
immense size of the data challenge, the distinctness and geographic
spread of many healthcare-related activities, and the fact that so many
healthcare activities are conducted by different entities which must
interact with each other, there is really no other way to provide operations
management tools necessary to deliver personalized medicine and to
control spiraling costs. Since clinical analytics is an immature discipline,
we carefully examine the practices of those institutions who are standard
setters in the industry.
Prerequisite: Graduate standing.
