*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Bachelor of Arts degree in Criminology and Justice Studies takes an interdisciplinary approach to the study of crime, law and justice. Faculty members view crime, deviance and society's response from the fields of sociology, political science, psychology and traditional criminal justice viewpoints. The curriculum provides a firm understanding of the basic institutions of the criminal justice system. Students are also exposed to criminological theory and diversity courses, which help them understand the complex relationship between the individual, society and the criminal justice system. The program stresses effective writing and analytical skills. Students are afforded the opportunity to earn credit through internship placements.

Students select at least one concentration in consultation with a faculty advisor or the undergraduate coordinator. Consultations with faculty enable students to make informed choices about which combination of courses will maximize their preparation for future careers and graduate education.

Criminology and Justice Studies students may apply early to the M.A. degree in Criminology and Criminal Justice and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

The Criminology and Justice Studies major comprises the following concentrations:

- **The Corrections** concentration is for students interested in pursuing careers in institutional corrections for adults or juveniles, or in such community corrections fields as probation and parole.
- **The Criminology and Deviance** concentration is for students interested in understanding the origins and nature of deviance and crime, their patterns and societal responses; this concentration is appropriate for students preparing for graduate study in sociology, criminology, criminal justice, public policy or social work.
- **The General–Criminology and Justice Studies** concentration is for students who either choose not to pursue specializations within the major or wish to pursue an individualized program of study (through general electives), which does not align with the other concentrations.
- **The Justice and Human Relations** concentration is for students interested in such fields as social work, counseling, clinical psychology, victimology, victim advocacy, juvenile justice, public/community relations in criminal justice, community organizing, diversity or social justice. (Interdisciplinary training and/or specialized graduate training are necessary for careers in many of those fields.)
- **The Law and Society** concentration is for students interested in the social relevance of law and social influences on law; this concentration is appropriate preparation for law school or graduate study in the social sciences.
- **The Policing** concentration is for students intending careers in law enforcement and other occupations related to security and public safety.
- **The Victimology** concentration is relevant for students interested in the scholarly study of crime victims, their treatment in the justice systems and programs that serve victims. It is useful for those interested in victim advocacy.

### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:

- Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

1. All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2. Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Description
The Society, Health and Medicine minor exposes students to the sociocultural, political and organizational dimensions of health and medicine while also promoting an understanding of the social determinants of health.

Students combine core courses from medical sociology with a series of electives of their choosing. Electives cut across many disciplines and content areas, allowing students to design a minor that aligns with their academic and career goals. The minor is well suited to students with an academic interest in health, medicine or health disparities, as well as those pursuing careers in the health professions.

Admission Requirements
Students must have a 2.000 overall GPA to declare the minor.

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes
Graduates of this program will be able to:
• Understand how health and wellness are shaped by factors such as race, gender and socioeconomic status
• Understand how medical care is organized in the United States and other countries
• Understand who receives health care and who does not
• Understand how medical providers are socialized into their roles
• Understand how patients navigate illness and treatment

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Arts degree in Sociology provides broad training in the theories and methods that sociologists use to understand contemporary social issues and problems. Students are encouraged to think critically as they examine issues ranging from small group behavior to global social movements. The core curriculum focuses on social inequalities, social psychology and health and illness. In addition, the program offers courses on a variety of topics that include urban living, deviant behavior, religion and family.

Sociology students are increasingly interested in courses that prepare them for meaningful careers that change the world (Seemiller and Grace 2016). One only needs to look at Black Lives Matter or the Sunrise Movement to see evidence of this generational disposition. Sociology, as a discipline, provides students with rigorous coursework on social inequality and social change, and helps students find careers in government, teaching, community organizing, non-governmental organizations and social work.

Sociology students may apply early to the M.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

The Sociology major comprises the following concentrations:

- The Family and Life Course Sociology concentration introduces students to the cultural, political and historical realities and changes in families across the lifespan. Courses examine issues such as gender socialization, dating and romance, cohabitation, marriage, divorce, parenthood, domestic violence, death and dying, family diversity and family policy. This concentration is relevant to students interested in careers in health care promotion, public health, family counseling, long-term care institutions, program planning, community education and policy analysis.
- The General concentration is for students who either choose not to pursue a specialization within the major or wish to pursue an individualized program of study (through sociology electives) that does not align with the substantive concentrations.
• The **Medical Sociology** concentration introduces students to the relationship between society and health. In this concentration, students study the impact of social, cultural, political and economic factors on health (and vice-versa). Courses in this area examine issues such as health behavior, physical and mental illnesses, doctor-patient interaction, medicalization, health care reform, health care delivery and health policy. This concentration is relevant for students interested in careers in administrative and program planning related to medicine, mental health, social services, patient advocacy, mental health facilities and nursing homes.

• The **Social Change and Social Justice** concentration trains students to recognize the conditions and contexts of social stasis and social upheaval; promote understanding of how and why social movements succeed or fail; and cultivate an interest in public sociology. Students in the concentration are encouraged to pair traditional course work with an internship or other experiential learning opportunity.

• The **Social Inequalities** concentration examines how social structural factors, such as age, gender, race, ethnicity, social class and sexuality relate to power, social status, wealth, income, health and morality. Courses in this area examine issues of poverty, race and ethnic inequality, sexism, age discrimination, neighborhood segregation, labor market processes and income disparity. This concentration is relevant for students interested in careers related to human or social services, nonprofit and community organizations, research and government agencies and human resources.

• The **Social Problems, Deviance and Crime** concentration examines a variety of social problems with special emphasis on types of behavior that are inconsistent with social norms, challenge to social order and are illegal. This concentration also examines the role of morality, public opinion, politics, government, law, and institutions of social control in the definition of, as well as the response to, social problems, deviance and crime. While containing some overlap with other concentrations in the Criminology and Justice Studies major, the sociological perspective here suggests important commonalities across the studies of crime, deviance and social problems, as well as the relevance of broad sociological themes, including critical inquiry, empirical research and increased awareness of social context. This concentration provides relevant preparation for students interested in further study in the areas of public safety, social policy, social services and civil service and graduate studies in law or social science. It can also be a convenient and constructive resource enabling a double major between Sociology and Criminology and Justice Studies.

• The **Sociological Social Psychology** concentration introduces students to the sociological approach to social psychology. Courses in this area examine theoretical perspectives that link structural factors such as gender, social class and race to individual factors and behaviors such as self-concept, identity, deviance and mental health. Courses typically include an overview of specific sociological topics such as socialization, emotions, social influence, group conflict and decision-making, prejudice and discrimination, status and power and interpersonal relationships. This concentration provides a foundation for students interested in careers or graduate work that focus on the many connections between individuals and the groups to which they belong.

### Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**Freshman Students on the Kent Campus:** The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

**Freshman Students on the Regional Campuses:** Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

**Transfer, Transitioning and Former Students:** For more information about admission criteria for transfer, transitioning and former students, please visit the admissions website.

3. Demonstrate how institutions of family, education, religion, medicine and the economy are interrelated
4. Understand the interrelationships between social structures and individuals in society

• To fulfill the diversity requirement, students must take one global diversity course that is not a sociology (SOC) course.

**Foreign Language College Requirement, B.A.**

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.
Roadmap
This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Description

The Sociology minor provides students with a broad understanding of the theoretical, methodological and substantive issues relevant to the field, as well as the tools necessary to apply this knowledge to other areas of study. Students explore the intersections between culture, social structure and individual behavior by examining issues related to social inequality, health and healthcare, deviance, families and family violence, urban communities, social psychology and more.

The skills developed in the Sociology minor allow students to connect their own life experiences to the experiences of other people, communities and cultures.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Foreign Language College Requirement

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.1

To complete the requirement, students have the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language 2
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - MCLS 10001 INTRODUCTION TO STRUCTURAL CONCEPTS FOR LANGUAGE STUDENTS
   - MCLS 20091 VARIABLE CONTENT SEMINAR IN GLOBAL LITERACY: CASE STUDIES
   - MCLS 21417 MULTICULTURALISM IN TODAY’S GERMANY (DIVG)
   - MCLS 28404 THE LATIN AMERICAN EXPERIENCE (DIVG)

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may begin beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through Credit by Exam (CBE), Advanced Placement (AP), International Baccalaureate (IB) or College Level Examination Program (CLEP); or (3) being designated a “native speaker” of a non-English language (consult with the College of Arts and Sciences Advising Office for additional information). When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

3 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Candidacy Requirement

In addition to satisfying the course work, the student must pass the materials science candidacy examination. The examination is divided into two parts, a written and an oral exam. The written exam is scheduled first followed by the oral exam. The exams will cover the core courses of the materials science program taken during the first year. A student who does not pass the candidacy exam the first time, may take it a second time. The student’s first attempt at candidacy will take place in August, during the week before the start of the fall semester of the student’s second year of study. The second attempt will take place in January, during the week before the start of the spring semester of the student’s second year of study. A request for exception will be considered for medical reasons or for other unpredictable circumstances. Requests must be submitted in writing with supporting documentation prior to the test date and must be approved by the candidacy exam committee and by the director of the materials science program. If the student fails the second attempt, they cannot continue towards the doctoral degree, but may complete the requirements for the Master’s of Science degree.

Description

The Pre-Dentistry Advising Program is a non-degree, pre-professional program that provides students with an opportunity to prepare for further dental school training after completing their undergraduate degree. Students take courses to prepare for the Dental Admissions Test (DAT) and coursework in dental school.

The College of Arts and Sciences offers advising non-degree programs for students who wish to pursue professional careers in a medical field, including medicine, osteopathy, dentistry, pharmacy and veterinary medicine. The curriculum in these pre-medical programs is designed to prepare students for advanced, professional study by providing a sound basis in biology and chemistry, physics and mathematics.

These advising programs meet the coursework requirements for admission to most medical schools, although admission requirements may differ per school. Students who wish to pursue a graduate medical program would be well advised to check carefully the admissions requirements of the professional schools they wish to enter. Students should also seek advice regularly from their faculty advisors.

Admission Requirements

Students must be admitted to a bachelor’s degree program in the College of Arts and Sciences to declare this non-degree advising program. Students who plan to pursue a bachelor’s degree in biology or chemistry (both of which have their own pre-dentistry concentration), should not declare this program.

Pre-Professional Information

- Students should consult with a faculty pre-medicine/pre-osteopathy advisor each semester for assistance in choosing classes, the appropriate sequencing of classes and to ensure entrance requirements for selected medical schools are being met.
- While individual medical or osteopathy schools may require a variety of additional courses, BSCI 30518 is recommended to strengthen a student's preparation for the MCAT.
- Students are encouraged, after consultation with a faculty pre-medicine and pre-osteopathy advisor, to select from the following Kent Core and general elective courses to help prepare for a career in medicine:

Description
The Pre-Pharmacy Advising Program is a non-degree, pre-professional program that provides students with an opportunity to prepare for further training in pharmacy schools or colleges. Students work closely with their pre-pharmacy faculty advisor to ensure they meet the admissions requirements for the pharmacy school or college of their choice.

The program’s curriculum aligns with admission criteria for the the Doctor of Pharmacy degree offered by the Northeast Ohio Medical University (NEOMED). As an alternate, students interested in applying to the NEOMED can satisfy all pre-pharmacy requirements by completing the B.S. degree in Chemistry with the Biochemistry concentration. In this degree program, students either complete four years of study at Kent State, or (with careful planning) complete three years of study at Kent State and satisfy the remaining requirements of their B.S. degree with coursework completed at NEOMED.

The College of Arts and Sciences offers advising non-degree programs for students who wish to pursue professional careers in a medical field, including medicine, osteopathy, dentistry, pharmacy and veterinary medicine. The curriculum in these pre-medical programs is designed to prepare students for advanced, professional study by providing a sound basis in biology and chemistry, physics and mathematics.

These advising programs meet the coursework requirements for admission to most medical schools, although admission requirements may differ per school. Students who wish to pursue a graduate medical program would be well advised to check carefully the admissions requirements of different pharmacy schools.

To better prepare for admission to pharmacy programs, additional coursework totaling 60-62 credit hours, which can be completed in two years. However, the coursework may vary based on the requirements of different pharmacy schools.

It is imperative that students meet with the pre-pharmacy faculty advisor immediately upon entering Kent State University. This allows students to most efficiently meet the requirements for admission to a number of pharmacy schools. These schools typically require coursework totaling 60-62 credit hours, which can be completed in two years. However, the coursework may vary based on the requirements of different pharmacy schools.

To better prepare for admission to pharmacy programs, additional courses are recommended:

1 Each doctoral candidate, upon admission to candidacy, must register for BMS 80199 for a total of 30 hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter BMS 80299, each semester, until all requirements for the degree have been met. As soon after completion of the candidacy examination as possible, the dissertation committee will be established, consisting of the guidance committee and an outside discipline member—a graduate faculty member from another department at Kent State University or another program committee of the School of Biomedical Sciences. The student will submit to this committee her/his prospectus for the dissertation. The format of the prospectus will parallel that utilized for NIH grant proposals (without biographical, budget and facilities information). The dissertation committee may elect to examine the candidate on the proposal, may accept it as submitted, or may reject it with specific reasons and recommendations for reformulation.

Description

The Ph.D. degree in Biomedical Sciences – Human Evolutionary Biology emphasizes a biological approach to research problems focusing on human and non-human anthropology. The program focuses on human anatomy and neuroanatomy, developmental biology, evolutionary genetics, mammalian physiology, paleontology, and experimental archaeology. Many graduates use their training and teaching experience to enter anthropology or corporate teaching positions. Most graduates are also prepared to teach both human anatomy and other cognate fields (neuroanatomy, cell biology, physiology, genetics) in demand at most medical schools.

Faculty in the program are drawn from the departments of Anthropology and the Biological Sciences at Kent State and the Department of Anatomy and Neurobiology at the Northeast Ohio Medical University.
(NEOMED). This inter-departmental and inter-institutional structure provides significant resources to the doctoral candidates, including the Hammon-Todd human and primate skeletal collection, state-of-the-art laboratories for neuroanatomy, anatomy, genetics, paleontology, biomechanics, and experimental archaeology. Additional resources are available to students through the Cleveland Museum of National History, the Cleveland Metroparks zoo, and other local, national, and international collaborative relationships.

Candidates for the Ph.D. are expected to engage, to the extent possible, in other activities that benefit their professional development. The teaching of laboratory and lecture course, as a appropriate is considered valuable and each student should have this experience during their graduate career, this includes those students on non-teaching scholarships or research appointments during their tenure. Students should also seek membership in professional organizations, attend meetings to present research results, and maintain currency in the relevant literature.

The Ph.D. degree in Human Evolutionary Biology program is offered in consortium with Northeast Ohio Medical University and University of Akron.

Description

The Master of Science degree in Biomedical Sciences—Physiology Interdisciplinary prepares graduates in areas that include cardiovascular, pulmonary, endocrine and neuroendocrine, reproductive or exercise physiology. In this context, emphasis is placed on an integrative approach for both research and graduate education. As with other program areas, the Biomedical Sciences—Physiology Interdisciplinary major takes advantage of the latest molecular and cellular techniques to address questions related to human diseases.

Faculty members are drawn from various departments at Kent State University, Northeast Ohio Medical University (NEOMED) and the Lerner Research Institute of the Cleveland Clinic. Although graduate work may be completed in any of the various research areas, faculty are listed in two general specializations: (1) environmental and comparative physiology and (2) cardiopulmonary and exercise physiology. Each specialization addresses different subject areas of physiology and each has an associated training faculty. The degree program is research oriented and designed to provide students with a thorough grounding in physiological principles and techniques within several well-defined focus areas.

The program’s flexibility encourages students to pursue specific interests, for example, early religion, high medieval culture, classical influences upon the Renaissance or Byzantine culture.

**Description**
The History and Philosophy of Science minor prepares students from a variety of related disciplines to think about science as a social, historical and philosophical enterprise. It will prepare students for graduate work in history of science, philosophy of science and science and technology studies, as well as for careers in areas of public and educational policy related to science.

Science is arguably the supreme intellectual enterprise of our species. It pervades nearly every aspect of modern society. Scientific research is heavily funded by governments and private institutions; courses in science are requirements at every level of education; scientific accomplishments are honored with awards and prizes; museums display scientific achievements and inventions. Moreover, the sheer depth and breadth of scientific progress through human history is monumental. All of this raises questions about what science is, how it works, and how it manages to be as successful as it is. These questions define the discipline known as the history and philosophy of science, which aims to study science, to understand its goals and methods, its principles and practices and its failures and triumphs.

**Admission Requirements**

Description
The Bachelor of Integrative Studies degree provides maximum freedom for students who wish to take a multidisciplinary, individualized approach to the design of an educational program while maintaining a focus on career and professional goals. The Integrative Studies major has a General concentration, and a Two Minors concentration. These concentrations may have the most appeal for students near the end of their academic careers (senior-level students) who are re-evaluating their academic and career choices. It is a program in which the student undertakes the responsibility for the research and design of their program, in consultation with an advisor.

The Integrative Studies-General concentration allows students to choose a minimum of 30 credit hours from interrelated programs that support their career aspirations.

The Integrative Studies-Two Minors concentration allows students to complete two university-recognized minors and/or certificates. A minimum of two academic departments in which to select courses are chosen and a rationale for the ways in which these courses support the student’s career goals is developed.
Admission Requirements

Students, who wish to declare either the General or the Two Minors concentrations of the Integrative Studies major within the Bachelor of Integrative Studies degree, must meet with a B.I.S. academic advisor in the College of Arts and Sciences to discuss their future academic and career goals and to develop an approved program of study. Ideally, students should begin the process for evaluation and program review at or near the time they have a minimum of 60 earned credit hours. To declare the Integrative Studies major within the Bachelor of Integrative Studies degree, the procedures listed below must be followed:

1. Visit or call the College Office, 105 Bowman Hall (Kent Campus), to arrange for an initial conference with a B.I.S. advisor (students on the regional campuses should contact their campus advising office for further information on this first step). This conference will include an evaluation of completed coursework and discussion of future academic and career goals. Working closely with an academic advisor, a program of study will be determined and reflected on the degree audit.

2. When the program of study is completed and approved by the College, the student and advisor complete a Change of Program form declaring either the Integrative Studies-General concentration or the Integrative Studies-Two Minors concentrations of the Integrative Studies major within the Bachelor of Integrative Studies degree. College approval of this form completes admission to the program.

Description
The Bachelor of Arts degree in International Relations empowers students to make a difference on a global scale. Whether students are interested in human rights, economic development, international law, peacebuilding, climate change, or some other global question, the program encourages them to understand international problems from a range of perspectives and see more clearly how they can make an impact on them.

The major is interdisciplinary, which enables students to explore issues from such perspectives as political science, economics, and geography, as well as history, literature, and pan-African studies. IR students also engage in advanced language study, enhancing their ability to communicate globally, and they are encouraged to study abroad if they are able. The program has permanent arrangements for study in Florence or Geneva, and more customized opportunities are also possible.

Because of their broad exposure to global issues and their language training, IR majors go on to rewarding careers in almost every imaginable sector, including international organizations, non-profit agencies, business, law, and government. To all of those areas, they bring a multifaceted understanding of the global system, and wherever they go, they make a difference.

1. Students must complete a foreign language offered at Kent State (Arabic, Chinese, French, German, Italian, Japanese, Russian, Spanish) at the Intermediate II level (or equivalent). This also will satisfy the college's foreign language requirement (see Foreign Language College Requirement below for additional information). In addition, students must either complete two upper-division courses in the same language or complete a second language at the Elementary II level (or equivalent). With approval of the political science undergraduate coordinator, students may apply courses in the same language or complete a second language offered at Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2. Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options 2:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. ¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options: ²

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

1. All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2. Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

### Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (¹) must be completed in the semester listed to ensure a timely graduation.

### Description

The Women’s Studies minor offers flexible and diverse coursework across a variety of disciplines. Distinct in its commitments—born of women’s struggles, movements, lives and work—the program invites students to revise perspectives, make fresh inquiries, broaden and deepen understandings by means of a simple but radical shift: the re-rendering of the female half of the human race not as “the second sex,” but as primary, fundamental, essential and real.

The minor emphases are inclusiveness, criticality, academic freedom and responsibility.

### Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Description

The World Literature and Cultures minor is dedicated to the interdisciplinary study of historical and contemporary literature, which is representative of a diversity of the world’s cultures. Students explore world literature and cultures with the aid of a variety of disciplinary methods of analysis and interpretation in the study of cultural texts and artifacts, as well as the interactions of the political, economic, cultural and social complexities with literature. The study of world literature and cultures is devoted to promoting a central trend among major research universities in the United States to engage in the critical integration of knowledge that cuts across the different disciplines, with sustained focus on the global study of cultures and literature, past and present.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. 1

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options 2:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.
Roadmap
This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Description
The Peace and Conflict Studies minor gives students a solid background in the theory and skills of managing conflicts in constructive, not destructive ways. Students learn how to apply skills that are not only useful in a variety of workplace settings, but in everyday life and relationships as well.

The minor especially is beneficial for students with a major or interest in business, communication studies, criminology and justice studies, nursing, public health, psychology, political science and sociology. However, because the skills taught are life skills, this minor matches up well with many majors.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Description
The Bachelor of Business Administration degree in Accounting is designed to provide students with a solid foundation in accounting theory and practice necessary for entry-level accounting positions and career advancement. It encompasses a common body of concepts, conventions, principles and theories essential to the professional competency of the certified public accountant, controller, industrial accountant, institutional accountant and governmental accountant.

Accounting students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.
In addition, students may apply toward a five-year program that leads to both the B.B.A. degree in Accounting and the Master of Science in Accounting degree. The two-degree, five-year program meets the requirements for admission of graduates to the Uniform CPA Examination. Requirements differ in different states, and students should check with the state board of accountancy for requirements.

Description

The Bachelor of Business Administration degree in Economics equips students with a variety of skills sought by employers, including conceptualizing and solving problems, locating, organizing and using relevant information; and analytical ability.

In their junior year, students learn microeconomic and macroeconomic theory and take an econometrics class to learn basic analytical skills. Students then take a series of electives that deal with vital current topics relevant to many careers in which these theories and skills are applied, such as U.S. financial and banking system; the economic relations between the United States and foreign countries; government spending and taxation policies; and the U.S. health system and policy options.

During their senior year, students take a capstone course that utilizes and applies the theory, skills and institutional knowledge learned in the program.

Economics students may apply early to either the M.B.A. degree or the Master of Arts in Economics degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information. Undergraduate students applying to the combined
program with the Master of Arts in Economics degree must have a minimum 3.200 overall Kent State GPA.

Description

The Economics minor is the study of how people make decisions in response to incentives. The minor examines a range of topics, including individual decisions regarding risk, firm strategies regarding their competitors and the role of the government in the financial system and broader economy. Students study specific areas of public policy concern such as health care, environmental problems, economic development and international trade. Problem-solving and analytical skills are emphasized throughout the program.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Economics minor, students must have a minimum 2.000 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Description
The Finance minor allows students to gain some familiarity with financial management, as well as with the financial system of institutions and markets in which firms must operate. Some knowledge of finance is necessary to understand and work in most businesses and organizations. Profits and value creation are the "bottom lines" to which companies direct their efforts. Some acquaintance with investment techniques may help students in managing their personal finances.

The Finance minor is particularly useful for business students in other majors who take the requisite courses, and for other students who desire to acquire some understanding of finance without having to take all the core business school requisites. Both groups are exposed to important fundamentals, yet they also will have the flexibility to consider several areas of finance.

Admission Requirements
Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the
A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Finance minor, students must have a minimum 2.500 overall Kent State University GPA (effective spring 2022, a minimum 2.000 overall GPA will be required). No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Progression Requirements
- Minimum 2.000 overall GPA
- Minimum C grade in FIN 26085 and FIN 36053.

Description
Admission to the Information Systems and Supply Chain Management concentrations have been temporarily suspended as of fall 2020.
The Master of Business Administration degree prepares students for responsible leadership positions in public, private and nonprofit organizations. Regardless of their undergraduate education, students will
find a challenging program designed to meet their specific backgrounds and needs.

The degree is structured for full-time/in-person and full-time or part-time online students:

- The full-time/in-person program is targeted to early career professionals, both nationally and internationally, who wish to jump-start their business career, and to those who wish to make a business-related career change. The program operates in cohorts so that students proceed through the sequence of required courses as a group. Students take six to seven courses a semester (offered in eight-week modules) and are expected to participate in experiential activities such as internships, mentoring and professional development activities. Delivery of the program is accelerated; students are able to earn the M.B.A. degree in 12 to 16 months.

- The online program is designed for those who want maximum flexibility in pursuing their MBA degree. Students can take courses to suit their life: from 1 course at a time to a full-time course load. This is an ideal program for professionals who intend to keep working full-time while pursuing the M.B.A., and for those students who want to pursue their MBA without commuting to campus.

The Business Administration major includes the following optional concentrations:

- The Accounting concentration allows students to specialize their degree with courses in managerial and financial accounting, business valuation using financial statements and international accounting. Completion of this concentration is not sufficient to sit for the CPA exam in Ohio unless the student has an undergraduate accounting major.

- The Business Analytics concentration allows students to gain the technical, analytical, communication, decision-making and leadership skills needed to glean useful information from data to make strategic business decisions.

- The Economics concentration allows students to specialize their degree with advanced topics in various areas in economics.

- The Finance concentration allows students to specialize their degree with advanced courses in investments, financial markets and institutions, real estate and other related areas.

- The Human Resource Management concentration allows students to specialize their degree with advanced topics in employee selection and appraisal, organizational analysis and the opportunity for real-world applications.

- The Information Systems concentration allows students to specialize their degree with advanced topics in database management systems, emerging hardware and software technology and other related area courses. Admission to this concentration is suspended.

- The International Business concentration allows students to specialize their degree with courses in accounting, marketing, finance and strategy with an international focus. Study abroad options are possible, with no language skills required.

- The Supply Chain Management concentration allows students to specialize their degree in vendor-customer relationships and logistic matters, with courses in global supply chain management, supply chain business models and vendor management strategies. Admission to this concentration is suspended.

All concentrations (other than those that are suspended) are available to students in the full-time/in-person program. The Business Analytics and International Business concentrations are available to students in the online program.

Students may pursue an online stackable certificate pathway to the M.B.A. by completing the Management and Leadership graduate certificate, the Financial Management graduate certificate and a set of remaining courses to earn the M.B.A. degree.

M.B.A. students have the opportunity to complete a dual degree with the Doctor of Podiatric Medicine degree. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

Several other dual degree programs with the M.B.A. are possible, including the following.

- Dual degree with the Master of Arts degree in Sport Administration is designed for managers of large libraries and information centers. Individuals in these positions need knowledge pertaining to planning, organizing, staffing, directing and controlling. Advanced education to obtain knowledge and learn skills related to these management functions enables students to take advantage of career opportunities both in library settings and other information settings, both in the profit and nonprofit sectors.

- Dual degree with the Master of Science in Nursing degree is designed for nurses whose career goals include assuming middle or executive management positions in health services agencies or in health-related companies, or who are interested in starting their own business. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities.

- Dual degree with the Master of Arts degree in Communication Studies is designed for students and professionals whose career goals focus on communication, particularly global communication, and provides direction and leadership in economic and business development processes.

- Dual degree with the Master of Arts degree in Sport Administration is designed to provide students with the knowledge, skills, and experiences to enable them to become successful professionals in the field of sports and recreation management. It integrates management theory and application in sports settings with a broad business curriculum to give you a competitive advantage.

### Description

The Bachelor of Business Administration degree in Business Analytics provides students with understanding of the diverse knowledge they need to be effective business data analysts. The focus of the major is to develop students who will understand and be able to apply business analytics to real-world problems.

While the major’s curriculum builds student expertise from theory, the focus is the practical application of the analytics knowledge. Therefore, the major primarily emphasizes problem-solving with data for strategic business decision-making using various analytics tools such as data visualization and machine-learning technologies. Examples of business analytics applications include marketing analysis or segmentation, city planning, delivery logistics, risk management, security and healthcare management.

Graduates from the program will be in demand for entry-level analytics positions in the workforce.

Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Bachelor of Business Administration degree in Computer Information Systems provides students with a focus on the creation and supervision of the information systems that are commonly used in organizations of all types and sizes. There is a primary emphasis on problem-solving involving cloud computing systems and infrastructure, creating intuitive systems, business modeling and agile design, data management and business intelligence, cloud systems integration and project management and business experience.

Examples of information systems include airline reservation systems, mobile apps, bank automated teller systems, trading systems for stock exchanges, social media platforms and accounting/auditing systems.

Students can select electives to complement their knowledge base and interests such as in application design and development and other computing infrastructure that focus on the creation and maintenance of application used in smart phones and similar technologies and prepares students for careers as development engineers and system analysts. Students learn to use and manage cloud-based platforms to support and manage business processes and operations in organizations. Some material taught in courses correlate with the knowledge needed to pass professional certification exams.

Students participate in an internship, which involves a summer or a semester of paid professional experience in industry. Internship experience helps show the relevance of on-campus courses to professional work, helps students focus their career plans and often enables students to secure better jobs upon graduation.

Computer Information Systems students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Description

The Computer Information Systems minor is self-contained and assumes essentially no prior experience with computers or information systems. It complements students’ primary career field by providing knowledge and hands-on experience in cloud computing systems and infrastructure, business modeling and agile design, data management and business intelligence and other computer technologies. Students are able to design and build computer information systems of modest size and to participate with professional analysts, on an effective partnership basis, in the construction of large cloud systems. Students also have the ability to aid their co-workers by performing computer system support in consultative and advisory roles.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.
To declare the Computer Information Systems minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

**Minimum Total Credit Hours:**

1. Students who complete BMRT 31006 as an associate degree student or at a Kent State regional campus may substitute it for HRM 34180.
2. A minimum C grade is required to fulfill the writing intensive requirement.
3. Students may fulfill major electives by selecting any remaining business courses listed above and/or approved upper-division courses from business or non-business disciplines. A course fulfilling the experiential learning requirement (ELR) is recommended if not already satisfied.
4. A student changing to the College of Business Administration or transferring may be waived out of BUS 10123 if:
   1. 30 or more credit hours have been earned and any two classes (from ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053) have successfully been completed.
   2. 60 or more credit hours have been earned and the student has successfully completed one course (from ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053)
   3. At the discretion of the college dean's office, the student has sufficient breadth and depth of knowledge in a business field (as demonstrated by a CLEP score or Credit by Exam) but does not meet the requirements listed above.
Students can take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002.

Students are required to take MATH 11012 or MATH 12002 if they change their major to, or want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics.

Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

Students who have taken MATH 10041 for another program may use it as a substitute for MGMT 24056.

Minimum C grade in ENG 21011 or HONR 20197.

ECON 12060, Personal Finance, is recommended as a General Elective. Maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses allowed. An education abroad course is encouraged as a general elective.

**Description**
The Human Resource Management minor focuses on the competitive advantage derived from the more effective use of human resource management policies, practices and procedures. The minor is relevant to a variety of students who want to learn to better manage a company's human resources in many positions after graduation, including line managers who need to implement human resource policies as they hire and manage the performance of their employees; entrepreneurs who need a fundamental knowledge of human resources management to run their companies more effectively; and members of not-for-profit organizations who need to understand the basics because they rarely are able to hire human resources staff.

The Human Resource Management minor covers a range of topic areas taught from both theoretical and applied perspectives. Students are
exposed to a wide array of human resource functional areas, including staffing, performance management, training, compensation, human resource information systems and employer-employee rights and responsibilities.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Human Resources minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

**Description**

The International Business minor introduces students to cultural issues of a broad, global nature. Students are encouraged to participate in study-abroad programs to complement their studies. Global business is fast becoming an important part of the U.S. economy. The world that college graduates are facing will essentially be a borderless world. This suggests a need to be trained for employment that will have international implications. Whether students take a major in business, fashion design and merchandising, the hard sciences, English or education, some training in global outreach, cultural diversity and "business cultures" will be necessary.

Leadership styles, organizational structure and behavior and a global perspective form the common ground between the military and business. The Military and Leadership Studies minor provides an overview of management, leadership and international business. A minor in Military and Leadership Studies allows students who have completed specialized ROTC or military service courses to receive credit for this training. Normally, these courses are applied as electives within a degree program. The minor provides proof on a student’s transcript that they have specialized in the area of Military and Leadership Studies.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Description

The Bachelor of Business Administration degree in Entrepreneurship provides students with the academic background and experiential opportunities needed to view business opportunities from an entrepreneurial perspective. The program helps students recognize market and business opportunities and learn when to seize them or take action, all while operating within the context of limited resources and creating value for the customer.

The program contains numerous opportunities to experience entrepreneurship firsthand. During their senior year, students earn course credit by launching and running a business of their own creation. A practicum can earn students credit while developing their own business or assisting entrepreneurs with their business. Students have many opportunities to meet experienced entrepreneurs who discuss their successes and failures in business. Courses in the major are hands-on, with experiential learning central to the course format.

Entrepreneurship students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

2 Students can take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002.

Students are required to take MATH 11012 or MATH 12002 if they change their major to, or want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics.

Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

3 Students who have taken MATH 10041 for another program may use it as a substitute for MGMT 24056.

Description
The Bachelor of Business Administration degree in Managerial Marketing prepares students to be marketing practitioners by helping them to fully develop the analytical, decision-making and communications (written and oral) skills used and valued by individuals working in this field. Faculty engage each student in active learning through hands-on assignments, case studies, projects with real businesses, and dynamic interactions with the faculty member and other students in the classroom. Each course aims to strengthen writing skills by emphasizing logical flow, persuasiveness and succinctness. Because coursework is sequential and integrated, each course builds upon prior classes to give students a comprehensive body of knowledge, skills and abilities.

The objective of this program is to educate students to function effectively in business environments where they will have to make autonomous decisions and be required to take action on their own initiative.

Managerial Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

¹ A minimum C grade must be earned to fulfill the writing-intensive requirement. Should students earn below a minimum C grade in MMTG 35011 they are required to repeat the course during the following fall semester to alleviate skill deficits, and they will not be eligible to progress in the major.

² A student changing to the College of Business Administration or transferring may be waived out of BUS 10123 if:

1. 30 or more credit hours have been earned and any two classes (from ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053) have successfully been completed.

2. 60 or more credit hours have been earned and the student has successfully completed one course from (ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053)

3. At the discretion of the Dean’s Office, the student has sufficient breadth and depth of knowledge in a business field (as demonstrated by a CLEP exam or Credit by Exam) but does not meet the requirements listed above.

³ Students can take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002.

4. Students are required to take MATH 11012 or MATH 12002 if they change their major to, or want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics.

5. Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

6. Students who have taken MATH 10041 for another program may use it as a substitute for MGMT 24056.

Minimum C grade in ENG 21011 or HONR 20197.

7. Students may take or use any course at any level as long as the minimum 39-credit hours requirement for upper-division courses is satisfied for graduation with a B.B.A. Although not required, an education abroad experience is recommended as a general elective.

Exceptions: Maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses may be counted toward the 120 total credit hours or 39-upper-division-credit-hour graduation requirement. General elective courses may be selected from any area and at any level provided students do not go over the PWS restriction and they satisfy the 39 credit hours upper-division requirements. Any other exceptions must be approved by the assistant dean.

Progression Requirements

• Minimum 2.500 cumulative GPA

• Minimum C grade in: COMM 15000, ENG 21011, MATH 11010, MGMT 25010 and MMTG 35011

• The curriculum is to be taken in sequence. Not all courses are offered each semester. Students should obtain from the department a copy of the schedule of course sequencing.

• Only three Managerial Marketing major (3/45000) courses may be repeated and counted toward the major. Exceptions require the approval of the department chair. All attempts count in the computation of the major, upper-division business and cumulative GPA.

• Entrepreneurship majors who are also majoring in Managerial Marketing, and who have taken ENTR 37045, are not required to take MMTG 35030 for the Managerial Marketing major. However, a double major in entrepreneurship and Managerial Marketing cannot waive ENTR 37045 by taking MMTG 35030.
• Managerial Marketing majors who are also majoring in Entrepreneurship and who have taken MMTG 35011 are not required to take ENTR 37040; however, an Entrepreneurship major cannot waive the required MMTG 35011 course by taking ENTR 37040 because MMTG 35011 is a writing-intensive course.

• Students who have passed MMTG 35030 will not receive graduation credit for MKTG 45046 or ENTR 37045.

• Students who have passed MMTG 45039 will not receive graduation credit for MKTG 45045.

• Students must complete at least 50 percent of business credit hours (required for the business degree) in-residence on a Kent State University campus.

• Students must complete two measures of outcomes assessment as specified by the College of Business Administration for complete satisfaction of the B.B.A.

Description
The Bachelor of Business Administration degree in Marketing provides a general approach that can be applied in a wide range of areas of business (e.g., for profit, nonprofit, service and manufacturing). The program addresses the breadth within the marketing field through courses (e.g., consumer behavior, marketing research, international marketing, personal selling, advertising and promotion management) that provide the student with an appreciation of all central topic areas in the field.

The program gives students a generalist's perspective and working knowledge of the theory and practice of marketing. Students learn the tasks involved in the analysis, planning, implementation and control of marketing programs that result in strategies and tactics used by businesses to sell products to consumers and other businesses. Typically, a traditional lecture format is used by instructors in this program.

Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Students may take either MKTG 45192 or MKTG 45292 to serve as a major elective but not both.

A student changing to the College of Business Administration or transferring may be waived out of BUS 10123 if:

1. 30 or more credit hours have been earned and any two classes (from ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053) have successfully been completed.
2. 60 or more credit hours have been earned and the student has successfully completed one course from (ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053)

Students can take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002.

Students are required to take MATH 11012 or MATH 12002 if they change their major to or, want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics.

Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

Students who have taken MATH 10041 for another program may use it as a substitute for MGMT 24056.

Minimum C grade in ENG 21011 or HONR 20197.

Students may take or use any course at any level as long as the minimum 39-credit-hours requirement for upper-division courses is satisfied for graduation with a B.B.A. Exceptions: Maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses may be counted toward the 120 total credit hours or 39-upper-division-credit-hour graduation requirement. General elective courses may be selected from any area and at any level provided students do not go over the PWS restriction and they satisfy the 39 credit hour upper-division requirements. Description

In today's highly competitive business environment, successful managers must have a strong focus on providing customer satisfaction as well as the ability to research consumer needs, wants and desires; understand...
what these mean in terms of company offerings; and communicate the benefits of their products or services effectively. The Marketing minor helps students develop the perspectives and skills necessary to understand consumers and to provide customer satisfaction. Students completing the minor should be equipped to bring a marketing orientation to both profit and not-for-profit organizations.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

- To declare the minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at
which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Professional Sales undergraduate certificate provides a broad spectrum of employment opportunities when combined with many different majors. It gives students the added edge in job hunting for sales related positions.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students on the Kent Campus: The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

Freshman Students on the Regional Campuses: Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Transfer, Transitioning and Former Students: For more information about admission criteria for transfer, transitioning and former students, please visit the admissions website.

College of Communication and Information

Description
The College of Communication and Information includes the Schools of Communication Studies, Emerging Media and Technology, Information, Media and Journalism, and Visual Communication Design.

The college is the only one in the nation that offers degree programs from five distinct but interrelated fields of study — media, design, communication, information and technology.

Students want to pursue their interests and engage with their talents — and the College is here to help them do just that. The evolution of digital and electronic media has blurred the distinctions among communication and information disciplines. With degree programs in the most relevant fields today and a range of interdisciplinary courses, students will be prepared for the new information and digital media landscape. Whether students are designers, public speakers or tech experts, the cross curricular majors and minors in CCI will help them develop the media, advocacy, web and design skills to succeed and grow — and still graduate on time.

Description
The Ph.D. degree in Communication and Information prepares individuals for traditional and emerging careers in teaching, research and administration in the converging fields of communication and information. The degree program consists of a prescribed core of interdisciplinary courses and varied selection of elective coursework within and across disciplines. The study is flexibly structured and designed to provide both an integrative and historical overview, as well as specializations in communication (media, technology and society; global communication; interpersonal communication) and information (human information behavior; cultural heritage informatics; knowledge organization).

- Minimum 3.300 graduate GPA on a 4.000 point scale (3.500 GPA or higher is recommended) for unconditional admission
- Official transcript(s)
- Goal Statement²
- Letters of recommendation from those in a position to evaluate graduate academic performance and potential
- Sample of superior scholarly writing (published paper, major term paper, thesis chapter, etc.).

Applicants normally are accepted for admission only for the fall semester and for full-time enrollment. Applicants who do not meet all of the requirements listed above but who have otherwise exceptional credentials may apply and may be admitted conditionally. To ensure full consideration for funding opportunities, all application materials must be received by January 2. 2 The goal statement must describe the applicant’s academic goals and intended topics of study that are compatible with the focus of the doctoral program including area of specialization based on the six specializations. It is expected that this statement will clearly indicate why the applicant wishes to pursue doctoral education. Included in the statement should be an indication of the theoretical area or areas the applicant wishes to study and the line of research the applicant wishes to pursue. Statements that make reference only to the applicant’s teaching or administrative goals are strongly discouraged.

Description

The key to the Bachelor of Arts degree in Communication Studies is flexibility. The curriculum allows students to design a program of coursework that’s right for them, serves their goals, and prepares them for the future. When employers are asked what they look for in new hires, communication skills top the list every time. Communication Studies prepares students with the knowledge, skills and abilities to succeed across industries — from government and business to nonprofits and education. Communication Studies mission is to teach students to think analytically, reason critically, communicate effectively, lead responsibly, and to understand how communication affects identities, communities and cultures.

The Communication Studies major comprises the following concentrations:

- Applied Communication: Gain expertise in organizational communication, advanced presentational speaking, professional writing and visual design. Combine theoretical knowledge and technical skills while mastering professional tasks such as conducting training seminars, creating web content, designing promotional materials, managing communication campaigns and writing press releases.
- Communication Studies—General: Features flexibility and choice. Students create a personalized plan of study tailored to their specific academic interests and career goals. This concentration is appropriate for those who have diverse academic interests.
- Communication Studies—Applied: Concentrates in professional communication as it is practiced in various environments. Students prepare their own plan of study in consultation with their adviser.
- Communication Studies—Media: Prepares students for careers in media production, writing, and content management. Students work with both print and electronic media.
- Communication Studies—Writing: Prepares students for careers in writing and editing. Students explore various types of writing, including business writing, technical writing, news writing, fiction, and creative nonfiction.

Students may apply early to the Master of Arts degree in Communication Studies and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program Policy in the University Catalog for more information.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college’s International Study Programs.

Description
Admission to the Bachelor of Arts degree in Digital Sciences has been temporarily suspended as of spring 2021.

The Bachelor of Arts degree in Digital Sciences is designed to provide students with the ability to adapt and succeed in a rapidly changing digital world. The program provides a broad overview of digital technologies, often from multiple points of view. For example, a student may study the content and visual layout of a web page with a journalism professor and later study the programming aspects of a web page with a business professor. A course with an architect adds more material on design, and a course with a computer scientist adds additional programming skills. This multidisciplinary skill set adds the flexibility needed for many of today's careers.

Building on this broad overview, the program adds further depth in technical topics, societal issues, and project management. Students gain additional technical competency by studying information management, database systems and digital security. Finally, students learn how to work on a team by studying requirements engineering, project management and team dynamics.

Programs in the College of Communication and Information are, by nature, innovative, interdisciplinary and collaborative, which is critical to both professional and scholarly disciplines. Students are educated to work at the intersections of communication, information and technology. Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students on the Kent Campus: The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the
admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

**Freshman Students on the Regional Campuses:** Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

*Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.
degree program draws on a number of disciplines, including emerging media, design, information sciences, human-computer interaction and communication. The technology curriculum is grounded in social science and the humanities, introducing students to theories of how technology shapes and changes people and societies. Students learn technical applications and skills in problem solving, design, user experience, creative applications and programming. Students synthesize technical and organizational skills in a series of experiential, hands-on and project-based courses in which they work collaboratively in interdisciplinary teams.

**Admission Requirements**

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**Freshman Students on the Kent Campus:** The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. Description

The Web Design and Development minor allows students to develop the fundamental skills needed to pursue jobs in web development, web design and related fields. Students learn technical applications and skills in problem solving, design, user experience, creative applications and coding. Students have the opportunity to use new and emerging technologies to design engaging multimedia experiences, improve existing systems, and study digital social structures. They will also gain experience working in diverse teams and communicating goals, needs, and processes to peers, clients, and consumers.

Web developers are software engineers who understand not only the full technological "stack" that powers modern websites, but who are also conversant in and able to make connections between the design, content and business aspects of web development. Web developers work with content providers, visual designers, and user experience designers. They are coders who use languages such as HTML, CSS, Python, Javascript, MySQL, PHP as well as frameworks used in web development such as Ruby or React. Web developers are also familiar with Content Management Systems, used to ensure that content and services can be delivered to end users. Please see the Web Programming minor offered by the Department of Computer Science in the College of Arts & Sciences for a distinct program with greater emphasis on back-end programming and database management.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate competency in the fundamental skills needed to pursue jobs in web development, web programming, web design and related fields.
2. Recognize the rapidly changing nature of web development technology and learn the skills needed to adapt.
3. Assess the societal and individual impact of new/emerging web and mobile technologies.
4. Employ teamwork as a means of solving technical problems related to web development.

## Description

The Master of Science degree in Knowledge Management prepares professionals to serve as leaders in all types of organizations who can assess and evaluate organizations on knowledge management principles, including culture, learning, communities and maturity. Graduates will be able to build strategy for effective knowledge management for organizations.

The skills and tools required to manage a knowledge organization build upon, but are different from, those required to manage an industrial-era organization. These new skills and tools are found in the emerging domain of knowledge management. Knowledge management organizations of all types, in all sectors of the economy, face a growing need for knowledge management professionals. In fact, knowledge organizations are created and sustained by knowledge management
professionals working side-by-side with corporate executives, business and subject matter experts. A knowledge organization works smarter at the organizational, the community and the individual level because knowledge management professionals envision and strategically manage the organization’s knowledge, design knowledge architectures and build technologies that enable the organization to work smarter and facilitate knowledge management on a daily basis.

Students in the program learn principles, values, assessment and best practices from their instructors and fellow students, many of whom are also professionals working in knowledge management. Through courses and internships, students are provided real-world, practical experience.

Description
The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual degree option with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Science degree in User Experience Design prepares students for careers that require them to apply a solid understanding of usability, content strategy, information architecture and user research.

The user experience designer engages in a variety of design activities that help produce usable interfaces and help organizations meet business goals. User experience design addresses the structural, informational, psychological and emotional aspects of what makes a successful user interface, whether it is Web, mobile, tablet or any other device.

At Kent State University, user experience design is thought of as a process where students learn, understand, imagine, evaluate and inform. The design team begins by gathering data/information about users, clients, the organizational culture, common tasks and work environments. After sufficient data/information is gathered, the team seeks to understand the context in which the project will be undertaken. This phase is the bridge between data collection and design. Design in the imagine phase involves brainstorming, iterative prototyping and critiquing. The design team needs to constantly evaluate their designs to see if they work in the real world. This may involve activities such as paper prototyping, high-fidelity interactive prototyping and usability testing. The results of design must be communicated to appropriate audiences. This informing process involves giving presentations to clients and stakeholders, report writing and other forms of communication.

Description
The Web-Enabled E-Learning Knowledge Management graduate certificate provides essential knowledge and skills to interested information professionals. Knowledge management is a business process that formalizes the management and use of an enterprise's intellectual assets. As the knowledge economy continues to take shape in the 21st century, the factors of production are shifting from physical financial capital to intellectual capital. In this environment, the success of organizations will depend on their ability to generate, adopt and diffuse knowledge. Knowledge management promotes a collaborative and integrative approach to the creation, capture, organization, access and use of information assets, including the tacit and knowledge of people.
