AEROSPACE ENGINEERING - PH.D.

Examples of Possible Careers*
Aerospace engineers
• 2.8% slower than the average
• 66,400 number of jobs
• $118,610 potential earnings

Architectural and engineering managers
• 2.6% slower than the average
• 198,100 number of jobs
• $149,530 potential earnings

Avionics technicians
• 4.4% about as fast as the average
• 22,800 number of jobs
• $67,840 potential earnings

Engineering teachers, postsecondary
• 8.6% much faster than the average
• 44,600 number of jobs
• $103,600 potential earnings

Contact Information
• Program Coordinator: D. Blake Stringer | Stephanie Fussell |
  caegraduatestudies@kent.edu | 330-672-2892
• Speak with an Admissions Counselor (gradadmissions@kent.edu)

Fully Offered
• Delivery:
  • In person
• Location:
  • Kent Campus

Description
The Ph.D. degree in Aerospace Engineering provides an advanced theoretical and/or research-oriented curriculum with significant depth in aerospace-specific disciplines, beyond the general fundamentals of the engineering bachelor’s degree.

Admission Requirements
• Bachelor’s degree in aerospace engineering or a closely related area from an accredited college or university
• Minimum 2.750 undergraduate or graduate GPA on a 4.000 point scale
• Official transcript(s)
• Goal Statement
• Three letters of recommendation
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 550 TOEFL PBT score (paper-based version)
  • Minimum 79 TOEFL IBT score (internet-based version)
  • Minimum 77 MELAB score
  • Minimum 6.5 IELTS score
  • Minimum 58 PTE score
  • Minimum 100 Duolingo test score

For more information about graduate admissions, visit the graduate admission website. For more information on international admission, visit the Office of Global Education website.

Program Learning Outcomes
Graduates of this program will be able to:
1. Conduct literature searches, comprehend advanced research materials and uncover connections between related work.
2. Perform research, discovery and integration by applying advanced knowledge of aerospace engineering.
3. Communicate clearly problems and solutions in aerospace engineering, both verbally and in writing.

Advisor-approved courses 0-30

Engineering-Focus Electives, choose from the following:
ENGR 72410 ENGINEERING OPTIMIZATION 18

Astronautics
ENGR 78001 ORBITAL MECHANICS
ENGR 78002 SPACECRAFT ATTITUDE DYNAMICS, DETERMINATION AND CONTROL
ENGR 78004 OPTIMAL CONTROL THEORY

Dynamics and Control
ENGR 78005 LINEAR SYSTEM ANALYSIS AND CONTROL
ENGR 78006 NONLINEAR SYSTEMS AND CONTROL
ENGR 78007 DIGITAL CONTROL SYSTEMS
### ENGR 78008
INTRODUCTION TO ROBUST CONTROL

### ENGR 78101
AUTONOMOUS UNMANNED AERIAL SYSTEMS

### Structure and Materials

**Minimum Total Credit Hours for Post-Baccalaureate Students:** 90

**Minimum Total Credit Hours for Post-Master’s Students:** 60

---

1. Post-baccalaureate students may apply toward the 30 credit hours a maximum 15 credit hours of coursework outside the College of Aeronautics and Engineering and 9 credit hours of research (maximum 18 credit hours total of research toward the degree).

2. Doctoral candidates, upon admission to candidacy, must register for ENGR 85199 for a total of 30 hours. It is expected that doctoral candidates will continuously register for ENGR 85199—and, thereafter, ENGR 85299—each semester until all requirements for the degree have been met. The doctoral candidate must successfully propose and defend their research dissertation in a public setting before the dissertation committee.
