ANTHROPOLOGY - M.A.

College of Arts and Sciences
Department of Anthropology
www.kent.edu/anthropology

About This Program
The Master of Arts degree in Anthropology provides opportunities for students to study in three fields: cultural anthropology, archaeology and biological anthropology. The research-oriented program encourages students to develop their own projects or participate in existing projects by their second semester. More than 80 percent of M.A. graduates continue for the Ph.D. degree or find employment in an area directly related to their training.

Contact Information
• Program Coordinator: Richard Meindl | rmeindl@kent.edu | 330-672-4363
• Connect with an Admissions Counselor: U.S. Student | International Student

Program Delivery
• Delivery: In person
• Location: Kent Campus

Examples of Possible Careers and Salaries*

Anthropologists and archeologists
• 5.2% faster than the average
• 8,000 number of jobs
• $66,130 potential earnings

Anthropology and archeology teachers, postsecondary
• 4.4% about as fast as the average
• 7,200 number of jobs
• $89,220 potential earnings

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

Admission Requirements
• Bachelor’s degree from an accredited college or university
• Minimum 3.000 undergraduate GPA on a 4.000 point scale
• Official transcript(s)
• GRE scores
• Goal statement
• Three letters of recommendation
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 525 TOEFL PBT score (paper-based version)
  • Minimum 71 TOEFL IBT score (Internet-based version)
  • Minimum 74 MELAB score
  • Minimum 6.0 IELTS score
  • Minimum 50 PTE score
  • Minimum 100 Duolingo English Test score

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

Application Deadlines
• Fall Semester
  • Priority deadline: February 1
  Applications submitted by this deadline will receive the strongest consideration for admission.

Minimum Total Credit Hours: 36

¹ Students are encouraged to select at least one course in either linguistics or statistics in consultation with their advisors. Students may be permitted to present a maximum 6 credit hours of coursework from outside of anthropology. The 6 credit hours, however, are expected to relate to the course of study being pursued (all cases will be considered on an individual basis, and outside courses must be selected in consultation with the advisor and the coordinator of graduate studies). Students wishing to take statistics or linguistics courses from outside of anthropology may be permitted to do so without those credit hours counting against their allotted 6 credit hours, in the event that the courses are not available within the department when they are needed.

² By the end of the first semester of graduate work, students should select two members of the graduate anthropology faculty, in addition to their principal advisor, to constitute a thesis committee. This committee must approve the thesis before it is submitted to the College of Arts and Sciences. Students should arrange for the appointment of this committee with the graduate coordinator for anthropology. A completed written thesis must be unanimously approved as a work of professional caliber as to content and form by a thesis committee of three graduate faculty. This thesis will be...
defended orally by the student. The defense is not to be considered a
mere formality. The committee may range beyond the actual content
of the thesis to questions about concepts, methods, theories upon
which the thesis is based and about the content of relevant studies
included in the bibliography of the thesis. In cases in which the
faculty believe that a student’s career would be better served by
additional coursework rather than a thesis, 6 credit hours of additional
coursework may be substituted for the thesis. The additional courses
should compose an intensive investigation within the student’s
specialty. Permission for using the non-thesis option must be arranged
through the graduate coordinator. In the very rare cases where a
student is granted permission to use the non-thesis option, special
written comprehensive examinations will be required.

Graduation Requirements

Formal final examinations are administered in ANTH 68230, ANTH 68430
and ANTH 68630. Students who do not pass these examinations (earning
"Unsatisfactory") may be dismissed from the program. Students who do
not earn a minimum B grade in these courses will be required to pass
an appropriate additional examination. Students who earn less than a
C grade in any of the courses cannot subsequently qualify for an M.A.
degree in Anthropology.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate a holistic view of human cultures. They are to
   appreciate that the global species is a social and cultural as well as a
   biological organism, with a past that is both historic and prehistoric.
   A student who wishes to emphasize socio-cultural anthropology
   will demonstrate a fundamental appreciation of diverse human and
   institutional behavior.

2. Appreciate and demonstrate how anthropologists investigate
   the past using the methods of the social sciences and the
   natural sciences, particularly geography and geology. They
   demonstrate comprehension of anthropology’s special role in
   making archaeology(particularly the study of prehistoric Ohio,
   woodland North America and Mesoamerica) come to life and become
   relevant for them. In addition, they gain a special appreciation of
   archaeology’s other mandate — the need to conserve the precious
   heritage of the archaeological record, not only Ohio’s but that of the
   Americas and the Old World as well.

3. Demonstrate an understanding of biological anthropology as
   the most relevant evolution science, the one which gives them
   an appreciation of their own place in nature. They see the two
dimensions of human evolution and adaptation: a global one (modern
   human variation) and a deep temporal one (human origins). Both
dimensions require an appreciation of the neo-Darwinian theory of
   evolution, which includes both the process of natural selection and
   also the roles which genetics and developmental biology play in
   adaptation and evolution. They appreciate the urgency of primate and
   rainforest conservation.
