COLLEGE OF ARTS AND SCIENCES

Mission of the College

It is the mission of the College of Arts and Sciences to deliver a first-rate education dedicated to the traditions and values of the liberal arts. These traditions include developing the skills of critical reasoning, writing, reading and deduction and providing a firm grounding in the theories and methodologies of the humanities, social and natural sciences and mathematics. These values include a commitment to rigorous questioning of principles and practices, intellectual integrity, community responsibility and diversity of perspectives in the pursuit of truth and social justice. Fundamental to a liberal education is the acquisition, preservation and transmission of new ideas and knowledge.

Study within the College of Arts and Sciences broadens and enriches students’ intellectual and cultural background. The college provides a core curriculum for all students whatever their major fields or career goals. With specialized and interdisciplinary programs at the undergraduate and graduate levels, the college strives to offer a wide variety of learning and research opportunities to its students, guided by nationally and internationally renowned faculty — faculty as passionate and intent on adding to human understanding as they are to passing this understanding on to future generations. The liberal arts provide both a rich variety of fields of academic specialization and a vital base for professional, creative and technological study.

Students pursuing degrees in the College of Arts and Sciences are introduced to a variety of disciplinary and intellectual perspectives through the college’s General Requirements. These requirements provide a solid foundation in essential communications skills and mathematics; a strong and varied background in the humanities, the social sciences and the natural sciences; and, for most students, study of a foreign language as a tool for approaching another culture. These requirements thus supply a broad acquaintance with the traditional liberal arts and a firm basis for more specialized study.

All students in the college select at least one area of academic specialization (major). This area of specialization may be within one of the traditional disciplines, it may be interdisciplinary or it may be self-designed. Students may also pursue a second major area or one or more minor areas of specialization.

In addition to general requirements and the specific requirements within the areas of specialization, students have elective credit hours that may be used to pursue secondary areas of specialization, to explore areas of general interest or to take additional coursework within the area of specialization or in related areas. Elective coursework in the liberal arts provides not only a sound basis for more specialized learning but also intellectual enrichment that is of lasting value to any student in the university.

Study in the liberal arts provides a basis for success in a wide variety of careers. In addition to preparing students for later professional study, it provides communication skills, analytical tools and mental flexibility necessary for success in adapting to changing careers in a changing world. Above all, study in the liberal arts prepares students for a lifetime of learning experiences and for personal and intellectual as well as professional growth.

College Policies
Foreign Language Requirements
In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies or the Department of Pan-African Studies. However, certain majors, fields of concentration and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, the students should seek the advice of the appropriate department before selecting a language.

The Department of Modern and Classical Language Studies offers courses of study beyond the minimum needed to meet the foreign language requirement in Arabic, Chinese, Dutch, French, German, Italian, Japanese and Russian; however, no major is available for them at this time.

Progress Toward Fulfillment
Arts and sciences students are required to begin meeting the foreign language requirement by the third semester of full-time enrollment (that is, no later than upon completing 30 credit hours) and are required to continue to enroll for foreign language courses until the requirement has been completed. Students who transfer to the College of Arts and Sciences from other universities or from other programs at Kent State University with sophomore status are required to begin meeting the foreign language requirement by their second semester of full-time enrollment in the college and must continue to enroll for foreign language courses until the requirement has been completed. Students who fail to meet these stipulations risk unnecessary delays in the completion of their degree programs. The stipulation that arts and sciences students begin meeting the foreign language requirement by their third semester of full-time study applies not only to students with declared majors but also to undeclared students. This includes those students seeking admission to selective programs in other colleges who do not achieve admission to the selective program at the time they achieve sophomore status.

Foreign Language College Requirement, B.A.
Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language.
2. Elementary I and II of a second language.
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.
- Minimum Elementary I and II of the same language

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Mandatory Outcomes Assessment
In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Three-Plus-One Programs
Students who choose to pursue Three-Plus-One programs take three years of preprofessional study at Kent State University, followed by a year or more of intensive professional training at an accredited professional school or clinical facility. Upon the satisfactory completion of this professional training, the B.S. degree from the College of Arts and Sciences at Kent State University is awarded. Students must
earn 97 credit hours in a university. Appropriate transfer credit from other institutions may be included in these 97 credit hours, but the students must complete at least 42 credit hours in-residence at Kent State University, including the last 32 credit hours of the 97 credit hours requirement.

Students must have a minimum 2.000 GPA in all work taken at Kent State University. They must also complete with at least a 2.000 average all off-campus work taken to fulfill fourth-year requirements. In some fields, students may also be required to present other evidence of the satisfactory completion of the off-campus professional training.

Students must satisfy all degree requirements, including the B.S. General Requirements and field of concentration requirements, by a combination of credits earned at Kent State University and the professional school. The only exception is that the college's foreign language requirement is waived for students who successfully complete a Three-Plus-One program.

Three-Plus-One programs are designed for students with a well-defined, specific, professional career goal. Currently, the College of Arts and Sciences offers a Three-Plus-One program in Medical Laboratory Science. Because of the intensive, professional focus of these programs, students pursuing them should work closely with their faculty advisors. Students who are interested in this program should consult the Department of Biological Sciences, 256 Cunningham Hall, for further information.

Please see the program requirements for the Medical Laboratory Science program offered under the College of Arts and Sciences.

ANTH 38789  FACES: HUMAN HEAD ANATOMY WITH A FORENSIC ART
FOCUS (DIVG) (ELR)  3 Credit Hours
Summer Florence Institute course: Renaissance artists became
anatomists in order to create more life-like portrayals of the human figure,
and Italy was in the forefront of these developments. Our course begins
with studying works by these artist/anatomists: Antonio Pollaiuolo,
Leonardo da Vinci, Michelangelo, and others, through visits to the
Galleria dell’Accademia and Museum of the Bargello and lectures. We
will examine drawings, paintings and sculptures of faces by these artists,
and gain an appreciation for how well they understood human anatomy.
We will also visit La Specola Anatomical Collection (exquisite wax
models copied from real corpses during the 17th century) since we are
studying anatomy. In the classroom, students will study human skulls,
and learn the form and function of the muscles of facial expression and
mastication. We will pay close attention to features of the skull that
ultimately give each face its unique qualities, and study the areas that
indicate age and sex of the individual. Each student will sculpt the facial
bones of a skull, using an exact replica cast as a model. In the last part
of the course students learn the techniques of two-dimensional forensic
facial reconstruction. Using knowledge of head anatomy, and tissue
depth data from the literature, each student will prepare detailed sketches
(one man, one woman) based on a photograph of his and her skull. We
will also learn about changes to the face over the life span, and make
sketches of older people based on photographs of them when young.

Different materials have distinct electromagnetic signatures depending on their composition, structure and the nature of the energy with which the material is interacting. This course focuses primarily on multispectral and hyperspectral visible remote sensing, but the field of remote sensing makes use of information throughout the electromagnetic spectrum to sense the environment around us. ESCI 72060  EARTH OBSERVING  3 Credit Hours
(Slashed with ESCI 42060 and ESCI 52060) Students are introduced to visible, thermal and LiDAR remote sensing methods. Visible and near infrared multispectral and hyperspectral data sets are used for a wide variety of research including land use change, water quality research and agricultural remote and proximal sensing. Thermal remote sensing can be used to characterize surface temperature changes, earth materials and thermal stresses on plants. LiDAR provides the ability to measure variations in surface topography and can “see” through clouds and jungle canopy and even penetrate aquatic environments to measure algal biomass and suspended sediment. Remote sensing is the use of instrumentation to obtain spectral and spatial information about an object or surface without direct contact. All matter interacts with electromagnetic energy through thermal emittance, absorption, transmittance, reflectance and/or scattering. Different materials have distinct electromagnetic signatures depending on their composition, structure and the nature of the energy with which the material is interacting. This course focuses primarily on multispectral and hyperspectral visible remote sensing, but the field of remote sensing makes use of information throughout the electromagnetic spectrum to sense the environment around us. Note that most of the data sets that are examined and analyzed in this course are multispectral Landsat images. Students are encouraged to explore various topics or geographic regions for their class project. It is recommended that students take an introductory GIS class prior to enrollment.

and experienced many struggles. The attempts to integrate have led
to significant debates about just what it means to be “European.” This
course covers Europe using a systematic approach. Students study the
physical, political, religious, linguistic, social and economic environments
within Europe. In addition, students explore the issues that tie Europeans
to each other and to the outside world. Students sum up many of these
aspects with case studies of nations or regions that typify the issues that
face Europe today.

HIST 37001  FLORENCE THE MYTH OF A CITY  3 Credit Hours
Florence is considered the birthplace of the Renaissance and the cradle
of modern Western Civilization because, among the many Italian city-

freedom, rational thought, individualism, the scientific method and
the capacity for critical reflection. This course covers and analyzes
different historical eras of Florence from its founding, during the Roman
era, up until today. Special attention is given to periods of intensive
development in Florence: the rebirth of the Middle Ages, the splendor of
the Renaissance, and the crucial role of the Risorgimento, when the city

HIST 62326 BETWEEN PLOWS AND SWORDS: U.S.-CHINA CULTURAL RELATIONS SINCE THE LATE 1700S 3 Credit Hours
(Slashed with HIST 82326) This seminar explores the beginning, evolution, transformation, and impact of U.S.-China cultural relations since the late 1700s. The United States and China have built a complex and dynamic relationship in the past two and a half centuries. Among the dimensions of that relationship, cultural relations were the oldest, deepest, and most consequential. While non-governmental organizations and individual Americans as well as Chinese played a crucial role in initiating and expanding cultural contacts between the two nations, government intervention and control were intensified over time, turning cultural relations into an instrument to achieve domestic as well as foreign policies goals. How did cultural contacts between the two nations begin? Who were the major players in the making of the Sino-American cultural relations? What were their major goals? How did the U.S. and the Chinese governments get involved in bilateral cultural contact and exchange? What impact did the expansion of cultural ties have on both societies? How were the U.S.-China cultural relations changed during the Cold War? What impact did the Cold War transformation have on cultural relations during and after rapprochement? By addressing these key questions, this course gives students a deeper understanding of the complexity and dynamics of U.S.-China relations.

HIST 62360 MARGINALITY AND POWER: HISTORY FROM BELOW 3 Credit Hours
(Slashed with HIST 82360) Who makes history? Every historian must grapple with this question and every generation of modern historians has answered this question in a different way. One response to this question is to write “history from below” and focus on the ways in which common people and historically marginalized groups have contributed to historical changes and developments in their societies and cultures. Throughout this course, we review some of the classic scholarship and new works that engage in the task of writing “history from below.” Our goal is to understand how “history from below” has developed over the last few decades and to engage with the important questions about representation and agency that this approach to history raises. A variety of assignments serve to further our exploration of the topic and help us gain some practice not just in analyzing “histories from below,” but also doing “history from below.”

HIST 62415  RELIGION AND VIOLENCE IN THE MODERN WEST  3 Credit Hours
(Slashed with HIST 82415) This class explores the role of religion in conflict throughout the modern Atlantic World. It is commonly believed that Western societies underwent a process of secularization in the modern age. However, recent scholarship has proven that religious beliefs and behaviors have retained their power, popularity and causal agency. This course is designed to give graduate students an introduction to recent trends in the writing of the history of religion and violence. Religion will be taken as social, cultural and political history, rather than merely ecclesiastical or theological history. Violence will be taken as rhetorics and cultures of violence, as well as warfare and other acts of physical violence. We will start the class by discussion theories of religion, including "civil religion" as an alleged replacement faith in an era of secularity; sample current debates on the question of the religious causes of violence; then survey prominent monographs and articles that address this nexus historically.

HIST 62485  THE CIVIL WAR AS EXPERIENCED AND REMEMBERED  3 Credit Hours
(Slashed with HIST 82485) This course looks at the U.S. Civil War from the point of view of the men (and occasionally women) who marched, camped, fought, suffered and died during the four years of conflict and the decades after. After giving brief attention to the causes and political issues that led to war, the course focus is on the experiences and reactions of the people called upon to fight it. Rather than concentrate on the famous leaders and generals, students look at the officers and men, civilians and enslaved people and other common folks on both sides who were thrust into the conflict. Some attention is paid to the guerrilla war, the draft, the POW experience and the participation of African Americans and Native Americans. The second part of the course looks at memory, commemoration and the effects of the war on many of these groups in the decades leading into the 20th century.

HIST 62500  REGIONAL IDENTITY AND OHIO HISTORY  3 Credit Hours
(Slashed with HIST 82500) As central as Ohio is in our national history, it is often underrepresented in standard historical narratives. This course explores the unfolding of more than two centuries of US history through the lens of the experience and understandings of residents of the State of Ohio. This changed perspective revisits many familiar themes -- indigenous histories, immigration, labor conflict, the Great Depression -- but moving our attention from the coast to the interior often places them in a revealing new light.

(Slashed with HIST 82505) This course explores the national and global history of social movements in the nineteenth and twentieth centuries through the lens of the great lakes region. While many social movements have focussed on the coasts, in fact the "Rust Belt" played a disproportionate role in fostering and populating radical movements from abolitionism to temperance to labor unionism as well as repressive movements like the Ku Klux Klan. Alternating between classic historical monographs and regional studies, the class interrogates the meaning of the region's sympathy to radical movements and also suggests a reconception of these movements through a new geographic focus.

HIST 82360  MARGINALITY AND POWER: HISTORY FROM BELOW  3 Credit Hours
(Slashed with HIST 62360) Who makes history? Every historian must grapple with this question and every generation of modern historians has answered this question in a different way. One response to this question is to write "history from below" and focus on the ways in which common people and historically marginalized groups have contributed to historical changes and developments in their societies and cultures. Throughout this course, we review some of the classic scholarship and new works that engage in the task of writing "history from below." Our goal is to understand how "history from below" has developed over the last few decades and to engage with the important questions about representation and agency that this approach to history raises. A variety of assignments serve to further our exploration of the topic and help us gain some practice not just in analyzing "histories from below," but also doing "history from below."

HIST 82400  THE LENS OF WAR: AMERICAN HISTORY THROUGH THE STUDY OF THE MILITARY  3 Credit Hours
(Slashed with HIST 62400) A survey of the impact conflict and the peacetime military have had on both the history and historiography of colonial America and the United States. Thematic points of emphasis include, but are not limited to civil-military relations, race, national identity, memory, gender, western expansion, American economic development, the growth of the federal government, Cold War culture, and citizenship.

HIST 82405  NATIVE WESTS  3 Credit Hours
(Slashed with HIST 62405) This course introduces students to the major analytical frameworks historians use to understand the diverse and complicated encounters between Euro-Americans and Native Americans in what is now the United States from first contact in the sixteenth century through the forced integration of Native nations into the United States after the Civil War. These encounters will be rooted in what was called the history of the "frontier," but is now more commonly described as "western" history or the study of "borderlands." Readings will emphasize sociocultural diversity among Indian societies, Indian agency, and Euro-American policy frameworks for Indian relations.

HIST 82415  RELIGION AND VIOLENCE IN THE MODERN WEST  3 Credit Hours
(Slashed with HIST 62415) This class explores the role of religion in conflict throughout the modern Atlantic World. It is commonly believed that Western societies underwent a process of secularization in the modern age. However, recent scholarship has proven that religious beliefs and behaviors have retained their power, popularity and causal agency. This course is designed to give graduate students an introduction to recent trends in the writing of the history of religion and violence. Religion will be taken as social, cultural and political history, rather than merely ecclesiastical or theological history. Violence will be taken as rhetorics and cultures of violence, as well as warfare and other acts of physical violence. We will start the class by discussion theories of religion, including "civil religion" as an alleged replacement faith in an era of secularity; sample current debates on the question of the religious causes of violence; then survey prominent monographs and articles that address this nexus historically.

HIST 82420  POLICE AND POLICED IN THE U.S. 19TH AND 20TH CENTURIES  3 Credit Hours
(Slashed with HIST 62420) This course traces (backwards, beginning with the most recent material) the historical processes through which policing took on its special character in this country beginning with slave patrols and the emergence of professional policing just before the Civil War. To trace how police transformed their work through 2001, this course explores public opinion; popular culture; technological and bureaucratic changes; relationships between state and non-state violence; and police working conditions, training and self-understandings.

HIST 82485  THE CIVIL WAR AS EXPERIENCED AND REMEMBERED  3 Credit Hours
(Slashed with HIST 62485) This course looks at the U.S. Civil War from the point of view of the men (and occasionally women) who marched, camped, fought, suffered and died during the four years of conflict and the decades after. After giving brief attention to the causes and political issues that led to war, the course focus is on the experiences and reactions of the people called upon to fight it. Rather than concentrate on the famous leaders and generals, students look at the officers and men, civilians and enslaved people and other common folks on both sides who were thrust into the conflict. Some attention is paid to the guerrilla war, the draft, the POW experience and the participation of African Americans and Native Americans. The second part of the course looks at memory, commemoration and the effects of the war on many of these groups in the decades leading into the 20th century.

HIST 82500  REGIONAL IDENTITY AND OHIO HISTORY  3 Credit Hours
(Slashed with HIST 62500) As central as Ohio is in our national history, it is often underrepresented in standard historical narratives. This course explores the unfolding of more than two centuries of US history through the lens of the experience and understandings of residents of the State of Ohio. This changed perspective revisits many familiar themes -- indigenous histories, immigration, labor conflict, the Great Depression -- but moving our attention from the coast to the interior often places them in a revealing new light.

HIST 82505  SOCIAL MOVEMENTS IN THE 19TH-20TH CENTURY RUST BELT  3 Credit Hours
(Slashed with HIST 62505) This course explores the national and global history of social movements in the nineteenth and twentieth centuries through the lens of the great lakes region. While many social movements have focussed on the coasts, in fact the "Rust Belt" played a disproportionate role in fostering and populating radical movements from abolitionism to temperance to labor unionism as well as repressive movements like the Ku Klux Klan. Alternating between classic historical monographs and regional studies, the class interrogates the meaning of the region's sympathy to radical movements and also suggests a reconception of these movements through a new geographic focus.

ITAL 35340  BOCCACCIO’S DECAMERON IN TRANSLATION  3 Credit Hours
The Decameron, one of the most entertaining, beloved and imitated prose works ever written, is an accurate reflection of fourteenth-century life in Italy. Like Dante’s Divine Comedy, this human comedy was written not only to delight, but also to instruct by exploring both our spiritual and our natural environment. Giovanni Boccaccio (1313-1375), considered by some typically medieval and by others one of the first truly modern literary figures to emerge from the darkness of the Middle Ages into the light of the Renaissance, shows himself, as author of The Decameron, to be both a passionate believer and a passionate critic as he reconstructs society, destroyed by the Black Plague, through the perfection of his 100-fold narrative. Boccaccio’s Decameron, of course, generated a flourishing early modern tradition of proto-novelistic short-story collections (think of Marguerite de Navarre and Cervantes), but also provided substantial material for the nascent dramatic tradition (from Machiavelli’s Mandragola to Shakespeare’s All’s Well). His biographical collection, Of Famous Women, was an indispensable source and model for the wide-spread debates on the status of women. His Genealogy of the Gentile Gods was a staple of the Renaissance mythographical tradition. This course is taught in English.

Some of the central topics of the course will include Dante’s relationship to Florence, his use of classical, Christian and mythological personages, symbols and references; his views on the papacy and the empire, his relationship to the people he encounters and the unique aspects of his vision of the afterlife. In addition, we will focus on a variety of thematic concerns including Dante’s understanding of poetry, grace, love and divine justice. Though primarily taught through a combination of lecture and discussion, the course will also focus on the use of art, film, music, performance, digital media and other interdisciplinary methods that have been used to interpret and further our understanding the Divine Comedy and its lasting fascination and influence. Philosophy (PHIL)

PHIL 11009  CRITICAL THINKING (KADL)  3 Credit Hours
Critical thinking is essential to every aspect of life, whether reading a news report or editorial, examining a contract or other legal document, or entering into a debate. This course teaches the strategies of "cognitive self-defense" that allow students to see past false claims and avoid being deceived by misleading rhetorical strategies. The course also examines the role of argument in reasoning, including types of arguments and the ways in which mistakes in reasoning can lead us astray. Examples from everyday life illustrate the sorts of complex reasoning that are a crucial part of practical decision-making.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Kent Core Additional, TAG Arts and Humanities
PHIL 20095  SPECIAL TOPICS  3 Credit Hours

PHIL 21001  INTRODUCTION TO ETHICS (DIVG) (KHUM)  3 Credit Hours
What makes an action morally right or morally wrong, and who gets to decide? Is ethics about performing actions that are morally right, or is it about being a virtuous person? This course examines at least three competing theories about ethics, including challenges to each theory. Students get to decide which theory they think is best, but every theory presents its own strengths and weaknesses.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Diversity Global, Kent Core Humanities, TAG Arts and Humanities, Transfer Module Humanities

PHIL 21002  INTRODUCTION TO FORMAL LOGIC (KMCR)  3 Credit Hours
This course is designed to sharpen students' reasoning skills and to help them better understand the structure of reasoning in general. To do this, it introduces students to some formal languages, such as Propositional Logic and Predicate Logic, that represent the logical structure of deductive reasoning. Unlike natural languages such as English, these formal languages allow students to focus on the general structure of different types of arguments, without discussing the content of any particular argument. Course covers both the construction of formal proofs in these languages, and translation between them and English. The study of formal logic contributes to effective and persuasive reasoning, not only in philosophy, but in any discipline or context. It also provides effective tools for evaluating the strength of English-language arguments. The skills that students acquire in this course are thus widely applicable in their personal, professional and academic lives.

PHIL 31013  LATE MODERN PHILOSOPHY  3 Credit Hours
The course explores the development of 19th century German idealism by thinkers such as Fichte, Hegel and Schelling, whose work was prompted by Kant's transcendental idealism understood as critique or as the examination of the conditions for the possibility of knowledge acquisition as a touchstone for understanding the relationship among metaphysics, epistemology, ethics and political philosophy. The course thus begins with Kant's critical project before turning to its reception and the various 19th century responses to it. Additional selections from Kant's ethical and political writings may supplement this reading. The course may also cover additional figures, such as Schopenhauer, Nietzsche and Marx, whose work, in turn, is a response to German idealism itself.

PHIL 41034  PHILOSOPHY OF PSYCHOLOGY AND PSYCHIATRY  3 Credit Hours  
(Slashed with PHIL 51034) This course addresses the question, “What
are mental disorders?” using the methods of philosophy. We consider
metaphysical questions such as, “Are mental disorders natural kinds
or social kinds?” and “Can we provide a reductionist account of mental
disorder?”, questions from Philosophy of Mind such as, “Can a theory of
mind-brain dualism accommodate the possibility of mental disorder?”
and ethical questions such as, “How can we hold people with personality
disorders responsible for their actions without blaming them?” By
addressing the nature of mental disorder from a variety of philosophical
angles, we will examine not only how each subfield answers the question

other philosophical approaches.

POL 60507 CONFLICT TRANSFORMATION AND RECONCILIATION 3 Credit Hours
(Cross-listed with PACS 60070)(Slashed with POL 70507) Over the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict towards various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda’s Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

(Slashed with PACS 60070 and POL 60507) Over the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict towards various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda’s Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

Gender and Sexuality Studies (GSS)

GSS 10100 INTRODUCTION TO GENDER AND SEXUALITY STUDIES  3 Credit Hours
This course explores gender and sexuality studies from a multidisciplinary perspective. This course examines the cultural, social and biological constructs of sex and gender and interrogates the structures — governmental, familial, religious and social — that have informed historical and current thinking about sex and gender. This course includes global histories and definitions of gender and sexuality across time and place, and asks students to ponder: why is gender a primary organizing societal principle, and how do race, class, sexuality and disability status intersect with it?
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

GSS 30500 METHODS AND PRACTICE IN GENDER AND SEXUALITY STUDIES  3 Credit Hours
This course provides an arena for individual and group inquiry as well as conversations on methodologies and practices in gender studies pedagogy and research with emphases on multi-inter- and transdisciplinary approaches. The topics reflect the crucial linkage between knowledge as we do knowledge, ethics as we embrace ethics, practices and traditions as they play and accrue within the real academic endeavors of the fields which converge and diverge in gender studies and its closely kindred variants. This course offers different methodological entrance points of use and value. At once, we study their deployment in actual practice. Moving beyond research practice, the course considers, too, the multifaceted praxes of scholars, teachers and cohorts of all kinds involved in the actional vision, mission, strategies, tactical planning and programmings, record-keeping, self-appraisals and archives at the heart of gender and sexuality studies.
Prerequisite: GSS 10100.

INTS 30101 HUMAN SECURITY 3 Credit Hours
For a century or more, leaders around the globe have defined "national security" narrowly, focusing nearly entirely on perceived threats of physical violence against the systems they led. A less state-centric and more person-centric conceptualization of security recognizes that the threats to human security include not only violence against a state or economic system. Food insecurity, for instance, whether caused by famine, poverty, maldistribution of resources or structural disparities in access (for instance, so called "food deserts") undermines the security not only of individuals, but communities and, thereby, leadership. Climate change has caused land erosion and, thereby, resource evolution and depletion in various parts of the globe, leaving whole communities (and thereby states) economically and physically vulnerable. This course explores multiple dimensions of human insecurity, examines related policies and stretches analytic muscles in considering potential solutions to causes of insecurity.

Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

INTS 30501 ORDER AND RESISTANCE 3 Credit Hours
When the hierarchies of economic systems or state institutions are unresponsive to the needs of society, movements develop to resist the prevailing ruling order. Sometimes social movements seek to empower and include new members of society. Other times they mobilize on constructed grievances that seek to maintain untenable social exclusions. Whether demanding more equality or something else, these ordinary people in social movements enter a conversation with the people who govern them and have the full weight of the state apparatus behind them. This course reflects on this process of social struggle in order to understand the political, economic and social costs of supporting the continued exclusion of certain groups. It aims to understand political change and violence as a struggle played out between state authorities and social movements. After examining case studies of such state-society struggles from around the world, students are guided to consider what role they can each play to constructively contribute to the global society.

Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture

This course counterbalances student inquiry with lectures and materials at once grounded in women's and gender/sexuality studies and reliant on a range of interdisciplinary sources. The course centers two key touchstones: witch and monstrous feminine. Course trajectories traverse history, culture, religion, politics and academic and popular renderings to locate keys: hunts, trials, dynamics of allegation, guilt and innocence. The course aims to 'correct' traditions of objectification and typecasting by interrogating real subjectivities and the dimensionality of femininity, monstrous and witch.

**FEMINIST HUMOR: DISARMING LAUGHTER, DISRUPTIVE DISCOURSE**  
**3 Credit Hours**

This course utilizes four key terms to set its directions of inquiry: humor, laughter, discourse and feminist. The most fundamental pursuits are inductive in nature, grounding studies in actual discursive practice, the realities of women's politically-charged and personally-resonant humor, laughter and feminisms as they converge in contexts both private and public, mediated and live/face-to-face. Scholarship on feminist humor provides our final framing.

**REPRESENTATIONS OF WOMEN AND FEMINISM IN POPULAR CULTURE**  
**3 Credit Hours**

The basic challenge of this course is that it requires the study of two things simultaneously: 'women' and 'women as represented' in popular culture. From the classic object of woman sexed and gendered, feminist study has evolved to also consider woman the subject, the autonomous person with agency within her environment. The course covers much ground: dominant narratives; the often-overlapping contexts of media, politics, morality and religion; the signs inherent in language and imagery; and the power asymmetry and embattled definitions of "woman." Throughout the course, we employ varied approaches that resist any one right answer, easy dogmatic conclusion or evaluation of the narratives.

**WMST 32323**  
**RAPE CULTURE: RETHINKING DANGER, POWER, SEX AND FEMINIST FRAMINGS**  
**3 Credit Hours**

Nothing is simple, incontrovertible or 'coof' in 'rape culture.' The subject, act and discourse surrounding rape is embedded in culture and confounded by culture: by opinions, standpoints, simplistic arguments and personal and political interests. Feminist framings of 'rape culture' invite different inquiry: into mythology, ideology, theory and alternative interpretations of bodies in a given context. Famed feminist Andrea Dworkin interrogates rape culture's center: powers practically guaranteed, moreover "exercised... [and] protected... by religion ... by universities ... [even] by [poets and artists], the unacknowledged legislators of the world." This course utilizes multiple approaches to study and interrogate 'rape culture,' each of which illuminates this inherently dark subject in new light.

WMST 44321  PIVOTAL PRAXIS: EXPERIMENTS IN ACTIONABLE FEMINISM  3 Credit Hours
This course engages students at the pumping heart of the whole feminist story: its actual work. Under scrutiny are scenes: socio-political, cultural spaces wherein women enact change, determine outcomes recognized as feminist. These include but are not limited to the realpolitik of suffrage vs. anti-suffrage, consciousness-raising, the famed national women's convention in Houston, internet activism, transversal coalition-building across boundaries/borders. The course provides opportunity for students' own experiments and exercises in feminist praxis.

Conflict and negotiation are normal and unavoidable parts of life. This course goes beyond basic negotiation concepts like principled negotiation, focusing on topics including the psychology of negotiation, power, international relations, technology and other advanced topics. We cover issues of information asymmetry; power; ethics; and multi-party, iterative and collaborative negotiations. We use research in negotiation and research on prior case studies to illustrate topics. This course is highly interactive, focusing on experiential learning and education. Evaluation of performance includes experiential exams, reflection papers and written understanding and analysis of real-world negotiations. Simulations and games are used in class frequently to illustrate concepts.

PACS 60002  ADVANCED MEDIATION  3 Credit Hours  
This course provides students with a conceptual understanding of mediation as well as practical mediation skills. It enables them to work as intermediaries who can assist conflict parties to reflect on the sources and dynamics of their conflict; develop mutually acceptable solutions and foster constructive, sustainable relationships. The course starts with essential concepts and skills for mediating small-scale interpersonal conflicts. It then addresses more complex inter-group, multiparty conflicts as well as deep-rooted structural conflicts. Through class discussions on readings and simulation exercises, students tackle questions such as how to work on conflicts in which there are many competing issues, goals and priorities involved; how to mediate enduring, intractable conflicts over identity, value and social structure; and how to respond to serious ethical dilemmas and power asymmetry. To meet these challenges, students not only critique the popularized framework of interest-based principled negotiation/mediation, but also develop holistic, creative third-party contributions to systemic social change.  
Prerequisite: PACS 60000; and PACS 60001; and graduate standing.

Case studies range across the areas of education, democracy, leadership, restorative justice, community conflict resolution and institutional change. Examples of topics include: theories of group process, engagement, participation, efficacy, dynamics and contact; community conflict resolution process such as inter-group dialogue and race dialogue; institutional change and strategic planning including evaluation and intervention for institutions, facilitation, stakeholder identification, planning, best practices and consensus decision making, ground rules, fishbowls and debriefs; and democracy and restorative justice practices including deliberative democracy, circle process and alternatives to violence project (AVP). The final course project involves students in applying these skills in partnership with a local community organization, group or neighborhood to address a community need or conflict. PACS 60006 POST-CONFLICT PEACEBUILDING  3 Credit Hours
Over the course of the past decade, peacebuilding has become the concept du jour of not only the field of conflict resolution and peace studies, but of the larger fields of international relations, development studies, transitional justice and a host of other subfields and portions of area studies. This is partly due to the fact that peacebuilding has become somewhat of a monster, enveloping and consuming different approaches to conflict resolution, international relations and development studies; to the point that almost any activity addressing those involved or suffering from conflicts can be included under its umbrella. However, given that the concept was originally coined to help address the tasks necessary to implement peace, this class largely, though not wholly, focuses on post-conflict peacebuilding and how different actors at different levels have roles to play in achieving sustainable peace in communities, regions and within states. We examine the concepts that make up peacebuilding, the manners in which peacebuilding efforts have been implemented by actors at multiple levels and the problems associated with dominant approaches to the topic.

PACS 60007  PRAXIS IN CONFLICT-SENSITIVE DEVELOPMENT  3 Credit Hours
This course enables students to build the practical skills necessary to advance socially responsible and sustainable development across conflict-affected societies and regions. A key concept explored throughout the course is conflict sensitivity - a sustained, iterative process of analyzing social conflict as a context of development work; understanding the interactions between the context and the development intervention; and making use of the understanding to maximize positive program impacts and minimize negative impacts. Students apply a range of theories to skill-building exercises in order to learn how to practice conflict-sensitive development. Through these experiential exercises, students think through the entirety of the development program cycle - from needs assessment to proposal development, fundraising, program implementation, capacity building, report writing, monitoring and evaluation and project phase-out. In each of these steps, students examine how to practice cultural sensitivity, stakeholder inclusion, local ownership and sustainability in a context-specific, adaptive manner. Case studies highlight essential themes selected from the Sustainable Development Goals (SDGs), a United Nations-sponsored list of 17 development goals such as poverty alleviation, food security, health, education, gender equity and climate change action. The course also opens dialogue on how to go beyond the conventional framework of conflict-sensitivity to realize conflict-transformative development.

PACS 60042  PUBLIC SECTOR CONFLICT TRANSFORMATION  3 Credit Hours
This course examines the many ways that conflict and decision-making are made in the public sector. Some methods of public interaction and decision-making are familiar and well-studied. Others are less so, despite their increasing use in a variety of policy domains and other circumstances. Such is the case with conflict resolution, which is now broadly used across the United States and internationally on multiple levels and by multiple groups with differing aims. This course explores the varied applications in public policy of conflict resolution principles, including negotiated rule making, public sector dispute resolution, mediation, collaborative problem solving, democratic governance, community-based planning and consensus building.

PACS 60070  CONFLICT TRANSFORMATION AND RECONCILIATION  3 Credit Hours
(Cross-listed with POL 60507)(Slashed with POL 70507) Over the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict towards various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda’s Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesty granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

PACS 60071  SOCIETY TECHNOLOGY AND SECURITY  3 Credit Hours
This course engages with current debates on the relationship between society, technology, peace and security, focusing particularly on military and dual-use technologies. The course begins by analyzing the literature on how technology shapes societies and how societies shape technology. This includes consideration of the way societies influence the emergence and application of particular technologies and the way understandings of military technological categories (e.g., pariah weapons, precision weapons) have been socially constructed. The module then examines how states and societies have responded to the policy and governance challenges presented by the development and trade in established weapons categories. This includes analysis of the history of disarmament initiatives, movements and agreements as well as the new field of ‘humanitarian disarmament’. It also includes examination of recent initiatives aimed at limiting weapons proliferation and armed violence in conflict-ridden societies. The remainder of the course is devoted to exploring the legal, normative and policy debates over the use of modern and emerging technologies. This includes examination of the governance implications of new developments in fields such as biotechnology, nanotechnology, cyber-warfare and drones.

PACS 60072 ENVIRONMENTAL CHANGE AND CONFLICT 3 Credit Hours
This course examines the varied theoretical and policy challenges involved in addressing the intersection between changes in the environment; the governance and sustainability of natural resources and ecosystems; and the prevention, management and resolution of conflict. It traces the history and development of environmental security and environmental peacebuilding, building a solid foundation in key theories, terminology and concepts, such as the relationship between natural resources and conflict (including scarcity vs. abundance, access and governance); the redefinition of security and securitization of the environment; slow- vs. sudden-onset climate change and displacement; and environmental cooperation in peacekeeping, peacemaking, peacebuilding and contemporary conflict resolution. Students have a working knowledge of important international laws and policies governing the protection of the environment in relation to armed conflict and engage in critical discussions at the intersection of conflict issues and trends in environmental change, such as green militarization and small arms proliferation, environmental crimes and surveillance, fortress conservation and conservation conflicts, the role of gender and youth, human rights and environmental defenders, climate justice and conflict-sensitive climate adaptation. Students apply the knowledge and skills developed in the course to the development of environmental security assessments, peace and conflict impact assessments and foresight analyses.
