COMPUTER SCIENCE - M.S.

College of Arts and Sciences
Department of Computer Science
www.kent.edu/cs

About This Program
The Master of Science in Computer Science program provides a comprehensive curriculum that covers a wide range of computer science topics, including software engineering, data science, and cybersecurity. With a focus on research and real-world experience, you'll be well-prepared to tackle complex tech challenges and advance your career.

Contact Information
• Program Coordinator: Hassan Peyravi | gradinfo@cs.kent.edu | 330-672-9047
• Connect with an Admissions Counselor: U.S. Student | International Student

Program Delivery
• Delivery: In person
• Location: Kent Campus

Admission Requirements
• Bachelor's degree from an accredited college or university
• Minimum 3.000 undergraduate GPA on a 4.000 point scale
• Core components of an undergraduate computer science curriculum
• Official transcript(s)
• Résumé
• Goal statement
• Three letters of recommendation
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 525 TOEFL PBT score (paper-based version)
  • Minimum 71 TOEFL IBT score (Internet-based version)
  • Minimum 74 MELAB score
  • Minimum 6.0 IELTS score
  • Minimum 50 PTE score
  • Minimum 100 Duolingo English Test score

Prospective students must successfully have completed high-level algebra, geometry and calculus coursework (equivalent to the following Kent State courses: MATH 12002, MATH 12003, and MATH 21001). In addition, it is strongly recommended that students successfully have completed coursework in computer science, including programming, data structures, abstraction, operating systems, combinatorial analysis and discrete structures, (equivalent to the following Kent State courses: CS 13001, CS 23001, CS 23022, CS 33211, CS 35101, and CS 46101). Highly qualified students lacking preparation in certain standards areas may be admitted.

Application Deadlines
• Fall Semester
  • Application deadline: June 15
• Spring Semester
  • Application deadline: November 1
• Summer Term
  • Application deadline: April 1

Applications submitted after this deadline will be considered on a space-available basis.

Core Courses, choose one course each from four out of the five categories: 1

- Computational Data Science Category
- Computer Engineering Category
- Computer Security Category
- Software and Application Category
- Theory and Algorithms Category

For more information about graduate admissions, please visit the Graduate Studies admission website. For more information on international admission, visit the Office of Global Education's admission website.
Additional Requirements or Concentrations

Choose from the following:
- Computational Data Science Concentration
- Computer Engineering Concentration
- Computer Security Concentration

Minimum Total Credit Hours: 32

Additional Requirements for Students Not Declaring a Concentration

Code  Title  Credit Hours

Computer Science (CS) Electives  12

Minimum Total Credit Hours: 12

Computational Data Science Concentration Requirements

Code  Title  Credit Hours

Concentration Electives, choose from the following: 12
- CS 54001  COMPUTER SCIENCE III - PROGRAMMING PATTERNS
- CS 54201  ARTIFICIAL INTELLIGENCE
- CS 54202  MACHINE LEARNING AND DEEP LEARNING
- CS 63005  ADVANCED DATABASE SYSTEMS DESIGN
- CS 63015  DATA MINING TECHNIQUES
- CS 63016  BIG DATA ANALYTICS
- CS 63017  BIG DATA MANAGEMENT
- CS 63018  PROBABILISTIC DATA MANAGEMENT

Minimum Total Credit Hours: 12

Computer Engineering Concentration Requirements

Code  Title  Credit Hours

Concentration Electives, choose from the following: 12
- CS 53301  SOFTWARE DEVELOPMENT FOR ROBOTICS
- CS 53302  ALGORITHMIC ROBOTICS
- CS 53303  INTERNET OF THINGS
- CS 53305  ADVANCED DIGITAL DESIGN
- CS 53334  HUMAN-ROBOT INTERACTION
- CS 63201  ADVANCED OPERATING SYSTEMS
- CS 63304  CLUSTER COMPUTING
- CS 63305  MULTICORE COMPUTING
- CS 63306  EMBEDDED COMPUTING
- CS 65101  ADVANCED COMPUTER ARCHITECTURE
- CS 65202  ADVANCED COMMUNICATION NETWORKS
- CS 65203  WIRELESS AND MOBILE COMMUNICATION NETWORKS

Minimum Total Credit Hours: 12

Graduation Requirements
- Maximum 12 credit hours of 50000-level courses may be applied toward the degree.

Program Learning Outcomes
Graduates of this program will be able to:
1. Demonstrate breadth-of-knowledge and understanding of essential facts, concepts, principles and theories relating to advanced topics in computer science.
2. Conduct literature searches, comprehend advanced research materials and uncover connections between related work and critical evaluation and synthesis.
3. Perform research, discovery and integration by applying advanced knowledge of computer science.

Full Description
The Master of Science degree in Computer Science provides students with an educational and research environment to develop career paths through necessary training with emerging technologies. Graduates have the technical knowledge and skills necessary for success within the information and high technology industries.

The M.S. degree in Computer Science has two culminating options: thesis or non-thesis. Students planning to pursue a Ph.D. degree an/or academic research should select the thesis option. Students planning to pursue applied research and development in industry may select the non-
thesis option. The thesis option requires original research and a written thesis. The non-thesis option requires a capstone project and an optional industrial internship.

The Computer Science major includes the following optional concentrations:

- The **Computational Data Science** concentration prepares students to process big data. In a spectrum of real-world applications, the collected data (from such sources as mobile devices, GPS, sensor/RFID networks, Internet, social media, etc.) is so large and complex, the traditional data processing tools cannot efficiently and effectively handle it. This concentration focuses on algorithms development, machine learning, computation techniques, network and computing infrastructure and software.

- The **Computer Engineering** concentration prepares students to meet the need of computer engineering professionals in the industry for designing and managing emerging smart devices and computer-integrated physical systems with programmable intelligence. Students learn the hardware-software co-design principles and theory, architecture of the associated software and hardware, devices and sensors communication protocols and the interfaces to effectively design, build and evolve such smart devices and computer-driven intelligent physical systems.

- The **Computer Security** concentration exposes students to a wide range of topics on the security of computer systems. Students study the vulnerabilities in software and networks and develop algorithms and software to protect data, using digital encryption coding, protected databases and protected computer networking techniques.

Students opting to not pursue a concentration will create a 12-credit hour individualized plan of study with their advisor.
