MATERIALS SCIENCE - PH.D.

College of Arts and Sciences
www.kent.edu/materials-science

About This Program
The Materials Science Ph.D. program offers advanced coursework and research opportunities in materials science, preparing you for a career in academia or industry. With experienced faculty and access to state-of-the-art facilities, you'll be equipped with the skills needed to make an impact in the field. Read more...

Contact Information
• Program Director: Antal Jakli | msgpdirector@kent.edu | 330-672-3899
• Connect with an Admissions Counselor: U.S. Student | International Student

Program Delivery
• Location: Kent Campus
• Delivery: In person

Examples of Possible Careers and Salaries*
Computer and information research scientists
• 15.4% much faster than the average
• 32,700 number of jobs
• $126,830 potential earnings

Physical scientists, all other
• -3.0% decline
• 22,800 number of jobs
• $107,210 potential earnings

Physicists
• 7.3% faster than the average
• 18,200 number of jobs
• $129,850 potential earnings

Biochemists and biophysicists
• 4.0% about as fast as the average
• 34,600 number of jobs
• $94,270 potential earnings

Biological scientists, all other
• 2.2% slower than the average
• 44,700 number of jobs
• $85,290 potential earnings

Chemists
• 4.7% about as fast as the average
• 86,700 number of jobs
• $79,300 potential earnings

Chemical engineers
• 4.4% about as fast as the average
• 32,600 number of jobs
• $108,540 potential earnings

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

Admission Requirements
• Bachelor’s degree or higher from an accredited college or university
• Minimum 2.750 GPA on a 4.000 point scale
• Official transcript(s)
• Goal statement
• Résumé or curriculum vitae
• Two letters of recommendation
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 525 TOEFL score
  • Minimum 71 TOEFL score
  • Minimum 74 MELAB score
  • Minimum 6.0 IELTS score
  • Minimum 50 PTE score
  • Minimum 100 Duolingo English score

GRE scores (general and subject test in physics or chemistry) are not required, but strongly recommended. Admission will be granted by examination of the student’s background on an individual basis. Students from a variety of undergraduate majors—such as physics, chemistry, engineering and materials science—are invited to apply.

Application Deadlines
• Fall Semester
  • Priority deadline: January 15
    Applications submitted by this deadline will receive the strongest consideration for admission.

Minimum Total Credit Hours for Post-Master's Students

Minimum Total Credit Hours for Post-Baccalaureate Students

MTSC 80199  Culminating Requirement

Approved Electives, choose from the following:  18-48

BSCI 70158  MOLECULAR BIOLOGY
BSCI 70220  BIOINFORMATICS
BSCI 71120  BIOLOGICAL LIGHT MICROSCOPY
CHEM 70352  INORGANIC MATERIALS CHEMISTRY
CHEM 70451  ORGANIC MATERIALS CHEMISTRY
CHEM 70478  SYNTHESIS OF ORGANIC LIQUID CRYSTALS
CHEM 70559  NANOMATERIALS
CHEM 70571  SURFACE CHEMISTRY
CHEM 70254  BIOMEMBRANES
MTSC 72241  STATISTICAL MECHANICS OF SOFT MATTER
MTSC 72249  LABVIEW FOR DATA ACQUISITION AND INSTRUMENT CONTROL
MTSC 72335  ADVANCED LIQUID CRYSTALLINE AND POLYMERIC MATERIALS
MTSC 72450  LIQUID CRYSTAL OPTICS I: THEORY
MTSC 72452  LIQUID CRYSTAL OPTICS II: OPTICAL SYSTEMS
MTSC 72460  LIQUID CRYSTAL MATERIALS SCIENCE
MTSC 72462  LIQUID CRYSTAL SCIENCE: PHYSICAL PROPERTIES
MTSC 72640  LIQUID CRYSTAL, POLYMER AND COLLOID COMPOSITES
MTSC 72643  ELECTRO-OPTICS OF LIQUID CRYSTALS: MODELING AND DEVICE DESIGN
MTSC 72647  STRUCTURED FLUIDS
MTSC 72650  COMPUTATIONAL MATERIALS SCIENCE
MTSC 72651  NANOBIOENGINEERING
MTSC 73010  LIYOTROPIC LIQUID CRYSTALS
MTSC 73025  ACTIVE MATTER
MTSC 73100  EMERGING DISPLAY TECHNOLOGIES
MTSC 74491  SEMINAR: LIQUID CRYSTALS
MTSC 74495  SPECIAL TOPICS IN CHEMICAL PHYSICS
MTSC 75006  LIQUID CRYSTAL DEVICE PROTOTYPING
MTSC 75008  LIQUID CRYSTAL DEVICE CONSTRUCTION
MTSC 75032  SCIENTIFIC COMMUNICATION
MTSC 80498  RESEARCH
PHY 76403  ADVANCED CONDENSED MATTER PHYSICS
PHY 78401  LIQUID CRYSTAL PHYSICS

Additional courses with advisor approval

Culminating Requirement
MTSC 80199  DISSERTATION I  1

Minimum Total Credit Hours for Post-Baccalaureate Students  90
Minimum Total Credit Hours for Post-Master's Students  60

1 Each doctoral candidate, upon admission to candidacy, must register for MTSC 80199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MTSC 80299, each semester, until all requirements for the degree have been met. A prospectus of the dissertation research project is required for all Ph.D. candidates. The prospectus is prepared jointly with the student’s dissertation advisor. The prospectus must be approved by the members of the student’s dissertation committee. A dissertation presenting and interpreting results of original research is required for the Ph.D. degree. Following acceptance of the dissertation by the dissertation committee, the final degree requirement is the satisfactory completion of the final oral exam (defense of dissertation) in front of a committee of graduate materials science faculty and representatives from other departments in the College of Arts and Sciences.

Graduation Requirements

Candidacy Requirement
In addition to satisfying the course work, students must pass the materials science candidacy examination. The examination is divided into two parts, a written exam and an oral exam.

The written exam is scheduled first, followed by the oral exam. The exams will cover the core courses of the materials science program taken during the first year. Students who do not pass the candidacy exam the first time may take it a second time. The first attempt at candidacy usually will take place in August, during the week before the start of the fall semester of the student’s second year of study. The second attempt usually will take place in January, during the week before the start of the spring semester of the student’s second year of study. A request for exception will be considered for medical reasons or for other unpredictable circumstances. Requests must be submitted in writing with supporting documentation prior to the test date and must be approved by the candidacy exam committee and by the director of the materials science program.

Students who fail the second attempt cannot continue towards the doctoral degree, but may complete the requirements for the Master of Science degree.

Program Learning Outcomes
Graduates of this program will be able to:

1. Develop an advanced understanding of the fundamental science of liquid crystals and related advanced materials and ability to apply acquired knowledge of physical and chemical properties of soft materials and devices such as liquid crystals, polymers, colloids and active matter.
2. Gain experience in presenting scientific data in research publications, articles, posters and oral presentations.
3. Apply acquired knowledge to the discovery of new advanced materials and development of advanced materials-based devices and applications.

Full Description
The Ph.D. degree in Materials Science provides students with extensive scientific training, cutting-edge research opportunities and engineering skills necessary for a variety of careers in academy and industry.

Program faculty and students conduct research through Kent State’s participating departments and the Advanced Materials and Liquid Crystal Institute. Such research includes liquid crystal synthesis and molecular design; properties of liquid crystals and related advanced materials; lyotropic liquid crystals and bio-related materials, opto-electronics; and nanoscience and nanotechnologies. These important research foci are inherently interdisciplinary.
