## Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate an in-depth knowledge and understanding of their interest area and display a high degree of mastery in appropriate theories, analytical skills, research design and methodologies.
2. Conduct original research by integrating knowledge of specific areas of interest and successfully articulating their research in written form.

## Full Description

The Ph.D. degree in Business Administration prepares doctoral students to conduct high-quality, scholarly research and teach effectively in the field of business. The degree's purpose is to develop the intellectual potential of the student through emphasis on specific areas of concentration within the framework of the general field of business administration. Academic objectives are accomplished through close student-faculty working relationships. The program provides the flexibility to allow for a considerable degree of individual design, based upon the career needs and objectives of the student.

The Business Administration major comprises the following concentrations:

- The **Accounting** concentration prepares highly qualified candidates for faculty positions in colleges and universities. In addition to completing doctoral-level coursework and a dissertation, students conduct scholarly research and become effective teachers.
- The **Finance** concentration prepares students for finance faculty positions in colleges and universities. Students complete courses in business and finance, learn how to conduct high-quality, scholarly research and become effective teachers.
- The **Human Resource Management** concentration prepares students for academic positions in the field of human resource management. Students are trained to be researchers and teachers. *Applications to the Human Resource Management concentration are not being accepted at this time.*
- The **Information Systems** concentration creates a strong grounding in areas of behavioral, strategic and economic aspects of global information systems decision-making. Students are trained to become scholars and effective teachers.
- The **Marketing** concentration prepares highly qualified candidates for positions of professional responsibility in university teaching and research. The program offers a solid balance of teaching experience and preparation for conducting scientific research.
