Fully Offered

- **Delivery**
 - In Person
- **Location**
 - Kent Campus

Admission Terms

- Fall

Examples of Possible Careers*

Software developers and software quality assurance analysts and testers

- 21.5% much faster than the average
- 1,469,200 number of jobs
- \$110,140 potential earnings

Special effects artists and animators

- 4.1% about as fast as the average
- 67,500 number of jobs
- \$77,700 potential earnings

Web developers and digital interface designers

- 8.0% much faster than the average
- 174,300 number of jobs
- \$77,200 potential earnings

Computer and information systems managers

- 10.4% much faster than the average
- 461,000 number of jobs
- \$151,150 potential earnings

Computer and information research scientists

- 15.4% much faster than the average
- 32,700 number of jobs
- \$126,830 potential earnings

Computer systems analysts

- 7.4% faster than the average
- 632,400 number of jobs
- \$93,730 potential earnings

Computer programmers

- -9.4% decline
- 213,900 number of jobs
- \$89,190 potential earnings

Sociologists

- 3.6% about as fast as the average
- 3,200 number of jobs
- \$86,110 potential earnings

*Note

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics'

Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Master of Science degree in Emerging Media and Technology is designed to augment a student's skill set, affording new career opportunities for students from diverse undergraduate and professional backgrounds. Due to the program's STEM foundation and interdisciplinary nature, students learn quantitative and coding skills for emerging media platforms, including interactive websites and apps; data-based analysis, communication and visualization; theoretical understanding of the relationship between the technology industry and society; and the tools for working in and managing interdisciplinary teams on interactive technology projects.

Students in this program develop individual plans of study and engage in experiential learning through interdisciplinary elective graduate coursework in one of the following specialization areas: data analytics and coding; social scientific research; applied communication, information and strategy; applied creative technology; or training and development technology.

Admission Requirements

- Bachelor's degree from an accredited college or university
- Minimum 2.750 undergraduate GPA on a 4.000 point scale
- Official transcript(s)
- Goal statement
- Two letters of recommendation from professional or academic evaluators
- Interview¹
- English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
 - Minimum 587 TOEFL PBT score (paper-based version)
 - Minimum 94 TOEFL IBT score (Internet-based version)
 - Minimum 82 MELAB score
 - Minimum 7.0 IELTS score

- Minimum 65 PTE score
- Minimum 110 Duolingo English Test score

Admission decisions will be made by the graduate program coordinator with consultation from the members of the graduate faculty.

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

¹ The graduate program coordinator, in coordination with program faculty members, will interview applicants to assess fit and further communicate the interdisciplinary program's goals and structure.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate competency in skills related to emerging media and technology, including technical problem-solving through
 - a. coding
 - b. data-based analytics, communication and visualization
 - c. interdisciplinary teamwork and project management.
2. Apply interdisciplinary solutions to solving technical, social and human problems related to emerging media and technology.
3. Demonstrate increased depth and breadth in applying emerging media and technology solutions in one of the areas of:
 - a. data analytics/coding
 - b. social scientific research
 - c. applied communication, information and strategy
 - d. applied creative technology
 - e. training and development technology

Program Requirements

Major Requirements

Code	Title	Credit Hours
Major Requirements		
EMAT 51510	PROJECT MANAGEMENT AND TEAM DYNAMICS	3
EMAT 60010	FOUNDATIONS OF EMERGING MEDIA AND TECHNOLOGY ¹	3
EMAT 60310	CREATIVE CODING FUNDAMENTALS	3
EMAT 62110	INTERACTIVE DATA	3
Interdisciplinary Specialization, chose from the following: ²		12
Applied Communication, Information and Strategy		
Applied Creative Technology		
Data Analytics/Coding		
Social Scientific Research		
Training and Development Technology		
Culminating Requirement		
Choose from the following:		6
EMAT 60999 & EMAT 69992	CAPSTONE PROJECT IN EMERGING MEDIA AND TECHNOLOGY and INTERNSHIP IN EMERGING MEDIA AND TECHNOLOGY	
EMAT 69199	THESIS I	
Minimum Total Credit Hours:		30

- ¹ Students with previous programming experience may be waived from taking EMAT 60010. These students will be given a registration exception to enroll in EMAT 62110. In addition, they will required to complete 15 credit hours for the interdisciplinary specialization to graduate with the minimum 30 credit hours toward the degree.
- ² For the interdisciplinary specialization, students develop a course plan with approval of their faculty advisor by the end of their first semester in the program. The makeup of this coursework is flexible, but each course should be designated under one of the five areas.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
	3.000

- Minimum 50 percent of coursework must be at the 60000 level.
