About This Program
Looking to make a difference in healthcare? The M.S. degree in Health Informatics prepares graduates for careers at the intersection of healthcare and technology. With a focus on data analytics and information management, our program prepares graduates to use data and information to improve patient outcomes and drive innovation in healthcare. Read more...

Program Delivery
• Delivery:
  • Fully online

Examples of Possible Careers and Salaries*
Computer and information research scientists
• 15.4% much faster than the average
• 32,700 number of jobs
• $126,830 potential earnings

Computer and information systems managers
• 10.4% much faster than the average
• 461,000 number of jobs
• $151,150 potential earnings

Database administrators and architects
• 9.7% much faster than the average
• 132,500 number of jobs
• $98,860 potential earnings

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

For more information about graduate admissions, visit the graduate admission website. For more information on international admission, visit the Office of Global Education’s admission website.

Admission Requirements
• Bachelor’s degree from an accredited college or university
• Minimum 2.750 undergraduate GPA on a 4.000-point scale
• Official transcript(s)
• Résumé
• Goal statement
• Three letters of recommendation
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 587 TOEFL PBT score (paper-based version)
  • Minimum 94 TOEFL IBT score (Internet-based version)
  • Minimum 82 MELAB score
  • Minimum 7.0 IELTS score
  • Minimum 65 PTE score
  • Minimum 120 Duolingo English test score

For more information about graduate admissions, visit the graduate admission website. For more information on international admission, visit the Office of Global Education’s admission website.

1 In calculating total GPA, all grades from all courses taken at relevant level (bachelor’s or master’s) from all institutions are counted. Applicants who do not meet the minimum 2.750 GPA requirement must submit a statement that addresses the circumstances that contributed to the GPA and preparation for success in graduate study. Applicants should include recent professional achievements that indicate an ability to perform at a higher academic level to be considered for conditional admission to the program.

Application Deadlines
• Fall Semester
  • Application deadline: April 15
• Spring Semester
  • Application deadline: November 15
• Summer Term
  • Application deadline: March 15

Applications submitted after these deadlines will be considered on a space-available basis.

Program Learning Outcomes
Graduates of the program will be able to:

1. Reconcile the needs of clinical and non-clinical users of health information systems utilizing workflow analysis, systems analysis and project management principles
2. Analyze collected data of health information systems, utilizing principles of data mining, statistics and clinical analytics
3. Manage the implementation of health information systems in multiple health care venues using principles of organizational dynamics and change management
4. Facilitate communication between clinical and non-clinical users of health information systems
5. Successfully obtain the credential of Certified Associate in Health Information Systems

Full Description
The Master of Science degree in Health Informatics prepares graduates for careers in managerial, analytical, consultative and executive roles working with healthcare systems and clinicians.

Health informatics is the science of evaluating, implementing and utilizing technology to manage all information related to the patient care delivery process: clinical, financial, technological and enterprise-wide. Three major components comprise the health informatics discipline:
