Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics'

Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Doctor of Audiology degree is a professional doctorate that prepares students to be licensed clinical audiologists. The program emphasizes the principles and practices underlying evaluation, treatment and provision of hearing care services. Graduates are independent professionals who specialize in the diagnosis, management and treatment of hearing and balance disorders.

The Au.D. degree is a full-time, continuous, 48-month post-baccalaureate course of study designed to integrate classroom, laboratory and clinical experiences, culminating in the qualification for national certification and state (Ohio) licensure as an audiologist. All students attend full-time and take a fixed sequence of classroom- and clinic-based courses.

This program may be undertaken simultaneously or sequentially with the Ph.D. in Audiology.

The Au.D. degree in Audiology is offered in consortium with the Cleveland Clinic and the University of Akron.

Accreditation

Council on Academic Accreditation in Audiology and Speech-Language Pathology

Clinical Setting

For any clinical practicum (on campus or off campus) in speech pathology or audiology that requires candidates to be placed within the on-campus speech and hearing clinics, school or agency setting, the SPA program requires candidates to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background check and submit the results to authorized personnel at their assigned clinic/school/agency before the beginning of their placement or the first day of the semester in which the practicum will take place. Authorized school/agency personnel will determine whether a candidate may participate in practicum in the off-campus setting. The BCII and FBI background checks are good for one year and the candidates will need to complete one each year that they are in graduate school.

Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed one month prior to clinical practicum. Candidates are responsible for fees incurred for this requirement. For more
