## Full Description

Career and Community Studies-College Preparation is a college-based, transition, non-degree program to prepare students with intellectual and developmental disabilities, traumatic brain injury and autism (ages 18 and older) for adult life through academic pursuits, peer socialization, and career discovery and preparation. The program integrates inclusive classes, a typical college experience, and a transition curriculum to prepare students who have the goal to enter a degree major but who benefit from a supportive intermediate program to best prepare for academic success.

The first year of the program is designed as a foundation with courses covering disability issues, personal development, health and wellness, and inclusive KSU courses. Year two allows students to extend their knowledge and skills by participating in supported college-level courses and other campus environments to increase awareness and success in academic and social skill development.
