* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.
Full Description

The Master of Arts degree in Human Development and Family Science provides students with advanced knowledge in the fields of family sciences and human development and the opportunity to develop multidisciplinary research and community outreach skills.

Coursework enables students to apply to become Certified Family Life Educators. Courses focus on current research and practice in human development and family science with an emphasis on family theories and processes; family life education; the reciprocal influences of family, school, work and community contexts; development across the lifespan; and the strengths and needs of diverse populations.

The program emphasizes both basic and applied research. Student participation in interdisciplinary research and community outreach projects is encouraged. Graduates are prepared for leadership and teaching positions in the social services, junior and community colleges and cooperative extension and/or for pursuing doctoral-level study.

- No more than one-half of a graduate student’s coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

1. Identify physical, intellectual, emotional and social dimensions of human life within their respective disciplines; recognize the unique strengths and needs of individuals and families; and apply knowledge of human development and family relationships through involvement with and study of diverse populations.

2. Communicate their ideas in oral presentations and written papers; demonstrate an understanding of theories, methods and principles of research pertaining to human development and family relationships; and access scholarly sources of information and critically evaluate the quality of empirical research pertaining to human development and family relationships.

3. Demonstrate proficiency in developmental and family research methods and relevant statistical analyses; and understand program development, delivery and evaluation pertaining to human development and family relationships.

4. Understand the interrelationship between theory, research and practice.
