Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate knowledge and skills associated with the National Association of School Psychologist's Domains of School Psychology Training and Practice.

Full Description

The Master of Education degree in School Psychology provides a focus on the core principles and foundations of the practice of school psychology. The M.Ed. degree is not considered a terminal degree and is not sufficient for earning the Ohio state license in school psychology.

Additional training beyond the M.Ed. (e.g., an Ed.S. or Ph.D.) is required in order to gain the credential of 'school psychologist' at the state (i.e., Ohio Department of Education) and national (i.e., through the National Association of School Psychologists national certification program) levels as well as for licensure and practice in most states.
