Accreditation

The B.S. degree in Integrated Health Studies is accredited by the Council on Education for Public Health (CEPH).

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics'

Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Current Kent State and Transfer Students: Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and earned a minimum 2.000 overall Kent State GPA to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

Transfer students visit the admissions website for transfer students for more information.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

University Requirements

All students in a bachelor's degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Flashes 101 (UC 10001)	1 credit hour
Course is not required for students with 30+ transfer credits (excluding College Credit Plus) or age 21+ at time of admission.	
American Civic Literacy	3 credit hours
Experiential Learning Requirement (ELR)	varies
Students must successfully complete one course or approved experience.	
Kent Core (see table below)	36-37 credit hours
Writing-Intensive Course (WIC)	1 course
Students must earn a minimum C grade in the course.	
Upper-Division Requirement	39 credit hours
Students must successfully complete 39 upper-division (numbered 30000 to 49999) credit hours to graduate.	
Total Credit Hour Requirement	120 credit hours

Program Learning Outcomes

Graduates of this program will be able to:

1. Integrate and apply knowledge, values and skills across the health and human services fields to applicable work settings.
2. Identify, present and critique the role of health care professionals and policies/issues facing the health and human services fields in order to better meet the needs of individuals, communities and society in the provision of services.

Full Description

The Bachelor of Science degree in Integrated Health Studies is designed for students interested in the health and medical professions. The primary mission of the program is to educate individuals to serve present and future needs of an increasingly diverse society in the professional fields associated with health and/or medical services. Fundamental to its mission is the education of students to excel as practitioners and provide leadership to their respective disciplines.

The Integrated Health Studies major comprises the following concentrations:

- The **Health Care Administration and Systems** concentration prepares students for administrative positions in the health care industry. In addition, students may wish to pursue graduate study in such fields as business administration, health administration, exercise/leisure/sports administration and public health. Students may earn the Business minor with additional coursework and GPA requirements.
- The **Health Sciences** concentration includes a strong basic science core (biology, chemistry, physics), as well as an applied science core (physiology of exercise, nutrition). Graduates are prepared for science-based graduate programs, especially physical or occupational therapy, and other advanced study options such as physician assistant programs.
- The **Health Services** concentration provides a comprehensive study of health professions, human development and human services. Graduates are prepared for careers in the service-delivery sector of the health care industry, such as non-profit and/or government agencies (e.g., health departments, national/state/local health organizations). This program is designed to offer more flexibility in coursework selection for pre-nursing coursework or students to declare a minor or certificate (e.g., health educator, non-profit

management, psychology). The program also provides students in associate degrees in the allied health areas (e.g., physical or occupational therapy assisting technology) with the opportunity to obtain a highly relevant bachelor's degree.
