EPIDEMIOLOGY - M.P.H.

College of Public Health
www.kent.edu/publichealth

About This Program
Explore Kent State University’s STEM-designated Master of Public Health program in Epidemiology, designed to provide students with comprehensive training in the principles and methods of epidemiological research. Gain expertise in analyzing health data, identifying disease trends and designing interventions to improve public health outcomes.

Program Delivery
- Delivery:
  - Fully online
  - In person
- Location:
  - Kent Campus

Accreditation
The M.P.H. degree in Epidemiology is accredited by the Council on Education for Public Health (CEPH).

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

Admission Requirements
- Bachelor’s degree from an accredited college or university
- Minimum 3.000 undergraduate GPA on a 4.000-point scale
- Official transcript(s)
- Goal statement
- Résumé
- Two letters of recommendation
- English Language Proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions to waive) by earning one of the following:1
  - Minimum 79 TOEFL iBT score
  - Minimum 6.5 IELTS score
  - Minimum 58 PTE score
  - Minimum 110 DET score

1 International applicants who do not meet the above test scores will not be considered for admission.

Application Deadlines
- Fall Semester
  - Priority deadline: March 15 (international student)
    Applications submitted by this deadline will receive the strongest consideration for admission.
  - Rolling admissions (domestic student)
- Spring Semester
  - Priority deadline: August 15 (international student)
    Applications submitted by this deadline will receive the strongest consideration for admission.
  - Rolling admissions (domestic student)
- Summer Term
  - Rolling admissions (domestic student)

Epidemiology - M.P.H. 1
GEOG 59072 GEOGRAPHIC INFORMATION SCIENCE AND HEALTH

Any Graduate course (50000 or 60000 level) with advisor approval

Major Electives B, choose from the following: 9

BST 60010 USING R IN PUBLIC HEALTH
BST 60011 USING SAS IN PUBLIC HEALTH
BST 60012 USING EXCEL IN PUBLIC HEALTH
BST 60200 DATA MANAGEMENT AND LOGIC USING SAS® SOFTWARE
BST 63012 SURVIVAL ANALYSIS IN PUBLIC HEALTH
BST 63013 EXPERIMENTAL DESIGNS IN PUBLIC HEALTH RESEARCH
EPI 63019 EXPERIMENTAL DESIGNS FOR CLINICAL RESEARCH
EPI 63200 ADVANCED EPIDEMIOLOGY AND CLINICAL RESEARCH METHODS
EPI 63211 ETHICAL ISSUES IN PUBLIC HEALTH AND RESEARCH
EPI 63034 LONGITUDINAL DATA ANALYSIS

Any Graduate course (60000 level only) with advisor approval

Culminating Requirement
EPI 60192 APPLIED PRACTICE EXPERIENCE IN EPIDEMIOLOGY 1
PH 61199 INTEGRATIVE LEARNING EXPERIENCE 1

Minimum Total Credit Hours: 46

1 It is expected that students enrolled in EPI 60192 who do not complete the course in one term will continuously register for EPI 60292 each semester, until all requirements have been met. Credit hours for EPI 60292 do not apply to the minimum 46 credit hours for the degree.

Graduation Requirements

Minimum Major GPA
- 3.000

• Practicum placement at an approved public health agency under the guidance of a qualified preceptor (150 or 300 contact hours).
• Final portfolio/report and a presentation integrating theory and practice.
• Participation in at least one approved interprofessional education event (IPE); IPE requires students to participate at a specific time/date to be determined in consultation with the student’s advisor.
• No more than one-half of a graduate student’s coursework may be taken in 50000-level courses.
• Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

Evidence-based Approaches to Public Health
1. Apply epidemiological methods to the breadth of settings and situations in public health practice.
2. Select quantitative and qualitative data collection methods appropriate for a given public health context.
3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
4. Interpret results of data analysis for public health research, policy or practice.

Public Health and Health Care Systems
1. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
2. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.

Planning and Management to Promote Health
1. Assess population needs, assets and capacities that affect communities’ health.
2. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
3. Design a population-based policy, program, project or intervention.
4. Explain basic principles and tools of budget and resource management. Select methods to evaluate public health programs.

Policy in Public Health
1. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
2. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
3. Advocate for political, social or economic policies and programs that will improve health in diverse populations.
4. Evaluate policies for their impact on public health and health equity.

Leadership
1. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
2. Apply negotiation and mediation skills to address organizational or community challenges.

Communication
1. Select communication strategies for different audiences and sectors.
2. Communicate audience-appropriate public health content, both in writing and through oral presentation.
3. Describe the importance of cultural competence in communicating public health content.

Interprofessional Practice
1. Perform effectively on interprofessional teams.

Systems Thinking
1. Apply systems thinking tools to a public health issue.

Full Description

The Master of Public Health degree in Epidemiology prepares students to analyze the distribution and determinants of disease, disabilities and death in populations. Graduates are able to apply quantitative and
qualitative methods to investigate disease outbreaks, determine causal relationships between environmental and biological factors and conduct studies to project health trends in populations. Students benefit from public health faculty research agendas in immigrant and refugee health, chronic disease, cancer and infectious disease epidemiology.

Career opportunities for graduates include research positions in universities, medical schools and pharmaceutical companies; disease prevention specialists in hospitals; and surveillance managers in state and local health departments.
