PACS 60002 ADVANCED MEDIATION 3 Credit Hours

(Slashed with PACS 70002) This course provides students with a conceptual understanding of mediation as well as practical mediation skills. It enables them to work as intermediaries who can assist conflict parties to reflect on the sources and dynamics of their conflict; develop mutually acceptable solutions; and foster constructive, sustainable relationships. The course starts with essential concepts and skills for mediating small-scale interpersonal conflicts. It then addresses more complex intergroup, multiparty conflicts as well as deep-rooted structural conflicts. Through class discussions of readings and simulation exercises, students tackle questions such as how to work with conflicts in which there are many competing issues, goals and priorities involved; how to mediate enduring, intractable conflicts about identity, value and social structure; and how to respond to serious ethical dilemmas and power asymmetry. To meet these challenges, students not only critique the popularized framework of interest-based principled negotiation/mediation, but also develop holistic, creative third-party contributions to systemic social change.

PACS 60003 COMMUNITY-BASED CONFLICT TRANSFORMATION 3 Credit Hours

(Slashed with PACS 70003) This course is designed to expand students' knowledge of and practice competency with group- and community-level dynamics and peacebuilding techniques, giving students the skills and knowledge to turn divisive situations into strengthened and connected communities. The course begins by introducing theories of group processes, engagement and peacebuilding. It then focuses on using case studies and experiential learning to master the skills and understand the applications of group and community peacebuilding techniques. Case studies range across the areas of education, democracy, leadership, restorative justice, community conflict resolution and institutional change. Examples of topics include theories of group process, engagement, participation, efficacy, dynamics and contact; community conflict resolution process such as intergroup and race dialogue; institutional change and strategic planning including evaluation and intervention for institutions, facilitation, stakeholder identification, planning, best practices and consensus decision making, ground rules, fishbowls and debriefs; and democracy and restorative justice practices including deliberative democracy, circle process and alternatives to violence project (AVP). The final course project involves students applying these skills in partnership with a local community organization, group or neighborhood to address a community need or conflict. PACS 60006 POST-CONFLICT PEACEBUILDING 3 Credit Hours
(Slashed with PACS 70006) Throughout the course of the past decade, peacebuilding has become the concept du jour of not only the field of conflict resolution and peace studies, but of the larger fields of international relations, development studies, transitional justice and a host of other subfields and portions of area studies. This is partly due to the fact that peacebuilding has become somewhat of a monster, enveloping and consuming different approaches to conflict resolution, international relations and development studies to the point that almost any activity addressing those involved or suffering from conflicts can be included under its umbrella. However, given that the concept was originally coined to help address the tasks necessary to implement peace, this course largely, though not wholly, focuses on post-conflict peacebuilding and how different actors at different levels have roles to play in achieving sustainable peace within communities, regions and states. The course examines the concepts that make up peacebuilding, manners in which peacebuilding efforts have been implemented by actors at multiple levels and problems associated with dominant approaches to the topic.

PACS 60007 PRAXIS IN CONFLICT-SENSITIVE DEVELOPMENT 3 Credit Hours

(Slashed with PACS 70007) This course enables students to build the practical skills necessary to advance socially responsible and sustainable development across conflict-affected societies and regions. A key concept explored throughout the course is conflict sensitivity — a sustained, iterative process of analyzing social conflict as a context of development work; understanding the interactions between the context and the development intervention; and making use of the understanding to maximize positive program impacts and minimize negative impacts. Students apply a range of theories to skill-building exercises to learn how to practice conflict-sensitive development. Through these experiential exercises, students think through the entirety of the development program cycle, from needs assessment to proposal development, fundraising, program implementation, capacity building, report writing, monitoring and evaluation and project phaseout. During each of these steps, students examine how to practice cultural sensitivity, stakeholder inclusion, local ownership and sustainability in a context-specific, adaptive manner. Case studies highlight essential themes selected from the Sustainable Development Goals (SDGs), a United Nations sponsored list of 17 development goals such as poverty alleviation, food security, health, education, gender equity and climate change action. The course also opens dialogue about how to go beyond the conventional framework of conflict sensitivity to realize conflict-transformative development.

PACS 60042 PUBLIC SECTOR CONFLICT TRANSFORMATION 3 Credit Hours

(Slashed with PACS 70042) This course examines the many ways that conflict and decision making are made in the public sector. PACS 60070 CONFLICT TRANSFORMATION AND RECONCILIATION 3 Credit Hours

(Cross-listed with POL 60507)(Slashed with POL 70507) Throughout the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict toward various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda's Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

(Slashed with PACS 70071) This course engages with current debates about the relationship between society, technology, peace and security, focusing particularly on military and dual-use technologies. The course begins by analyzing the literature of how technology shapes societies and societies shape technology. This includes consideration of the way societies influence the emergence and application of particular technologies and how understandings of military technological categories (e.g., pariah weapons, precision weapons) have been socially constructed. The module then examines how states and societies have responded to the policy and governance challenges presented by the development and trade of established weapon categories. This includes analysis of the history of disarmament initiatives, movements and agreements as well as the new field of 'humanitarian disarmament'. It also includes examination of recent initiatives aimed at limiting weapons proliferation and armed violence in conflict-ridden societies. The remainder of the course is devoted to exploring the legal, normative and policy debates about the use of modern and emerging technologies. This includes examination of the governance implications of new developments in fields such as biotechnology, nanotechnology, cyberwarfare and drones.

PACS 60072 ENVIRONMENTAL CHANGE AND CONFLICT 3 Credit Hours

(Slashed with PACS 70072) This course examines the varied theoretical and policy challenges involved in addressing the intersection between changes in the environment; the governance and sustainability of natural resources and ecosystems; and the prevention, management and resolution of conflict. It traces the history and development of environmental security and peacebuilding, building a solid foundation of key theories, terminology and concepts, such as the relationship between natural resources and conflict (including scarcity vs. abundance, access and governance); redefinition of security and securitization of the environment; slow- vs. sudden-onset climate change and displacement; and environmental cooperation of peacekeeping, peacemaking, peacebuilding and contemporary conflict resolution. Students have a working knowledge of important international laws and policies governing the protection of the environment in relation to armed conflict and engage in critical discussions at the intersection of conflict issues and trends of environmental change, such as green militarization and small arms proliferation, environmental crimes and surveillance, fortress conservation and conservation conflicts, the role of gender and youth, human rights and environmental defenders, climate justice and conflict-sensitive climate adaptation. Students apply the knowledge and skills developed throughout the course to the development of environmental security assessments, peace and conflict impact assessments and foresight analyses.

PACS 70001 ADVANCED NEGOTIATION 3 Credit Hours

(Slashed with PACS 60001) Conflict and negotiation are normal and unavoidable parts of life. This course goes beyond basic negotiation concepts like principled negotiation, focusing on topics including the psychology of negotiation, power, international relations, technology and other advanced topics. The course covers issues of information asymmetry; power; ethics; and multi-party, iterative and collaborative negotiations. Research of negotiation and prior case studies are used to illustrate topics. This course is highly interactive, focusing on experiential learning and education. Evaluation of performance includes experiential exams, reflection papers and written understanding and analysis of real-world negotiations. Simulations and games are used during class frequently to illustrate concepts.

PACS 70002 ADVANCED MEDIATION 3 Credit Hours

(Slashed with PACS 60002) This course provides students with a conceptual understanding of mediation as well as practical mediation skills. It enables them to work as intermediaries who can assist conflict parties to reflect on the sources and dynamics of their conflict; develop mutually acceptable solutions; and foster constructive, sustainable relationships. The course starts with essential concepts and skills for mediating small-scale interpersonal conflicts. It then addresses more complex intergroup, multiparty conflicts as well as deep-rooted structural conflicts. Through class discussions of readings and simulation exercises, students tackle questions such as how to work with conflicts in which there are many competing issues, goals and priorities involved; how to mediate enduring, intractable conflicts about identity, value and social structure; and how to respond to serious ethical dilemmas and power asymmetry. To meet these challenges, students not only critique the popularized framework of interest-based principled negotiation/mediation, but also develop holistic, creative third-party contributions to systemic social change.

PACS 70003 COMMUNITY-BASED CONFLICT TRANSFORMATION 3 Credit Hours

(Slashed with PACS 60003) This course is designed to expand students' knowledge of and practice competency with group- and community-level dynamics and peacebuilding techniques, giving students the skills and knowledge to turn divisive situations into strengthened and connected communities. The course begins by introducing theories of group processes, engagement and peacebuilding. It then focuses on using case studies and experiential learning to master the skills and understand the applications of group and community peacebuilding techniques. Case studies range across the areas of education, democracy, leadership, restorative justice, community conflict resolution and institutional change. Examples of topics include theories of group process, engagement, participation, efficacy, dynamics and contact; community conflict resolution process such as intergroup and race dialogue; institutional change and strategic planning including evaluation and intervention for institutions, facilitation, stakeholder identification, planning, best practices and consensus decision making, ground rules, fishbowls and debriefs; and democracy and restorative justice practices including deliberative democracy, circle process and alternatives to violence project (AVP). The final course project involves students applying these skills in partnership with a local community organization, group or neighborhood to address a community need or conflict. This course is taught in a flipped format.

PACS 70005 PEACE, CONFLICT AND DEVELOPMENT: LOCAL-GLOBAL DYNAMICS 3 Credit Hours

(Slashed with PACS 60005) This course explores the relationships between peace, conflict and development. It covers key concepts, theories and approaches to understanding and addressing the nexus between peace, conflict and development. Students critically review relevant theoretical and policy literature and apply them to real-world case studies as part of participatory skill-building exercises. The course starts with an overview of essential development theories, models and actors of development practice. It examines relevant scholarly and policy debates of conflict-development links; the political economy of conflict and (uneven) development; relevant security issues (e.g., small arms proliferation, disarmament, demobilization and reintegration (DDR), security sector reform (SSR)); the relationships between natural resources, livelihoods and conflict; the roles of gender and youth in conflict and development; measures of effective development in conflict-affected societies; and development alternatives, as well as emerging critical debates about alternatives to development.

PACS 70006 POST-CONFLICT PEACEBUILDING 3 Credit Hours

(Slashed with PACS 60006) Throughout the course of the past decade, peacebuilding has become the concept du jour of not only the field of conflict resolution and peace studies, but of the larger fields of international relations, development studies, transitional justice and a host of other subfields and portions of area studies. This is partly due to the fact that peacebuilding has become somewhat of a monster, enveloping and consuming different approaches to conflict resolution, international relations and development studies to the point that almost any activity addressing those involved or suffering from conflicts can be included under its umbrella. However, given that the concept was originally coined to help address the tasks necessary to implement peace, this course largely, though not wholly, focuses on post-conflict peacebuilding and how different actors at different levels have roles to play in achieving sustainable peace within communities, regions and states. The course examines the concepts that make up peacebuilding, manners in which peacebuilding efforts have been implemented by actors at multiple levels and problems associated with dominant approaches to the topic.

PACS 70007 PRAXIS IN CONFLICT-SENSITIVE DEVELOPMENT 3 Credit Hours

(Slashed with PACS 60007) This course enables students to build the practical skills necessary to advance socially responsible and sustainable development across conflict-affected societies and regions. A key concept explored throughout the course is conflict sensitivity — a sustained, iterative process of analyzing social conflict as a context of development work; understanding the interactions between the context and the development intervention; and making use of the understanding to maximize positive program impacts and minimize negative impacts. Students apply a range of theories to skill-building exercises to learn how to practice conflict-sensitive development. Through these experiential exercises, students think through the entirety of the development program cycle, from needs assessment to proposal development, fundraising, program implementation, capacity building, report writing, monitoring and evaluation and project phaseout. During each of these steps, students examine how to practice cultural sensitivity, stakeholder inclusion, local ownership and sustainability in a context-specific, adaptive manner. Case studies highlight essential themes selected from the Sustainable Development Goals (SDGs), a United Nations sponsored list of 17 development goals such as poverty alleviation, food security, health, education, gender equity and climate change action. The course also opens dialogue about how to go beyond the conventional framework of conflict sensitivity to realize conflict-transformative development.

PACS 70023 PEACE PSYCHOLOGY 3 Credit Hours

(Slashed with PACS 60023) This course provides students with an introduction to the concepts of peace psychology and how these concepts relate to wider themes of the peace and conflict studies field, including positive and negative peace, conflict resolution and reconciliation. During the course, students investigate the micro-level psychological foundations for peace and conflict (e.g., power and emotions) and group- and national-level dynamics. During each class, a variety of psychological approaches, from neuroscience to political psychology, are discussed. This course is highly interactive, focusing on experiential learning and education. This means students should be prepared to participate during discussions, simulations and presentations. Collaborative work and case studies help students develop their ability to apply and assess peace psychology theories. Students also have opportunities to personalize course content and assignments to support their learning and research interests.
