*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Master of Education degree in Reading Specialization develops practical and professional knowledge that is essential for educators concerned with the improvement of literacy at all instructional levels. Students study the nature of the reading and writing processes; the interrelationships between language, literature and literacy; literacy learning and teaching; the nature and needs of students who find reading and writing difficult; reading and writing as vehicles for learning and enjoyment; and the role of research in literacy instruction.

Admission Requirements

- Bachelor’s degree from an accredited college or university
- Minimum 2.750 undergraduate GPA on a 4.000 point scale
- Official transcript(s)
- Goal statement
- Two letters of recommendation
- English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  - Minimum 550 TOEFL PBT score (paper-based version)
  - Minimum 79 TOEFL IBT score (Internet-based version)
  - Minimum 77 MELAB score
  - Minimum 6.5 IELTS score
  - Minimum 58 PTE score
  - Minimum 110 Duolingo English Test score

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate outstanding or satisfactory knowledge of the foundations of reading and writing processes and instruction.
2. Use a wide range of instructional practices, approaches, methods and curriculum materials to support reading and writing instruction.
3. Use a variety of assessment tools and practices to plan and evaluate effective reading instruction.
4. Create and engage their students in literacy practices that develop awareness, understanding, respect and valuing of differences in society.
5. Create a literate environment that fosters reading and writing by integrating foundational knowledge, use of instructional practices, approaches and methods, curriculum materials and the appropriate use of assessments.
6. View professional development as a career long effort and responsibility.

Description
The Bachelor of Science degree in Sport, Exercise and Performance Psychology provide students, athletes and those preparing for careers as coaches and sport practitioners with the knowledge of psychological theory and skills to enhance human behavior in the sport and exercise settings and the performing arts. The major differs from existing sport-related bachelor’s degree programs due to its focus on psychological processes related to sport performance, as opposed to existing programs that focus on pedagogical, physiological or the business aspects of sport performance.

The Sport, Exercise and Performance Psychology major explores social-psychological concepts such as motivation, self-confidence, anxiety or burnout, and how these concepts interact with the sport environment to influence athletes (e.g., losing focus under pressure or having self-doubts during a game) and performance. The program prepares students with essential knowledge of psychological aspects of sport performance and ethical practice to work in wide-ranging sport-related fields or to further their education in their chosen careers via graduate programs and mental performance certification by the Association of Applied Sport Psychology.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Program Learning Outcomes
Graduates of this program will be able to:
1. Explain the role of the individual and the environments in sport and exercise behavior.
2. Demonstrate understanding of the foundation of motivation in sport sciences, learning and personal life.
3. Define and illustrate the concepts, tools and application of mental skills and performance enhancement.
4. Design and evaluate an applied research study from inception to conclusions.
5. Define the standards for competence, domestic and global diversity and ethical principles (i.e., AASP and APA) and its role in sport psychology professional practice.

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Description
The Sport, Exercise and Performance Psychology minor provides students, athletes and those preparing for careers in coaching, performing arts, sport practitioners and sport administrators with the knowledge of psychological theory and skills development to enhance human behavior in sport and exercise settings and artistic performance. The minor explores social-psychological concepts such as motivation, self-confidence, concentration, anxiety or burnout, and how these concepts can influence a sport environment (e.g., losing focus under pressure or self-doubt during a game), and the performing and creative artistic domain (e.g., lifestyle stresses, self-esteem or confidence.) Students are prepared to work in a wide-range of sport-related fields or to further their education in their chosen careers by continuing to a graduate program and certification.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes
Graduates of this program will be able to:
1. Gain knowledge and skills on the influences of the psychological aspects of exercise, injury and physical activity on performance.
2. Achieve a greater understanding of performance and achievement within the context of sport at a variety of levels, with diverse populations and in many different sports.
3. Consider a holistic perspective of sport, which includes athlete-centered coaching, cultural competence, development of character and life lessons through youth sport.
4. Demonstrate cultural competence, effective leadership and ethical decision-making skills.

Teaching and Learning with Technology - Minor
College of Education Health and Human Services
School of Teaching, Learning and Curriculum Studies
The Teaching and Learning with Technology minor will provide students with the tools to acquire the knowledge and concrete skills to deploy educational technology theories and strategies in multiple fields while working at educational institutions, communication-related companies, public health entities and other industries.

This certificate is for both students in an education or non-education major. Education students will strengthen their know-how in learning innovations while being exposed to interdisciplinary stimuli and references and expanding their professional and academic horizon. Non-education students will access the most recent best practices in educational technology, applying them in their own field of reference and beyond.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare this minor, students must have attempted a minimum 12 credit hours at Kent State and earned a minimum 2.000 overall Kent State GPA. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**Program Learning Outcomes**

Graduates of the program will be able to:

1. Identify and evaluate main factors and processes related the role of technology in improving learning and teaching practices at any level, from preK-12 education to professional development needs
2. Deploy learning technologies and related strategies to fields like public health and communication
3. Design technology-mediated solutions for improving education and related best practices

4. Develop interventions for increasing learning outcomes and performances in education, communication, and public health

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Teaching and Learning with Technology undergraduate certificate provides students with the tools to acquire the knowledge and concrete skills to deploy educational technology theories and strategies in multiple fields while working at educational institutions, communication-related companies, public health entities and other industries.

This certificate is for both students in an education or non-education field. Non-education students will access the most recent best practices in educational technology, applying them in their own field of reference and beyond.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Assigning Out-of-Sequence Students to Clinical Nursing Courses

1. Students are responsible for contacting Student Services, Room 216, Henderson Hall to make arrangements for repeating a nursing course.
2. Readmission to the B.S.N. sequence for any reason is on a “space available” basis. Students already progressing in sequence have priority in placement over those requesting re-enrollment. Accelerated B.S.N. students have priority in summer scheduling.
3. Students are enrolled in courses using the following guidelines in order:
   a. Are in good standing but lost a semester with verified illness or military service.
   b. Have failed and successfully repeated a clinical course.
   c. Have withdrawn from one course.
   d. Have withdrawn from a course more than once.
   e. Cumulative grade point average at the time of registration.

Clinical Compliance Policy

This policy applies to all students enrolled in B.S.N., M.S.N., D.N.P. degree programs and postmaster’s certificates. Students must provide documentation of the following items to a third-party vendor that is approved to track and maintain student health and other compliance documents. Students are responsible for all costs incurred in meeting the requirements for clinical compliance and for establishing and maintaining their third party account profile. Students in the B.S.N., M.S.N. and D.N.P. degree programs and College of Nursing post-master’s certificates must be fully compliant with this policy prior to registering for their first practicum course.

Requirements

1. Current American Heart Association Basic Life Support for Healthcare Provider certification in cardiopulmonary resuscitation (CPR) or American Red Cross CPR/AED. Ph.D. students must have CPR certification within the first semester of enrollment.
2. Background Check: Students are required to submit federal and state criminal background checks and incur the related costs. International students must meet university policy for admission.
3. Healthcare Insurance: Students must provide proof of health insurance. Students can submit either (a) a copy of an insurance card with the student’s name on the card or (b) a copy of the health insurance statement coverage that indicates that the student is covered.
4. Immunizations/Immune Status Testing: Evidence of the required immunizations/tests must be provided on the Immunization and Physical Compliance Form available from the Office of Student Services. The form must be completed, dated and signed by a licensed health care provider then uploaded to the third party vendor’s portal.
5. Physical examination: A physical examination is required within one year prior to admission to a clinical site. For students admitted into the B.S.N., M.S.N. and D.N.P. degrees or post-master’s certificates, the provider conducting the physical must indicate that the student can perform activities in the nursing student’s clinical and practicum courses, or can do so with reasonable accommodations, and is free of all communicable diseases. Students should request accommodations from the Office Student Accessibility Services. Failure to obtain the physical examination or the provider assurance may prevent the university from placing the student in a clinical setting.

Students who have allergic reactions, medical waivers, refuse vaccinations or other physiological conditions that preclude them from receiving vaccinations are required to contact the Office of Student Services upon admission to their academic program. Such conditions may prevent students from completing clinical/practical coursework at some partner agencies which may result in a delay of graduation.

Registered Nurse (RN) Licensure

Students enrolled in the B.S.N. (Nursing for Registered Nurses major), M.S.N., and D.N.P. degrees or post-master’s certificates must have an active, unrestricted RN license in either (1) the state of Ohio for students taking on-campus courses or who will be completing practica in Ohio or (2) the state of residence and practice for applicants residing and completing practicum outside Ohio. They must obtain proof of the appropriate licensure within the first semester of their program or before starting their practicum hours, whichever comes first.

Students in the Ph.D. degree must have an active unrestricted Ohio RN license—or for international students, proof of legal ability to practice as a RN in country of origin. They must show proof of license at the time of admission into the Ph.D. degree.

Uniform for Clinical Experience

1. The uniform consists of a white tunic top and blue pants embroidered with the Kent State University College of Nursing logo. Any student expecting a modification of the uniform should speak first with the Kent State University Associate Dean of Undergraduate Programs.

2. Students are required to purchase two sets of the official embroidered uniform, an embroidered white scrub jacket, and the required College of Nursing name tag, which must be worn at all times during each clinical experience (per Ohio Board of Nursing). Uniforms may only be purchased from the uniform company authorized to sell official Kent State University College of Nursing uniforms.

3. Female students who need a maternity uniform should contact the official Kent State University College of Nursing uniform company to purchase a maternity uniform embroidered with the Kent State University College of Nursing logo, similar to the typical tunic and pants.

4. Students requiring a uniform dress to meet religious guidelines should contact the official Kent State University College of Nursing uniform company to purchase a uniform embroidered with the Kent State University College of Nursing logo dress similar in style to the tunic top.

5. In selected areas such as obstetrics, community health, and psychiatric/mental health, scrubs or street clothes are worn. Specific apparel requirements for these areas are provided by the affiliating clinical agencies, the course syllabus and/or the faculty.

6. It is required that baccalaureate nursing students dress in a professional manner at all times in the clinical area. In order to maintain a professional appearance, a limited number of accessories may be worn with the uniform:
   a. A watch with a second hand, a single pair of plain gold or silver posts worn in the lower ear lobe of pierced ears and a wedding band are acceptable in most settings.
   b. A chain that does not show when worn may also be acceptable, depending on the clinical agency.
   c. Not permitted in the clinical area are visible piercings with jewelry in places other than the lower ear lobes (e.g. upper ear, nose, tongue, eyebrows, etc.). All open piercing must remain empty. Spacers are not permitted while attending clinical experiences.

7. While at the clinical agency, tattoos must be covered with a long sleeve top, white or neutral undershirt, socks or dressing/band aid.

8. If nail polish is worn, only a clear or light, neutral shade is permitted. Nails should be trimmed to avoid extending beyond the end of the fingers. Per OSHA rules, artificial nails may not be worn in any clinical facility.

9. Hair should be neat and worn above the collar in a style becoming to the person. If hair is longer than collar length, it must be pulled back to avoid contact with patients while performing procedures. Hair of unnatural color is unacceptable. Established beards are to be neatly trimmed. Males without beards are to be clean shaven.

10. Prior to the first clinical experience, students are required to provide documentation to the Assistant Dean of the Undergraduate program if they must adhere to specific religious dress and head covering restrictions.

11. Shoes should be clean and in good repair. With the official Kent State University College of Nursing uniform, students may wear white nursing shoes; white, closed front clogs with backs; or white, leather athletic shoes, without large or colorful logos.

12. At all times during clinical experiences, students must adhere to the uniform code of Kent State University College of Nursing. Clinical agency policies may be more restrictive and require further or additional accommodations by students.

Not Permitted to Continue Policy within the College of Nursing

1. Undergraduate Students who fail any two nursing courses, or any single course twice will be not permitted to continue in the professional nursing sequence. NURS 10060 and NURS 20950 or approved NURS special topics courses (NURS 31095 and NURS 41095) are exempt from this rule. Students will have their major switched to nursing in this situation.
   a. Reinstated students in the College of Nursing will not be permitted to continue in the Nursing program if the student fails one nursing course.

2. Traditional and Accelerated B.S.N. students must have a minimum cumulative GPA of 2.00 each semester to continue in the Nursing program. Failure to achieve this GPA each semester will result in not being permitted to continue in the professional nursing sequence. Students will have their major switched to nursing in this situation.

3. The College of Nursing retains the right to not permit a student to continue in the program if deemed to violate:
   a. Any policy within the College of Nursing Student handbooks or of affiliating facilities.
b. Professional behavior and role development standards as outlined in College of Nursing, university, or affiliating agency policies of handbooks.

4. Reinstated students must pass all nursing courses with a grade of C or better. Students who fail to earn a C in any nursing course will not be permitted to continue in the Professional Nursing Sequence and will have their major changed to nursing.

Repeat of Nursing Courses

1. A student who does not attain a GPA of 2.000 (grade of C) in a nursing clinical course cannot proceed to the next academic level. A student who does not earn a 2.000 (grade of C) in a nursing course must repeat this course based on seat availability.

2. A student can repeat a single nursing course only one time. A student who earns below a 2.000 (grade of C) in a second (or is repeating a failure) nursing course will be not be permitted to continue in the program within the College of Nursing.

3. This policy excludes NURS 10060, NURS 20950 and NURS 31010.

4. Accelerated B.S.N. students who fail a course will no longer continue in the Accelerated concentration, but can continue in the Traditional B.S.N. program.

Reinstatement Into the College of Nursing

Applications for readmission to the College of Nursing following Not Permitted to Continue will be reviewed on an individual basis. Students wishing to appeal their Not Permitted to Continue decision should contact the Office of Student Services in Henderson Hall for the detailed procedure related to such an appeal.

Changing Campuses

1. Traditional and Accelerated B.S.N. students are admitted by campus and are required to complete the B.S.N. program at their admitted campus of origin.

2. Students wishing to change campuses during their program must comply with the following guidelines in order:
   a. Once campus rosters have been set based on the procedure for assigning students, who are in-sequence and approved to switch campuses by the Associate Dean of Undergraduate Programs may be placed.
   b. Students who are out of sequence may switch campuses in order to repeat courses based on the order established for assigning out-of-sequence students. No approval by Associate Dean of Undergraduate Programs is needed in this instance. Students will be directed to return to their campus of origin, once they have successfully repeated their course at another campus.

Science GPA Calculation Policy

The first year science course GPA is an average of all recorded science grades for each of the College of Nursing BSN prerequisite science courses.

NURS 20025  PHARMACOLOGY AND ALTERATIONS IN PHYSIOLOGICAL FUNCTIONING I  3 Credit Hours
This course provides nursing students with an introduction to the basic principles of pathophysiology and pharmacology. It offers a general understanding of pathophysiologic processes of body systems and the major classes of pharmacotherapeutic agents that are used to treat these pathophysiologic processes. The course focuses on mechanisms of action, effects of medications, pharmacodynamics, pharmacokinetics, as well as principles that guide the administration of medications, dosage, and nursing responsibilities. Age and cultural differences related medication administration will be addressed throughout the course. Students must be admitted to the Professional Nursing Sequence to be able register for this course.
Prerequisite: NURS 20020 or NURS 20040 (as a corequisite); and nursing major; and sophomore standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 20030  FOUNDATIONS OF NURSING INTERVENTIONS  5 Credit Hours
Foundations of nursing interventions focuses on selected aspects of nursing care to improve the health of individuals within families and groups. Utilizes principles of the interpersonal process, nursing process and professional nursing. Students must be admitted to the Professional Nursing Sequence to be able register for this course.
Prerequisite: NURS 20020 with a minimum C grade.
Schedule Type: Clinical Laboratory, Laboratory, Lecture
Contact Hours: 2 lecture, 3 lab, 6 other
Grade Mode: Standard Letter

NURS 20040  FUNDAMENTALS OF NURSING  8 Credit Hours
Foundations of Nursing focuses on selected aspects of nursing care to improve the health of individuals within families and communities. Individuals are assessed as members of families and community members. Communication in nursing is explored. Principles of the interpersonal process, nursing process, and professional nursing are utilized. Students must be admitted to the Professional Nursing Sequence to be able register for this course.

Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

NURS 35020  TRANSCULTURAL NURSING AND HEALTH CARE  3 Credit Hours
Provides students with the opportunity to explore and understand the role of the transcultural nurse in the care of patients from multiple and diverse cultural groups.
Prerequisite: Junior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 35030  PATHOPHYSIOLOGY: ANALYSIS AND APPLICATION OF THE NURSING PROCESS  3 Credit Hours
Enhances the understanding of pathophysiologic processes, the management of disease states, and analysis of related concepts of pharmacology, symptomology and lab interpretation of data for the purpose of identification of priority nursing diagnosis and formulation of care plans appropriate for individual disease processes.
Prerequisite: Minimum C grade in NURS 20020, NURS 20030, NURS 30035 and NURS 30060; and nursing major; and junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
NURS 35040  COMPLEMENTARY AND INTEGRATIVE HEALTH  3 Credit Hours
(Repeatable for credit) Explores and critically analyzes complementary and integrative health therapies, products, and supplements primarily being used in the United States through the review of evidenced based research and case studies. Synthesizing the exploration of complementary and integrative health practices that are often used in conjunction with traditional Western medicine, students examine the evolving Integrative Health, which has also been called Integrative Medicine, or Complementary and Alternative Medicine.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 35050  ADVANCED MEDICAL SURGICAL SIMULATION  3 Credit Hours
Provides students opportunities for critical thinking and decision making through the use of human patient simulation. Theory, content and hands on application advance students’ clinical judgement and competence in caring for patients of advancing complexity and those in crisis situations.
Prerequisite: NURS 20030 with a minimum C grade.
Corequisite: NURS 30010, NURS 30020 and NURS 30035.
Schedule Type: Combined Lecture and Lab
Contact Hours: 1.5 lecture, 1.5 lab
Grade Mode: Standard Letter

NURS 35060  CRITICAL THINKING AND TEST TAKING SKILLS  2 Credit Hours
(Repeatable once for credit) The focus of this course is to understand the art of analyzing and evaluating one's thinking. The focus is on how a person thinks and how they can improve their thinking. This course is designed for nursing students seeking to expand their critical thinking ability and improve studying and test taking skills. This course promotes analysis and evaluation of problem solving abilities and requires self-directed, self-disciplined and corrective thinking. The student will explore and develop individual plans with the course faculty person to improve their studying and test taking skills.
Prerequisite: Enrolled in the college of nursing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 35065  STUDENTS HELPING STUDENTS: A STUDENT MENTORING COURSE  2 Credit Hours
(Repeatable once for credit) This course is designed for the junior or senior student that has demonstrated a strong understanding of one or more course topics and who desires to function in the role of a mentor or tutor. Throughout the course the student will utilize skills learned in the course while engaging in a mentor tutor relationship with students of a lower class rank in need of mentoring and or tutoring.
Prerequisite: Nursing major; and junior and senior standing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 35070  NURSING ETHICS IN CLINICAL PRACTICE  3 Credit Hours
This course focuses on the principles and the theories related to the ethical challenges faced by today's health care professionals. It explores the ethical obligations of the professional nurse's role as a member of the interdisciplinary team, provider, leader and manager of care. This course further emphasizes methods of analyzing and resolving moral dilemmas using clinical decision making skills that can be applied to the clinical setting.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 35075  INTRODUCTION TO FORENSIC NURSING  3 Credit Hours
This course will explore the basic concepts and foundations of forensic nursing in both criminal and civil contexts. The different roles and responsibilities of the forensic nurse in the investigation of violence and trauma, as well as the integration of scientific, ethical and legal principles into the acute care and community nursing practice will be examined. Providing specialized, holistic care of victims and families will be stressed. Students will review victimology, evaluate prevalent population-based health issues and explore forensic nursing interventions.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 35080  CONTEMPORARY ISSUES IN NURSING PRACTICE AND HEALTH CARE  3 Credit Hours
This course provides the student an opportunity to focus on diverse contemporary issues in professional nursing practice and the health care environment. Content promotes critical thinking pertaining to emerging issues in society and how the topics impact practicing nurses, the nursing profession, the delivery of care, and the health-wellness continuum. This course will encompass evidence-based theory, which correlates with the relevant issues and explores avenues for improved health care.
Prerequisite: Special approval.

Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 40010  NURSING OF THE CRITICALLY ILL  4 Credit Hours
Holistic approach to assessing, intervening and evaluating critically ill persons. Nursing practice in critical care settings with diverse populations. This course integrates concepts to prepare students to deliver culturally congruent and appropriate care. Students must be admitted to the Professional Nursing Sequence to be able register for this course.
Prerequisite: Minimum C grade in NURS 30010, NURS 30020, NURS 30025, NURS 30035 and NURS 30050.
Schedule Type: Clinical Laboratory, Laboratory, Lecture
Contact Hours: 2 lecture, .8 lab, 4 other
Grade Mode: Standard Letter

NURS 40020  COMMUNITY HEALTH NURSING (DIVG)  4 Credit Hours
Concepts of community health nursing with emphasis on health promotion and prevention of population-based health problems, locally and globally. This course integrates concepts to prepare students to deliver culturally congruent and appropriate care in the United States and across the world. Students will gain insight into the health problems facing diverse populations. Students will use an epidemiological approach to assess community health and identify subgroups within the community or globally that are at risk for disease, disability, and premature death. Students must be admitted to the Professional Nursing Sequence to be able to register for this course. Students are responsible for their transportation to field experience.
Prerequisite: Minimum C grade in NURS 30010, NURS 30020, NURS 30025, NURS 30035 and NURS 30050.
Corequisite: NURS 40030.
Schedule Type: Clinical Laboratory, Laboratory, Lecture
Contact Hours: 2.3 lecture, .4 lab, 3.9 other
Grade Mode: Standard Letter
Attributes: Diversity Global

NURS 40025  PROFESSIONAL AND EVIDENCE-BASED PRACTICE  3 Credit Hours
This course introduces the student to the process of identifying quality research studies and applying the findings to nursing practice to improve patient outcomes. This course also focuses on professional development and the transition from student to graduate nurse, including interviewing techniques and resume preparation. Explores health care economics and policy, political activism, cultural competence, nursing theory, leadership of meetings and managing group dynamics, the future of nursing and health care, nursing practice opportunities, role development, professional nursing organizations, graduate education and specialty certification. Students have the opportunity to attend a professional nursing organization meeting. Students must be admitted to the Professional Nursing Sequence to be able register for this course.
Prerequisite: NURS 30010 and NURS 30050 with a minimum C grade; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 40030  PSYCHIATRIC MENTAL HEALTH NURSING  4 Credit Hours
Focuses on the development of therapeutic relationships with individuals, families and vulnerable populations across the lifespan who have potential and or identified mental health needs. Students will learn and apply theory about mental health and illness and demonstrate psychiatric nursing skills and interventions in caring for persons living with mental illness. This course integrates concepts to prepare students to deliver culturally congruent and appropriate care.
Prerequisite: Minimum C grade in NURS 30010, NURS 30020, NURS 30025, NURS 30035 and NURS 30050.
Schedule Type: Clinical Laboratory, Laboratory, Lecture
Contact Hours: 2 lecture, .4 lab, 4 other
Grade Mode: Standard Letter

NURS 40045  INTEGRATION OF LEADERSHIP AND MANAGEMENT IN NURSING (ELR)  6 Credit Hours
Course provides students with the knowledge and skills for a beginning leadership position (team leader, module leader and primary nurse), applicable to the care of patients in a health care environment. Course provides students with opportunities to synthesize their nursing knowledge and collaborate with their clinical preceptor in preparation for their professional nursing role. This course integrates concepts to prepare students to deliver culturally congruent and appropriate care. NURS 70640  ADVANCED LEADERSHIP IN HEALTHCARE  3 Credit Hours
Advanced competencies of the doctoral-prepared advanced practice nurse for transformational leadership in healthcare to improve patient and population health outcomes are addressed. Five key leadership competencies including creating and leading change, self-knowledge, strategic vision; interpersonal communication; and organizational effectiveness are presented with examples and case studies. Transcending themes of ethics, research, interprofessional collaboration, creativity, and insuring accountability are addressed throughout the course. Students conduct a self-assessment, and develop and implement individualized action plans for advanced competency in interprofessional healthcare leadership.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70650  ORGANIZATIONAL SYSTEMS  3 Credit Hours
Building on the skills in Advanced Leadership for Healthcare Providers, students will gain an understanding of organizational culture and management structures that contribute to the design and delivery of healthcare. Economic, political and cultural aspects of organizational systems will be discussed.
Prerequisite: NURS 70640; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70670  QUALITY IMPROVEMENT IN HEALTHCARE DELIVERY  3 Credit Hours
Focus on the design, implementation and evaluation of quality and patient safety initiatives to improve healthcare delivery at the individual patient and system levels. Data necessary to support quality initiatives will be considered as well as policy, legal and ethical implications.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
NURS 70680  POPULATION HEALTH  3 Credit Hours
Students will explore care delivery models and strategies for health promotion and disease prevention in individuals, aggregates and populations. Gaps in care and healthcare access will be explored, including social, cultural, economic, and policy and political barriers. The role of genomics in healthcare delivery of populations will be discussed. Students will develop skills to design and evaluate health promotion and disease prevention programs.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70685  HEALTHCARE FINANCE AND ECONOMIC POLICY  3 Credit Hours
Students will gain an understanding of healthcare finance, economics and policy on healthcare delivery systems. The impact of current healthcare laws-policies (Affordable Care Act, HCAHPS, and other care delivery and reimbursement strategies) will be discussed. The DNP prepared nurses' role in patient advocacy and policy development will be discussed. Student will gain an understanding of cost-benefit analyses and creating budgets to support the design, implementation and sustainability of healthcare delivery initiatives.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70710  HISTORY AND PHILOSOPHY OF NURSING SCIENCE  2 Credit Hours
This course examines the nature and metaphysics and epistemology and the influence of contemporary Eastern and Western philosophies on the developing epistemology of disciplinary nursing knowledge.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 70711  SCIENTIFIC WRITING  2 Credit Hours
This course covers how to conduct several types of literature reviews. Students will conduct a literature review relevant to their research interest, synthesize the literature, identify gaps, and write a synthesis of the literature. Ethical issues and authorship considerations are discussed.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 70712  RESEARCH DESIGN FUNDAMENTALS  2 Credit Hours
The course focuses on learning fundamental methodological concepts and tools that enable an understanding of research problems and serve as a basis to conduct quantitative and qualitative research. There is emphasis on linking theory and research models to research questions, hypotheses and designs.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 70713  ADVANCED STATISTICS I  2 Credit Hours
This course focuses on learning introductory descriptive, parametric and non-parametric statistical models. Students learn how to enter, clean, and handle missing data, as well as perform analyses using SPSS. Expected outcomes are a conceptual understanding of statistical models covered in the course, interpretation of output of statistical analyses, and communication of findings in oral and written work.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

NURS 70714  LEADERSHIP FOR NURSING SCIENCE  3 Credit Hours
This course focuses on the development of the nurse scientist as a leader across health care and higher educational systems, as well as in influencing and formulating healthcare policy.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70715  THEORY CONSTRUCTION AND DEVELOPMENT IN NURSING  3 Credit Hours
This course examines strategies for theory development including logical-empirical-deductive and inductive approaches. Emphasis will be on elements and strategies used in theory building.
Prerequisite: NURS 70710; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70740  ADVANCED STATISTICS II  3 Credit Hours
This course provides in-depth knowledge of regression, general linear model, and exploratory factor analysis statistical models. Course outcomes include a conceptual understanding of these models and the ability to conduct and interpret output of statistical analyses and communicate findings in oral and written work. Knowledge of SPSS is required.
Prerequisite: NURS 70713; and doctoral standing.
Schedule Type: Lecture
Grade Mode: Standard Letter

NURS 70741  ADVANCED STATISTICS III  3 Credit Hours
This course focuses on more advanced statistical models used in nursing, including but not limited to, confirmatory factor analysis, path analysis and structural equation modeling. Course outcomes are a conceptual understanding of these models and ability to interpret output of statistical analyses and communicate findings in oral and written work.
Prerequisite: NURS 70740; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70742  ADVANCED QUALITATIVE METHODS FOR HEALTH SCIENCES  4 Credit Hours
Select qualitative research methods used to study nursing phenomena are examined. Theory and philosophical underpinnings, design, recruitment, data collection and analysis, evaluation of rigor, and ethical issues for major qualitative methods are discussed.
Prerequisite: NURS 70710, NURS 70712 and NURS 70715; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Standard Letter
NURS 70743  ADVANCED QUANTITATIVE METHODS FOR HEALTH SCIENCES  4 Credit Hours
This course extends knowledge of quantitative research designs for nursing and focuses on cross-sectional, cohort, and case control studies, and clinical trials. Advanced knowledge of measurement, sampling, data collection and methods to improve quantitative design rigor is covered. There is emphasis on application of course content to a selected research question or hypothesis.
Prerequisite: NURS 70710, NURS 70712 and NURS 70715; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Standard Letter

NURS 70744  PROPOSAL DEVELOPMENT  3 Credit Hours
In this course, students will critically evaluate existing literature to develop persuasive and methodologically sound arguments addressing at least one critical gap for nursing science. Focus is on study design, scope, and feasibility of projects that culminate in a dissertation proposal first draft.
Prerequisite: NURS 70742 and NURS 70743; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70791  VARIABLE CONTENT SEMINAR: EMERGING ISSUES IN NURSING SCIENCE AND RESEARCH  3 Credit Hours
(Repeatable for credit) This seminar course will examine in-depth current scientific trends and emerging topics in nursing research.
Prerequisite: NURS 70742 and NURS 70743; and doctoral standing.
Schedule Type: Seminar
Contact Hours: 3 lecture
Grade Mode: Standard Letter

NURS 70795  SPECIAL TOPICS IN NURSING  2-6 Credit Hours
(Repeatable for credit) Study of important topics in nursing practice, research on the profession. Offering in response to existing interests and opportunities.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 2-6 lecture
Grade Mode: Standard Letter

NURS 70796  INDIVIDUAL INVESTIGATION IN NURSING  1-3 Credit Hours
(Repeatable for credit) Individual enrollment for independent study in nursing carried out by student under supervision of a doctoral faculty member.
Prerequisite: Doctoral standing.
Schedule Type: Individual Investigation
Contact Hours: 1-3 other
Grade Mode: Standard Letter

NURS 80199  DISSERTATION I  15 Credit Hours
(Repeatable for credit) Independent doctoral research for the dissertation under faculty supervision. Registration of at least two semesters is required, continuing until completion of 30 credit hours. Akron 8200:899.
Prerequisite: Admission to doctoral candidacy; and doctoral standing.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

NURS 80299  DISSERTATION II  15 Credit Hours
(Repeatable for credit) Continuing registration of research, after initial 30 hours of Dissertation I.
Prerequisite: 30 hours of NURS 80199; and doctoral standing.

Description
The Adult/Adolescent Sexual Assault Nurse Examiner graduate certificate provides registered nurses the specialized training necessary to be certified as a sexual assault nurse examiner (SANE) for adult and adolescent patients. A SANE provides comprehensive care to victims of sexual assault or abuse. In addition, they conduct a forensic examination and may provide expert testimony if a case goes to trial.

Nurses receive their SANE certification through the International Association of Forensic Nurses, Commission on Forensic Nursing Certification. To be certified, nurses with a minimum of two years of full-time experience must have completed a minimum of 40 hours of sexual assault education; worked under the supervision of an expert (e.g., SANE-certified nurse); performed enough sexual assault exams to demonstrate clinical competency; and successfully passed a certification test.

The certificate's didactic courses will be offered on-ground and online at the Kent Campus, and the practicum experiences will be conducted at the Sexual Assault Evidence Collection and Care Facility of Cleveland Clinic Akron General.

Admission Requirements
- Bachelor's or master's degree from an accredited nursing program
- Minimum 3.000 undergraduate or graduate GPA on a 4.000 point scale
- Official transcript(s)
- Active, unrestricted registered nurse license in the state of Ohio

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Science in Nursing degree in Nursing prepares practitioners for professional nursing, helps them understand their role in society and prepares them for graduate study. The program emphasizes professional knowledge, skills and compassionate nursing practices. Students begin with courses that demonstrate the core foundations of the nursing profession and its historical roots. The capstone preceptorship exposes students to research and professional-practice concepts that will ensure their abilities to be nurse leaders and healthcare advocates.

Throughout the curriculum, students study life-span and cultural diversity issues while applying evidence-based practice to their profession.

The Nursing major includes the following optional concentration:

• The **Accelerated Second Degree** concentration is for students who hold a bachelor’s degree and wish to pursue the B.S.N. degree in an accelerated manner.
Accreditation
The B.S.N. degree in Nursing at Kent State University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students: Admission to the Nursing major is selective; the process is competitive, and acceptance is never guaranteed. Prospective applicants must have completed:

- High school level mathematics. High school level biology and chemistry are recommended. (effective spring 2023, the completion of high school level biology and chemistry are required)
- In addition, students must have achieved one of the following:
  - Minimum 2.7 overall high school grade point average (on a 4.0 scale), and a minimum 22 ACT composite or a minimum 1100 SAT score.
  - Minimum 3.0 overall high school grade point average (on a 4.0 scale);

Transfer Students: Admission to the Nursing major requires minimum 30 credit hours, a minimum 2.750 GPA in all coursework and a minimum 2.750 GPA in the required sciences—BSCI 21010, BSCI 21020, BSCI 30171 and CHEM 10050, CHEM 10055 or CHEM 10060—including a minimum C grade in each course. Students who have failed out of another nursing program are not eligible for admission the four-year Bachelor of Science in Nursing.

Transfer students who have successfully completed minimum 12 credit hours at Kent State University will be evaluated on their Kent State overall GPA only along with the previously described admission criteria. Transfer students from another accredited B.S.N. degree who have completed at least one laboratory or clinical course must have achieved the following for admission to Kent State's B.S.N. degree:

- Minimum 3.200 overall GPA in all college-level coursework
- Minimum 2.75 GPA for the required (or equivalent) science courses in Kent State’s B.S.N. degree
- Minimum C grade on the first attempt in all nursing courses in the current nursing curriculum
- Good academic standing at current college or university

Admission to the Accelerated Second Degree concentration: Admission to the concentration requires a completed bachelor’s degree with a minimum overall 2.75 GPA. Accelerated students must have all college-level core and nursing prerequisite courses complete:

- Anatomy and Physiology (BSCI 21010 and BSCI 21020)
- Microbiology (BSCI 20021 or BSCI 30171)
- Genetics (BSCI 30050 or BSCI 30156)
- Chemistry (CHEM 10050, CHEM 10055 or CHEM 10060)
- Psychology (PSYC 11762)
- Human Growth and Development (NURS 20950)
- Sociology (SOC 12050 or SOC 22778)
- Statistics
- Mathematics (MATH 10772, MATH 11010, MATH 12002, MATH 10775, MATH 12011, MATH 11009, MATH 11022 or MATH 11012)
- Nutrition (NUTR 23511)
- Minimum 2.75 overall GPA and minimum 2.75 science GPA
- Minimum C grade in all science and mathematics courses

English Language Proficiency Requirements for International Students:
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of this program will be able to:

1. Meet educational eligibility requirements to take the registered nurse licensing examination (National Certification and Licensure Exam).
2. Acquire competencies based on professional standards to assume the role of the professional nurse and for career advancement, including graduate studies.
3. Apply the nursing process in providing evidence-based, culturally sensitive care to promote health and adaptation of individuals, families, groups and communities.

Professional Licensure Disclosure
This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Destination Kent State: First Year Experience 1

Course is not required for students with 25 transfer credits, excluding College Credit Plus, or age 21+ at time of admission.

Diversity Domestic/Global (DIV/DIVG) 2 courses

Students must successfully complete one domestic and one global course, of which one must be from the Kent Core.

Experiential Learning Requirement (ELR) varies

Students must successfully complete one course or approved experience.

Kent Core (see table below) 36-37

Writing-intensive Course (WIC) 1 course

Students must earn a minimum C grade in the course.

Upper-Division Requirement 39

Students must successfully complete 39 upper-division (numbered 30000 to 49999) credit hours to graduate.

Total Credit Hour Requirement 120

Progression Requirements

- All students in the B.S.N. degree must have a minimum 2.000 overall GPA each semester to continue in the program; failure to achieve this GPA each semester will result in not permitted to continue in the program.
- All students in the B.S.N. degree must have earned a minimum C grade in each science course required in the B.S.N. curriculum. All required chemistry and biology courses must be successfully completed with a minimum C grade to graduate with the B.S.N. degree.
- Students in the traditional and accelerated concentration must have a minimum C grade in each of the sophomore nursing courses to progress to the junior nursing sequence.
- Students in the traditional and accelerated concentration must have a minimum C grade in each of the junior nursing courses (NURS 30010, NURS 30020 and NURS 30035) to progress to the senior nursing sequence.
- Students in the traditional and accelerated Nursing major must have a minimum C grade in each of the senior nursing courses (NURS 40005, NURS 40010, NURS 40020, NURS 40030, NURS 40045 and NURS 40872) to progress and graduate.
- Students in the accelerated concentration and LPN and Allied Health to B.S.N. sequence may take junior- and senior-level courses concurrently as specified by their curriculum.
- Students in the traditional Nursing major may take a maximum of two clinical courses each semester.
- Students in the accelerated concentration and LPN and Allied Health to B.S.N. sequence are permitted to take three clinical courses each term, as specified by their curriculum.
- Students in the accelerated concentration and LPN and Allied Health to B.S.N. sequence who do not earn a C or better in any nursing courses will be transferred to the traditional B.S.N. course schedule.

Professional Nursing Sequence. Students are eligible to apply to the Professional Nursing Sequence during the semester in which they anticipate completing or have completed 30 credit hours.

Admission to the Professional Nursing Sequence is based on overall; and science GPA. Students who completed required prerequisite science courses while in the College Credit Plus (CCP) program may elect to repeat prerequisite science courses to be used in the calculation of the science GPA.

Students must meet all the following requirements to be eligible for admission to the Professional Nursing Sequence:

- Minimum 2.750 overall GPA
- Minimum 2.750 GPA in the required sciences:
  - BSCI 21010
  - BSCI 21020
  - BSCI 20021 or BSCI 30171
  - CHEM 10050 or CHEM 10055 or CHEM 10060
- Minimum C grade in each of the prerequisite science courses:
  - BSCI 21010
  - BSCI 21020
  - BSCI 20021 or BSCI 30171
  - CHEM 10050 or CHEM 10055 or CHEM 10060
- Completion of one of the following math courses with minimum C grade:
  - MATH 10772, MATH 10775, MATH 11009, MATH 11010, MATH 11012, MATH 12002, MATH 12011 MATH 11022 or MATH 12012

LPN and Allied Health to B.S.N. Sequence: Students who are pursuing the nursing major will need to complete all core and prerequisite coursework to be admitted to the Professional Nursing Sequence. Admission is competitive and is never guaranteed.

Admission checklist for the Professional Nursing Sequence for LPN and Allied Health to B.S.N. students:

- Students are eligible to make application during the semester in which they anticipate completing, or have completed the core courses, along with:
  - UC 10097
  - Approved statistics course
  - SOC 12050 or SOC 22778
  - NUTR 23511
  - NURS 40020
  - PSYC 11762
  - Mathematics elective (choose one: MATH 10772, MATH 11010, MATH 12002, MATH 10775, MATH 12011, MATH 11009, MATH 12012, MATH 11022 or MATH 11012)
  - Chemistry electives (CHEM 10050, CHEM 10055 or CHEM 10060)
  - BSCI 30050 or BSCI 30156
  - BSCI 20021 or BSCI 30171
  - BSCI 21020
  - BSCI 21010
  - NURS 10060
- Students must have a 2.750 overall GPA, and a 2.750 science GPA
- Students must earn minimum C grade in all science and mathematics courses
- Unrestricted practice license (priority admission is given to students with two or more years of practice in their field)

The college dean may review the student's educational files to determine if adequate progression has been made.

*Note

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Doctor of Nursing Practice degree in Nursing is the terminal degree for nurses who want to advance their knowledge of nursing practice, gain leadership and technology skills and become clinical scholars. Students develop leadership skills to affect health outcomes for individuals and populations by translating scientific evidence into clinical interventions,
managing healthcare systems and collaborating with other health care providers.

**Accreditation**

The D.N.P. degree in Nursing at Kent State University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

**Admission Requirements**

- Bachelor's degree in nursing or master's degree in advanced practice nursing that is accredited by the Commission on Collegiate Nursing Education or the Accreditation Commission for Education in Nursing
- Minimum overall 3.000 GPA on a 4.000 point scale
- Completion of an undergraduate- or graduate-level statistics course with a minimum C grade
- Active, unrestricted registered nurse license in the state in which the student's practica will be completed
- GRE scores, no more than five years old (only for post-Bachelor of Science in Nursing applicants)
- Résumé or curriculum vitae that demonstrates professional experience in nursing
- Essay (300 words) describing professional goals and reasons for seeking the professional practice doctorate
- Three letters of reference from health care professionals or academic faculty who can speak to the applicant's professional and academic abilities
- Pre-admission interview
- English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  - Minimum 560 TOEFL PBT score (paper-based version)
  - Minimum 83 TOEFL IBT score (Internet-based version)
  - Minimum 78 MELAB score
  - Minimum 6.5 IELTS score
  - Minimum 55 PTE score
  - Minimum 110 Duolingo English Test score

Students selected for admission to the nursing program must meet the College of Nursing's Clinical Compliance Policy. For more information about graduate admissions, please visit the Graduate Studies admission website. For more information on international admission, visit the Office of Global Education's admission website.

1. Upon admission to the D.N.P. degree, students who hold only a CCNE- or NLNAC-accredited bachelor's degree in nursing will be admitted also to the M.S.N. degree. This will allow students to complete M.S.N. coursework and enroll in some D.N.P. coursework after successfully completing their first two full-time semesters of graduate study. Students must first complete M.S.N. coursework, earn the M.S.N. degree and obtain APRN national certification before they can continue with D.N.P. coursework and earn the D.N.P. degree.

2. Students with a master's degree must submit proof of current, national certification as an advanced practice registered nurse within their first semester or prior to beginning their practicum hours, whichever comes first.

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Develop systems and strategies to promote health and fiscal outcomes across the healthcare continuum.
2. Provide expert, advanced nursing care to select populations within a variety of settings based on evidence, ethics, theory, professional standards and models of care.
3. Provide leadership and interdisciplinary consultation and collaboration to plan, implement and evaluate programs of care delivery to improve health outcomes.
4. Synthesize and translate evidence for implementation and dissemination to improve healthcare outcomes.

**Professional Licensure Disclosure**

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

Minimum Total Credit Hours: 34

1. Students must be continuously enrolled in NURS 70592 and complete a minimum of 7 credit hours (525 clock hours) of practicum in a clinical setting. If the student is unable to complete and successfully defend the scholarly project after being enrolled continuously for 7 credit hours (525 clock hours), the student must continuously enroll in 1 credit hour of NURS 70592 each semester, until the scholarly project is successfully defended. The IP grade will be used until the scholarly project is successfully defended, at which time all IP grades in NURS 70592 will be changed to satisfactory grades.

**Graduation Requirements**

Minimum Major GPA: 3.000

- Minimum B grade in all courses
- Completion of 525 clinical practice hours
• Submission and defense of a scholarly project to a committee that includes, at minimum, the student’s academic advisor and two other doctoral-prepared members. The project must result in a manuscript suitable for publication.

1 If the student does not earn a minimum B grade, the student must repeat the course and cannot take other courses that require that course as a prerequisite until the course is successfully repeated. If the student repeats the course and does not earn a minimum B grade, the student may be dismissed from the D.N.P. degree.

Description

The Master of Science in Nursing degree meets the educational eligibility requirements for national certification in the respective area of study. The degree program can be completed in four to five semesters (two full academic years) for full-time students. Part-time students typically take three to four years to complete the program. Completion of a thesis is optional.

The Nursing major comprises the following concentrations:

• The Adult Gerontology Acute Care Nurse Practitioner concentration allows students to attain advanced practice nursing competencies in providing evidence-based care to adults and older adults with complex acute and chronic illnesses. Clinical experiences occur in a variety of acute care settings, including general medical care, emergency care, critical care and specialty practice. Through clinical practicums, students provide direct patient care in collaboration with a team of health professionals to diagnose and treat patients across the continuum of health care services.

• The Adult Gerontology Clinical Nurse Specialist concentration fosters acquisition of the needed competencies to care for patients spanning the entire adult to older-adult spectrum. Class and clinical experiences focus on providing advanced nursing care across the health continuum, from wellness to acute care. Students develop competencies across the three spheres of impact: patient/direct care, nurses/nursing practice and organizations/systems.

• The Adult Gerontology Primary Care Nurse Practitioner concentration allows students to develop advanced practice nursing competencies in health promotion, risk detection, illness prevention and management of acute and chronic illnesses in adults and older adults. Clinical experiences involve direct care in collaboration with other health professionals to maximize the effectiveness of community and health care system services. Clinical practicums include primary care offices, such as internal medicine and family practice clinics, managed care offices, emergency departments, free clinics and long-term care and occupational health settings.

• The Family Nurse Practitioner concentration allows students to acquire advanced practice nursing competencies to provide continuity of health care to persons across the life span, as well as to maximize the effectiveness of community and health care system services through collaboration with other health professionals. Clinical experiences are offered in a variety of ambulatory care settings and specialty clinics in primary care offices, including family practice, internal medicine, managed care offices, emergency departments, long-term care facilities and academic and occupational health settings.

• The Nurse Educator concentration allows students to develop in-depth knowledge and expertise in selected areas of nursing
practice and the role of the nurse educator. Emphasis of the nurse educator role focuses on best practices in curriculum development, instruction and evaluation that prepare students for teaching within a variety of learning environments in academic and staff professional development settings. Students engage in individualized practicum experiences where they apply content learned throughout the graduate curriculum in both their area of nursing practice and the nurse educator role.

- The Nursing Administration and Health Systems Leadership concentration integrates management, leadership and nursing knowledge for students to develop skills and competencies in administration, systems leadership and advanced nursing.
- The Pediatric Primary Care Nurse Practitioner concentration focuses on health promotion, illness prevention, risk identification and acute and chronic care of infants, children and adolescents in the primary care setting. Practicum experiences take place in outpatient primary care and specialty settings; the experiences offer the opportunity for students to provide individualized and culturally competent advanced practice nursing care to children within the context of their families.
- The Psychiatric Mental Health Nurse Practitioner concentration builds on core advanced practice nursing knowledge. The program focuses on knowledge and skill development in mental health assessment and diagnostic reasoning, prescribing and medication management and advanced therapeutic modalities such as individual, group and family psychotherapy.
- The Women's Health Nurse Practitioner concentration prepares students to provide the highest level of primary nursing care for women involving health promotion and disease prevention. Students gain competency in advanced nursing management of common acute and chronic conditions. Students practice in direct care and in collaboration with other health care professionals. Practicum experiences foster development of clinical judgment and primary care skills through faculty mentorship and clinical preceptors in a variety of ambulatory care settings and specialty clinics.

Dual Degree with M.B.A. degree in Business Administration

Student have the opportunity to complete a dual degree program with the M.B.A. degree in Business Administration and the M.S.N degree in Nursing. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

The dual degree is for experienced nurses whose career goals include assuming middle or executive management positions in health services agencies or in health-related companies, or who are interested in starting their own businesses. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities.

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Ph.D. degree in Nursing prepares nurse scientists to develop methods to advance health, health care and the nursing profession. Graduates are expected to lead and promote interprofessional innovative scholarly endeavors and to assume leadership roles in the profession.

Admission Requirements
- Active, unrestricted U.S. registered nurse license (international students need to show proof of legal ability to practice as a registered nurse in country of origin)
- Bachelor’s or master’s degree in nursing or related field, or a Doctor of Nursing Practice degree, from an accredited program
- Minimum overall 3.000 graduate GPA on a 4.000-point scale
- Official transcript(s)
- GRE scores (must be less than five years old at the time of application) - effective for fall 2023 admissions, GRE scores will no longer be required
- Résumé or curriculum vitae
- Essay (two pages, single-spaced) addressing the following questions:
  - Why do you want to pursue a Ph.D. in nursing?
  - What are your professional goals?
  - How have you been involved in research, publications and professional presentations?
  - How have you been involved in professional organizations?
  - What are your research interests?
  - Why are you interested in these research areas?
  - How could research—and specifically your research—in these areas advance science?
  - Sample of written work - effective for fall 2023 admissions, sample will no longer be required
  - Three letters of reference from health care professionals or academic faculty members who can speak to the applicant’s professional and academic abilities (two of the three references from doctoral-prepared individuals are preferred)
- Interview
  - English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
    - Minimum 560 TOEFL PBT score (paper-based version)
    - Minimum 83 TOEFL IBT score (Internet-based version)
    - Minimum 78 MELAB score
    - Minimum 6.5 IELTS score
    - Minimum 55 PTE score
    - Minimum 110 Duolingo English Test score

For more information about graduate admissions, visit the graduate admission website. For more information on international admissions, visit the international admission website.

1 A bachelor’s degree in a closely related health field may be considered if the applicant has a master’s degree in nursing or a D.N.P. degree from an accredited program. A master’s degree in a closely related field may be considered if the applicant has a bachelor’s degree in nursing from an accredited program.
2 International applicants who do not meet the above test scores may be considered for conditional admission.

Program Learning Outcomes
Graduates from this program will be able to:
1. Generate new knowledge that contributes to the advancement of health, health care and nursing science.
2. Disseminate advances in scientific knowledge.
3. Use collaborative, interdisciplinary and innovative approaches to knowledge generation.
4. Assume leadership roles in health care and education as researchers, educators and advanced clinicians.
5. Serve as stewards of the body of knowledge for the discipline of nursing.

Candidacy Examination
At the conclusion of coursework, students sit for the candidacy examination. The examination provides the basis for evaluation of the student's readiness for completing the dissertation. Students must successfully pass candidacy and a proposal defense before beginning dissertation work.

Graduation Requirements
- Minimum B grade in all courses. If a course must be repeated, the student cannot take other courses that require that course as a prerequisite until the course is successfully retaken. If the student retakes the course and does not earn a minimum B grade, the student may be dismissed from the Ph.D. degree.
- Passage of the candidacy examination
- Submission and successful defense of a dissertation

Description

The Bachelor of Science in Nursing degree in Nursing for Registered Nurses is for registered nurses (RN) with a diploma or associate degree who are seeking an accredited bachelor’s degree in nursing. The completer program is offered fully online for part- and full-time students. Expert faculty and administrators work closely with students to equip them to meet the future challenges of professional nursing and influence the future of health care.

Student may apply early to the M.S. degree in Health Informatics and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program Policy in the University Catalog for more information.
Accreditation

The B.S.N. degree Nursing for Registered Nurses at Kent State University is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to the Nursing for Registered Nurses major is selective. Criteria for admission includes the following:

- Evidence of admission in good standing from a state-approved associate degree or diploma nursing program with a minimum 2.000 (on a 4.0 scale) overall GPA.

English Language Proficiency Requirements for International Students:

All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Acquire competencies based on professional standards to assume the role of the professional nurse and for career advancement, including graduate studies.
2. Apply the nursing process in providing evidence-based, culturally sensitive care to promote health and adaptation of individuals, families, groups and communities

Mission of the College

The mission of the College of Podiatric Medicine is to educate students to be highly competent doctors of podiatric medicine who will excel in residency training.

The College of Podiatric Medicine is one of nine accredited podiatry colleges in the United States and is a four-year, graduate-level medical college, granting the Doctor of Podiatric Medicine degree. Founded in 1916 as the Ohio College of Podiatric Medicine, the college has graduated more than 6,000 podiatrists who have made outstanding contributions to the field and study of podiatric medicine. The college has regional and national affiliations with more than 50 hospitals and more than 300 private practitioners nationwide that provide externship training to podiatry students. Currently, the college maintains an average four-year school enrollment of 425 students and typically graduates 85 to 100 podiatrists a year.

The College of Podiatric Medicine is accredited by the Council on Podiatric Medical Education. Accreditation.

Policies

Academic Dismissals

The following will lead to academic dismissal:

1. Two or more failures (F or U in any combination of courses or rotations) in one academic level during the same academic year. Academic level is defined as 801xx, 802xx, 803xx, and 804xx / 805xx courses and rotations. Also, additional or multiple failures (F or U in any combination of courses or rotations) while on academic probation or with outstanding failures on the student’s record, regardless of the academic year or academic level, will result in academic dismissal.
   a. Students in their first year will be academically dismissed for multiple 801xx failures (courses or rotation) within the same academic year.
   b. Students in their second year will be dismissed for multiple 802xx failures (courses or rotations) within the same academic year.
   c. Students in their third year will be academically dismissed for 803xx failures (courses or rotations) within the same academic year, or for multiple outstanding 803xx failures (courses or rotations) across multiple academic years.
   d. Students in their fourth year will be academically dismissed for multiple outstanding 804xx failures (courses or rotations) across multiple academic years.

2. A failure in a course or clinical rotation (including remedial) during a semester in which the student is on academic probation and/or with a failure still outstanding on their academic record.

3. An overall GPA below 2.400 at the end of the spring semester of the student’s second year.

4. Three failures on APMLE Part I.

5. Failure on the Objective Structured Clinical Examination (OCSE) in combination with one or more failures in any other 803xx rotation or course.

6. Failure on the Objective Structured Clinical Examination (OCSE) combined with a failure on the Objective Structured Clinical Examination (OSCE) remediation.

7. Failure on the second attempt on the Objective Structured Clinical Examination (OCSE) for students who were dismissed for failing the first attempt along with any additional 803xx failure (course or rotation) and were reinstated to repeat all 803xx rotations and any outstanding failures on their record.

8. Failure on the third attempt on the Objective Structured Clinical Examination (OCSE) for students who were dismissed for failing the first attempt and the remedial attempt and were reinstated and required to repeat all 803xx rotations.

9. Failure in a remedial course or rotation.

(Please note, outstanding failures are defined as courses or rotations that have not been successfully remediated or repeated with a grade of C or better (or a grade of S for S/U courses or rotations). Students without a previous dismissal on their record are eligible to apply for reinstatement.

The following students are not eligible for readmission or reinstatement.

1. Students with two dismissals, academic or non-academic, on their record.
2. Students who have taken and failed APMLE Part I three or more times without passing.

Students seeking reinstatement who will not be able to complete the program in six academic years must receive an exception from the Council on Podiatric Medical Education in order to be considered for readmission or reinstatement.

Academic Probation

Students readmitted or reinstated with failures on their transcript are placed on academic probation until all failures are successfully repeated or remediated with at least a C or S grade. The academic probation status
will be noted on a student’s record, including the official transcript. Any failure while on probation will result in academic dismissal.

Reinstatement

Students seeking reinstatement to the college must contact the Office of Academic Operations and Institutional Research. Any student who has been dismissed two times from the college, academically or for non-academic reasons, is ineligible for reinstatement consideration at any time.

Students meeting one of the following are not eligible for reinstatement consideration until **one year** from the date of dismissal:

1. Students who have been officially dismissed from the college for academic reasons who have not been offered reinstatement by the Academic Readmission / Reinstatement Committee.
2. Students who have been dismissed for any reason other than academics.

Students who have been previously academically dismissed and are seeking reinstatement to the program will have their request considered by the Academic Readmission / Reinstatement Committee. The decision of the committee for these students is final.

Students applying for reinstatement who have been previously dismissed for reasons other than academics will have their request considered by the college dean. The decision of the dean for these students is final.

Students readmitted or reinstated with failures on their transcript are:

1. Placed on academic probation with a notation being made on their transcript.
2. On academic probation until any failures have been resolved with at least a C or S grade.
3. Subject to academic dismissal if any course or rotation is failed while on academic probation.

Academic Readmission and Reinstatement Committee

The Academic Readmission / Reinstatement Committee meets with eligible students who are reapplying to the program.

Students required to appear before the committee include those who have been academically dismissed and students who had previously withdrawn from the program with failing grades (U, F, WF, SF, or NF) on their transcript.

In all matters, the committee reviews the student’s application for readmission / reinstatement and ultimately renders a decision concerning the student’s ability to successfully complete the podiatric medicine program.

Membership of the Academic Readmission Committee is as follows:

Voting members

- College of Podiatric Medicine faculty (with four faculty members present for each readmission hearing)
- Academic associate dean of academic affairs (or designee)

Non-voting members

- Director of academic operations and institutional research (or designee)
- Director of educational resources (or designee)

Hearing Procedure

- **Request**
  - A written request from the student is submitted to the Office of Academic Operations and Institutional Research and shall include a statement of facts summarizing the basis for the appearance. Such requests must be submitted by the deadline specified.

- **Preparation for Hearing**
  - A written notice of the date, time and place of the hearing will be given to the committee members and the student requesting the hearing.
  - At the scheduled meeting, all committee members will be presented with a copy of any written statements prepared by the student and access to the student’s academic file.

- **Hearing**
  - The student must be present at the requested hearing and may make an oral and/or written presentation to the committee.
  - Attorney or legal counsel for any parties involved may be present in the room during a hearing, but may not participate directly in the hearing. The legal counsel may only advise his/her client. The office of academic services and institutional research must be notified at the time of the request for an appeal if the student intends on having legal counsel present at the hearing.
  - Letters in support of the student must be submitted in advance of the hearing.
  - The student (and legal counsel) is excused from the room prior to deliberation.
  - The committee shall deliberate and formulate a decision in the absence of the involved parties. Votes shall be by anonymous ballot. There are two decision options:
    - Offer the student readmission to the program or
    - Deny the student readmission to the program.
  - The committee's decision is final.

- **Students who are denied readmission or reinstatement are not eligible to appear before the committee again until**
  - One year from the date of the most recent reinstatement hearing for students who were academically dismissed.
  - A minimum of five months from the date of the most recent readmission hearing for students who withdrew with failing grades (WF, F, NF, SF, or U).

(Students who are denied readmission or reinstatement may request that the above time periods for a reinstatement/readmission hearing be waived due to extreme circumstances or to present new information not previously available to the committee. Students wishing to be considered for an early hearing must submit the request in writing along with all relevant supporting documentation to the Office of Academic Operations and Institutional Research. These requests will be reviewed by the Academic Readmission and Reinstatement Committee who will then make a decision to approve or deny the granting of an early hearing. This process will include only a committee review of the submitted written documentation. The student will not make an appearance and will not be permitted to present information, verbally or in writing, outside of what is officially submitted for review. Should an early hearing be granted, the process will follow the Hearing Procedure as detailed above. A granting of an early appearance is not a guarantee of being readmitted or reinstated by the committee. Should the committee vote to deny that an early hearing be granted, the original eligibility timelines listed
The decision of the committee to grant or deny an early appearance is final.)

Privacy of Records and Hearing

- The committee will act in compliance with the Family Educational Rights and Privacy Act of 1974 (FERPA) regarding the information of a student's record.
- All proceedings of a hearing are confidential. No member of the committee shall disclose any of the subject matter or discuss these matters with anyone except members of the committee.

Academic Performance and Student Organizations

The College of Podiatric Medicine offers a number of student organizations, fraternities and sports clubs to serve the student population. Student organizations, fraternities and clubs are subject to college policies. The Office of Student Affairs has the right to review and revoke the privilege to continue as a recognized chapter of any organization or fraternity. A full listing of organizations is available on the College of Podiatric Medicine website.

Each organization, fraternity or club has elected positions in which members of the College of Podiatric Medicine student body may hold office. In order to participate and hold office in any position, including, but not limited to, President; Vice President; Secretary; Treasurer; Director of Clinical Affairs; Race Coordinator; Delegate, etc., the student must be in good academic standing. Specifically, students must have a 2.500 cumulative GPA with no academic failures to run and/or hold an elected position within any organization, fraternity, or club. In addition, students must pass boards on their first attempt.

Academic records will be checked fall and spring semesters and after boards results are posted. Students who fall below the academic minimums or fail to pass boards on their first attempt will be removed from his or her position within a particular club, organization or fraternity so that the student may focus on academic and/or boards performance.

In addition, a student who receives two or more professionalism deficiencies will be removed from any position within a particular club, organization or fraternity.

A formal notification will be sent from the Office of Student Affairs to those students who fail to meet the minimum requirements to hold office.

American Podiatric Medical Licensing Examination (APMLE)

All podiatric residency programs require passage of APMLE Part I and Part II (written examination and the Clinical Skills Patient Encounter (CSPE) examination) prior to the beginning of the residency.

Eligible students are required to take the APMLE Part I and both portions of Part II (written examination and the Clinical Skills Patient Encounter - CSPE examination) the first time the examinations are offered, and every subsequent time as necessary.

Students who do not take APMLE Part I the first time offered will automatically be placed in Pathway I. Students who fail APMLE Part I on the first attempt and do not take the examination the second time offered will automatically be placed into Pathway II. Students missing a required administration of APMLE Part I will still be given the opportunity to take the examinations three times before being subject to dismissal from the program, but they may not continue on to CLI 8040xx rotations until APMLE Part I has been passed.

Students who do not take both portions of Part II (written examination and the Clinical Skills Patient Encounter - CSPE examination) the first time the examinations are offered, and every subsequent time as necessary, will be subject to a professionalism deficiency.

Students who have not passed APMLE Part I will not be eligible to take Part II. Those students will be under the college's Board Part I Failure Policy (see below).

College of Podiatric Medicine Board Part 1 Failure Policy

Students who fail APMLE Part I on their first attempt will be placed into Pathway I and will continue with third-year classes and clinical rotations. For August and September, students will be removed from clinic and enrolled in PCS 80001 to prepare for the required retake in October. Pathway I students will continue in their non-rotation courses.

Pathway I students will return to clinic beginning with their October clinical rotation. Students will only be excused from clinic the day of the October APMLE Part I reexamination. Students will be required to attend all other days for the October rotation, including the first day of the rotation.

1. **Pathway I – Passage:** Students who pass the October APMLE-1 retake examination will continue in classes through March and clinic through April. In May and June, these students will complete the CLI 803xx clinical rotations that were missed in August and September. Beginning with the July rotation, these students will begin CLI 804xx clinical rotations. These students will lose one optional clerkship elective month and will be required to complete a CLI 804xx rotation in April of their fourth-year summer semester. Please note, this schedule is contingent on a student not having to remediate a third-year course or rotation. Students who are required to remediate a third-year course or rotation will follow the schedule detailed in the remediation policy. Pathway I students making up a clinical rotation for reasons other than failure will be required to complete the rotation in July before beginning 804xx clinical rotations in August

2. **Pathway II – Failure:** Students who fail the October APMLE-1 retake exam will continue in classes and clinic through November. These students will not attend clinic rotations beginning in December, but will continue in non-rotation courses through March. Beginning in April, students will be enrolled in PCS 80002: Comprehensive Basic Sciences II to prepare for the required APMLE-1 July retake examination. They will have no other academic or clinical responsibilities in April or May unless required to complete a remedial course or rotation or to complete 803xx clinical make-up days. In July, Pathway II students will sit for the APMLE-1 retake examination. Students who fail the July retake examination will be dismissed from the college and will be ineligible for reinstatement consideration at any time. Students who pass APMLE Part I on the third attempt will continue along the following pathway. Between November and the end of May, students will make up the third-year clinic rotations they have yet to complete. Pathway II students will begin CLI 804xx clinical rotations in June and will have their original graduation date extended by one year.

All students, currently or previously enrolled, are subject to the policy on the maximum number of attempts (three) for APMLE Part I.
Non-enrolled students who have taken APMLE Part I three times without passing are not eligible for readmission / reinstatement consideration regardless of whether or not the examination was passed on subsequent attempts.

**Attendance**

**Classroom and Laboratory Attendance**

Attendance is expected of all students, and the course coordinator may require, at their discretion, compulsory attendance in a course. This includes any or all laboratory sessions, lectures or demonstrations. When the instructor does not state attendance as a compulsory requirement, students remain responsible for all material covered in that course, including all examinations, quizzes and projects. A student’s eligibility to complete make-up work is at the discretion of the course instructor.

Mandatory in-person attendance is required at all scheduled examinations and assessments.

**Clinic Attendance**

Attendance is mandatory at all scheduled college-approved internal / external clinical rotations and clerkship programs. Absences must be excused by the rotation coordinator or clerkship director.

Clinical make-up days may not be completed during regularly scheduled course lectures, labs or assessments.

Students missing clinic without prior approval must contact the Office of Academic Operations and Institutional Research by email at cpmacademicsupport@kent.edu no later than 8:00 a.m. on the day of absence.

- Students are required to complete one make-up day for each excused clinic day missed.
- Students are required to complete three make-up days for each unexcused clinic day missed.

Students requesting that an absence be excused are required to submit relevant documentation at the time of the request (advance requests) or prior to their return to clinic (absences due to emergencies or illness).

Days missed to illness, or for any other reason, without supporting documentation will be considered unexcused. The decision to approve or deny a request for an excused absence is at the discretion of the rotation’s coordinator or clerkship director.

Students requesting an excused absence ahead of time should contact the rotation’s coordinator or clerkship director at least two weeks before the clinical absence.

Make-up days will be assigned to students with the following deadlines in mind:

- Make-up days for CLI 803xx-level rotations must be completed no later than the end of April of the third-year summer semester. The date and time of the make-up days will be assigned. Students are not permitted to progress to any 804xx-level rotations or courses with an incomplete, failing grade, or outstanding make-up days for any 803xx-level rotations or courses.
- The dates and location for CLI 804xx make-up days will be assigned.

**APMLE Part II and CRIP**

In regard to how APMLE Part II and CRIP (and additional residency interviews) affect clinical attendance requirements:

- All students are required to report to their January clinical location on the first day.
- Students are given time off only on the day of APMLE Part II and are required to report to clinic the day before and the day after the exam.
- For CRIP and residency interviews outside of CRIP, students are required to provide to their clinical site travel documentation and interview schedule in advance of the days missed. Only days in which a student has interviews scheduled or are traveling will be excused.

All of the above applies to clerkships, senior medicine rotations, and program core rotations at the college’s clinics or at external locations.

**Clinical Attendance for Rotations at External Facilities**

External rotations follow the schedule of the facility, not the college. This includes closures due for any reason, including closures for inclement weather or holiday / spring breaks.

When rotating at an external facility as part of any rotation, if the external clinical site remains open even though the college is closed (holidays, inclement weather, etc.), students are required to report to clinic as scheduled.

External rotations are facilities in which students rotate for a variety of third- and fourth-year clinical rotations. These rotations include, but are not limited to, third-year and fourth-year DVA, clerkships, senior medicine, simulated patients (both I and II), podiatric surgery and community medicine. Students may also be scheduled at external sites during any other CFAC rotation.

Clinical schedules at external facilities may include evenings, weekends, holidays and other days when the university or Independence location is closed. If the university or Independence location is closed for any reason, you must report to the external experience as their schedule dictates.

**Clinical Attendance for Pathway I Students:** APMLE – Pathway I students will only be excused from clinic the day of the October APMLE Part I reexamination. Students will be required to attend all other days for the October rotation, including the first day.

**Academic Presence Verification**

In compliance with federal regulations, all course and rotation coordinators are required to verify student academic presence for every student. The method of how academic presence is verified is at the sole discretion of each coordinator and may differ from course to course or rotation to rotation. The meeting of academic presence requirements as determined by the coordinator is mandatory for all students. Students who do not meet academic presence verification requirements will receive a professionalism deficiency, will receive an NF (Never Attended – Fail) grade for each course in which the requirement was not met, and may lose their federal financial aid for that particular semester.

**Background Checks and Drug Testing**

**Mandatory Background Checks**

Background check reports will be made available electronically to the College of Podiatric Medicine.
Discrepancies in background check reports are subject to review by the dean and could result in a student’s dismissal or rescission of admission offer from the College of Podiatric Medicine.

Students and applicants have the right to review the information reported by the designated company for accuracy and completeness and to request that the designated company verify that the background information provided is correct. Prior to making a final determination that will adversely affect the applicant or student, the college will provide applicants and students the opportunity to address any issues or discrepancies found in the report.

Incoming students are required to complete a background check prior to matriculation (dates and deadline to be assigned).

For current students, FBI and Ohio Bureau of Criminal Investigation (BCI) background checks are required at the following schedule:
- February of the second-year spring semester (date to be assigned).
- February of the third-year spring semester (date to be assigned).

If an FBI or BCI background check comes back with a discrepancy or the statement, "may not meet employment conditions," the student is required to provide the Office of Academic Operations and Institutional Research with a detailed summary report.

Please note, some clinical programs may require specific background checks and/or additional documentation.

**Drug Testing**

Incoming students are required to complete a drug test prior to matriculation (dates and deadline to be determined by the Office of Academic Operations and Institutional Research.

Current students are required to complete a drug test prior to the beginning of the third-year fall semester (dates and deadline to be assigned).

Drug test results are subject to review by the College of Podiatric Medicine. Positive drug screens will be cause for review by the dean on a case-by-case basis and could result in a student’s dismissal or rescission of admission offer from the College of Podiatric Medicine.

Please note, additional drug tests may be required in the event of a positive result or if required by a program for the completion of a clinical rotation.

**Cheating and Academic Dishonesty**

Students found responsible for cheating or academic dishonesty in any form on any examination, quiz, assignment or on anything related to the College of Podiatric Medicine curriculum will automatically be given a failing grade (0.000, F grade) for that specific academic item. This will also result in disciplinary actions to be taken, including possible dismissal from the program.

**Clerkship and Senior Medicine Rotations**

Information on clerkship and senior medicine rotations, including the selection process, can be obtained by contacting the Office of Academic Operations and Institutional Research.

**Clerkships**

Clerkships are mandatory rotations that students schedule through AACPM’s Doctor of Podiatric Medicine Clerkship website in the months that are allotted. There are seven months scheduled that are strictly for clerkship rotations. Of these seven months, students are required to complete six months of clerkship rotations. If eligible, students may choose to take one of the seven months allotted for a clerkship as an elective month. If students decide to take this elective by not filling the month with a clerkship, they will have no clinical responsibility for the month, though they may visit programs or complete clinical make-up days if they wish. Note: Clerkship rotations or an elective month off cannot be scheduled during any month in which a core rotation is scheduled.

**Senior Medicine**

The date of the selection of senior medicine rotations will be determined by the Office of Academic Operations and Institutional Research. A list of available rotation spots will be sent to each group along with a deadline for student selections. If an agreement on senior medicine selections within a student group cannot be reached by the group members, the final determination will be made by random selection by a representative of the Office of Academic Operations and Institutional Research.

Senior medicine rotations may include out-of-state locations and facilities not within the immediate area of the college. The Office of Academic Operations and Institutional Research and the college administration will determine which locations will be considered mandatory (i.e., all spots available at those locations will be required to be filled by students in each group).

The number of spots for each senior medicine rotation is limited within each group. The number of available spots at each location is determined by numerous factors, including facility preference and availability and the number of students in that particular group.

Students are only permitted to complete their senior medicine requirement at rotation spots on the approved list distributed by the college. Senior medicine rotations at locations not on this list are not permitted at any time or under any circumstances.

**Completion of Clerkship and Senior Medicine Rotations**

Once a student selects a clerkship or a senior medicine rotation, the student is required to attend that specific rotation for the month chosen. Schedule changes, including dropping rotations or switching months, are not permitted. Students who do not attend a scheduled rotation will fail the rotation and be required to make up the rotation in April of the student’s fourth year (location and specifics of make-up rotations will be assigned). Students will also receive a professionalism deficiency evaluation and be placed on academic probation.

In rare cases, schedule changes or rotation exceptions may be permitted provided that the student can demonstrate extreme circumstances that will prevent the completion of a particular rotation. Students who wish to be considered for this type of schedule change must submit the request in writing along with supporting documentation to the Office of Academic Operations and Institutional Research. If the request is denied, the student will be required to attend the rotation as scheduled.

**Feedback and Surveys**

At the conclusion of each clerkship and senior medicine rotation, students will receive a link via e-mail to a rotation feedback survey. The completion of the rotation feedback survey for each rotation by the deadline given is mandatory. Students who miss the deadline will be subject to a professionalism deficiency evaluation.
Patient Logs

Students are required to submit a patient log for every patient encounter experienced (observed, assisted or performed) during each clinical rotation (external and core rotations). Patient logs for each rotation must be completed and entered into Typhon by 8:00 a.m. on the Monday following the conclusion of the rotation. Failure to meet this deadline will result in a professionalism deficiency and possible failure on the rotation. For further information on what types of encounters are required to be logged during a particular clinical rotation, please see the coordinator for that specific rotation.

Cleveland Foot & Ankle Clinic (CFAC) Shadowing (1st Year Students)

Students should contact the Office of Academic Operations and Institutional Research for assistance regarding shadowing opportunities. All students are required to shadow in one or both of the CFAC clinics during their first year in the program. A schedule will be distributed to all students at the beginning of the academic year or will be listed in the syllabus of a course requiring the shadowing experience. These shadowing experiences are considered mandatory. If this requirement is not met and all scheduled sessions not attended, the student will be subject to academic and disciplinary actions.

In addition to the required CFAC shadowing, students in all years are encouraged to visit clinical programs when they can find the free time in their schedules to do so.

If visiting a program outside of an assigned (registered for college credit) clinical rotation that will consist of hands-on experiences rather than just observational, students must notify the Office of Academic Operations and Institutional Research prior to the hands-on experience taking place, or immediately following.

Clinical Affiliation Agreements

For external clinical rotations completed during the third and fourth year, the college has executed affiliation agreements with facilities where students rotate. Students are subject to the requirements listed in these agreements for any approved rotation. Student visitations are observation only and not for college credit, and therefore, not considered approved rotations.

A list of all facilities with which the college has a current affiliation agreement is available by contacting the Office of Academic Operations and Institutional Research. Affiliation agreement status is subject to change at any time.

Students may review, in person only, the affiliation agreement for any facility in which they will be completing an external clinical rotation. To do so, please contact the Office of Academic Operations and Institutional Research.

Clinical Rotations

For all clinical rotations, students are randomly assigned to a group. This assignment determines the specific clinical schedule for each student, including the monthly order in which students complete each rotation. Requesting a specific group or schedule or switching groups once assigned is not permitted.

The policy and procedures for clinical education are in place to assure quality care and education. Students must conform to these policies and procedures to ensure that educational outcomes are met and quality patient care is delivered.

No student may proceed to any fourth-year rotation without having first completing all prior courses and clinical rotations. A student may not continue onto fourth-year courses or rotations with a failure or grade or incomplete in any third-year course or clinical rotation.

Students are only permitted to be registered for one clinical rotation per month. Students are not permitted to complete a remedial course or rotation during the same month as a scheduled course or clinical rotation.

Clinical Remediation and Make-up Months

All fourth-year remedial rotations will take place at an assigned location starting in April in the fourth-year summer semester without exception. The dates of the rotation will be based on the AACPM national clerkship calendar.

Make-up rotations for non-academic reasons (e.g., leave of absence) will take place in April at an assigned location during the fourth-year summer semester. The dates of the rotation will be based on the AACPM national clerkship calendar.

The location of a remedial or make-up rotation will be assigned to the student by the Office of Academic Operations and Institutional Research.

Clinic Rotation Groups and Schedule

Students will be randomly assigned into groups twice – once for third-year clinical rotations and once for fourth-year clinical rotations. Switching of groups and/or rotation months is not permitted.

Patient Logs

Students are required to submit in Typhon a patient log for every patient encounter experienced (observed, assisted or performed) during each clinical rotation (external and core rotations). Patient logs for each rotation must be completed and entered into Typhon by 8:00 a.m. on the Monday following the conclusion of the rotation. Failure to meet this deadline will result in a professionalism deficiency and possibly failure on the rotation.

For further information on what types of encounters are required to be logged during a particular clinical rotation, students should contact the rotation’s coordinator or the Office of Academic Operations and Institutional Research.

Course Exemptions

To be considered for a course exemption, students must file a request by contacting the Office of Enrollment Management and Student Affairs. The request will be considered by the college's senior associate dean and the appropriate division head. Requests for a course exemption are handled on a case-by-case basis, and the college's decision is final. Student requests for course exemptions will only be considered prior to matriculation.

Eligibility for Doctor of Podiatric Medicine Degree

All candidates for the Doctor of Podiatric Medicine degree must have achieved the following:
1. Maintained satisfactory academic performance with no grade below a C, no Unsatisfactory (U) grade and no Incomplete (IN) marks;
2. Demonstrated clinical competence through completion of the performance objectives;
3. Been verified as being in good disciplinary standing;
4. Satisfactorily completed all academic requirements, including clinical rotations and externship/clerkship program requirements, with a minimum C grade or Satisfactory (S) grade on all courses and rotations;
5. Satisfactorily passed the Objective Structured Clinical Examination (OSCE);
6. Fulfilled all responsibilities and financial obligations to the college and to the university; and
7. Taken and passed the American Podiatric Medical Licensing Examination (APMLE), Part I, taken both sections of Part II (written examination and the Clinical Skills Encounter – CSPE examination) and released the score reports to the college.

To be eligible for graduation in May, candidates must have met all of the above requirements by the end of the fourth-year summer semester. Attendance at the graduation ceremony is required.

All students must successfully complete the graduation requirements in no more than six academic years. Exceptions for students with extenuating circumstances must have the approval of the Council on Podiatric Medical Education.

**Essential Requirements for Student Education**

Kent State University College of Podiatric Medicine is committed to the admission and advancement of all qualified students. College policy prohibits discrimination against anyone solely based on race, sexual orientation, gender, Veteran status, color, national origin, religion, age, handicap or disability.

The faculty and administration have adopted the following technical standards and essential requirements that must be met by all students for progression and graduation. These technical standards expected of students seeking the degree of Doctor of Podiatric Medicine reflect the college's highest commitment to the safety of its students and patients, and recognize the essential functions of the profession of podiatric medicine.

The following standards and requirements describe the academic abilities and non-academic qualifications that are essential to the program of instruction, are directly related to the licensing requirements, and are directly related to those physical abilities, mental abilities, skills, attitudes and behaviors that students must demonstrate or perform at each stage of their education to ultimately ensure patient safety.

**Technical Standards and Essential Requirements for Student Education at Kent State University College of Podiatric Medicine**

**Visual Observation and Integration**

Candidates and students must be able to observe demonstrations, video materials, slides through a microscope and computer screens. They must acquire information from written documents, radiographs, photographs, charts and diagrams. They must be able to observe a patient accurately close at hand and at a distance to assess asymmetry, range of motion and tissue/texture changes.

**Communication**

Candidates and students must be able to communicate effectively in oral and written formats, and in settings where time span is limited. This includes communication in classroom, clinical and laboratory settings. Candidates must be able to accurately elicit information in a timely and efficient manner. Candidates must be able to describe a patient's condition to the patient and to others in the diagnosis and treatment process.

**Other Sensory Capacities**

Students must independently be able to take an oral history, do stethoscopy and communicate while wearing a surgical mask. Students must also have sufficient somatosensory capacity to palpate pulses, use a tuning fork and assess skin temperature.

**Motor Functions**

Candidates and students must have sufficient motor function to undertake classes, laboratories and demonstrations, to provide general patient care as well as emergency treatment to patients. This includes cadaver dissection, microscopy, aseptic technique and safe handling of microbiological specimens. Also included is the motor capacity for chart and prescription writing, palpation, percussion, auscultation and other diagnostic maneuvers. All of these tasks must be done in a timely and efficient manner within prescribed time limitations relative to the context of a practicing physician. Examples of common daily treatments include, but are not limited to, palliative care of foot and ankle problems, injections, orthotic impressions, taking and processing of pedal radiographs, and performance of soft tissue and osseous tissue surgical procedures. Examples of emergency treatments include CPR, administration of intravenous medications, the opening of obstructed airways, and hemostasis techniques.

**Intellectual, Conceptual, Quantitative and Integrative Abilities**

Candidates must have sufficient cognitive abilities and effective learning techniques to assimilate the detailed and complex information presented in the medical student curriculum. Candidates must engage in critical thinking and problem solving. They must be able to learn through a variety of modalities including, but not limited to, classroom and lab instruction and exams; small group, team and collaborative activities; individual study; preparation and presentation of reports and use of computer technology. Candidates must be able to consistently, quickly and accurately measure, calculate, interpret, reason, memorize, analyze, synthesize and transmit information across modalities. Candidates must be able to demonstrate these skills and procedures under pressure and in a timely fashion across a range of conditions and time frames. They must be able to recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events. These skills and abilities are fully defined by the faculty and explained in course syllabi.

**Behavioral and Social Attributes**

Candidates must demonstrate the maturity and emotional stability required for full use of their intellectual abilities. They must accept responsibility for learning, exercising good judgement and promptly completing all responsibilities attendant to the diagnosis and care of patients. They must understand the legal and ethical aspects of the practice of medicine and function within both the law and ethical standards of the medical profession. Candidates must be able to work effectively, respectfully and professionally as part of the healthcare team and to interact with patients, their families and health care personnel in a courteous, professional and respectful manner. They must be able to tolerate physically taxing workloads and long work hours, to function...
effectively under stress and to display flexibility and adaptability to changing environments.

Candidates must be able to work effectively, respectfully and professionally with faculty, staff and student colleagues. They must be capable of regular, reliable and punctual attendance at classes and in regard to their clinical responsibilities. Candidates must be able to contribute to collaborative, constructive learning environments; accept constructive feedback from others; and take personal responsibility for making appropriate positive changes.

Involvement in Invasive and Exposure-prone Procedures
Candidates and students must be qualified to be personally and actively involved in invasive and exposure-prone procedures without being a danger to patients, other health care professionals or fellow students, faculty and staff. They must demonstrate adherence to the universal precautions as defined by the Center for Disease Control. As part of the technical standards and essential requirements to matriculate at the college, the following statement shall apply: If the student is HIV seropositive, the student may be restricted by the State Medical Board of Ohio from performing procedures required for graduation. If the student is HBV and/or HCV positive and does not demonstrate noninfectivity, the student may be restricted by the State Medical Board of Ohio from performing procedures required for graduation. Any questions regarding these requirements should be directed to the senior associate dean.

Examination Policy
1. No books, papers, notes, calculators, cell phones, watches, tablets and similar electronic devices, pens, pencils, markers, food, drink, backpacks or any other personal items are permitted in the room during an examination. Hats and outerwear (coats) are not permitted. Clothing or accessories that interfere with the proctor’s full view of the student’s eyes are not permitted. Any clothing layers that are removed before or after the examination begins must be given to the proctors to be placed in the front of the room until the completion of the examination.

2. The use of cell phones or any other forms of electronic communication during any examination is strictly forbidden. No electronic communication devices are permitted in the room.

3. Students are expected to be waiting outside of the classroom 15 minutes prior to the start of the examination, but cannot enter the room until the academic support staff or proctors give permission.

4. Students arriving late to the examination, not to exceed 30 minutes, must receive permission from the course coordinator (or designee) to start the examination late. No student, even those approved to begin late, will be given extra time to complete an examination.

5. Students will not be permitted to leave the classroom less than 30 minutes following the start of an examination.

6. Students arriving 30 minutes or more after the scheduled start of an examination will automatically receive a score of 0.00 points for the exam, unless they can demonstrate that they have a valid reason to receive an excused absence from the course coordinator.

7. Students arriving late for a laboratory exam must receive permission from the course coordinator (or designee) to take the examination. No student, even those approved to begin the laboratory examination late, will be given extra time to answer questions.

8. For students not on an approved leave of absence, only the course coordinator can grant an excused absence for an examination (didactic, lab, clinical). Supporting documentation must be submitted when requesting an excused absence.

9. Students who miss an examination receive 0.00 points. Students are responsible for contacting the course coordinator within 24 hours of the administration of the examination to request an excused absence. The course coordinator’s decision is final.

10. Failure of a student to secure an excused absence or to make up all approved eligible assessments, assignments, and examinations by the assigned deadlines will result in 0.00 points.

11. Students are responsible for checking the accuracy of all posted scores within seven calendar days of posting or receipt. No challenge will be considered or adjustments made after that period.

12. Students found responsible for cheating or academic dishonesty in any form on any examination, quiz, assignment, or on anything related to the College of Podiatric Medicine curriculum will automatically be given a failing grade (0.00 points, F grade) for that specific academic item. This will also result in disciplinary actions to be taken, including possible dismissal from the program.

Make-Up Examinations
Approved make-ups must be completed within 10 school days of the student’s return. For make-up examinations, students will be contacted prior to their return by the Office of Academic Support with their makeup schedule. If the student is for any reason not contacted by the Office of Academic Support prior to or immediately upon their return, the student is required to contact in writing each of their instructors by the end of the second day (no later than 3:00 p.m.) of their return.

For assignments or assessments other than make-up examinations, students must contact in writing the appropriate course coordinators within two school days (no later than 3:00 p.m. on the second day) of their return to school to determine their eligibility for a make-up. If a make-up is granted for an assignment or assessment, the faculty member will determine the date of the make-up, not to exceed ten days from the student’s return. In some cases, the Office of Academic Support, at the discretion of the faculty, may include non-examination assessments or assignment make-ups with the schedule sent prior to the student’s return.

For all make-up examinations, assessments, quizzes, etc., if the student has any questions or concerns once they receive their make-up schedule, they must contact their course coordinator as soon as possible but not after the make-up takes place or after the scheduled date for the make-up.

Students should be prepared to complete make-up examinations, assessments, and assignments as early as the first day of their return. Multiple make-ups may also be scheduled on the same day.

If the instructor determines that there is insufficient time to complete the make-up assignments and examinations due to conflicts with other scheduled examinations, the make-up assignments and examinations must be taken within two school days of the conclusion of the regularly scheduled examination period.

Failure to adhere to the aforementioned timelines will result in the loss of students’ eligibility to complete missed assignments and examinations, resulting in 0.00 points for all missed assignments and examinations.
Make-ups take precedence over all other academic responsibilities. Prearranged travel is not a sufficient reason for missing a scheduled make-up.

This policy covers all examinations and any other assessments in any form (e.g., quizzes, lab activities, case studies, projects). Timing, in regard to the 30-minute rule, will be adjusted accordingly for non-examination assessments.

**HIPAA Training**

All students are required to complete HIPAA training. The method of delivery for the training as well as the dates and deadlines for completing training will be assigned by the Office of academic Operations and Institutional Research. Failure to complete HIPAA training by the assigned deadline will result in a professionalism deficiency evaluation and a delay in the student’s entry into clinical rotations.

**Immunizations**

In order to ensure that all students are protected against preventable communicable illness, the following requirements must be met prior to matriculation or within 60 days of classes starting. In addition, students must maintain compliance while enrolled in the College of Podiatric Medicine. Students who fail to maintain compliance may be removed from the classroom and/or clinical settings (including clerkships) until the student can provide proof of compliance.

Students are required to receive all required immunizations (see list below) and will not be allowed on clinical rotations, including clerkships, if all immunization requirements are not met. Students who are allergic to a vaccine ingredient, or who may have a medical condition that prevents the administration of a vaccine, must provide supporting documentation.

All incoming students must provide documentation of the immunizations listed below prior to orientation or within 60 days of matriculation.

### Required Immunizations for Podiatric Medicine Students

**First Year**

- Tetanus, Diphtheria, Pertussis (Tdap)
  - One Tdap vaccine within the past 10 years. Td will not be accepted.
  - Must be current all four years.
- Measles, Mumps, Rubella (MMR)
  - One dose if born before January 1, 1957; two doses if born on or after January 1, 1957. Minimum four weeks apart between Dose 1 and Dose 2.
  - Positive Rubella titer required OR
  - Positive Rubeola IgG Titer, and Positive Mumps IgG Titer
- Hepatitis B
  - Three doses required. Dose 1 to Dose 2: minimum four weeks apart; Dose 2 to Dose 3: minimum eight weeks apart (and at least 16 weeks after first dose) AND
  - Hep B sAB Titer - Positive
  - The Hepatitis B series can take up to six months to complete. Students are advised to begin this series upon admission to the program.
  - Varicella
  - Two doses required. Minimum four weeks apart between Dose 1 to Dose 2 OR
  - Positive Varicella Zoster IgG Titer
  - Influenza (Vaccination required annually)
- Tuberculosis screening (PPD)
  - Two TB skin tests (PPD) performed in the 12 months prior to starting classes, with the second PPD performed less than three months prior to the start. These must be done in the United States OR
  - A blood test, Interferon Gamma Release Assay (Quantiferon-TB Gold In-Tube or T-Spot), performed less than three months prior to starting class.
  - An IGRA is required for this with past BCG vaccine who have tested positive with a PPD, unless they have a positive IGRA in the past.
  - A chest x-ray is required for the positive TB testing (PPD or IGRA).
  - Provide copies of reports for chest x-rays, blood tests, TB treatment statement, and PPD results.

Continuing students are responsible for obtaining the following immunizations so they remain compliant with Podiatric Medicine requirements:

**Second Year:**

- Influenza
- Tuberculosis screening

**Third Year:**

- Influenza
- Tuberculosis screening

**Fourth Year:**

- Influenza
- Tuberculosis screening

Below is a list of strongly recommended immunizations for first-year Podiatric Medicine students:

- Meningococcal;
- Hepatitis A
- Human papillomavirus (HPV2, HPV4)
- Polio

Some clerkships/externships may require additional immunizations. Please check with the Office of Academic Operations and Institutional Research to determine if there are any additional immunization requirements.

Immunization requirements are subject to change.

**Incomplete Mark**

Refer to the policy in the University Catalog for information on the process and deadline for the Incomplete mark for a graduate course.

**Lecture Capture**

It is a violation of copyright law to copy, download or print any portion of any recorded lectures.
Leave of Absence Procedure

For the university policy on Leave of Absence for Graduate Studies, please refer to the Academic Policies section of this Catalog.

A leave of absence is an excused absence (one-day to a maximum of 30 calendar days) from the scheduled course and/or clinical responsibilities. In rare instances of severe illness and prolonged hospitalization, students may be approved for a one-time extension of leave for an additional 30 calendar days per academic year. A student who is granted a leave of absence due to medical reasons may be required to submit appropriate documentation from a medical professional before their return from a leave of absence is approved.

Below are the procedures for requesting an official leave of absence.

1. Student files the leave of absence form and supporting documentation with the Office of Academic Operations and Institutional Research.
2. Once the leave of absence is approved, the Office of Academic Operations and Institutional Research will notify all appropriate faculty and staff members of the leave and the intended return date.
3. Upon returning from the approved leave of absence, the student will submit a completed return from a leave of absence form along with any required supporting documentation to the Office of Academic Operations and Institutional Research. Once the return is approved, all appropriate faculty and staff members will be notified.

Any requests for a leave of absence longer than 60 consecutive days will be viewed as a “withdrawal” from the college.

It is important to note that even though a currently enrolled student is on a leave of absence, the granting of the leave does not constitute a waiver of the student’s responsibility for tuition, fees, or academic and graduation requirements.

Upon returning from a leave of absence, a student is required to make up any eligible missed assignments or examinations within 10 school days of the student’s return.

For make-up examinations, students will be contacted prior to their return by the Office of Academic Support with their make-up schedule. If students are, for any reason, not contacted by the Office of Academic Support prior to their return from a leave of absence, they are required to contact in writing each of their course coordinators by the end of the second day (no later than 3:00 p.m.) of their return.

For assignments or assessments other than make-up examinations, students must contact in writing the appropriate course coordinators within two school days (no later than 3:00 p.m. on the second day) of their return to school to determine their eligibility for a make-up. If a make-up is granted for an assignment or assessment, the faculty member will determine the date of the makeup, not to exceed ten days from the student’s return. In some cases, the Office of Academic Support, at the discretion of the faculty, may include non-examination assessments or assignment make-ups with the schedule sent prior to or immediately upon the student’s return.

For all make-up examinations, assessments, quizzes, etc., if students have any questions or concerns once they receive their make-up schedule, they must contact their course coordinator as soon as possible, but not after the make-up is completed or after the scheduled date for the make-up.

Students should be prepared to complete make-up examinations, assessments, and assignments as early as the first day of their return. Multiple make-ups may also be scheduled on the same day.

Make-ups take precedence over all other academic responsibilities. Preamrranged travel is not a sufficient reason for missing a scheduled make-up.

If the course coordinator determines that there is insufficient time to complete the make-up assignments and examinations due to conflicts with other scheduled examinations, the make-up assignments and examinations must be taken within two school days of the conclusion of the regularly scheduled examination period at a time and date determined by the instructor. It is fully up to the course coordinator’s discretion as to whether or not the two-day extension is warranted.

Failure to adhere to the aforementioned timelines will result in the loss of students’ eligibility to complete missed assignments and examinations, resulting in 0.00 points for all missed assignments and examinations.

Objective Structured Clinical Examination (OSCE)

Students in April of their third year summer term are required to take and pass an Objective Structured Clinical Examination (OSCE) that covers multiple areas and topics, including podiatric medicine, podiatric surgery and biomechanics. The OSCE also includes simulated patients, medicine and oral case studies.

Students must have an overall pass rate of 70 percent on all sections combined in order to pass the OSCE. Students who fail the OSCE on the first attempt with an outstanding failure (course or rotation) on their academic record are academically dismissed. Students who fail the OSCE in April without additional outstanding failures on their academic record (course or rotation) are dropped from their May clinical rotation to remediate the failure through scheduled meetings with content experts for the subject area(s) they failed. These students will take the OSCE examination a second time at the end of May. Students passing will progress to 804xx / 805xx rotations. Students who fail the OSCE on the second attempt are academically dismissed from the program.

Students in Pathway I take the OSCE two months later than other students once all 803xx courses and rotations are successfully completed with a minimum C or S grade. Students making up 803xx rotations for reasons other than or in addition to Pathway I take the OSCE once all 803xx courses and rotations are successfully completed with a minimum C or S grade. Please note, this does not apply to students remediating a failed 803xx course or rotation. (See below for more information on remediation.) All other policies stated above regarding OSCE remediation taking place the month immediately following a failure on the OSCE and dismissals due to multiple failures apply to these students.

Students required to remediate an 803xx course or rotation are not eligible to do so until they have taken and passed with a minimum C or S grade all other 803xx courses and rotations and have taken and passed the OSCE.

Students dismissed for failing the OSCE twice (first attempt and remedial attempt taken the month immediately following the original failure) or for failing the OSCE once with additional outstanding 803xx (course or rotation) failures on their record have the right to apply for reinstatement,
provided the student has not been previously dismissed, academic or otherwise.

Students reinstated after failing the OSCE once along with any other 803xx failure(s) (course or rotation) are required to successfully repeat (S grade) all 803xx rotations before taking the OSCE a second time. This second attempt takes place once all 803xx rotations and any outstanding course failures are successfully repeated (minimum C or S grade). Students reinstated after failing the OSCE and any other 803xx rotation or course who then fail the OSCE on their second attempt (original attempt and attempt after being reinstated) are dismissed from the college without eligibility for reinstatement.

Students reinstated after failing the OSCE twice (first attempt and remedial attempt) are required to repeat and pass (S grade) all 803xx rotations before taking the OSCE a third and final time. Students reinstated after failing the OSCE and the OSCE remediation who then fail the OSCE on the third attempt are dismissed from the college without eligibility for reinstatement.

**Professionalism Deficiency Evaluation**

Professional behavior is expected at all times on campus, in clinic, during college events and while on outside rotations. If behavior is deemed unprofessional by a member of staff or faculty, the student will be subject to a professionalism deficiency evaluation and possible further disciplinary actions. Students missing assigned deadlines or mandatory college meetings/events will also be subject to a professionalism deficiency evaluation.

Students receiving a first professionalism deficiency evaluation will be required to meet with the initiator and a witness. This witness may include a staff supervisor or faculty member. Additional professionalism deficiency evaluation notices will result in a meeting with the dean or associate dean of the college.

Students receiving a professionalism deficiency evaluation may be subject to additional disciplinary actions, including dismissal from the program, regardless of how many evaluations they has previously received.

The following is a list of expectations of all students in regards to professional behavior:

1. Reliability and responsibility
2. Maturity
3. Ability to accept criticism and take appropriate steps to correct shortcomings
4. Communication professionally and appropriately, both orally and in writing
5. Honesty and integrity
6. Demonstrating respect for patients and/or members of college community
7. Appearance and grooming that demonstrate professionalism

In addition, if behavior in clinic is deemed unprofessional by a member of faculty, the student will be asked to leave the clinic and will be charged with an unexcused absence.

**Registration for the College Podiatric Medicine**

All students must complete a registration each year. Students who fail to complete registration requirements by the assigned deadline are subject to a professionalism deficiency evaluation. Students will not be promoted to the following grade level / academic year until registration requirements are fulfilled. Once the academic year concludes, students who have not submitted the required registration paperwork for the subsequent academic year will be withdrawn from the program.

**Remediation and Mandatory Academic Counseling**

Students may remediate an F (fail) or U (unsatisfactory) grade by receiving a satisfactory grade after remediation of the course or clinical rotation. Both the initial grade (F or U) and the satisfactory grade (no higher than the C grade) received after remediation are noted on the transcript. However, the original F or U grade is not calculated into the GPA provided that the student receives a passing grade (C or S) for the remedial course or rotation. Students who fail a remedial course or rotation will have both the original and remedial grades calculated into their GPA.

Any student with one course or rotation failure will be placed on academic probation until the requirement is successfully (C or S grade) remediated. Failure in a remedial course or rotation will result in academic dismissal, as will any failure in an additional course or rotation prior to the successful (C or S grade) completion of remediation.

Remediation of the failed course or rotation will take place during the four-week period detailed below. Please note, the four-week remediation period may continue into the next academic year.

- Students in their first year will begin remediation immediately following the summer semester.
- Students in their second year will begin remediation immediately following the spring semester.
- With the exception of Pathway I students, remediation for students in their third year will take place in May of the third-year summer semester. Non-Pathway I students making up an entire third-year clinical rotation for non-academic reasons will remediate a failure in June after the successful completion of all 803xx coursework and clinical rotations. If making up multiple third-year clinical rotations, students will remediate the month after all 803xx courses and rotations are successfully completed.
- Remediation for APMLE Pathway I students will take place in July once students have successfully completed all 803xx level clinical rotations and coursework. Pathway I students making up an additional 3xx level clinical rotation (for non-academic reasons) will remediate in August once they have successfully completed all 803xx clinical rotations and coursework. Please note, students, including Pathway I students, making up three 803xx clinical rotations and remediating one 803xx clinical rotation or course will not graduate on time at the end of the fourth-year summer semester and may have their entry into residency delayed.
- Remediation for the Objective Structured Clinical Examination (OSCE) will take place the month immediately following the student’s first attempt and failure. For full details regarding the OSCE schedule and eligibility for remediation, please see the Objective Structured Clinical Examination (OSCE) policy.
• Remediation for students in their fourth year will take place in April of the fourth-year summer semester.

In addition to standard tuition, students are subject to an additional fee for remediation.

Students are not permitted to begin remediation until all other courses and clinical rotations from that academic level have been successfully completed. Academic level is defined as 801xx, 802xx, 803xx, and 804xx.

Students are advised that remediation takes precedence over all other educational responsibilities. Remediation is conducted in a manner that is at the sole discretion of the course coordinator. This includes the specifics of delivery of the remedial course or rotation and the format of all assessments and examinations. Prearranged travel is not a qualified excuse to be absent from any scheduled meeting or examination.

Students are required to meet the following GPA requirements during the first and second year (effective for students whose first semester of coursework in the Podiatric Medicine program is fall 2016 or later):

• First Year
  • Minimum 2.500 GPA at the end of the first-year fall semester;
  • Minimum 2.500 overall GPA at the end of the first-year spring semester; and
  • Minimum 2.500 GPA at the end of the first-year summer semester.

• Second Year
  • Minimum 2.500 overall GPA at the end of the second-year fall semester; and
  • Minimum 2.400 overall GPA at the end of the second-year spring semester.

Students falling below the minimum GPA following the first-year fall, first-year spring, first-year summer or second-year fall will be required to participate in mandatory academic counseling.

Students with a 2.400 GPA at the conclusion of the spring semester will be academically dismissed from the program.

Student Conduct
A finding of responsibility for violating college or university policy will lead to a review by the dean of the college and may result in summary dismissal from the program. The decision of the dean is final.

Student Malpractice Insurance Coverage
Podiatric Medicine students are covered by the college’s malpractice insurance policy for all official clinical rotations (i.e., registered for college credit).

Students are encouraged to visit clinical programs when they can find the free time in their schedules to do so. If visiting a program outside of an official clinical rotation that will consist of hands-on experiences rather than just observational, students must notify the Office of Academic Operations and Institutional Research prior to the hands-on experience taking place, or immediately following.

Test Review Procedure
Students may review an examination by appointment only with the course coordinator, and only for a period extending two weeks following the conclusion of the exam cycle. Students wishing to receive an extension to the two-week period must contact the course coordinator prior to the deadline in order for their request to be considered. The course coordinator will determine the manner in which all reviews take place.

Transfer and Advanced Standing Admissions
Advanced Standing is credit(s) granted by a college to a student for studies completed elsewhere (i.e., another podiatry college or accredited medical school). Students will only be considered for Transfer and Advanced Standing prior to matriculation.

Candidates interested in transfer/advanced standing admission must meet the criteria for initial admission as outlined in the academic requirements section and follow the procedures outlined below:

• Submit a statement to the Office of Enrollment Management / Admissions requesting transfer/advanced standing consideration.
• Provide an official transcript of academic performance in all undergraduate, graduate and professional programs of study, domestic and international. If there was international institutional enrollment, reports from a recognized foreign credentialing agency must be jointly submitted for full consideration.
• Provide a letter of status from the academic dean or dean of student affairs at the College of Podiatric Medicine or other accredited medical school currently being attended. Official transcripts must indicate minimum 3.500 GPA from previous podiatric college for transfer consideration.

Withdrawal from the College of Podiatric Medicine
To discuss withdrawing from the podiatric medicine program, please contact the Office of Academic Operations and Institutional Research.

Students withdrawing will receive the following grades:

• Courses that fall within the university drop/add period will be dropped from the student’s transcript with no grades being assigned.
• Courses prior to seven weeks of course instruction and after the university drop/add period will be assigned the W mark.
• Courses after seven weeks of course instruction, but before the university deadline to withdraw from a specific course, will be assigned the WP (withdraw passing) or WF (withdraw failing) mark.
• Courses after the university deadline to withdraw from a specific course will be assigned the SF (stopped attending - fail) grade.

Refer to the Office of the University Registrar website for registration deadlines.

Students are not permitted to withdraw from individual courses. Any withdrawal will be a complete withdrawal from Doctor of Podiatric Medicine degree program.

NOTE: The official date of withdrawal is the date on which the student begins the withdrawal process.

A student who leaves the college without proper notice or without following the withdrawal policy automatically will be withdrawn from the college after two attempts to contact the student.
Readmission

Students seeking readmission to the college are instructed to contact the Office of Academic Operations and Institutional Research.

Students who previously withdrew in good academic standing with no failures (F, U, SF, or NF) or WF grades are required to appear before the Academic Readmission / Reinstatement Committee to request readmission. These students should contact the Office of Academic Operations and Institutional Research to discuss readmission options.

Students who previously withdrew with failures (F, U, SF, NF) or WF grades are required to appear before the Academic Readmission / Reinstatement Committee in order to be readmitted to the program. These students should contact the Office of Academic Operations and Institutional Research in order to be considered for readmission or reinstatement.

The following students are not eligible for readmission or reinstatement.

1. Students with two dismissals, academic or non-academic, on their record.
2. Students who have taken and failed APMLE Part I three or more times without passing.

Students seeking readmission or reinstatement who will not be able to complete the program within six academic years must receive an exception from the Council on Podiatric Medical Education in order to be considered for readmission or reinstatement.

Clinical Education (CLI)

CLI 80200 STANDARDIZED PATIENTS ROTATION 1 Credit Hour

Offers second year students the opportunity to interview standardized patients and receive feedback on their patient interviewing and history recording skills which prepares them to function competently in a doctor/patient encounter. Some students find that interviewing patients comes naturally, while for others it is more a learned skill. The standardized patients are actors who have been coached to simulate actual patients so accurately that the simulation could possibly fool even a skilled clinician.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 4 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80311 WOUND CARE 4 Credit Hours

The clinical rotation provides students with an opportunity to become exposed to the clinical practice of wound care. Students have a unique opportunity to be involved in wound care patient management, which is an essential part of podiatric medical practice. Students develop skills in wound care patient management as well as communication skills. Students also develop cognitive reasoning skills so as to accurately diagnose comorbid conditions and develop treatment plans appropriate for each patient. Students are exposed to a variety of wound pathology during this clinical wound care rotation. A combination of physician-guided patient care and nursing lead discussion groups allow students to be exposed to many topics related to the essentials of wound patient management. Students are able integrate knowledge already gained in the classroom with clinical medicine.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 24 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80312 FOOT AND ANKLE SURGERY I 4 Credit Hours

This rotation is designed as a well-rounded surgical experience involving all appropriate settings, including the surgical clinic, the hospital, the operating room and academic conferences.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 24 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80313 FOOT AND ANKLE SURGERY II 4 Credit Hours

This rotation is designed as a well-rounded surgical experience involving all appropriate settings, including the surgical clinic, the hospital, the operating room and academic conferences.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 24 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80315 SURGICAL SKILLS WORKSHOP 4 Credit Hours

Provides students with the knowledge and hands-on training pertaining to the physical skills that are necessary to perform surgery of the foot and ankle. An effort is made to correlate didactic information learned in the classroom with the rationale behind why many surgical procedures are performed. Adequate demonstration of surgical skills are provided along with practice time and constructive performance feedback.

Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory
CLI 80320  RADIOLoGY RoTAtIoN  4 Credit Hours
Clinical rotations function by adapting and applying classroom information to real life, “hands-on” situations. A majority of foot complaints necessitate the taking and reading of radiographs. As specialists of the foot and ankle, podiatrists are in a unique situation in being able to take and interpret radiographs in their own offices. Radiographic analysis is therefore and integral component of podiatric medical education. The Radiology/Medical Imaging rotation focuses on those skills commonly performed by the podiatrist. This includes positioning and developing radiographs along with recognizing the most common pedal pathologies.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80351  PODIATRIC MEDICINE/BIOMECHANICS (EUCLID)  4 Credit Hours
Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record the findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. This rotation also provides the student with the opportunity for observation and practice of examination skills required in performing a musculoskeletal and biomechanical evaluation. This involves the development of skill in obtaining a biomechanical/musculoskeletal history, arthrometric evaluation, visual gait analysis and musculoskeletal examination to include muscle strength testing, flexibility and range of motion. The student is also taught, and provided opportunities for practice, various methods of obtaining and evaluating proper biomechanical cast impressions of the feet for the purpose of fabricating orthotic devices. Emphasis is on the practice and refinement of clinical evaluation and manual skills.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80352  PODIATRIC MEDICINE/BIOMECHANICS (INDEPENDENCE)  4 Credit Hours
Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record their findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics, with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. Also provides the student with the opportunity for observation and practice of examination skills required in performing a musculoskeletal and biomechanical evaluation. The student is also taught, and provided opportunities for practice, various methods of obtaining and evaluating proper biomechanical cast impressions of the feet for the purpose of fabricating orthotic devices. Emphasis is on the practice and refinement of clinical evaluation and manual skills.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80356  PRIMARY CARE/VETERANS ADMINISTRATION  4 Credit Hours
This is a one-month rotation at a veteran’s health care facility, which emphasizes the skills necessary to function effectively in government health care facilities.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80370  HISTORY AND PHYSICAL ROTATION  4 Credit Hours
The history and physical rotation is a one month experience in one of the several area hospitals, which is designed to provide experience in history and physical examinations. Each rotation site will provide the same core experiences, (based on the goals and objectives), in patient assessment techniques (i.e., history and physical examination), the understanding of disease processes and management strategies. In addition to the core experiences, each rotation site may add additional exposures and training.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80380  SIMULATED PATIENTS I  4 Credit Hours
Clinical course offered as part of the core clinical rotations in the third year. Covers general medicine rotation, simulated patients interactions and clinical skills exam exposure.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 4 other
Grade Mode: Satisfactory/Unsatisfactory-IP
CLI 80381 SIMULATED PATIENTS II 4 Credit Hours
Clinical course offered as part of the core clinical rotations in the third year. Covers general medicine rotation, simulated patient interactions and clinical skills exam exposure.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 4 other
Grade Mode: Satisfactory/Unsatisfactory-IP

CLI 80441 SENIOR CLINICAL ROTATION I 4 Credit Hours
The senior podiatric rotation is a one-month rotation at the Cleveland Foot and Ankle Institute, which emphasizes competencies needed to enter hospital residency training. Experiences are gained in primary clinical sites and external sites affiliated with the college.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Clinical Laboratory
Contact Hours: 48 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80442 SENIOR CLINICAL ROTATION II 4 Credit Hours
The senior podiatric rotation is a one-month rotation at the Cleveland Foot and Ankle Clinic, which emphasizes competencies needed to enter hospital residency training. Experiences are gained in primary clinical sites and external sites affiliated with the college. Students may choose to complete this experience at an external clerkship site or at the college's clinic in Independence.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Clinical Laboratory
Contact Hours: 48 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80443 SENIOR CLINICAL ROTATION 4 Credit Hours
The senior clinical rotation is designed to maximize student-learning opportunities in a clinical setting. This rotation will take place at the Cleveland Foot & Ankle clinics (Midtown and Independence locations) as well as Cleveland-area Department of Veterans' Affairs locations. Students are assigned to one or more locations for the month.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory, Clerkship
Contact Hours: 40 lecture
Grade Mode: Satisfactory/Unsatisfactory

CLI 80445 SENIOR ROTATION VETERANS ADMINISTRATION HOSPITAL 4 Credit Hours
Designed to provide clinical experiences in primary care management, treatment, and problem solving for that special population in the VA medical center, Brecksville nursing home environment and extended care facilities. This rotation also gives the students the opportunity to gain experience by providing care to the medically disenfranchised veterans. Additionally, intensive educational opportunities are offered to evaluate and treat various degrees of chronic and acute wounds, as well as offer some surgical experience. Finally all students are offered an opportunity to participate in a specialized surgical clinic, designed to be interactive and skills oriented, followed by surgical case presentations and group discussions.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80455 COMMUNITY MEDICINE/MEDICAL IMAGING ROTATION 4 Credit Hours
In addition to the rotations on campus, the college operates several community medicine clinics in various sites throughout the city of Cleveland to fulfill the college's commitment to serve the community. Students are assigned to these clinics and treat patients under the supervision of members of the clinical faculty. Students are afforded the opportunity to provide care and develop an understanding and appreciation of community based health problems. Also included is training in various imaging modalities including plain film radiography, MRI and CT scanning.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 16 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80460 CLERKSHIP ROTATION I 4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 4 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80465 CLERKSHIP ROTATION II 4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80470 CLERKSHIP ROTATION III 4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80475 CLERKSHIP ROTATION IV 4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory
CLI 80480   CLERKSHIP ROTATION V   4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80485   CLERKSHIP ROTATION VI   4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80486   CLERKSHIP ROTATION VII   4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences. This is an elective rotation that is available in the event that students wish to gain additional experience in a clinical setting prior to graduation.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80487   CLERKSHIP ROTATION VIII   4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences. This is an elective rotation that is available in the event that students wish to gain additional experience in a clinical setting prior to graduation.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80490   CLERKSHIP VII   4 Credit Hours
Designed to enhance the clinical education and patient exposure of the podiatric medical student. This interdisciplinary training affords students an opportunity to share and expand their knowledge with experienced members of the health care team in Cleveland and around the country. Office and hospital-based programs available in almost every state, offer a diversity of clinical experiences. Students are expected to participate in a minimum of five months of external rotations during their fourth year, but are given the opportunity to add elective clerkship rotations. An orientation is conducted and a complete handbook of information is provided to the third year student to assist in this important educational process. This is an elective rotation that is available in the event that students wish to gain additional experience in a clinical setting prior to graduation.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 40 other
Grade Mode: Satisfactory/Unsatisfactory

CLI 80521   SENIOR MEDICINE ROTATION I   4 Credit Hours
One month external rotation at an area hospital. Students are instructed in skills, values and knowledge necessary to perform complete medical history and physical.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Clinical Laboratory
Contact Hours: 48 other
Grade Mode: Satisfactory/Unsatisfactory-IP

CLI 80522   SENIOR MEDICINE ROTATION II   4 Credit Hours
One-month external rotation at an area hospital. Students are instructed in skills, values and knowledge necessary to perform a complete medical history and physical.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Clinical Laboratory
Contact Hours: 48 other
Grade Mode: Satisfactory/Unsatisfactory-IP

Community Medicine (CMD)

CMD 80326   PUBLIC HEALTH ADMINISTRATION   3 Credit Hours
Public health administration comprises efforts to improve the health of communities. This course provides an overview for public health administration and practice, including organization, law, legislative relations, financing, workforce issues, leadership, and surveillance.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
CMD 80327 HEALTHCARE LAW AND REGULATION  3 Credit Hours
Healthcare is one of the most heavily regulated industries in the United States. In order to contain spiraling costs, the federal and state governments are focusing on the individual provider conduct in the context of fraud, waste and abuse scrutiny. This course covers the underlying theories behind healthcare law and regulations as well as the specific provisions affected the organization, delivery, and payment of primary health services. Administrators and clinicians will gain a basic understanding of the regulatory environment and provisions impacting their practice.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

General Medicine (GMD)

GMD 80121 PHYSICAL ASSESSMENT AND DIAGNOSIS  3 Credit Hours
Physiology and physical assessment are coordinated to allow students to integrate the underlying physiologic processes with physical diagnostic findings. Physiologic is a study of the basic concepts of normal organ and organ system function. Emphasis is placed on regulatory functions of each organ or system as well as the contribution of each to the whole body homeostasis. Physical diagnosis combines the patient's symptoms and signs to arrive at a diagnosis of disease. Focus is on total body examination using the traditional processes of inspection, palpation, percussion and auscultation.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Laboratory, Lecture
Contact Hours: .73 lecture, 2.27 lab
Grade Mode: Standard Letter

GMD 80205 INTEGRATIVE PHYSICAL DIAGNOSIS FOR INTERNAL MEDICINE  1 Credit Hour
This is an elective course designed to integrate physical assessment in preparation for training in the internal medicine specialties. This course prepares podiatric medical students to better evaluate patient concerns by symptom, utilize and improve their physical diagnostic skills, and optimize preparation for clinical training experiences in the internal medicine specialties. The course emphasizes concepts and integrates knowledge from traditional science disciplines in the context of clinical application.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Satisfactory/Unsatisfactory

GMD 80314 NEUROLOGY  2 Credit Hours
A comprehensive study of neurological diseases that are pertinent to treatment of the podiatric patient. Includes etiologies, diagnosis and treatment of the neurologic diseases.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

GMD 80315 DERMATOLOGY  2 Credit Hours
Series of lectures on dermatologic manifestations of systemic diseases. Includes the etiology, diagnosis, treatment and management of dermatologic disorders.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

GMD 80316 MEDICINE I  4 Credit Hours
The podiatric physician is an integral part of the medical team. The podiatric physician must be able to recognize systemic medical problems that manifest in the lower extremity and interface with other health care professionals for optimal patient care. The podiatric medical/surgical resident must be able to diagnose and treat all medical diseases under the direction of an attending physician in each individual specialty, as does any other medical resident in post graduate training. Medicine GMO 80316 and GMO 80326 are divided into 8 blocks of internal medicine specialties including cardiovascular/pulmonary medicine, endocrinology, hematology/oncology, nephrology, infectious disease, rheumatology/immunology, gastrointestinal medicine, and emergency medicine. GMO 80316 emphasizes Cardiovascular/pulmonary medicine, endocrinology, infectious disease, and rheumatology/immunology. This course prepares podiatric medical students to enter clinical training experiences in the internal medicine specialties. The course emphasizes concepts and integrates knowledge from traditional science disciplines in the context of clinical application.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Standard Letter

GMD 80326 MEDICINE II  4 Credit Hours
The podiatric physician is an integral part of the medical team. The podiatric physician must be able to recognize systemic medical problems that manifest in the lower extremity and interface with other health care professionals for optimal patient care. The podiatric medical/surgical resident must be able to diagnose and treat all medical diseases under the direction of an attending physician in each individual specialty, as does any other medical resident in post graduate training. Preclinical Sciences (PCS)

PCS 80001 COMPREHENSIVE BASIC SCIENCE I  1 Credit Hour
This course will be required for all Pathway I students. Pathway I students are defined as students who fail APMLE Part I on the first attempt and are preparing to take it for the second time. Students who do not take APMLE Part I on the first attempt will be also be required to take this course.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Satisfactory/Unsatisfactory

PCS 80002 COMPREHENSIVE BASIC SCIENCE II  5 Credit Hours
This course will be required for all Pathway II students. Pathway II students are defined as students who fail APMLE Part I on the first and second attempts and are preparing to take it for the third and final time. Eligible students who do not sit for APMLE Part I the first time offered and who fail on their first attempt will be required to take this course as well.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 5 other
Grade Mode: Satisfactory/Unsatisfactory

PCS 80109 HUMAN ANATOMY  6 Credit Hours
The macroscopic anatomy of the upper limb, thorax, abdomen, head and neck, pelvis and perineum of the human body is described, utilizing audiovisual teaching aids and full cadaver dissection. The course is taught using a regional approach, with emphasis on structural and functional relationships. The laboratory instruction includes cadaver dissection supplemented with anatomical prosections, as well as cross-sectional anatomy and computerized educational material.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 4 lecture, 4 lab
Grade Mode: Standard Letter

PCS 80110 EMBRYOLOGY  2 Credit Hours
This course will cover the major events and processes involved in normal and abnormal embryologic development of the major body organs and systems.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PCS 80112 CELL AND TISSUE  5 Credit Hours
Histology is the study of the microscopic organization of the human body. Reciprocal relationships between normal structural features and their functions are emphasized. Macromolecules, organelles, cells, fundamental body tissues and organs are compared and contrasted. Light microscopic preparations are examined in laboratories, which are closely correlated with lecture topics.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Laboratory, Lecture
Contact Hours: 3 lecture, 1 lab, 1 other
Grade Mode: Standard Letter

Podiatric Biomechanics/Orthopedics (ORT)

ORT 80131 BIOMECHANICS I  3 Credit Hours
Biomechanics is a comprehensive course, which stresses normal gait and foot function. Abnormalities in gait of foot mechanics are related to foot pathology.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ORT 80132 REHABILITATIVE MEDICINE  2 Credit Hours
Rehabilitative Medicine reviews various physical therapy modalities and principles of rehabilitation. Examples of application of these principles as relating to foot pathology are given.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

ORT 80135 SPORTS MEDICINE  2 Credit Hours
Sports Medicine is a comprehensive course. Students gain an understanding of running biomechanics, shoe gear construction and evaluation, and the incidence, etiology, pathomechanics, evaluation and treatment of many lower extremity sports pathologies.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

GMD 80327 BEHAVIORAL MEDICINE  1 Credit Hour
Behavioral medicine is a series of lectures on major topics in the area including mood and anxiety disorders, alcoholism, substance abuse, psychoses and pain management. The presentations relate the relevance to the practice of podiatry.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

GMD 80328 WOMEN'S HEALTH  1 Credit Hour
Seminar covering important areas unique to women including pregnancy, contraception, infertility, cardiovascular health, osteoporosis and menopause.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Satisfactory/Unsatisfactory

GMD 80329 Podiatric Biomechanics/Orthopedics

PCS 80110 HUMAN ANATOMY  6 Credit Hours
The macroscopic anatomy of the upper limb, thorax, abdomen, head and neck, pelvis and perineum of the human body is described, utilizing audiovisual teaching aids and full cadaver dissection. The course is taught using a regional approach, with emphasis on structural and functional relationships. The laboratory instruction includes cadaver dissection supplemented with anatomical prosections, as well as cross-sectional anatomy and computerized educational material.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 4 lecture, 4 lab
Grade Mode: Standard Letter

PCS 80112 CELL AND TISSUE  5 Credit Hours
Histology is the study of the microscopic organization of the human body. Reciprocal relationships between normal structural features and their functions are emphasized. Macromolecules, organelles, cells, fundamental body tissues and organs are compared and contrasted. Light microscopic preparations are examined in laboratories, which are closely correlated with lecture topics.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Laboratory, Lecture
Contact Hours: 3 lecture, 1 lab, 1 other
Grade Mode: Standard Letter
PCS 80113 STAYING ALIVE 5 Credit Hours
The study of the physical and chemical properties of the major constituents of cells and body fluids. This includes structures, functions and biochemical mechanisms involved in the biosynthesis, utilization and degradation of amino acids, carbohydrates, lipids, proteins and nucleic acids. Also included are enzyme kinetics, bioenergetics, cellular communication, nutrition and biochemistry of specialized tissues and fluids.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 3 lecture, .5 lab, 1.5 other
Grade Mode: Standard Letter

PCS 80118 MEDICAL GENETICS 2 Credit Hours
This course provides basic principles of human genetics dealing with genetic variations and anomalies that impact medical practice. Molecular genetics, cytogenetics, genomics, and population genetics will be reviewed.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PCS 80119 HUMAN ANATOMY AND EMBRYOLOGY 8 Credit Hours
The human upper limb, head and neck, thoracic, abdominal and pelvic anatomy is explored through lecture, audiovisual aids and cadaver dissection. The material is presented in a regional approach, with emphasis on structural and functional relationships, and is correlated with cadaver dissection. In addition, early events in human embryology are presented and discussed followed by coverage of regional and system-based events during embryological and fetal development. Anatomical and embryological topics are correlated throughout the course.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Combined Lecture and Lab
Contact Hours: 6 lecture, 4 lab
Grade Mode: Standard Letter

PCS 80121 NEUROMUSCULAR SYSTEMS 5 Credit Hours
Neuromuscular Systems covers the microanatomy, structures, pathways, connections, biochemistry and physiology of the nervous and muscular (both skeletal and smooth) systems. Students must be first year podiatric students taking Spring semester courses. Students must be first year podiatric students taking Spring semester courses.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 5 lecture
Grade Mode: Standard Letter

PCS 80122 CARDIOVASCULAR SYSTEM 3 Credit Hours
Cardiovascular System covers the microanatomy, structures, biochemistry and physiology of the heart, blood vascular and lymphatic systems. Students must be first year podiatric students taking Spring semester courses.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PCS 80123 RENAL AND RESPIRATORY SYSTEMS 3 Credit Hours
Renal and Respiratory Systems covers the microanatomy, structures, pathways, connections, biochemistry and physiology of the renal and respiratory systems. Students must be first year podiatric students taking Spring semester courses. Pre/corequisites: None Corequisites: None
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 45 lecture, 0 lab, 0 other
Grade Mode: Standard Letter

PCS 80124 LOWER EXTREMITY ANATOMY 8 Credit Hours
Lower extremity anatomy presents the detailed macroscopic anatomy of the lower limb. The course is augmented with radiographs, MRI, surface anatomy and cross sectional studies. The course includes an introduction to basic concepts of podiatric medicine, surgery and biomechanics. Laboratory instruction includes a detailed dissection of the lower limb, supplemented with computerized educational materials and study of natural bone specimens.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Laboratory, Lecture
Contact Hours: 4 lecture, 4 lab
Grade Mode: Standard Letter

PCS 80128 MEDICAL MICROBIO/IMMUNOLOGY 6 Credit Hours
This course will introduce the student to the basic concepts, characteristics and techniques used in the study of the clinically significant microbic groups: viruses, bacteria, fungi, and protozoa. The structure, metabolism, genetics, control and laboratory techniques of each microbic group will be described. The roles and outcomes of these organisms in producing manifestations of human infection and disease will be investigated. This course will also introduce the student to the molecular, cellular and organismal mechanisms responsible for the human immune response system. Laboratory will provide hands on experience in staining, cultivation, identification, sensitivity testing, and immunologic techniques.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Combined Lecture and Lab
Contact Hours: 5 lecture, 1 lab
Grade Mode: Standard Letter

PCS 80218 HUMAN SYSTEMS PATHOLOGY I 8 Credit Hours
The study of disease with emphasis on epidemiology, pathogenesis, natural history, morphologic appearance and relationship to clinical manifestation. Emphasis is placed on basic cellular pathologic processes (injury, inflammation and repair, neoplasia), and description of diseases organized by organ system. An introduction to the concepts of clinical decision making through the use of case studies and current clinical literature will be emphasized.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 8 lecture
Grade Mode: Standard Letter
PCS 80219 PHARMACOLOGY AND THERAPEUTICS I 4 Credit Hours
Historically, the clinician was responsible for information about the sources, physical and chemical properties, compounding and dispensing of drugs. Today the practitioner’s responsibility requires the rational clinical use of therapeutic agents for the prevention, diagnosis, and treatment of disease based on an understanding of pharmacological principles. This course is designed to prepare practitioners to prescribe for maximum benefit and to recognize the clinical ramifications of concomitant drug therapy.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Standard Letter

PCS 80228 HUMAN SYSTEMS PATHOLOGY II 8 Credit Hours
The study of disease with emphasis on epidemiology, pathogenesis, natural history, morphologic appearance and relationship to clinical manifestation. Emphasis is placed on basic cellular pathologic processes (injury, inflammation and repair, neoplasia), and description of diseases organized by organ system. An introduction to the concepts of clinical decision making through the use of case studies and current clinical literature will be emphasized.
Prerequisite: Student must be enrolled in the podiatric medicine program.
Schedule Type: Lecture
Contact Hours: 8 lecture
Grade Mode: Standard Letter

Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Standard Letter

PCS 80230 PRECLINICAL SCIENCES COMPETENCY 4 Credit Hours
This course will assist students with preparation for taking the APMLE Part 1 board examination. Specifically this course will address the preclinical science areas of general anatomy (including embryology, histology, genetics and neuroanatomy); lower extremity anatomy; biochemistry; physiology; microbiology and immunology; pathology; and pharmacology. Students must be in their second year.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Satisfactory/Unsatisfactory

Podiatric Medicine (PMD)

PMD 80113 MEDICAL ETHICS 1 Credit Hour
The focus of the medical ethics curriculum is to provide a foundation in ethical analysis, augment knowledge of contemporary bioethics issues, and offer experience applying ethical reasoning to clinical cases. The goal of this course is to promote discussion of the ethical responsibilities of a doctor to their patients.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PMD 80114 PRINCIPLES OF MEDICAL RESEARCH 1 Credit Hour
It is important for a podiatric physician to have developed the ability to read and interpret the medical literature. This requires a fundamental understanding of biostatistics, epidemiology, and research design. This course provides a framework for the development of an evidence-based methodology to patient care.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PMD 80117 PODIATRY, PROFESSIONALISM AND SOCIETY I 1 Credit Hour
This introductory course is the first in a series that spans all four years of the DPM program. The subject matter is relevant but nontraditional in nature with respect to classic medical education. Some of the topics covered are sometimes considered “soft topics” covering a wide range of subjects that podiatric medical students encounter in their personal, academic and professional careers. Students will participate in discussions and projects on ethics, socio-behavior and issues, and practice related topics such as professionalism, communication, empathy, and time and financial management. Other topics related to the National Board Examinations, personal health, and team-based healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they advance their learning. An emphasis on academic and personal wellness in the first year of podiatric medical school is the focus of this course.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Satisfactory/Unsatisfactory

PMD 80132 LOW EXTREMITY ASSESSMENT AND DIAGNOSIS 2 Credit Hours
A comprehensive approach to physical examination, which combines the patient’s symptoms and the physical signs to arrive at a diagnosis of disease. It is accomplished by training students in the methods of history taking and physical examination. The course focuses on lower extremity examination. The traditional processes of inspection, palpation, percussion and auscultation are emphasized.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter
PMD 80133  INTRODUCTION MEDICAL IMAGING  1 Credit Hour
Podiatric physicians are fully licensed to order, perform and interpret radiologic studies of the foot and ankle. As operators of ionizing x-ray equipment, all practitioners must undergo basic training in x-ray physics, image control and quality assurance, safety and patient positioning. These four building blocks comprise the foundation of this course in fundamentals.
Prerequisite: Student must be enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PMD 80211  PODIATRIC MEDICINE I  2 Credit Hours
This is a core course designed to present the 2nd year student with the full spectrum of pathology, which he or she will encounter during his or her clinical training and later in private practice. Topics include infectious disease, wound care, rheumatology, vascular medicine, and the diabetic foot. The student will be instructed in the evaluation of foot and ankle pathology including signs, symptoms, and differential diagnosis. Laboratory and radiographic evaluation will be discussed when appropriate. The student will also be instructed in the treatment alternatives available in each case.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PMD 80214  RADIOLOGY AND MEDICAL IMAGING I  2 Credit Hours
This course encompasses the fundamentals of modern musculoskeletal imaging, with particular emphasis on the foot and ankle. The course begins with basic principles of plain film radiographic imaging, an approach that emphasizes the correlation of abnormal findings with basis pathologic differential consideration. Lectures will then introduce the student to pedal biomechanical radiography before moving to cover the imaging topics such as the pedal arthropathies, infection and the diabetic foot. The semester will end with a detailed presentation of the diabetic neuro-osteoarthropathy (Charcot arthropathy).
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PMD 80221  PODIATRIC MEDICINE II  2 Credit Hours
This is a core course designed to present the 2nd year student with the full spectrum of pathology, which he or she will encounter during his or her clinical training and later in private practice. Topics include infectious disease, wound care, peripheral neuropathy, vascular medicine, and the diabetic foot. The student will be instructed in the evaluation of foot and ankle pathology including signs, symptoms, and differential diagnosis. Laboratory and radiographic evaluation will be discussed when appropriate. The student will also be instructed in the treatment alternatives available in each case.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PMD 80222  PODIATRIC MEDICAL SKILLS  2 Credit Hours
Podiatric Medical Skills is a practical course, which includes strapping and padding, instrument dexterity, local anesthetic injection, nail avulsion technique, blood glucose finger stick, handheld Doppler exam, fitting for diabetic shoes, arthrometric examination and casting for orthoses. Students are taught the indications and proper application of adhesive bandages and splints for the prevention of injury, control of foot function and treatment of injuries to the foot and lower extremity. Padding is the treatment of foot pathology by redistribution of weight, stress and friction. Students are taught how to relieve acute and chronic pathologies of the foot through the use of various padding materials, or prefabricated pads. Students also gain an understanding of the theory of pad placement. Students are taught the proper techniques for performing toenail avulsions, blood glucose finger sticks, and using the handheld Doppler. Students are taught the proper methods of fitting for diabetic shoes, performing a foot and ankle arthrometric examination and casting methods for foot orthoses.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Laboratory
Contact Hours: 2 lab
Grade Mode: Satisfactory/Unsatisfactory

PMD 80224  RADIOLOGY AND MEDICAL IMAGING II  2 Credit Hours
The Spring semester course will continue to the topic of imaging complex diabetic foot problems, focusing on non-invasive imaging modalities as potential problem solvers. The first of these will be radionuclide imaging modalities, which will be covered in detail. From the diabetic foot, the course will then logically continue onto defining and then detailing the classic metabolic bone disorders. The course will then delve into the basics of MR and CT sectional imaging. The course will then formally cover applications to common pedal problems such as infection, trauma, and bone and soft tissue tumors. The course will then conclude with an introduction to diagnostic musculoskeletal ultrasound.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PMD 80317  PODIATRY, PROFESSIONALISM AND SOCIETY III  1 Credit Hour
This course is the third in a series that spans all four years of the DPM program. The subject matter is functionally relevant but nontraditional in nature with respect to classic medical education. Topics cover a wide range of subjects that podiatric medical students encounter in their academic and professional careers. Students will participate in discussions and projects on ethics, socio-behavior, and practice related topics such as professionalism, communication, and time and financial management. Other topics related to personal health and the changing healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they advance their learning. The content will be relevant to the third year podiatric medical school student.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Satisfactory/Unsatisfactory
PMD 80318  PEDIATRICS  2 Credit Hours
Pediatrics is a comprehensive course, which introduces general pediatric pathologic processes, pediatric H&P and emphasizes the incidence, etiology, pathomechanics, evaluation and treatment of common lower extremity pathology in children.
Prerequisite: This course has prerequisites of successful completion of all 1st and 2nd year curriculum in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

PMD 80396  INDEPENDENT STUDY  5 Credit Hours
Independent study in Podiatric Medicine.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Individual Investigation
Contact Hours: 5 other
Grade Mode: Satisfactory/Unsatisfactory

PMD 80417  PODIATRY, PROFESSIONALISM AND SOCIETY IV  4 Credit Hours
This course is the last in a series that spans all four years of the DPM program. The subject matter is functionally relevant but nontraditional in nature with respect to classic medical education. Topics cover a wide range of subjects that podiatric medical students encounter in their academic and professional careers. Students will practice self-directed learning while preparing for graduation. There will be discussions and projects in various areas such as ethics, social behavior, as well as practice related topics such as professionalism, communication, business, and courtroom law/malpractice. Other topics related to personal health and the changing healthcare system will also be covered. Ultimately, students will develop a more unique level understanding and appreciation of the above referenced themes as they finalize their DPM degree program. The content will be relevant to the fourth year podiatric medical school student.
Prerequisite: Students must be enrolled in the Podiatric Medicine program in order to register for this course.
Schedule Type: Lecture
Contact Hours: 4 lecture
Grade Mode: Satisfactory/Unsatisfactory

PMD 80495  ST PODIATRIC GEN MED  1-4 Credit Hours
(Repeatable for maximum 8 credit hours) The special topics course is to sample new offerings on various topics.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 1-4 lecture
Grade Mode: Standard Letter

Podiatric Surgery (SUR)

SUR 80221  INTRODUCTION TO PODIATRIC SURGERY  2 Credit Hours
This course is designed to provide the 2nd year podiatric medical student with a comprehensive understanding of the basic and fundamental principles and techniques of surgery, with emphasis on wound healing, closure techniques, hemostasis, lower extremity tourniquets and basic surgical procedures. Surgical and hospital protocol, charting, instrumentation and injection techniques are taught in this course, along with basic forefoot surgery, including nail disorders, soft tissue, skin tumors and digital surgery. The use of local anesthetic agents including indications, classification, pharmacology, adverse reactions (and treatment of such reactions) and injection techniques will be discussed. In addition, the course provides an orientation to operating room protocol, allowing students to master necessary techniques of asepsis, gowning, gloving and surgical scrubbing. Introduction to these skills will be taught in weekly workshops in the surgical skills lab.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

SUR 80313  PODIATRIC SURGERY  2 Credit Hours
A comprehensive working knowledge of common deformities of the foot is essential to the podiatric physician in providing comprehensive care of patients. This course provides the 3rd year podiatric medical student with the knowledge of surgical management of patients and their foot deformities. The course includes material on the etiology, clinical and radiographic evaluation, indications and contraindications, as well as postoperative considerations and care. These courses discuss the surgical management of deformities of the foot, ankle and lower leg and include surgical complications. In addition, several lectures are dedicated to special topics, such as AO/ASIF Fixation, Bio-materials, Arthroscopic surgical procedures and reconstructive foot and ankle procedures. Weekly skills workshops will be held in the surgical skills laboratory. Emphasis is placed on current and prevailing concepts and techniques employed by the podiatric physician.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

SUR 80323  PODIATRIC SURGERY  2 Credit Hours
A comprehensive working knowledge of common deformities of the foot is essential to the podiatric physician in providing comprehensive care of patients. This course provides the 3rd year podiatric medical student with the knowledge of surgical management of patients and their foot deformities. The course includes material on the etiology, clinical and radiographic evaluation, indications and contraindications, as well as postoperative considerations and care. These courses discuss the surgical management of deformities of the foot, ankle and lower leg and include surgical complications. Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter
SUR 80325  TRAUMATOLOGY  2 Credit Hours
The purpose of the course is to provide the 3rd year podiatric medical students with a broad overview and appreciation of the major trauma areas of the foot, including the midfoot, rearfoot, ankle and lower leg. A strong effort is made to correlate the mechanical, surgical, physiologic and anatomic principles of surgery with emphasis on their implications and applications in major reconstructive surgery and the management of the trauma patient who presents with foot and or ankle trauma. Surgical procedures for the management of specific trauma situations will be discussed, as well as indications, contraindications, and post-operative management. An overall view of the trauma patient as viewed in a Level I trauma center will also be included as this is a major responsibility for the podiatric physician treating the trauma patient.
Prerequisite: Enrolled in the college of podiatric medicine.
Schedule Type: Lecture
Contact Hours: 2 lecture
Grade Mode: Standard Letter

Description
The Doctor of Podiatric Medicine degree prepares students for the podiatric medicine field. The podiatric physician is a health professional who is involved with examination, prevention, diagnosis and treatment of foot disorders by physical, medical and surgical means. A podiatric medicine doctor is trained to detect the signs of systemic disease which may appear first in the lower extremity, such as diabetes or circulatory disorders. When such diagnoses are made, the podiatric physician consults with the patient’s family doctor concerning the systemic disease.

A career in podiatric medicine can include the areas of primary care, surgery, orthopedics, sports medicine, geriatrics and pediatrics.

Accreditation
The D.P.M. degree in Podiatric Medicine is accredited by the Council on Podiatric Medical Education (CPME) of the American Podiatric Medical Association (APMA).

Admission Requirements
• Minimum 90 semester credit hours (or minimum 135 quarter hours) of undergraduate coursework, including the following prerequisites:
  • 6 semesters (or 9 quarter hours) of English
  • 8 semesters (or 12 quarter hours) each of biology, physics, organic chemistry and general/inorganic chemistry
  • following classes are recommended: biochemistry, histology, anatomy and physiology, neurobiology and microbiology.
• Medical College Admission Test (MCAT) scores - effective for fall 2023 admissions, scores for the Dental Admission Test (DAT) may be submitted in place of the MCAT
• Two letters of recommendation - one an academic letter or a composite letter from a pre-medical advisory committee, and one a letter from a practicing doctor of podiatric medicine.
• English language proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  • Minimum 587 TOEFL PBT score (paper-based version)
  • Minimum 94 TOEFL IBT score (internet-based version)
  • Minimum 82 MELAB score
  • Minimum 7.0 IELTS score
  • Minimum 65 PTE score
  • Minimum 120 Duolingo English score

Nearly all of entering D.P.M. students will have earned a bachelor’s or advanced degree prior to matriculation; however, students may be granted admission with the required undergraduate coursework (90 semester hours or 135 quarter hours) and prerequisites completed.

For more information about graduate admissions, visit the graduate admission website. For more information on international admission, visit the Office of Global Education website.

Technical Standards and Essential Requirements for Student Education at Kent State University College of Podiatric Medicine.

The College of Podiatric Medicine is committed to the admission and advancement of all qualified students. College policy prohibits discrimination against anyone solely based on race, sexual orientation, gender, veteran status, color, national origin, religion, age, handicap or disability.
The faculty and administration have adopted the following technical standards and essential requirements that must be met by all students for progression and graduation. These technical standards expected of students seeking the degree of doctor of Podiatric Medicine reflect the college’s highest commitment to the safety of its students and patients, and recognize the essential functions of the profession of podiatric medicine.

The following standards and requirements describe the academic abilities and non-academic qualifications that are essential to the program of instruction, are directly related to the licensing requirements, and are directly related to those physical abilities, mental abilities, skills, attitudes and behaviors that students must demonstrate or perform at each stage of their education to ultimately ensure patient safety.

- **Visual observation and integration:** Candidates and students must have sufficient vision to observe demonstrations, video materials, and slides through a microscope and computer screens. They must acquire information from written documents, radiographs, photographs, charts and diagrams. They must be able to observe a patient accurately close at hand and at a distance to assess asymmetry, range of motion and tissue.Texture changes.

- **Communication:** Candidates and students must be able to communicate effectively in oral and written formats, and in settings where time span is limited. This includes communication in clinical and laboratory settings. Candidates must be able to accurately elicit information in a timely and efficient manner. Candidates must be able to describe a patient’s condition to the patient and to others in the diagnosis and treatment process.

- **Other sensory capacities:** Students must independently be able to take an oral history, do stethoscopy and communicate while wearing a surgical mask. Students must also have sufficient somatosensory capacity to palpate pulses, use a tuning fork and assess skin temperature.

- **Motor functions:** Candidates and students must have sufficient motor function reasonably required to undertake classes, laboratories and demonstrations, to provide general patient care as well as emergency treatment to patients. This includes cadaver dissection, microscopy, aseptic technique and safe handling of microbiological specimens. Also included is the motor capacity for chart and prescription writing, palpation, percussion, auscultation and other diagnostic maneuvers. All of these tasks must be done in a timely and efficient manner within prescribed time limitations relative to the context of a practicing physician. Examples of common daily treatments include, but are not limited to, palliative care of foot and ankle problems, injections, orthotic impressions, taking and processing of pedal radiographs, and performance of soft tissue and osseous tissue surgical procedures. Examples of emergency treatments include, CPR, administration of intravenous medications, the opening of obstructed airways, and hemostasis techniques.

- **Intellectual, conceptual, quantitative and integrative abilities:** Candidates must have sufficient cognitive abilities and effective learning techniques to assimilate the detailed and complex information presented in the medical student curriculum. Candidates must engage in critical thinking and problem solving. They must be able to learn through a variety of modalities including, but not limited to, classroom and lab instruction and exams; small group, team and collaborative activities; individual study; preparation and presentation of reports; and use of computer technology. Candidates must be able to consistently, quickly and accurately measure, calculate, interpret, reason, memorize, analyze, synthesize and transmit information across modalities. Candidates must be able to demonstrate these skills and procedures under pressure and in a timely fashion across a range of conditions and time frames. They must be able to recognize and draw conclusions under pressure and in a timely fashion across a range of conditions and time frames. They must be able to recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events. These skills and abilities are fully defined by the faculty and explained in course syllabi.

- **Behavioral and social attributes:** Candidates must demonstrate the maturity and emotional stability required for full use of their intellectual abilities. They must accept responsibility for learning, exercising good judgement and promptly completing all responsibilities attendant to the diagnosis and care of patients. They must understand the legal and ethical aspects of the practice of medicine and function within both the law and ethical standards of the medical profession. Candidates must be able to work effectively, respectfully and professionally as part of the healthcare team and to interact with patients, their families, and health care personnel in a courteous, professional and respectful matter. They must be able to tolerate physically taxing workloads and long work hours, to function effectively under stress and to display flexibility and adaptability to changing environments.

- **Involvement in invasive and exposure-prone procedures:** Candidates and students must be qualified to be personally and actively involved in invasive and exposure-prone procedures without being a danger to patients, other health care professionals or fellow students. They must demonstrate adherence to the universal precautions as defined by the Center for Disease Control. As part of the technical standards and essential requirements to matriculate at the college, the following statement shall apply: If the student is HIV seropositive, the student may be restricted by the State Medical Board of Ohio from performing procedures required for graduation. If the student is HBV and or HCV positive and does not demonstrate non-infectivity, the student may be restricted by the State Medical Board of Ohio from performing procedures required for graduation. Any questions regarding these requirements should be directed to the senior associate dean.

**Program Learning Outcomes**

The following educational outcomes will be attained as a result of the cumulative effect of both didactic instruction in preclinical courses and clinical courses, as well as clinical experiences afforded through clinical rotations and clerkship experiences. The goal is to prepare the graduate for successful entry into postdoctoral training program.

1. To have an appreciation of the ethical responsibilities of the physician to his or her patient.
2. Demonstrate an understanding of medical statistics, epidemiology and research methods.
3. Diagnose common foot and ankle pathology utilizing signs, symptoms, differential diagnosis, laboratory and X-ray evaluations; and discuss treatment alternatives available in each diagnosis, including the following:
   - Hallux valgus
   - Hallux limits
   - Contracted and deformed lesser digits
   - Hyperpronation on hindfoot
   - Hypersupination of hindfoot
   - Morton’s Neuroma
   - Capsulitis of forefoot

Program Notes

Minimum Total Credit Hours: 214

Students take 1 credit hour of CLI 80200 in either fall or spring semester.

Students take 32 credit hours of third-year clinical in either fall or spring semester and follow a class rotation.

Students are separated into groups with a different rotation each month. Students are permitted to take one clerkship month off as an elective month. CLI 80486 and CLI 80487 are elective clerkship rotations available to students who wish to gain further clinical experience on top of the required seven clerkship rotations. Please note, once a student registers for these electives, the required minimum total credit hours for the student will increase by 4 credit hours for each elective. PMD 80495 may be available for students to take as an elective on top of the program requirements.

For the fourth-year clinical, students take courses not taken during their third-year summer term.

• Students placed in Pathway I (due to one failure on the American Podiatric Medical Licensing Examination, APMLE Part I) are required to take PCS 80001, increasing the minimum total credit hours by 5 credit hours. Students not taking APMLE Part I on the first attempt are also required to take this course.

• Students placed in Pathway II (due to two failures on the American Podiatric Medical Licensing Examination, APMLE Part I) are required to take PCS 80002, increasing the minimum total credit hours by 5 credit hours. Students not taking APMLE Part I on the second attempt are also required to take this course.

• GMD 80205 is an elective open to all second-year students. Please note, once students register for this course, the required minimum number of credit hours increases by one credit hour.

Students whose first semester of coursework in the D.P.M. degree is fall 2016 or later are required to meet the following minimum overall GPA during the first and second year.

• 2.500 overall GPA at the end of year 1, fall semester
• 2.500 overall GPA at the end of year 1, spring semester
• 2.500 overall GPA at the end of year 1, summer term
• 2.500 overall GPA at the end of year 2, fall semester
• 2.400 overall GPA at the end of year 2, spring semester

Students falling below the minimum overall GPA following year 1, fall, spring and summer, or year 2, fall semester, are required to participate in mandatory academic counseling. Students below the minimum 2.400 overall GPA at the end of year 2, spring semester, will be academically dismissed with the right to appeal for reinstatement, provided that the
student has not previously been dismissed (academic or otherwise) from the College of Podiatric Medicine.

A candidate for the degree of Doctor of Podiatric Medicine must have:

- Maintained satisfactory academic performance with no grade below a C or S (satisfactory)
- Demonstrated clinical competence through completion of the performance objectives
- Been verified as being in good disciplinary standing
- Satisfactorily completed all academic requirements, including clinical rotations and externship/clerkship program requirements
- Fulfilled all responsibilities and financial obligations to the college and university
- Demonstrated moral and mental competency to practice podiatric medicine
- Taken and passed the American Podiatric Medical Licensing Examination (APMLE) Part I, and have taken both sections of Part II (written examination and the Clinical Skills Encounter—CSPE examination) and released the score reports to the college

**Attendance at the graduation ceremony is required.**

- In order to be eligible for graduation in May, candidates must have met all of the above requirements prior to June 30th immediately following the May graduation.
- All students must successfully complete the graduation requirements within six years of their initial matriculation. Exceptions for students with extenuating circumstances must have the approval of the Council on Podiatric Medical education (CPME).
- There is no contract stated or implied, between the college and the students that a degree will be conferred at any stated time, or at all.

Mission of the College
The mission of the College of Public Health is to advance public health by preparing leaders, scientists and practitioners to collaborate with community partners in conducting impactful research and practice to solve public health challenges.

Kent State University’s College of Public Health was established in 2009 to educate and prepare students to meet the current and projected shortage of public health professionals in Ohio and the nation. It is one of only two schools of public health in Ohio and the first to offer a Bachelor of Science in Public Health degree. In addition to the bachelor’s degree, the college also offers a Master of Public Health degree, Master of Science degree in Clinical Epidemiology and a Doctor of Philosophy degree. The academic programs integrate theory and practice to equip graduates with the knowledge and skills to address and solve the health challenges of the 21st century. Faculty engage in innovative research that seeks answers to some of society’s most challenging public health issues. Partners include local health departments,
community organizations, health care institutions and businesses; those partnerships provide students with applied practical experiences in public health.

**Undergraduate Programs**
- Public Health - B.S.P.H.

**Minors**
- Environmental Health Sciences
- Health Services Administration
- Health Technologies and Informatics
- Public Health

**Graduate Programs**
- Clinical Epidemiology - M.S.
- Public Health - M.P.H.
- Public Health - Ph.D.

**Undergraduate Certificates**
- Public Health

**Accreditation Feedback Policy**
The College of Public Health at Kent State University has been accredited by the Council on Education for Public Health (CEPH) as a school of public health. Being an accredited institution adds great value to degrees conferred and ensures a comprehensive student experience. A continual self-evaluation program is required by CEPH for accreditation. At the core of this program, it is required that the college solicit and respond to feedback from our students. Accordingly, it is an expectation of the college that students earnestly participate in providing accurate and timely feedback to the college in the form of Student Surveys of Instruction (SSI) as well as annual exit and alumni satisfaction surveys. Participation in the feedback process will assist in the College's accreditation process and will allow the administration and faculty to quickly identify and address any problems as they arise, thus enhancing the quality of the academic experience in the college.

Students who fail to complete the required surveys may be prevented from future term registration.

**Biostatistics (BST)**

**BST 50196 INDIVIDUAL INVESTIGATION IN BIOSTATISTICS** 1-3 Credit Hours
(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to biostatistics. **Prerequisite:** Graduate standing; and special approval.
**Schedule Type:** Individual Investigation
**Contact Hours:** 1-3 other
**Grade Mode:** Standard Letter-IP

**BST 52019 BIOSTATISTICS IN PUBLIC HEALTH** 3 Credit Hours
Provides students with an understanding of basic statistical methods in public health research, as well as the skills to perform and interpret basic statistical procedures. Students learn how to use statistical analysis software to analyze real data from public health-related studies. They then learn how to interpret the analysis and present the results to public health professionals and educated lay audiences. Includes lab component that enhances student awareness and informed usage of the statistical software SAS for public health analysis. Students learn how to input, read, store, export and modify data in SAS and be able to use common SAS procedures to analyze public health data and conduct independent SAS programming. **Prerequisite:** Graduate standing.
**Schedule Type:** Lecture
**Contact Hours:** 3 lecture
**Grade Mode:** Standard Letter
**BST 60191** VARIABLE CONTENT SEMINAR IN BIOSTATISTICS 1-3 Credit Hours
(Repeatable for credit) Seminar on current and important topics in biostatistics. Subject matter varies depending on the topic.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 1-3 other
Grade Mode: Standard Letter

**BST 60192** APPLIED PRACTICE EXPERIENCE IN BIOSTATISTICS 3,6 Credit Hours
(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 9-18 other
Grade Mode: Satisfactory/Unsatisfactory-IP

**BST 60195** SPECIAL TOPICS IN BIOSTATISTICS 1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in biostatistics.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

**BST 60292** APPLIED PRACTICE EXPERIENCE IN BIOSTATISTICS II 1 Credit Hour
Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.
Prerequisite: BST 60192; and graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory

**BST 62020** DATA MANAGEMENT AND LOGIC USING SAS® SOFTWARE 3 Credit Hours
(Slashed with BST 82020) This course introduces graduate students to SAS® software, reading external data into SAS software, use of SAS data step, basic SAS functions, logical data steps for data management, and different SAS procedures for creating summary reports, graphical displays, and conducting basic statistical analysis using the SAS software. SAS Lab sessions are designed to mimic real time challenges working with different kinds of data and learn how to meet such challenges. By the end of the course, students will achieve competency in proper and efficient use of SAS software.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**BST 63012** SURVIVAL ANALYSIS IN PUBLIC HEALTH 3 Credit Hours
Introduction in survival analysis for graduate students in public health. Covers survival functions, hazard rates, types of censoring and truncation. Methods of focus include life tables, Kaplan-Meier plots, log-rank tests, Cox regression models and parametric survival models. Inference for recurrent event and competing risks models are also covered.
Prerequisite: BST 52019 and 63014; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**BST 63013** EXPERIMENTAL DESIGNS IN PUBLIC HEALTH RESEARCH 3 Credit Hours
Introduces students to experimental research methods, in public health settings. First introduces a number of quasi-experimental and experimental study designs, then identifies a number of statistical methods that can be used to draw correct causal inferences from the study.
Prerequisite: BST 52019 and 63014; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**BST 63014** APPLIED REGRESSION ANALYSIS OF PUBLIC HEALTH DATA 3 Credit Hours
(Slashed with BST 83014) Focuses on developing student proficiency in building and evaluating various regression models for public health studies. Topics covered include exploratory and descriptive methods, simple and multiple linear regression models, predictor selection, binary and multinomial logistic regression models, survival analysis, repeated measures and generalized linear models.
Prerequisite: BST 52019; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**BST 63015** CATEGORICAL DATA ANALYSIS OF PUBLIC HEALTH DATA 3 Credit Hours
(Slashed with BST 83015) Provides an applied introduction to the most important methods for analyzing categorical data in public health. Topics covered include contingency tables, logistic regression, generalized linear models, modeling matched pairs and clustered responses.
Prerequisite: BST 52019 and EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**BST 73011** MULTIVARIATE ANALYSIS IN PUBLIC HEALTH 3 Credit Hours
Multivariate statistical methods are designed to evaluate more than one variable at a time. An application-oriented introduction to essential multivariate statistical methods used in public health. Topics covered include matrix theory, data screening and preliminary analyses, multivariate normal distributions, multivariate versions of the general linear model (MANOVA, multivariate multiple regression, MANCOVA), discrimination and classification, canonical correlation analysis, and methods of analyzing covariance and correlation structures (principal components and factor analysis). Also introduces and explores methods of handling missing data.
Prerequisite: BST 52019; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
BST 82020  DATA MANAGEMENT AND LOGIC USING SAS® SOFTWARE  
3 Credit Hours  
(Slashed with BST 62020) This course introduces graduate students to SAS® software, reading external data into SAS software, use of SAS data step, basic SAS functions, logical data steps for data management, and different SAS procedures for creating summary reports, graphical displays, and conducting basic statistical analysis using the SAS software. SAS Lab sessions are designed to mimic real time challenges working with different kinds of data and learn how to meet such challenges. By the end of the course, students will achieve competency in proper and efficient use of SAS software.  
Prerequisite: Doctoral standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

BST 83012  SURVIVAL ANALYSIS IN PUBLIC HEALTH  
3 Credit Hours  
Covers survival functions, hazard rates, types of censoring and truncation. Methods of focus include life tables, Kaplan-Meier plots, log-rank tests, Cox regression models and parametric survival models. Inference for recurrent event and competing risks models are also covered.  
Prerequisite: BST 52019; and BST 63014 or 83014; and doctoral standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

BST 83013  EXPERIMENTAL DESIGNS IN PUBLIC HEALTH RESEARCH  
3 Credit Hours  
Designed to introduce students to experimental research methods, in public health settings. First introduces a number of quasi-experimental and experimental study designs, then identifies a number of statistical methods that can be used to draw correct causal inferences from the study. Students are expected to develop two research proposals, first using quasi-experimental then an experimental design and develop a statistical analysis plan for each study.  
Prerequisite: BST 52019; and BST 63014 or 83014; and doctoral standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

BST 83014  APPLIED REGRESSION ANALYSIS OF PUBLIC HEALTH DATA  
3 Credit Hours  
(Slashed with BST 63014) Focuses on developing student proficiency in building and evaluating various regression models for public health studies. Topics covered include exploratory and descriptive methods, simple and multiple linear regression models, predictor selection, binary and multinomial logistic regression models, survival analysis, repeated measures and generalized linear models.  
Prerequisite: BST 52019; and doctoral standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

BST 83015  CATEGORICAL DATA ANALYSIS OF PUBLIC HEALTH DATA  
3 Credit Hours  
(Cross-listed with BST 63015) Provides an applied introduction to the most important methods for analyzing categorical data in public health. Topics covered include contingency tables, logistic regression, generalized linear models, modeling matched pairs, mixed models for categorical data and clustered responses.  
Prerequisite: BST 52019 and EPI 52017; and doctoral standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

Environmental Health Sciences (EHS)  

EHS 50060  PUBLIC HEALTH LABORATORY METHODS  
3 Credit Hours  
(Slashed with PH 40060) Course introduces the student to the fundamental theory and hands on use to track specimen collection and laboratory analysis. Environmental specimens are examined for their public health importance using classical and modern techniques. Students learn classical laboratory methods and their modern use in the laboratory environment. Examples include culture and microscopic identification of microorganisms, identification of disease vectors, detection of newborn disease and detection of terrorism agents.  
Prerequisite: BSCI 30140 or CHEM 10062 or CHEM 10971 or PH 30006; and graduate standing.  
Schedule Type: Combined Lecture and Lab  
Contact Hours: 2 lecture, 1 lab  
Grade Mode: Standard Letter  

EHS 50109  LABORATORY SAFETY AND HYGIENE  
3 Credit Hours  
(Cross-listed with PH 40109) Basic introduction to laboratory safety, chemical hygiene, and biosafety. Includes the research compliance programs of institutions (IBC, IACUC, IRB, RSC) and the OSHA Chemical Hygiene standard requirements and program responsibilities. General lab safety concepts are reviewed, along with chemical handling and storage, fumehoods and ventilation, hazardous waste disposal, radiation safety, and lab design. Basic principles of biosafety are covered, BSL 1-4 levels, biosafety cabinets, select agents, bloodborne pathogens, NIH Guidelines, biosecurity and animal use.  
Prerequisite: Graduate standing.  
Schedule Type: Field Experience, Lecture  
Contact Hours: 2.67 lecture, .33 other  
Grade Mode: Standard Letter  

EHS 50196  INDIVIDUAL INVESTIGATION IN ENVIRONMENTAL HEALTH SCIENCES  
1-3 Credit Hours  
(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to environmental health sciences.  
Prerequisite: Graduate standing; and special approval.  
Schedule Type: Individual Investigation  
Contact Hours: 1-3 other  
Grade Mode: Standard Letter-IP  

EHS 52018  ENVIRONMENTAL HEALTH CONCEPTS IN PUBLIC HEALTH  
3 Credit Hours  
Provides a comprehensive overview of the core topics in environmental health as related to public health.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter
EHS 53009  EMERGING ENVIRONMENTAL HEALTH ISSUES AND RESPONSE  3 Credit Hours
Provides an overview of emerging environmental health issues that will impact the public's health.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EHS 53012  OCCUPATIONAL SAFETY AND HEALTH  3 Credit Hours
Survey of major concepts and issues relating to health and safety in the workplace. Emphasis is on the application of public health principles and decision-making practices used by various worker populations for the prevention of injury and disease on the job. This course will cover protective equipment, hazardous conditions, environmental toxins, risk assessment, prevention science approaches and workplace health promotion.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EHS 53014  BUILT ENVIRONMENT AND PUBLIC HEALTH  3 Credit Hours
The focus of this course is on preventing disease and injury while improving the health of populations by looking “upstream” at the built environment or those settings designed, created, and maintained by human efforts. Public health effects of community design will be explored, including transportation, land use, parks and green space in the context of physical activity, food environments, air and water quality, injury prevention, social capital and health disparities. Components of healthy communities will be explored in the home, workplace, schools, and health care facilities. Students will examine strategies for creating sustainable health places consistent with the ecological model, through multidisciplinary collaboration, research, and policy to promote the health of populations.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EHS 60191  VARIABLE CONTENT SEMINAR IN ENVIRONMENTAL HEALTH SCIENCES  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Seminar on current and important topics in environmental health sciences. Subject matter varies depending on the topic.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 1-3 other
Grade Mode: Standard Letter

EHS 60192  PRACTICUM EXPERIENCE IN ENVIRONMENTAL HEALTH SCIENCES  3,6 Credit Hours
Observational and participation in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and approved organization or agency.
Prerequisite: Graduate standing and special approval.
Schedule Type: Practical Experience
Contact Hours: 9-18 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EHS 60195  SPECIAL TOPICS IN ENVIRONMENTAL HEALTH SCIENCES  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in environmental health sciences.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

EHS 60292  APPLIED PRACTICE EXPERIENCE IN ENVIRONMENTAL HEALTH SCIENCES II  1 Credit Hour
(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.
Prerequisite: EHS 60192; and graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory

EHS 63010  APPLIED RISK ASSESSMENT  3 Credit Hours
Introduces the student to environmental and occupational hazards, assessing the risks associated with hazard exposure. Standard principles of risk assessment are emphasized including methods of hazard identification and regulation, quantitative exposure measurement, dose and toxicity relationships and risk management. Analysis of public policy regulatory guidance and health advisory watchdog recommendations are evaluated.
Prerequisite: EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EHS 63011  APPLICATION OF RISK ANALYSIS IN ENVIRONMENTAL HEALTH  3 Credit Hours
Students are introduced to methods in risk analysis that are applied by U.S. federal, state, and local agencies in their assessment of chemical toxicants. Linkages between risk assessment, risk management, and risk communication will be studied as components of this process, along with issues and controversies in the analysis of environmental health risks.
Prerequisite: EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

Epidemiology (EPI)

EPI 50015  SCIENTIFIC WRITING FOR CLINICAL RESEARCH  3 Credit Hours
(Cross-listed with PH 40015) Course provides students the tools to develop proficiency in scientific reading, to conduct presentations and to demonstrate skill in scientific writing, with the goal of preparing clinical researchers to be able to communicate findings to the science community and the general population. Course includes an examination of the science literature in clinical trials research.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
EPI 5017 PHARMACOEPIDEMIOLOGY  3 Credit Hours
(Cross-listed with PH 40017) Introduction to the field of pharmacoepidemiology, which uses epidemiology methods to understand medication use and distribution at the population level. Course examines risk-benefit and epidemiology approaches to examining medication use and therapeutic trials. Drug and device manufacturing to market are explored.
Prerequisite: BST 52019 and EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 50018 REGULATORY AFFAIRS IN CLINICAL RESEARCH  3 Credit Hours
(Cross-listed with PH 40018) Course provides the tools for students to develop an understanding of the researcher and organization responsibility in research and development of clinical trials products. Students understand regulations from the government and industry, privacy concerns, liability and ethical issues related to clinical trials research. Examples from the field are explored in detail.
Prerequisite: EPI 52017.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 50196 INDIVIDUAL INVESTIGATION IN EPIDEMIOLOGY  1-3 Credit Hours
(Repeatable for maximum 6 credits) Individual graduate investigation or research in areas related to epidemiology.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 1-3 other
Grade Mode: Standard Letter-IP

EPI 52017 FUNDAMENTALS OF PUBLIC HEALTH EPIDEMIOLOGY  3 Credit Hours
(Slashed with EPI 72017) Introduces principles, methods and application of epidemiology. Covers the history of epidemiology, concepts of disease causation and prevention, measures of disease frequency and excessive risk, epidemiologic study designs, causal inference, outbreak investigation and screening. Provides experience with calculation of rate standardization; measures of disease frequency, association and impact; and sensitivity and specificity of screening tests. Highlights applications of epidemiology to understanding of disease etiology, transmission, pathogenesis and prevention; evaluation and public policy development.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 52028 METHODS OF EVIDENCE BASED PUBLIC HEALTH  3 Credit Hours
(Slashed with EPI 72028) Explores tools and techniques used to quantitatively determine the effectiveness of public health interventions in the social sciences.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 53089 PLAGUES THAT SHAPED THE WORLD  3 Credit Hours
(Slashed with EPI 73089) (Cross-listed with PH 43089) Course examines the Bubonic plague, HIV/AIDS, Ebola and pandemic influenza outbreaks to introduce students to the fundamentals of public health, establishing epidemiological principles that explain how plagues erupt and propagate, decimate populations and alter cultures. Inherent in the course's discussion are the social determinants that fuel plague outbreaks and slow recovery. Examples of emerging infectious diseases and threats of bioterrorism are discussed as new plagues for which creative solutions are still required. Students take city excursions and a field trip to assess cultural changes resulting from historical plagues.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 60191 VARIABLE CONTENT SEMINAR IN EPIDEMIOLOGY  1-3 Credit Hours
(Repeatable for credit) (Slashed with EPI 80191) Seminar on current and important topics in epidemiology. Subject matter varies depending on the topic.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

EPI 60192 APPLIED PRACTICE EXPERIENCE IN EPIDEMIOLOGY  3,6 Credit Hours
(Repeatable for credit) (Slashed with EPI 80192) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete a field experience with joint supervision from the university and approved organization or agency.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 60195 SPECIAL TOPICS IN EPIDEMIOLOGY  1-3 Credit Hours
(Repeatable for a maximum 6 credit hours) (Slashed with EPI 80195) Special topics to sample new offerings on topics in epidemiology.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

EPI 60292 APPLIED PRACTICE EXPERIENCE IN EPIDEMIOLOGY II  1 Credit Hour
(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.
Prerequisite: EPI 60192; and graduate standing.
Schedule Type: Practical Experience
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory
EPI 63014  EPIDEMIOLOGY OF CHRONIC DISEASES  3 Credit Hours
(Slashed with EPI 83014) With a life course approach to chronic disease epidemiology, this course focuses on cardiovascular, respiratory, cerebrovascular diseases and cancer. Health and disease are addressed from a multicausal perspective, which includes individual behaviors; psychosocial issues; and sociodemographic, biological and physiological factors. Time points for prevention and intervention are identified.
Prerequisite: EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63015  EPIDEMIOLOGY OF INFECTIOUS DISEASES  3 Credit Hours
(Slashed with EPI 83015) Surveys the history, principles, methods and practice of infectious disease epidemiology, by (1) defining and understanding infectious disease epidemiology surveys, (2) collecting and measuring surveillance data, (3) interpreting epidemiology data and (4) predicting evidence-based outcomes. Primarily a course in epidemiology, students learn some infectious disease microbiology as well.
Prerequisite: EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63016  PRINCIPLES OF EPIDEMIOLOGIC RESEARCH  3 Credit Hours
(Slashed with EPI 83016) Course builds upon EPI 52017 to explore deeper the concepts and methods in epidemiologic research. Reviews the measures of disease frequency; association and impact; epidemiologic reasoning and causal inference; and methods and techniques for designing, implementing, analyzing and interpreting various epidemiologic study designs. Discusses advantages and limitations of various study designs. Explores threats to validity, precision and generalizability of epidemiologic studies.
Prerequisite: BST 52019 and EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63017  EPIDEMIOLOGICAL ANALYSIS  3 Credit Hours
(Slashed with EPI 83017) Provides practical instruction in the analysis and interpretation of data from various epidemiologic study designs, including cross-sectional, case-control and cohort studies. Reviews statistical concepts and epidemiologic studies designs; outlines a strategy for data analysis; and reviews relevant methodologic issues and applies stratified analysis methods and multivariable regression models to the studies. Develops an understanding of the underlying principles and assumptions, practical application and correct interpretation of the epidemiologic results. Provides hands-on experience on the application of epidemiologic analysis methods and presentation of the results.
Prerequisite: BST 52019 and BST 63014 and EPI 52017 and EPI 63016; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63018  OBSERVATIONAL DESIGNS FOR CLINICAL RESEARCH  3 Credit Hours
(Slashed with EPI 83018) Course provides students the skills to design, conduct and perform clinical epidemiology studies using an observational design. Students understand major concepts of clinical research, develop clinical research questions, and solve clinical research problems. Topics include study design, risk, causation, exposures, bias, measurement and validity and disease prognosis.
Prerequisite: BST 52019 and EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63019  EXPERIMENTAL DESIGNS FOR CLINICAL RESEARCH  3 Credit Hours
(Slashed with EPI 83019) Principles of experimental designs as they apply to clinical research and clinical trials are presented at an intermediate level. Students understand randomized control trial designs and alternative designs. Study methodology, including randomization and blinding techniques, is covered. Topics include evidence-based medicine; risk prediction and risk scores; instruments and measurement; data issues; and recruitment, retention and adherence.
Prerequisite: EPI 63018; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63020  ADVANCED EPIDEMIOLOGY AND CLINICAL RESEARCH METHODS  3 Credit Hours
(Slashed with EPI 83020) This advanced course focuses on why particular methods, study designs or approaches are used in particular investigative scenarios in clinical research. Students develop an advanced understanding and application of epidemiology methods in clinical research.
Prerequisite: EPI 63018 and EPI 63019; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63021  ETHICAL ISSUES IN PUBLIC HEALTH AND CLINICAL RESEARCH  3 Credit Hours
(Slashed with EPI 83021) Introduces students to historical and contemporary ethical issues that arise during public health and clinical or biomedical research studies. Broadly covers human subjects research, the responsible conduct of research and the good clinical practice guidelines.
Prerequisite: EPI 52017; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 63034  LONGITUDINAL DATA ANALYSIS  3 Credit Hours
(Slashed with EPI 73034) Statistical techniques for analyzing longitudinal, or repeated measures, data. Focuses primarily on application of the various statistical models covered, with direct application illustrated using standard statistical software. Topics covered include univariate and multivariate analysis of variance for repeated measures, mixed-effects models (HLM or multilevel models), covariance pattern models, generalized estimating equations (GEE), mixed-effects logistic regression models and missing data in longitudinal studies.
Prerequisite: BST 52019 and BST 63014; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
EPI 63192 RESEARCH PRACTICUM IN CLINICAL EPIDEMIOLOGY 1-6 Credit Hours
Research practicum allows students to gain hands-on experience conducting research in a clinical setting, such as a hospital or other approved organization. Students complete the experience under the supervision of a field preceptor and faculty member.
Prerequisite: EPI 63018 and EPI 63019; and graduate standing.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 63199 THESIS I 2-6 Credit Hours
Student must register for a total of 6 credit hours in the program. Student may register for 2 to 6 hours in a single semester.
Prerequisite: Graduate standing.
Schedule Type: Masters Thesis
Contact Hours: 2-6 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 63299 THESIS II 2 Credit Hours
Thesis students must continue registration in Thesis II each semester until all degree requirements are met.
Prerequisite: EPI 63199; and graduate standing.
Schedule Type: Masters Thesis
Contact Hours: 2 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 72017 FUNDamentals OF PUBLIC HEALTH EPIDEMIOLOGY 3 Credit Hours
(Slashed with EPI 52017) Introduces principles, methods and application of epidemiology. Covers the history of epidemiology, concepts of disease causation and prevention, measures of disease frequency and excessive risk, epidemiologic study designs, causal inference, outbreak investigation and screening. Provides experience with calculation of rate standardization; measures of disease frequency, association and impact; and sensitivity and specificity of screening tests. Highlights applications of epidemiology to understanding of disease etiology, transmission, pathogenesis and prevention; evaluation and public policy development.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 72028 METHODS OF EVIDENCE BASED PUBLIC HEALTH 3 Credit Hours
(Slashed with EPI 52028) Explores tools and techniques used to quantitatively determine the effectiveness of public health interventions in the social sciences.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 73026 DESIGN AND IMPLEMENTATION OF HEALTH SURVEYS 3 Credit Hours
Covers survey design, variable construction, survey administration and data collection methods, variable coding and manipulation and data analysis. Students understand sampling methods and sample size. Large health surveys are discussed. Students gain practical experience through design and implementation of a health survey, which can be used to facilitate dissertation research or a publication.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 73027 BIOLOGICAL BASIS OF PUBLIC HEALTH 3 Credit Hours
Integrates the sciences of biology and molecular biology into the principles and practice of public health. Implicit in this course are learning objectives that establish the ecology of infectious disease, the impact of vaccines in disease prevention, and the role of environmental toxins on human health and disease. Additionally, students propose policy, regulations and legislation designed to protect human health within the realm of personalized medicine.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 73028 PUBLIC HEALTH SURVEILLANCE SYSTEMS 3 Credit Hours
Introduces students to surveillance systems of both infectious and non-infectious diseases as well as intentional and non-intentional injury. Students are exposed to the theory and practice of surveillance illustrated with examples existing systems from around the world. Culminates in a project where the student creates and evaluates a surveillance system of their own design.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 73029 ENVIRONMENTAL EPIDEMIOLOGY 3 Credit Hours
Comprehensive course on concepts in environmental epidemiology and statistical methods in environmental epidemiology, including causal inference models.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 73030 LONGITUDINAL DATA ANALYSIS 3 Credit Hours
(Slashed with EPI 63034) Statistical techniques for analyzing longitudinal, or repeated measures, data. Focuses primarily on application of the various statistical models covered, with direct application illustrated using standard statistical software. Topics covered include univariate and multivariate analysis of variance for repeated measures, mixed-effects models (HLM or multilevel models), covariance pattern models, generalized estimating equations (GEE), mixed-effects logistic regression models and missing data in longitudinal studies.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
EPI 73089  PLAGUES THAT SHAPED THE WORLD  3 Credit Hours
(Slashed with EPI 53089)(Cross-listed with PH 43089) Course examines the Bubonic plague, HIV/AIDS, Ebola and pandemic influenza outbreaks to introduce students to the fundamentals of public health, establishing epidemiological principles that explain how plagues erupt and propagate, decimate populations and alter cultures. Inherent in the course’s discussion are the social determinants that fuel plague outbreaks and slow recovery. Examples of emerging infectious diseases and threats of bioterrorism are discussed as new plagues for which creative solutions are still required. Students take city excursions and a field trip to assess cultural changes resulting from historical plagues.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture, 3 lab
Grade Mode: Standard Letter

EPI 80191  VARIABLE CONTENT SEMINAR IN EPIDEMIOLOGY  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with EPI 60191) Seminar on current and important topics in epidemiology. Subject matter varies depending on the topic.
Prerequisite: Doctoral standing.
Schedule Type: Seminar
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

EPI 80195  SPECIAL TOPICS IN EPIDEMIOLOGY  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with EPI 60195) Special topics to sample new offerings on topics in epidemiology.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

EPI 80196  INDIVIDUAL INVESTIGATION IN EPIDEMIOLOGY  1-3 Credit Hours
Individual graduate investigation or research in areas related to epidemiology.
Prerequisite: Doctoral Standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 3-9 other
Grade Mode: Standard Letter-IP

EPI 80198  DIRECTED RESEARCH IN EPIDEMIOLOGY  1-15 Credit Hours
(Repeatable for credit) Directed research or individual investigation in an area of interest and with the guidance of a Kent State faculty member.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Individual Investigation, Research
Contact Hours: 1-15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 80199  DISSERTATION I  15 Credit Hours
(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of Dissertation II and 30 hours of total dissertation work.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 80299  DISSERTATION II  15 Credit Hours
(Repeatable for credit) Second course of dissertation sequence completing requirement of with 30 total hours of dissertation work.
Prerequisite: EPI 80199; and doctoral standing; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

EPI 83014  EPIEMIOLOGY OF CHRONIC DISEASES  3 Credit Hours
(Slashed with EPI 63014) With a life course approach to chronic disease epidemiology, this course focuses on cardiovascular, respiratory, cerebrovascular diseases and cancer. Health and disease are addressed from a multicausal perspective, which includes individual behaviors; psychosocial issues; and sociodemographic, biological and physiological factors. Time points for prevention and intervention are identified.
Prerequisite: EPI 72017; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83015  EPIEMIOLOGY OF INFECTIOUS DISEASES  3 Credit Hours
(Slashed with EPI 63015) Surveys the history, principles, methods and practice of infectious disease epidemiology, by (1) defining and understanding infectious disease epidemiology surveys, (2) collecting and measuring surveillance data, (3) interpreting epidemiology data and (4) predicting evidence-based outcomes. Primarily a course in epidemiology, students learn some infectious disease microbiology as well.
Prerequisite: EPI 72017; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83016  PRINCIPLES OF EPIDEMIOLOGIC RESEARCH  3 Credit Hours
(Slashed with EPI 63016) Course builds upon EPI 52017 to explore deeper the concepts and methods in epidemiologic research. Reviews the measures of disease frequency; association and impact; epidemiologic reasoning and causal inference; and methods and techniques for designing, implementing, analyzing and interpreting various epidemiologic study designs. Discusses advantages and limitations of various study designs. Explores threats to validity, precision and generalizability of epidemiologic studies.
Prerequisite: BST 52019 and EPI 72017; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83017  EPIDEMIOLOGICAL ANALYSIS  3 Credit Hours
(Slashed with EPI 63017) Provides practical instruction in the analysis and interpretation of data from various epidemiologic study designs, including cross-sectional, case-control and cohort studies. Reviews statistical concepts and epidemiologic studies designs; outlines a strategy for data analysis; and reviews relevant methodologic issues and applies stratified analysis methods and multivariable regression models to the studies. Develops an understanding of the underlying principles and assumptions, practical application and correct interpretation of the epidemiologic results. Provides hands-on experience on the application of epidemiologic analysis methods and presentation of the results.
Prerequisite: BST 83014 and EPI 63016; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
EPI 83018 OBSERVATIONAL DESIGNS FOR CLINICAL RESEARCH 3 Credit Hours
(Slashed with EPI 63018) Course provides students the skills to design, conduct and perform clinical epidemiology studies using an observational design. Students understand major concepts of clinical research, develop clinical research questions, and solve clinical research problems. Topics include study design, risk, causation, exposures, bias, measurement and validity and disease prognosis.
Prerequisite: BST 52019 and EPI 72017; and doctoral standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83019 EXPERIMENTAL DESIGNS FOR CLINICAL RESEARCH 3 Credit Hours
(Slashed with EPI 63019) Principles of experimental designs as they apply to clinical research and clinical trials are presented at an intermediate level. Students understand randomized control trial designs and alternative designs. Study methodology, including randomization and blinding techniques, is covered. Topics include evidence-based medicine; risk prediction and risk scores; instruments and measurement; data issues; and recruitment, retention and adherence.
Prerequisite: BST 52019 and EPI 72017; and doctoral standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83020 ADVANCED EPIDEMIOLOGY AND CLINICAL RESEARCH METHODS 3 Credit Hours
(Slashed with EPI 63020) This advanced course focuses on why particular methods, study designs or approaches are used in particular investigative scenarios in clinical research. Students develop an advanced understanding and application of epidemiology methods in clinical research.
Prerequisite: EPI 83018 and EPI 83019; and doctoral standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

EPI 83021 ETHICAL ISSUES IN PUBLIC HEALTH AND CLINICAL RESEARCH 3 Credit Hours
(Slashed with EPI 63021) Introduces students to historical and contemporary ethical issues that arise during public health and clinical or biomedical research studies. Broadly covers human subjects research, the responsible conduct of research and the good clinical practice guidelines.
Prerequisite: EPI 72017; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture, 3 lab
Grade Mode: Standard Letter

Health Policy and Management (HPM)

HPM 53009 WHOLE SYSTEMS APPROACHES TO LEADING ORGANIZATIONAL CHANGE IN PUBLIC HEALTH 3 Credit Hours
Intended to provide students with an initial exploration and overview of whole systems approaches to organizational change in public health settings, a more detailed working knowledge of key whole systems methodologies, and a detailed working knowledge and practical experience with one of the most frequently used and favored whole systems approaches.
Prerequisite: Graduate standing.
Pre/corequisite: HPM 53008.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

College of Public Health
HPM 53010  COMMUNITY HEALTH NEEDS ASSESSMENT  3 Credit Hours
This course covers concepts and methods relevant to community health needs assessment, such as systems thinking, the use of quantitative and qualitative methods, primary and secondary data, and the role of community assessment in current national policy, including the Affordable Care Act and on community health improvement. Students will draw from multiple disciplines to assess health status and its determinants (social, behavioral, and environmental), needs for health services, and the capacity and resources of the local community. Students will also learn to facilitate and evaluate the use of data for decision-making by partnerships, organizations and policy makers.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter

HPM 53011  PUBLIC HEALTH EVALUATION METHODS  3 Credit Hours
This course provides an in-depth review of major concepts, methods, and issues involved in evaluating public health programs and policy interventions. Students learn skills needed to conduct and use evaluations, with an emphasis on conceptual, methodological, organizational, political, and ethical aspects associated with public health evaluation. Topics will include development of evaluation questions, types of program evaluation (process, formative, impact, outcome), evaluation design (experimental, quasi-experimental, and non-experimental designs), collection of evaluation data, and dissemination of evaluation results. Students gain practical experience through a series of exercises. Examples of effective methods and approaches will be elaborated for multiple public health contexts.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter

HPM 53012  NATIONAL HEALTH REFORM  3 Credit Hours
This course provides an overview of health reform in the United States, starting with the history of health reform, the passage of the ACA, and the future of health reform. It includes political and policy discourse leading up to the Patient Protection and Affordable Care Act (ACA) its passage, analysis of the law’s impact, Supreme Court rulings and other legal challenges affecting the legislation, and the future of public health and health care in the context of health reform. The impact of health reform on health care financing, quality, and public health will also be covered. Students will draw upon and apply an interdisciplinary literature base to analyze health reform.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter

HPM 53013  SEX: A WICKED PUBLIC HEALTH PROBLEM  3 Credit Hours
Wicked problems is a term developed in the 1970s by systems thinkers and planners, Horst Rittel and Melvin Webber (1973), to describe complex social problems that are resistant to solution. The term has recently been applied to public health issues that have proven to be difficult to address and resistant to mitigation. Sexual and reproductive health behaviors, attitudes, and cultural norms often produce problems at the individual and population levels that meet the criteria for designation as wicked problems. Effectively addressing these kinds of problems requires a correct understanding and application of public health principles and practices.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter

HPM 60191  VARIABLE CONTENT SEMINAR IN HEALTH POLICY AND MANAGEMENT  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with HPM 80191) Seminar on current and important topics in health policy and management. Subject matter varies depending on the topic.  
Prerequisite: Graduate standing.  
Schedule Type: Seminar  
Contact Hours: 1-3 lecture  
Grade Mode: Standard Letter

HPM 60192  APPLIED PRACTICE EXPERIENCE IN HEALTH POLICY AND MANAGEMENT  3,6 Credit Hours
Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.  
Prerequisite: Graduate standing and special approval.  
Schedule Type: Practical Experience  
Contact Hours: 9-18 other  
Grade Mode: Satisfactory/Unsatisfactory-IP

HPM 60195  SPECIAL TOPICS IN HEALTH POLICY AND MANAGEMENT  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with HPM 80195) Special topics to sample new offerings on topics in health policy and management.  
Prerequisite: Graduate standing.  
Schedule Type: Lecture  
Contact Hours: 1-3 lecture  
Grade Mode: Standard Letter

HPM 60292  APPLIED PRACTICE EXPERIENCE IN HEALTH POLICY AND MANAGEMENT II  1 Credit Hour
Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.  
Prerequisite: HPM 60192 and graduate standing and special approval.  
Schedule Type: Practical Experience  
Contact Hours: 15 other  
Grade Mode: Satisfactory/Unsatisfactory
HPM 63003 HEALTH CARE SYSTEMS 3 Credit Hours
Provides a systems approach to delivering health care and public health services in the US. Includes an overview of public health, outpatient, inpatient, managed care, long term care and health services for special populations.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 63004 PUBLIC HEALTH POLICY, LAW AND ETHICS 3 Credit Hours
Provides a comprehensive review of health policymaking, public health law and ethical principles as applied to public health decision making.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 63005 FINANCIAL MANAGEMENT FOR PUBLIC HEALTH ORGANIZATIONS 3 Credit Hours
Provides an overview of financial management of public health organizations. Topics include planning for public health program budgeting, understanding costs and short and long term financing, accountability and control, reporting results and financial statement and financial conditions analysis.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 63006 COST BENEFIT ANALYSIS IN PUBLIC HEALTH PROGRAMS 3 Credit Hours
Provides an overview of cost-benefit analysis as applied to the evaluation of public health programs. Students apply principles of cost benefit analysis and related cost utility analysis to case studies in the public health sector.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 63007 PUBLIC HEALTH PROGRAMS: PLANNING, IMPLEMENTATION AND EVALUATION 3 Credit Hours
Overview of developing, implementing and evaluating public health programs. Examines how public health programs can target different levels within a population, different determinants of health and strategies and interventions.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 64002 GLOBAL HEALTH IMMERSION: GENEVA, SWITZERLAND 3 Credit Hours
(Slashed with HPM 84002) Participants explore a number of health concerns, policies and challenges with global importance and implications. Students investigate current global health policies and themes, and become familiar with the major players in global health including governmental and nongovernmental organizations and multinational agencies. Presentations are given by experts currently working in various regions of the world to solve such pressing global problems as HIV/AIDS, postwar trauma, tuberculosis, refugee health, non-communicable disease prevention and environmental contamination.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 72015 EMERGING ISSUES IN PUBLIC HEALTH POLICY AND MANAGEMENT 3 Credit Hours
(Slashed with HPM 52015) An overview of emerging challenges in public health policy and management. Examples include pandemic H1N1 response, biopreparedness, national health care reform, public health financing challenges, global tuberculosis drug resistance.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 72030 GRANT WRITING IN PUBLIC HEALTH 3 Credit Hours
Doctoral students should take this course at the end of the program of study. Students in this doctoral level course for Public Health learn the basics of grant writing for federal (NIH) and non-federal funding agencies with a particular emphasis on the components required of most grant proposal submitted for funding. This includes rationale for seeking funds, collaborations with community organizations, and working with consultants and subcontractors. Participants also learn about the basic sections of grant writing such as specific aims and hypotheses, developing your literature review, background and significance, research design and methodology, developing a budget, and conducting research with human subjects. Participants have the opportunity to write sample grant proposals, learn about the review and scoring process and post-award grant management.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 73021 HEALTH CARE FINANCE 3 Credit Hours
Covers the financial environment of health services in the US, including accounting principles, financial statement analysis, delivery models, management control processes of budgeting and capital project analysis, managerial accounting, program development and financial plan.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
HPM 73022  STRATEGIC MANAGEMENT OF PUBLIC HEALTH ORGANIZATIONS  3 Credit Hours
Covers basic and advanced principles of strategic management of public health organizations including service area analysis, internal environment analysis, developing and evaluating strategic alternatives and quality indicators.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 73031  PUBLIC HEALTH POLICY ANALYSIS  3 Credit Hours
Provides a framework for conducting public health policy analysis. Applies concepts to case studies of health policies at the local, state and Federal levels.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 80191  VARIABLE CONTENT SEMINAR IN HEALTH POLICY AND MANAGEMENT  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with HPM 60191)
Seminar on current and important topics in health policy and management. Subject matter varies depending on the topic.
Prerequisite: Doctoral standing.
Schedule Type: Seminar
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

HPM 80195  SPECIAL TOPICS IN HEALTH POLICY AND MANAGEMENT  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) (Slashed with HPM 60191)
Special topics to sample new offerings on topics in health policy and management.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

HPM 80196  INDIVIDUAL INVESTIGATION IN HEALTH POLICY AND MANAGEMENT  1-3 Credit Hours
Individual graduate investigation or research in areas related to health policy and management.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 3-9 other
Grade Mode: Standard Letter-IP

HPM 80198  DIRECTED RESEARCH IN HEALTH POLICY AND MANAGEMENT  1-15 Credit Hours
(Repeatable for credit) Directed research or individual investigation for doctoral students in the Health Policy and Management concentration.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Research
Contact Hours: 1-15 other
Grade Mode: Standard Letter

HPM 80199  DISSERTATION I  15 Credit Hours
(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of Dissertation II and 30 hours of total dissertation work.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

HPM 80299  DISSERTATION II  15 Credit Hours
(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of 30 hours.
Prerequisite: HPM 80199; and doctoral standing; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

HPM 81000  PUBLIC HEALTH LAW AND REGULATION  3 Credit Hours
Enables participants to describe, apply, and explain key aspects and principles of law, regulation, and policy relating to public health issues and topics. Requires students to master the content material for the course, and apply it to particular (a) topics or issues relating public health. Students also are required to design and or conduct a research project and explain their hypotheses, methods, findings and or conclusions.
Prerequisite: HPM 52016; and doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HPM 84002  GLOBAL HEALTH IMMERSION: GENEVA, SWITZERLAND  3 Credit Hours

Public Health (PH)

PH 10000  EXPLORING CAREERS IN PUBLIC HEALTH  1 Credit Hour
Provides an overview of the diverse career opportunities available in the field. Explores various public health issues from the perspectives of public health professionals from the core disciplines in public health: social behavioral sciences, environmental health, health policy and management, epidemiology and biostatistics. Students learn about how public health professionals approach issues and the types of professional roles and activities they bring to addressing each issue.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter
PH 10001  INTRODUCTION TO PUBLIC HEALTH  3 Credit Hours
An overview of the evolution and practices of the dynamic field of public health in the United States and globally. Students are introduced to the structure and functions of public health organizations and public health practice.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 10002  INTRODUCTION TO GLOBAL HEALTH (DIVG)  3 Credit Hours
An overview of the biological, social and environmental contributors to health and diseases in populations around the world, including case studies of selected infectious diseases, nutritional deficiencies and health effects of environmental change.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Diversity Global

PH 10003  EXPLORING CAREERS IN GLOBAL HEALTH  1 Credit Hour
Course provides students with an introduction to global health and an overview of the diverse career opportunities available in the field. The global health sector is evolving as one of the primary career destinations and is moving beyond the traditional roles of science, pharmacy, medicine and nursing; additional areas also include communications, technology, data scientists, finance, management, legal, linguistics, international relations, and most important, cross functional skills are needed.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 15 lecture, 0 lab, 0 other
Grade Mode: Standard Letter

PH 10195  SPECIAL TOPICS IN PUBLIC HEALTH  1-3 Credit Hours
(Repeatable for credit) Subject varies depending on the emerging issue.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

PH 15092  PUBLIC HEALTH FIELD EXPERIENCE I (ELR)  1-3 Credit Hours
(Repeatable for credit) Entry-level internship experience in a public health setting under the supervision of a site preceptor and university supervisor. Students gain experience in public health work.
Prerequisite: Special approval.
Schedule Type: Practical Experience
Contact Hours: 3-10 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 20000  PUBLIC HEALTH PROFESSIONAL PRACTICE I  1 Credit Hour
Professional development course designed to expose future public health leaders to the diverse field of public health and develop attainable career goals. Student will begin the development of personal goals and a portfolio of work that will build during the entire program. The understanding of public health as a profession will be fostered.
Prerequisite: Sophomore standing.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PH 20001  ESSENTIALS OF EPIDEMIOLOGY  3 Credit Hours
Students are introduced to the strategies adopted by public health professionals to study distribution and identification of important biologic, social and environmental determinants of diseases and health-related states in specific populations.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 20010  INTRODUCTION TO PUBLIC HEALTH INFORMATICS  3 Credit Hours
Provides an overview of informatics principles applied in public health settings. Issues addressed include definitions, approaches, competencies, applications and the national health information network. Topical areas are digital literacy, electronic communication, system development, information use, project management, procurement, accountability, research, data standards, databases, human resource management, and confidentiality and security.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 20015  ZOMBIE OUTBREAK  3 Credit Hours
Teaches the basic survival skills necessary to protect you, your family, and the public from a variety of natural and manmade “apocalypses”. Students apply the basics of emergency Public Health management to a zombie outbreak.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 20195  SPECIAL TOPICS IN PUBLIC HEALTH  1-3 Credit Hours
(Repeatable for credit) Subject varies depending on the emerging issue.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

PH 20392  COMMUNITY HEALTH WORKER CERTIFICATION II- INTERNSHIP (ELR)  3 Credit Hours
Internship course providing necessary contact hours for the Ohio Community Health Worker Certification.
Prerequisite: PH 23000.
Schedule Type: Practical Experience
Contact Hours: 9 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement
PH 22001  PLAGUES AND PANDEMICS: HOW INFECTION SHAPED CULTURE AND HISTORY  3 Credit Hours
Infectious diseases continue to affect us all in the present, and plagues have shaped the course of history. From the Justinian plague in the 6th Century to the decimation of Native populations in the US by smallpox to the 1918 influenza pandemic, human history has been influenced by microbes—and our culture, in turn, can affect the generation of new plagues. This course is appropriate both for humanities majors looking for an introduction to infectious diseases as well as science majors looking to better understand infectious diseases in their historical and cultural context, and the way these diseases have (and continue to) shape history. Ultimately, students should be able to understand the basics of infectious disease epidemiology and disease control within a wide cultural and historical context. The course will encompass various topics in microbiology and infectious disease, using primarily popular non-fiction books on these subjects as sources.
Prerequisite: None.
Schedule Type: Lecture, Seminar
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 23000  COMMUNITY HEALTH WORKER CERTIFICATION I  3 Credit Hours
Students will be guided through the competencies of a Community Health Worker (CHW). Students will be introduced to soft skills and culture including but not limited to basic health care, community resources, advocacy, communication and service skills related to working with communities. Lifespan development will also be covered including but not limited to: Basic health information and education regarding prevention and treatment throughout the lifespan. Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 25092  PUBLIC HEALTH FIELD EXPERIENCE II (ELR)  1-3 Credit Hours
(Repeatable for credit) Mid-level internship experience in a public health setting under the supervision of a site preceptor and university supervisor. Students gain experience in public health work.
Prerequisite: Special approval.
Schedule Type: Practical Experience
Contact Hours: 3-10 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 30000  PUBLIC HEALTH PROFESSIONAL PRACTICE II  1 Credit Hour
Professional development course designed to further prepare future public health leaders to the diverse field of public health. The career portfolio will be further developed. Career goals will be re-evaluated and the strategies for goal attainment reassessed. The understanding of public health as a profession will be further developed. Graduate or professional education as an option will be discussed in greater detail.
Prerequisite: PH 20000; and junior standing.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PH 30002  INTRODUCTORY BIOSTATISTICS  3 Credit Hours
An introduction to statistical methodology in the field of public health. Students learn the statistical skills to read scientific articles, understand the statistical methods used and interpret the results on their own.
Prerequisite: Any kent core mathematics; and critical reasoning course.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30004  PUBLIC HEALTH RESEARCH  3 Credit Hours
Approaches involved in defining public health problems and steps involved in conducting research about these problems. Students are introduced to how to evaluate published public health research.
Prerequisite: PH 30002; and ENG 21011 or HONR 10297.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30005  SOCIAL AND BEHAVIORAL SCIENCE THEORIES IN PUBLIC HEALTH  3 Credit Hours
An overview of the contributions of the social and behavioral sciences to human health behavior, including application of studies in the area of health promotion, health protection and disease prevention in public health.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30006  INTRODUCTION TO ENVIRONMENTAL HEALTH AND SAFETY  3 Credit Hours
Introduction: the environment at risk; environmental epidemiology, environmental toxicology, environmental policy and regulation, watershed management, safe drinking water, wastewater management, vector-born and zoonotic disease, air quality, solid and hazardous waste, food protection, radiation safety and injury prevention, occupational health and safety, total worker health, the built environment.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30007  PREVENTION AND CONTROL OF DISEASES  3 Credit Hours
Provides an overview of concepts involved in biological mechanisms of disease at cell, individual and community levels, provides insight into strategies used in preventing and controlling diseases at the population and/or community level within this framework.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30009  ENVIRONMENTAL HEALTH AND SAFETY REGULATIONS AND POLICY  3 Credit Hours
Develops a framework for understanding the regulatory structure of environmental and occupational health and safety regulations and policy in the U.S. Federal, state, and local levels of government are reviewed as well as major agencies and regulations.
Prerequisite: PH 30006.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
PH 30012 COMMUNICABLE DISEASES 3 Credit Hours
A survey of communicable diseases of global public health significance, including the epidemiology and forensics associated with disease transmission, vaccination strategies and practices, and human responses to infectious disease. Students are introduced to infectious disease pathogens and the practices and procedures for their surveillance, handling and control.
Prerequisite: PH 20001 and 30007.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30014 STRATEGIES FOR PREVENTION IN PUBLIC HEALTH 3 Credit Hours
Provides a review of population strategies for health promotion and disease prevention from a social-ecological perspective, highlighting the importance of evidence-based, equitable, and ethical approaches.
Prerequisite: PH 30007.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30015 UNITED STATES HEALTH CARE SYSTEM 3 Credit Hours
Provides an overview of the U.S. healthcare delivery system, including operations, stakeholders and the role of government with a particular emphasis on public health's role in health care. Students gain an understanding of inpatient and outpatient services, the various roles of healthcare professionals, private and public financing and the impact of managed care. The primary focus is the public health system.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30020 FUNDAMENTALS OF HEALTH PRIVACY 1 Credit Hour
This course will provide an overview of compliance in healthcare privacy and security within the context of the Health Insurance Portability and Accountability Act (HIPAA). Current topics such as electronic health records and the challenges posed by social media will be explored.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PH 30025 FUNDAMENTALS OF HEALTHCARE COMPLIANCE 1 Credit Hour
This course will provide an overview of fraud, waste, and abuse compliance in the healthcare industry. The practical and legal basis for compliance programs will be explored as well as their creation, implementation, and maintenance.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PH 30033 PUBLIC HEALTH POLICY AND DECISION-MAKING 3 Credit Hours
An introductory survey of the formulation to implementation of public health policies for various public health issues, and the use of practical administrative tools such as strategic planning, use of economic evaluation tools and decision analysis.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 30040 PUBLIC HEALTH LABORATORY SAFETY, SECURITY AND EMERGENCY PREPAREDNESS 3 Credit Hours
Safe operations within the public health laboratory require specific knowledge and skills sets. Upon completion of this course, the student will (1) understand the public health laboratory infrastructure; (2) work safely and responsibly with equipment and reagents to investigate laboratory-based public health problems; (3) define the laws, policies and guidance documents related to public health laboratory activities; and (4) respond to simulated laboratory safety and security emergencies.
Prerequisite: PH 30006 and 30012.
Schedule Type: Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

PH 30101 SOLID AND HAZARDOUS WASTE MANAGEMENT 3 Credit Hours
Solid and hazardous waste programs and practices are explored. Pollution prevention, safety, sanitation practices, sustainability concepts, management, and regulations pertinent to solid and hazardous waste such as RCRA, are discussed and studied. Consumption, garbage handling, landfill design and disposal, sustainability concepts, reuse, recycling, composting and other waste strategies are presented. Hazardous waste and materials issues in the environment are introduced; such as HW disposal, TSD Facilities, underground storage tanks, “Superfund”, brownfields and related issues.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 30102 AIR QUALITY AND POLLUTION CONTROL 3 Credit Hours
Basic survey of air pollution and its control. The respiratory system and the bodies response to air pollutants of different types is reviewed and related illnesses such as asthma are studied. The Clean Air Act, NESHAPS and related regulations are surveyed. Ambient air quality standards, the effect of climate and other air pollution concepts are reviewed. Measurement and control methods for both particulate and gaseous contaminants are surveyed.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 30103 FOOD PROTECTION 3 Credit Hours
Topics in foodborne disease prevention and food sanitation relative to quality control, food service and processing systems are introduced. Foodborne disease agents, microbiology, epidemiology and outbreak investigation techniques are explored. The regulatory process and agencies at the wholesale, retail and food service levels are introduced. Ohio food regulations are covered, including the Ohio Uniform Food Code. Basic preparation of students to conduct food serve inspections and foodborne disease investigations as part of agency regulatory programs. The opportunity to earn the National Restaurant Association, ServSafe Manager Certification is also provided.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 35005 ADVOCACY AND ACTIVISM IN PUBLIC HEALTH 3 Credit Hours
Public health advocacy and activism are areas of increasing importance for those in public health at both national and international levels because they offer more direct approaches to achieve lasting social and political change. This course provides a foundation to the theory, evidence-based and strategies that can be harnessed to bring about change to improve the lives and health of populations, and explains how activism has an essential role in public health policy and practice.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 35010 RACISM: A PUBLIC HEALTH CRISIS 3 Credit Hours
Across the US, an increasing number of communities have declared racism as a public health crisis. This declaration is not based on an isolated incident, rather, it is the acknowledgement that racism is structural and has been embedded within the institutional policies and societal norms that are present in our everyday lives. This course will: Recognize racism in the US as a significant cause of poor health, disease, and persistent dis-ease among Black Americans; Explore the relationship between racism and health through a historic accounting of social, political, economic, and environmental conditions post-slavery through current events; and, identify how, research, and advocacy can address anti-Black racism and promote health equity.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture, 0 lab, 0 other
Grade Mode: Standard Letter

PH 40000 PUBLIC HEALTH PROFESSIONAL PRACTICE III 1 Credit Hour
Professional development course designed to launch graduates into the workforce or graduate school. The career portfolio, resume, and cover letters will be finalized. Interviewing and application skills will be developed. Working with a College of Public Health career counselor students will develop job search strategies and begin the application process. Students continuing their education in a graduate program will work on application materials.
Prerequisite: PH 30000; and senior standing.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

PH 40013 CLINICAL EPIDEMIOLOGY BASICS 3 Credit Hours
The purpose of this course is to develop an understanding of clinical research, Good Clinical Practices, research environments, and methods used in clinical research. The student will gain an understanding of the use of clinical investigation from the product development stage to the application of investigations in contract research organization. Ethical implications and regulatory issues will be examined.
Prerequisite: PH 20001.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40014 CLINICAL TRIALS MANAGEMENT 3 Credit Hours
Course examines the good clinical practices guidelines. Students learn how to conduct and manage clinical trials; understand clinical trials data; develop instruments and protocols; recognize quality control and data issues; know approaches to recruitment, retention and participant assessment; identify adverse events and measurement of response variables; and acquire skill in study close-out procedures.
Prerequisite: PH 40013.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40015 SCIENTIFIC WRITING FOR CLINICAL RESEARCH 3 Credit Hours
(Cross-listed with EPI 50015) Course provides students the tools to develop proficiency in scientific reading, to conduct presentations and to demonstrate skill in scientific writing, with the goal of preparing clinical researchers to be able to communicate findings to the science community and the general population. Course includes an examination of the science literature in clinical trials research.
Prerequisite: ENG 21011 or HONR 10297.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40017 PHARMACOEPIDEMIOLOGY 3 Credit Hours
(Cross-listed with EPI 50017) Introduction to the field of pharmacoepidemiology, which uses epidemiology methods to understand medication use and distribution at the population level. Course examines risk-benefit and epidemiology approaches to examining medication use and therapeutic trials. Drug and device manufacturing to market are explored.
Prerequisite: PH 40013 and PH 40014.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40018 REGULATORY AFFAIRS IN CLINICAL RESEARCH 3 Credit Hours
(Cross-listed with EPI 50018) Course provides the tools for students to develop an understanding of the researcher and organization responsibility in research and development of clinical trials products. Students understand regulations from the government and industry, privacy concerns, liability and ethical issues related to clinical trials research. Examples from the field are explored in detail.
Prerequisite: PH 40013 and PH 40014.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40020 DISASTER PREPAREDNESS 3 Credit Hours
College-level version of the FEMA “Are You Ready?” training designed to prepare average citizens to respond to emergency situations. Students learn how to appropriately prepare for and respond to natural and contrived emergencies, such as floods, tornados, fires, terrorism, etc. Students prepare an emergency response kit for home use, using materials from home or store, and learn how to shelter-in-place.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
PH 40040  FORENSIC EPIDEMIOLOGY  3 Credit Hours
Introduction to the principles and practices of investigative epidemiology. Inherent to the course is the understanding of how public health law impacts data collection and representation. Students learn the roles and responsibilities of the criminal justice, public health, and first responder communities as they relate to the investigation of public health crimes. Additionally, students use real case studies to apply knowledge in the investigation of mock public health crimes.
Prerequisite: Special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 40050  PUBLIC HEALTH AND FIRST RESPONDER LINKAGES  3 Credit Hours
Capstone experience meant to unite students of public health with their professional partners. Students interact in the classroom and at the partners’ place of business to link theory and practice, gain real-world knowledge and cement partnerships.
Prerequisite: PH 40040; and special approval.
Schedule Type: Field Experience, Lecture
Contact Hours: 1 lecture, 2 other
Grade Mode: Standard Letter

PH 40060  PUBLIC HEALTH LABORATORY METHODS  3 Credit Hours
(Slashed with EHS 50060) Course introduces the student to the fundamental theory and hands on use to track specimen collection and laboratory analysis. Environmental specimens are examined for their public health importance using classical and modern techniques. Students learn classical laboratory methods and their modern use in the laboratory environment. Examples include culture and microscopic identification of microorganisms, identification of disease vectors, detection of newborn disease and detection of terrorism agents.
Prerequisite: BSCI 30140 or CHEM 10062 or CHEM 10971 or PH 30006.
Schedule Type: Combined Lecture and Lab
Contact Hours: 2 lecture, 1 lab
Grade Mode: Standard Letter

PH 40092  INTERNATIONAL HEALTH PRACTICUM (ELR)  3-6 Credit Hours
(Repeatable for credit) A supervised internship in global/international health.
Prerequisite: PH 10002; and junior or senior standing.
Schedule Type: Practical Experience
Contact Hours: 10-20 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 40100  VECTOR-BORNE AND ZOONOTIC DISEASES  3 Credit Hours
Presents a broad overview of major considerations related to human health and the vector-borne diseases transmitted by rodents and arthropods (insects and arachnids). Control measures, including rodent control, local mosquito control programs, and integrated pest management (IPM) concepts with safe pesticide use are reviewed. Application of FIFRA regulations are presented. An overview of issues associated with zoonotic diseases transmitted by animals, such as rabies, and their control are also included. Vector and reservoir relationships are explored.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 40101  OCCUPATIONAL HEALTH AND SAFETY  3 Credit Hours
Introduction to workplace safety and industrial hygiene. The OSHA regulations and procedures are reviewed and workplace safety and health principles studied. Students learn how to anticipate, recognize, evaluate and control workplace hazards. Safety issues are surveyed; such as confined space, electrical LOTO, trenching, fall protection, walking and working surfaces. Industrial hygiene issues are surveyed; such as air contaminants, hazard communication, respiratory protection, ergonomics, noise control and bloodborne pathogens. Control measures for workplace hazards are discussed.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 40109  LABORATORY SAFETY AND HYGIENE  3 Credit Hours
(Crosslisted with EHS 50109) Basic introduction to laboratory safety, chemical hygiene, and biosafety. Includes the research compliance programs of institutions (IBC, IACUC, IRB, RSC) and the OSHA Chemical Hygiene Standard requirements and program responsibilities. General lab safety concepts are reviewed, along with chemical handling and storage, fumehoods and ventilation, hazardous waste disposal, radiation safety, and lab design. Basic principles of biosafety are covered, BSL 1-4 levels, biosafety cabinets, select agents, bloodborne pathogens, NIH Guidelines, biosafety and animal use.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 40112  INSTITUTIONAL AND RECREATIONAL ENVIRONMENTAL, OCCUPATIONAL HEALTH AND SAFETY  3 Credit Hours
Introduces the environmental and occupational health and safety issues unique to institutional settings and licensed facilities; such as, hospitals, nursing homes, K-12 schools, universities, R&D, correctional facilities, and childcare facilities; and in various recreational environments, such as swimming pools, spas, bathing beaches, marinas, campgrounds, playgrounds and natural areas.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 40191  SEMINAR IN PUBLIC HEALTH  1-3 Credit Hours
(Repeatable for credit) Seminar on current and important topics in public health. Subject matter varies depending on topic.
Prerequisite: None.
Schedule Type: Seminar
Contact Hours: 1-3 other
Grade Mode: Standard Letter

PH 40195  SPECIAL TOPICS IN PUBLIC HEALTH  1-3 Credit Hours
(Repeatable for credit) Subject varies depending on the emerging issue.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter
PH 40196 INDIVIDUAL INVESTIGATION IN PUBLIC HEALTH 1-3 Credit Hours
(Repeatable for maximum 6 credits) Individual undergraduate investigation or research on specific public health issues.
Prerequisite: Junior or senior standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 1-3 other
Grade Mode: Standard Letter

PH 40200 THE BUILT ENVIRONMENT 3 Credit Hours
Provides a basic understanding of the relationships between poor housing and environmental health and safety problems. It explores the physiological and psychological aspects of shelter. Students gain a basic understanding of housing codes, fire codes, zoning, and related regulatory issues. Students explore housing related health problems; such as, indoor air quality, mold, asbestos, lead paint, and radon. Manufactured housing parks and agricultural labor camp regulations are also reviewed. The role of EH in community planning is explored. Health issues with urban sprawl and community design problems, utility problems such as urban run-off and pest problems, and other issues are reviewed. Elements of healthy community, community planning and environmental protection are introduced; such as new urbanism, walkable communities programs, environmental building design, green communities, urban gardening and LEED’s.
Prerequisite: PH 30006.
Schedule Type: Field Experience, Lecture
Contact Hours: 2.67 lecture, .33 other
Grade Mode: Standard Letter

PH 41000 ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT 3 Credit Hours
Entails leadership and management principles in environmental and occupational health and safety (EOHS), and helps students develop skills needed to become an effective supervisor. Issues such as regulatory structure, program and community planning, policy development, budgeting, staffing and staff development, strategic planning, training, professionalism and assessment are reviewed. Board development, dealing with difficult people and situations, legal, social, political, and economic effects on EOHS programs are dealt with. Related issues such as ethics, human resources, workers comp, court appearances, media relations and communications are reviewed.
Prerequisite: PH 30006 and 30102 and 30105 and 30106; and senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 41092 FIELD EXPERIENCE IN MEETING THE BASIC HEALTH AND HUMAN NEEDS (ELR) 3 Credit Hours
(Repeatable for credit) Provides practical skills in simple, affordable appropriate technologies that can offer solutions for meeting basic health and human needs in the developing world at the household and community levels. Technologies are organized into five modules: 1) food, agriculture, and nutrition; 2) water and sanitation; 3) alternative household energy; 4) primary health care; and 5) community development needs and resource assessment. All five modules cover appropriate technologies that while meeting the basic needs have significant impact on health of the individuals and communities. Principles of participatory community development and sensitivity to cross-cultural, gender, and ecological issues are emphasized throughout the training.
Prerequisite: Special approval.
Schedule Type: Field Experience
Contact Hours: 8 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 42092 ENVIRONMENTAL, OCCUPATIONAL, HEALTH AND SAFETY INTERNSHIP (ELR) 4-6 Credit Hours
The purpose of the environmental and occupational health and safety internship is to supplement the student in-class learning experiences with practical hand-on skills and work practice experiences that helps them develop the environmental competencies required for success in the field.
Prerequisite: Junior or senior standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 13.33-20 other
Grade Mode: Satisfactory/Unsatisfactory-IP
Attributes: Experiential Learning Requirement

PH 43014 PUBLIC HEALTH AND MASS INCARCERATION 3 Credit Hours
This course will examine incarceration using a public health lens. Students will examine the epidemiology of mass incarceration in the U.S., infectious and chronic diseases of those incarcerated, incarceration as a self-sustaining epidemic with generations of imprisonment, access to health care of those behind bars and on release, and the contagion of punishment including collateral damage to children, families and neighborhoods. The course will conclude with a public health model for ending mass incarceration.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 43039 PLAGUES THAT SHAPED THE WORLD 3 Credit Hours
(Cross-listed with EPI 53039 and and EPI 73039) Course examines the Bubonic plague, HIV/AIDS, Ebola and pandemic influenza outbreaks to introduce students to the fundamentals of public health, establishing epidemiological principles that explain how plagues erupt and propagate, decimate populations and alter cultures. Inherent in the course’s discussion are the social determinants that fuel plague outbreaks and slow recovery. Examples of emerging infectious diseases and threats of bioterrorism are discussed as new plagues for which creative solutions are still required. Students take city excursions and a field trip to assess cultural changes resulting from historical plagues.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
PH 43092  INTERNSHIP IN CLINICAL TRIALS RESEARCH (ELR)  3-6 Credit Hours
The internship will place students in a clinical trials setting (e.g., contract research organization, hospital, or academic setting) where they can gain hands on experience conducting clinical trials and clinical research. The internship is 300 hours and can be taken in the last one to two semesters. The purpose of the internship is to provide the student with practical experiences that will make them marketable for a position in clinical research upon graduation.
Prerequisite: PH 40013 and PH 40014.
Schedule Type: Practical Experience
Contact Hours: 3-6 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 44000  HEALTH DISPARITIES (DIVD) (WIC)  3 Credit Hours
Understanding the factors involved in health disparities at the national and global level, and the impact of health disparities on public health.
Prerequisite: ENG 21011 or HONR 10297; and 15 credit hours of public health courses; and junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Diversity Domestic, Writing Intensive Course

PH 44002  GLOBAL HEALTH IMMERSION: GENEVA, SWITZERLAND  3 Credit Hours
Participants explore a number of health concerns, policies and challenges with global importance and implications. Students investigate current global health policies and themes, and become familiar with the major players in global health including governmental and nongovernmental organizations and multinational agencies. Presentations are given by experts currently working in various regions of the world to solve such pressing global problems as HIV/AIDS, post-war trauma, tuberculosis, refugee health, non-communicable disease prevention and environmental contamination.
Prerequisite: PH 10001 and PH 10002; and junior or senior standing; and special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44003  ENVIRONMENTAL HEALTH ISSUES IN LOW- AND MIDDLE-INCOME COUNTRIES  3 Credit Hours
Covers the important environmental health issues of concerns in low- and middle-income countries and appropriate intervention strategies. Topics include clean drinking water and sanitation, indoor air pollution, outdoor air pollution, environmental management, sustainability and health.
Prerequisite: Public health or anthropology major; and junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44004  GLOBAL HEALTH IMMERSION: LATIN AMERICA  3 Credit Hours
The principal objective of this summer intersession course is to immerse students into the history, culture and public health systems of Latin American countries Colombia Ecuador. Students will have the opportunity to visit major cities, i.e., Cali, Colombia, and Quito, Ecuador, rural areas, and well-known tourist destinations (Cartagena, Colombia, Otavalo, Ecuador). Students will gain an understanding of current scientific research on tropical diseases of local public health relevance, such as malaria. The course will focus on the basic biology of disease, mechanisms of transmission (epidemiology), and efforts to develop vaccines against malaria. The course is designed primarily for sophomores, juniors and seniors who are public health, nursing, or biological science majors. Master's level students will also be accepted. Knowledge of basic Spanish language is useful but not necessary.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44005  LEGAL ASPECTS OF HEALTH SERVICES MANAGEMENT  3 Credit Hours
Provides an overview of legal and regulatory essentials in health services management. Provides a historical perspective on legal aspects of health care as well as an introduction to law, tort law, criminal aspects, contracts, civil procedure and trial practice as related to health care. Students examine how liability impacts corporate structures, health departments and health care professionals and examine issues related to patient consent, legal reporting requirements, labor relations and patient rights.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44010  PUBLIC HEALTH PLANNING AND FINANCE  3 Credit Hours
Introduces students to business planning of health services. Students obtain skills in public health financial decision-making, including general principles of public health accounting, budgeting and financial planning.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44015  PUBLIC HEALTH MANAGEMENT  3 Credit Hours
Provides an overview of management and leadership concepts, principles and practice as applied to public health management. Students learn basic skills in team-building, developing board relationships, strategic planning, fiscal management, marketing, conflict resolution and negotiation in healthcare management. Coursework integrates principles of ethics and professionalism, effective communication, managing complex and culturally diverse workplaces and the changing role of public health managers.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
PH 44020  PUBLIC HEALTH ETHICS IN PRACTICE, POLICY AND RESEARCH  3 Credit Hours
Provides an introduction to public health ethics, including the key foundations, concepts and frameworks for evaluating ethical issues in the public health setting.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44025  PRINCIPLES OF PUBLIC HEALTH LEADERSHIP  3 Credit Hours
Designed to introduce students to skill-sets and leadership practices necessary for successful public health leadership, with an emphasis on leading positive and sustainable change in real world situations. It also familiarizes students with key aspects of partnership building and advocacy for the purposes of improving health. Particular skills include coalition/partnership development, health advocacy, team building, mentoring and leadership.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PH 44092  INTERNSHIP IN PUBLIC HEALTH (ELR)  3-6 Credit Hours
(Repeatable for credit) Capstone internship experience in a public health setting under the supervision of a site preceptor and university supervisor. Students gain experience in public health work.
Prerequisite: Senior standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 3-6 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

PH 45092  SERVICE LEARNING PRACTICUM IN COMMUNITY-BASED PUBLIC HEALTH (ELR)  3 Credit Hours
This course is designed to provide an opportunity for students to engage in a variety of public health settings under the supervision of faculty. The practicum experience is focused on developing skills needed to implement change to improve population health, providing a setting in which students may integrate and apply the skills and knowledge acquired through their coursework. Students will be exposed to some of the benefits and challenges encountered by public health professionals on a routine basis.
Prerequisite: Junior or senior standing.
Corequisite: PH 35001.
Schedule Type: Lecture, Practical Experience
Contact Hours: 1 lecture, 6 other
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

PH 49000  CAPSTONE EXPERIENCE IN PUBLIC HEALTH (ELR)  3 Credit Hours
Case studies of various strategies used in addressing various public health issues are discussed within an evaluative framework.
Prerequisite: 21 credit hours of public health courses; and junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

PH 60172  PRACTICUM SEMINAR IN PUBLIC HEALTH  1 Credit Hour
(Repeatable 6 times for credit) Seminar component of the Practicum Experience; course must be taken at the same time as the Practicum Experience; students prepare a final portfolio and seminar presentation integrating theory and practice.
Prerequisite: Graduate standing.
Corequisite: PH 60192.
Schedule Type: Lecture
Contact Hours: 1 other
Grade Mode: Satisfactory/Unsatisfactory-IP

PH 60192  PRACTICUM EXPERIENCE  5 Credit Hours
(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.
Prerequisite: Graduate standing.
Corequisite: PH 60172.
Schedule Type: Practical Experience
Contact Hours: 20 other
Grade Mode: Satisfactory/Unsatisfactory-IP

PH 61199  INTEGRATIVE LEARNING EXPERIENCE  1 Credit Hour
Students complete an integrative learning experience that demonstrates a synthesis of foundational and concentration competencies. Students in consultation with faculty select foundational and concentration-specific competencies appropriate to the student's educational and professional goals.
Prerequisite: Completion of 30 credit hours of Biostatistics (BST) or Epidemiology (EPI) or Environmental Health Sciences (EHS) or Health Policy and Management (HPM) or Social and Behavioral Sciences (SBS) courses.
Schedule Type: Project or Capstone
Contact Hours: 1 other
Grade Mode: Satisfactory/Unsatisfactory

PH 60199  DISSERTATION I  15 Credit Hours
(Repeatable for credit) Registration for two semesters required, first semester dissertation work beings and continues until completion of 30 hours.
Prerequisite: Doctoral standing.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

PH 80199  DISSERTATION II  15 Credit Hours
(Repeatable for credit) Continuing registration required of doctoral students who have completed the initial 30 hours of dissertation and continuing until degree requirements are met.
Prerequisite: Doctoral standing.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

Social and Behavioral Sciences (SBS)

SBS 50196  INDIVIDUAL INVESTIGATION IN SOCIAL AND BEHAVIORAL SCIENCES  1-3 Credit Hours
(Repeatable for credit) Individual graduate investigation or research in areas related to social and behavioral sciences.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 1-3 other
Grade Mode: Standard Letter-IP
SBS 54634 SOCIAL DETERMINANTS OF HEALTH BEHAVIORS 3 Credit Hours
Overviews the social determinants of health and the dynamic interplay between individual behaviors and community structures (systems orientation) including public policy, social and built environments, commercial messages, access to services, cultural norms, psychosocial hazards, and poverty both as causal effects that either provide opportunity or constraints to health. Also examines systems approaches to preventing public health threats from issues including substance use (alcohol, tobacco and other drugs), physical inactivity, poor dietary practices, unsafe sexual behaviors, violence and injury, and mental health. 
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 54700 COMMUNITY-BASED SUBSTANCE ABUSE PREVENTION FOR PUBLIC HEALTH PROFESSIONALS 3 Credit Hours
This course focuses on prevention science and its application to prevention implementation. It is the first of a series of curricula courses we plan to offer on drug abuse prevention; these courses will add to the elective courses for master's level students in the College of Public Health. This course will be the "core" of this series—that is, students will be required to complete this course before they take another course in the series. The core course (Community-Based Substance Abuse Prevention) provides foundational knowledge for substance abuse prevention. The other courses in the series focus on prevention in specific contexts (e.g., school-based, workplace, media based, etc.). The course will enhance the knowledge and skills of public health professionals to enable them to implement evidence-based substance use prevention interventions and policies. Primary emphasis is on evidence-based interventions and policies and on implementation quality and sustainability.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 54701 COMMUNITY-BASED PUBLIC HEALTH IMPLEMENTATION SYSTEMS 3 Credit Hours
This course focuses on Public Health prevention science and its application to the implementation of substance use interventions. The content focuses on community systems for addressing substance use problems that affect whole communities. These community systems incorporate evidence-based prevention interventions at various levels of influence within a socio-ecological perspective. Students will examine the development of community organizations that come together to address specific problems, and how they network and integrate with existing organizations that provide community services. The content draws from the International Standards on Drug Use Prevention that were published by the United Nations Office on Drugs and Crime (2013; 2015) and the European Drug Prevention Quality Standards published by the European Monitoring Centre on Drugs and Drug Addiction (2011). Primary emphasis is on evidence-based interventions and policies and on implementation quality and sustainability.
Prerequisite: SBS 54700; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 60002 QUANTITATIVE METHODS IN SOCIAL AND BEHAVIORAL SCIENCES 3 Credit Hours
Introduces basic quantitative methods used in social and behavioral scientific research. First we focus on the measurement of socio-behavioral phenomena and the relationship between measurement and statistics. Next, we examine the interrelated roles of scientific theory and the design of socio-behavioral research studies. Last, we focus on building appropriate multiple linear regression and or analysis of variance statistical models to provide valid analysis of data collected in socio-behavioral research.
Prerequisite: BST 52019; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 60020 PROGRAM EVALUATION II: APPLICATION IN THE REAL WORLD 3 Credit Hours
This course provides students with a more in-depth examination of program evaluation for Public Health professionals and the opportunity to apply their evaluation knowledge and skills to an existing health intervention. The content will delve deeply into formative and summative evaluation—including theoretical underpinnings, professional standards, research design and data collection and analysis. Students will be required to apply this knowledge to a selected program and produce an evaluation proposal acceptable for submission to a funding agency.
Prerequisite: HPM 53011; and graduate standing.
Schedule Type: Seminar
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 60021 SOCIAL AND BEHAVIORAL SCIENCE THEORIES 3 Credit Hours
Examines fundamental social and behavioral science theoretical frameworks that explain health behaviors with an emphasis on application through universal prevention approaches to inform both research and program evaluation designs.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 60030 CODING FOR QUALITATIVE RESEARCH 1 Credit Hour
(Slashed with SBS 80030) The purpose of this course is to provide students with a brief but thorough overview of the basic process of coding text-based, unstructured data for qualitative research projects. Focus is on coding for descriptive or basic qualitative research.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 15 lecture
Grade Mode: Standard Letter

SBS 60040 TRANSCRIBING INDIVIDUAL AND GROUP INTERVIEWS FOR QUALITATIVE RESEARCH 1 Credit Hour
(Slashed with SBS 80040) The purpose of this course is to provide students an overview of, and applied practice in transcribing audio-recorded interview data as preparation for qualitative analysis techniques.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 15 lecture
Grade Mode: Standard Letter
SBS 60191 VARIABLE CONTENT SEMINAR IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Seminar on current and important topics in social and behavioral sciences. Subject matter varies depending on the topic.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

SBS 60192 APPLIED PRACTICE EXPERIENCE IN SOCIAL AND BEHAVIORAL SCIENCES 3-6 Credit Hours
(Repeatable for credit) Observational and participation in public health activities of a public health agency, hospital or other approved organization. The student completes the field experience with joint supervision from the university and approved organization or agency.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 9-18 other
Grade Mode: Satisfactory/Unsatisfactory/IP

SBS 60195 SPECIAL TOPICS IN SOCIAL AND BEHAVIORAL SCIENCES 1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in social and behavioral sciences.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

SBS 60292 APPLIED PRACTICE EXPERIENCE IN SOCIAL AND BEHAVIORAL SCIENCES II 1 Credit Hour
(Repeatable for credit) Continuing enrollment for students participating in public health activities of a public health agency, hospital or other approved organization. Students complete the field experience with joint supervision from the university and an approved organization or agency.
Prerequisite: SBS 60192 and graduate standing.
Schedule Type: Practical Experience
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory

SBS 63008 GRANT WRITING IN SOCIAL AND BEHAVIORAL SCIENCES 3 Credit Hours
Students learn the basics of grant writing for federal and non-federal funding agencies with a particular emphasis on the components of most proposals for funding. This includes rationale for seeking funds, collaborations with community organizations, and working with consultants and subcontractors. Participants also learn about the basic sections of grant writing such as specific aims and hypotheses, developing a literature review, background and significance, research design and methodology, developing a budget and conducting research with human subjects. Participants have an opportunity to write sample grant proposals, learn about the review and scoring process and post-award grant management.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 63010 QUALITATIVE METHODS FOR PUBLIC HEALTH RESEARCH 3 Credit Hours
(Slashed with 83011) In this course, students will be guided through exploration of the uses and value of qualitative approaches to research with humans through a combination of resource review and guided applied practice. Students will be provided with information about various methodologies that comprise qualitative inquiry, and will engage in practice efforts to analyze provided data, and to assess the quality of research reports.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 63011 QUALITATIVE DATA ANALYSIS 3 Credit Hours
(Slashed with SBS 83011) Students will be introduced to the process and goals of qualitative data analysis relevant to research design and study purpose, and will be provided opportunities to conduct coding and other types of analysis of qualitative data using both computer assisted and manual processes. Students will focus on descriptive or generic approaches for both qualitative and mixed methods research. Students will additionally learn about and be provided opportunities for guided practice in quality control measures that include creation of an audit trail, "member checking," composition of analytic memos, and other forms of researcher initiated documentation.
Prerequisite: SBS 63010 or special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 63030 SEMINAR IN SOCIAL AND BEHAVIOR SCIENCES 3 Credit Hours
Explores case studies in the social and behavioral sciences on topics that address the leading health indicators including substance use (alcohol, tobacco and other drugs), obesity (physical activity and nutrition), HIV and STIs, mental health, injury, immunization and access to health care, and social determinants of health.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

SBS 65010 RACISM: A PUBLIC HEALTH CRISIS 3 Credit Hours
Across the US, an increasing number of communities have declared racism as a public health crisis. This declaration is not based on an isolated incident, rather, it is the acknowledgement that racism is structural and has been embedded within the institutional policies and societal norms that are present in our everyday lives. This course will: Recognize racism in the US as a significant cause of poor health, disease, and persistent dis-ease among Black Americans; Explore the relationship between racism and health through a historic accounting of social, political, economic, and environmental conditions post-slavery through the current events of 2020; and, identify how, research, and advocacy can address anti-Black racism and promote health equity.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
SBS 73018 THEORIES OF PREVENTION SCIENCE I  3 Credit Hours
Provides a background and theoretical review of prevention science as a multi-disciplinary field focusing on systematic inquiry on health behaviors including substance use (alcohol, tobacco and other drugs), physical activity, dietary practices, mental health, violence and injury, and sexual behaviors.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 73019 THEORY PREVENTION SCIENCE II  3 Credit Hours
This course examines the methods used by prevention science researchers to determine the effectiveness of public health programs. Focus is on advanced formative, process, impact and outcome evaluation methods. Qualitative and quantitative analysis techniques used for assessing program process and effects are discussed in the context of research evaluation.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 73020 ADVANCED METHODS IN PREVENTION SCIENCE  3 Credit Hours
Focuses primarily on advanced quantitative methods in the application of prevention science.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 80020 PROGRAM EVALUATION II: APPLICATION IN THE REAL WORLD  3 Credit Hours
This course provides students with a more in-depth examination of program evaluation for Public Health professionals and the opportunity to apply their evaluation knowledge and skills to an existing health intervention. The content will delve deeply into formative and summative evaluation—including theoretical underpinnings, professional standards, measurement, research design and data collection and analysis. Students will be required to apply this knowledge to a selected program and produce an evaluation proposal acceptable for submission to a funding agency.
Prerequisite: HPM 53011.
Schedule Type: Seminar
Contact Hours: 3 lecture

SBS 80030 CODING FOR QUALITATIVE RESEARCH  1 Credit Hour
(Slashed with SBS 60030) The purpose of this course is to provide students with a brief but thorough overview of the basic process of coding text-based, unstructured data for qualitative research projects. Focus is on coding for descriptive or basic qualitative research; other methodologies are reviewed based on student needs.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 15 lecture
Grade Mode: Standard Letter

SBS 80040 TRANSCRIBING INDIVIDUAL AND GROUP INTERVIEWS FOR QUALITATIVE RESEARCH  1 Credit Hour
(Slashed with SBS 60040) The purpose of this course is to provide students an overview of, and applied practice in transcribing audio-recorded interview data as preparation for qualitative analysis techniques, using both content-focused and conversation-analytic approaches.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 15 lecture
Grade Mode: Standard Letter

SBS 80100 EMERGING ISSUES IN PREVENTION SCIENCE  3 Credit Hours
Survey of relevant challenges and issues facing prevention science researchers.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 80195 SPECIAL TOPICS IN SOCIAL AND BEHAVIORAL SCIENCES  1-3 Credit Hours
(Repeatable for a maximum of 6 credit hours) Special topics to sample new offerings on topics in social and behavioral sciences. Subject matter varies depending on the topic. 
Prerequisite: Doctoral standing.
Schedule Type: Seminar
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter

SBS 80198 DIRECTED RESEARCH IN PREVENTION SCIENCE  1-15 Credit Hours
(Repeatable for credit) Directed research or individual investigation for doctoral students.
Prerequisite: Doctoral standing.
Schedule Type: Research
Contact Hours: 1-15 other
Grade Mode: Standard Letter
SBS 80199  DISSERTATION I  15 Credit Hours
(Repeatable for credit) Registration for two semesters required, first semester dissertation work begins and continues until completion of Dissertation II and 30 hours of total dissertation work.
Prerequisite: Doctoral standing; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

SBS 80299  DISSERTATION II  15 Credit Hours
(Repeatable for credit) Second course of dissertation sequence completing requirement of with 30 total hours of dissertation work.
Prerequisite: SBS 80199; and special approval.
Schedule Type: Dissertation
Contact Hours: 15 other
Grade Mode: Satisfactory/Unsatisfactory-IP

SBS 83010  QUALITATIVE METHODS FOR PUBLIC HEALTH RESEARCH  3 Credit Hours
(Slashed with SBS 63010) In this course, students will be guided through exploration of the uses and value of qualitative approaches to research with humans through a combination of resource review and applied practice. Students will be provided with information about various methodologies that comprise qualitative inquiry, and will engage in practice efforts to gather, process, and analyze data, and to assess the quality of research reports.
Prerequisite: Doctoral standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

SBS 83011  QUALITATIVE DATA ANALYSIS  3 Credit Hours
(Slashed with SBS 63011) Students will be introduced to the process and goals of qualitative data analysis relevant to research design and study purpose, and will be provided opportunities to conduct coding and other types of analysis of qualitative data using both computer assisted and manual processes. Qualitative approaches potentially considered in this course include grounded theory, phenomenology, descriptive or generic approaches, content analysis, mixed methods, and others depending on needs and interests of students in the class. Students will additionally learn about and practice quality control measures that include creation of an audit trail, "member checking," composition of analytic memos, and other forms of researcher initiated documentation.
Prerequisite: SBS 83010 or special approval.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Science degree in Clinical Epidemiology is a STEM-designated advanced degree that prepares students in the epidemiological and biostatistical methods related to clinical trials and clinical research. Students will learn advanced methods of observational and experimental study designs and be able to understand disease prevention, development, prognosis and treatment. In addition, students will master and be able to apply good clinical practices, clinical trial design and management, statistical analysis, study monitoring, pharmaceutical research and regulations related to clinical research.

Accreditation
The M.S. degree in Clinical Epidemiology is accredited by the Council on Education for Public Health (CEPH).

Admission Requirements
- Bachelor’s degree from an accredited college or university
- Minimum 3.000 undergraduate GPA on a 4.000 point scale
- Official transcript(s)
- GRE scores or other standardized graduate admission exam (GMAT, MCAT, LSAT, PCAT)
- Goal statement
- Three letters of recommendation
- English Language Proficiency - all international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning one of the following:
  - Minimum 550 TOEFL PBT score - paper-based version
  - Minimum 79 TOEFL IBT - Internet-based version
  - Minimum 77 MELAB score
Minimum 6.5 IELTS score
Minimum 58 PTE score

Applicants to the program who have limited clinical or science backgrounds may be advised to take additional coursework to prepare them for the field. Determinations will be made by the admissions committee when the student is admitted conditionally to the program.

For more information about graduate admissions, please visit the Graduate Studies admission website. For more information on international admission, visit the Office of Global Education's admission website.

GRE scores may be waived, as determined by graduate coordinator using program criteria. Contact the graduate coordinator for more information.

Program Learning Outcomes

Graduates of this program will be able to:
1. Conduct patient-oriented research to understand and modify health outcomes
2. Design and carryout epidemiologic studies
3. Analyze clinical data and understand the sources, strengths and limitations of patient data
4. Design and perform clinical trials
5. Interact with human subjects and describe prognosis, therapies and outcomes

Description

The Environmental Health Sciences minor is intended for students who have a strong interest or curricular focus in a natural science major. The minor provides students with foundational concepts in environmental health as it relates to the broad field of public health. This includes students in a variety of majors, including, but not limited, to biology, chemistry, geology, geography, physics, botany and zoology.

Students who complete the required coursework and have 30 credit hours of coursework in specific public health areas, biology, chemistry, physics, geology, math or statistics can pursue a Sanitarian in Training (SIT) career path in State of Ohio agencies to become a Registered Sanitarian (RS) and are well equipped to enter the workforce in a variety of career paths.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.
Program Learning Outcomes

1. Students will be able to address the basic concepts, methods, and tools of public health data collection, use, and analysis and why evidence-based approaches are an essential part of public health practice.

2. Students will be able to address the socio-economic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.

3. Students will be able to address the basic concepts, methods, and tools of public health data collection, use, and analysis and why evidence-based approaches are an essential part of public health practice.

Description

The Health Services Administration minor is intended for students that have a strong interest in concepts related to the management, ethics and practice of the administration of health services. Students complete a series of specific courses designed to enhance their knowledge in the area of health services, as well as courses geared for professional practice.

The minor will augment students’ study in a variety of majors including, but not limited to, business, communications, nursing, psychology, sociology, public health and health and human services.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Description
The Health and Technologies and Informatics minor provides students with knowledge and skills in public health and information technology. Students who are interested in public health face new challenges and opportunities with technology. Conversely, students in other fields related to technology are often presented with challenges and opportunities related to public health. Drawing on an interdisciplinary focus of public health, education, communication, geography, information, and educational technology, students increase their skill set for practice in an information-intensive health care environment.

Students in this minor will gain knowledge on how information technology is used to organize and analyze health records, health information databases and trends in technology to improve healthcare outcomes. For students with natural science, communication, business, computer, or information technology degrees, the minor courses will expose them to the uniqueness and complexity of work processes in public health and healthcare.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes
Graduates of this program will be able to:
• Explain basic tenants of public health
• Identify how health informatics improves health care effectiveness and efficiency
• Describe how technology informs lifespan learning
• Explain evaluation methods, e-Health, decision support, and database systems as important information technologies for supporting healthcare decision-making

Students declared in the Nursing major may substitute NURS 40045 for PH 30033.

Description

The Bachelor of Science in Public Health degree in Public Health broadly prepares students to enter the workforce as a public health professional or to enter an advanced program of study. Students explore the five disciplines of public health: biostatistics, environmental health, epidemiology, health policy and management and the social and behavioral sciences through general coursework. The Public Health major comprises the following concentrations:

• The Allied Health concentration seeks to augment the career portfolio of the allied health professional or aspiring student. Students who are interested in a generalist focus in public health or interested in moving to a professional degree (accelerated nursing) or technical allied health degree (respiratory care, radiologic technology, occupational/physical therapy assisting, etc.) are encouraged to pursue this path. Students may currently hold or may be actively pursuing a state licensure in an allied health field and may be eligible to receive a maximum 12 credit hours of upper-division credit for their prior experience and demonstrated competency in select areas. Students without a state licensure may still pursue this concentration but will complete 12 hours of coursework in allied health-specific areas. Students in this concentration will be exposed to broad areas of public health including epidemiology, biostatistics, environmental health, global health and health policy; thus, preparing students to
meet the increased demands for a trained and educated public health workforce.

- The **Clinical Trials Research** concentration focuses on training students in the epidemiology methods used in clinical research. The curriculum provides students a thorough understanding of the management of research studies, the scientific literature related to drugs, medical devices and other new therapies, and the federal regulations related to conducting clinical trials. Students are prepared to design and answer research questions, collect and manage data and communicate research findings to both scientific and lay audiences. An internship experience provides necessary experience in a clinical research setting. Potential places of employment for graduates include hospitals, contract research organizations, medical schools and pharmaceutical companies where graduates assist with and manage clinical research studies.

- The **Community Health Outreach and Development** concentration focuses on identifying and exploring ways to influence the multi-level determinants of population health and health behaviors, from a perspective that prioritizes health equity and social justice. Approaches focus on community- and system-level strategies to promote health and healthy behaviors among populations and eliminate health disparities through media, policy and education initiatives. Career options include the public sector, social services, non-profit agencies and other community-based health promotion and advocacy efforts. Graduates are prepared to assist with developing, implementing and coordinating public health interventions that promote community health and organize diverse communities around issues related to health and health behavior.

- The **Global Health** concentration educates students in identifying and working to address the critical public health and human needs of diverse, underserved and vulnerable populations locally and globally. Students learn the need for multidisciplinary (biological and social sciences) approaches and cooperation to address the major global public health problems. In addition, they have the opportunity to focus on a specific aspect of global health, e.g. HIV/AIDS, health policy, health disparities, health education, environmental health, nutrition. Graduates are prepared to work at entry-level positions in public health with local, regional, national or international public health agencies in both public and private sectors. Students who pursue this concentration are required to participate in a study abroad experience and complete four courses (at the elementary and intermediate levels) of either Arabic, Chinese, French, Russian or Spanish.

- The **Health Services Administration** concentration establishes a foundation for graduate work in health policy and management. Students analyze national and local public health infrastructure, evaluate the effectiveness and efficiency of health care delivery and explore the legal and ethical issues of health care administration. Graduates enter the health care workforce as finance managers, compliance officers, patient navigators, insurance specialists and other health care managers. Students are encouraged to pair this concentration with a minor.

- The **Pre-Medicine, Dentistry, Osteopathy** concentration includes preparatory courses for the Medical College Admissions Test (MCAT), the Dental Admissions Test (DAT) and admission entry into other professional schools including pharmacy, podiatry, occupational/physical therapy and physicians assistant programs. The overall curriculum—focusing on biological, social and economic determinants of health, prevention and control of diseases, introduction to biostatistics and public health research—makes this program highly desirable for admission to professional schools.

The unique features of the program open new opportunities and offer competitive advantages for students seeking to enter into clinical medicine.

**Combined Degree Programs**

- **Master of Public Health degree.** Students in the Health Services Administration concentration may seek early admission to the M.P.H. degree, Health Policy and Management concentration. Applicants must have completed two semesters of college composition, a college-level mathematics course, PH 1001 and PH 3003.

- **Master of Science degree in Clinical Epidemiology**

Qualified undergraduate students may apply by completing an application for admission to the master’s degree and securing approval from the college no later than March 1 for acceptance into the fall cohort. Students must consult with their undergraduate and faculty advisors to create a plan substituting selected master’s courses for selected undergraduate courses based on approved courses. Following graduation from the B.S.P.H. degree, students’ applications to the M.P.H. or M.S. degree may be activated for admission.

Please refer to the Combined Bachelor's/Master's Degree Program policy in the Academic Policies section of the University Catalog for eligibility criteria for combined degree programs.

**Accreditation**

The B.S.P.H. degree in Public Health is accredited by the Council on Education for Public Health (CEPH).

**Admission Requirements**

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**First-Year Students on the Kent Campus:** First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

**First-Year Students on the Regional Campuses:** First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** For more information, visit the admissions website for transfer students.
Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Program Learning Outcomes
Graduates of this program will be able to:

1. Understand the history and philosophy of public health as well as its core values, concepts and functions across the globe and in society
2. Understand the basic concepts, methods and tools of public health data collection, use and analysis and why evidence-based approaches are an essential part of public health practice
3. Understand the concepts of population health, and the basic processes, approaches and interventions that identify and address the major health-related needs and concerns of populations
4. Understand the underlying science of human health and disease, including opportunities for promoting and protecting health across the life course
5. Understand the socioeconomic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities
6. Understand the fundamental concepts and features of project implementation, including planning, assessment and evaluation
7. Understand the fundamental characteristics and organizational structures of the U.S. health system, as well as the differences between systems in other countries
8. Understand the basic concepts of legal, ethical, economic and regulatory dimensions of health care and public health policy and the roles, influences and responsibilities of the different agencies and branches of government
9. Understand the basic concepts of public health-specific communication, including technical and professional writing and the use of mass media and electronic technology

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Concentrations

Choose from the following: 56

Allied Health
Clinical Trials Research
Community Health Outreach and Development
Global Health
Health Services Administration
Pre-Medicine, Dental, Osteopathy

Minimum Total Credit Hours: 120

1. Students in the Nursing major may substitute NURS 40020 for PH 30007, NURS 40045 for PH 30033 and NURS 40872 for PH 30004.
2. A minimum C grade must be earned to fulfill the writing-intensive requirement.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Public Health degree in Public Health is designed to help students develop real-world knowledge and skills needed to pursue success in the public health industry.

The Public Health major comprises the following concentrations:

- The Biostatistics concentration prepares students in the quantitative science of health data collection, storage, retrieval, analysis and interpretation. Graduates are equipped to use statistical methods to design and analyze health-related surveys and experiments for improving health. The college’s faculty research interests include applying biostatistical analysis to understand critical health problems. Graduates in biostatistics are in demand at hospitals, pharmaceutical companies, state and local health departments, federal health agencies and biotechnology companies to analyze the effectiveness of new drugs and interventions, identify risk factors for disease and develop effective prevention strategies.

- The Epidemiology concentration prepares students to analyze the distribution and determinants of disease, disabilities and death in populations. Graduates are able to apply quantitative and qualitative methods to investigate disease outbreaks, determine causal relationships between environmental and biological factors, and conduct studies to project health trends in populations. Students benefit from public health faculty research agendas in bio-preparedness, public health surveillance systems, chronic disease, cancer and infectious disease epidemiology. Career opportunities for graduates include research positions in universities, medical schools and pharmaceutical companies; disease prevention specialists in hospitals; and surveillance managers in state and local health departments.

- The Health Policy and Management concentration prepares students to address public health risks and develop effective health services delivery models. This concentration incorporates health services research, health policy analysis and health care planning and management. Given the active research of the college’s faculty in identifying service gaps and in developing evidence-based practices and policy analysis, students emerge with strong skills in health services management, alternative models of service financing and strategies for improving services. Career opportunities for graduates include administrative and management positions in hospitals, clinics, state and local health departments, nursing homes and mental health facilities; policy analyst positions in health planning organizations and governmental agencies; and planning and management positions in health maintenance organizations and health insurance companies.

- The Social and Behavioral Sciences concentration provides students with an interdisciplinary approach to improve health in populations across the life course. Students learn to apply theoretical principles to design, implement and evaluate effective programs that include behavioral and environmental approaches. Graduates are able to design and evaluate public health interventions intended to improve health for families, workplaces, communities and other settings. The active research of the college’s faculty—particularly in the areas of childhood obesity, violence and injury prevention, substance abuse prevention and chronic disease prevention—provides students the opportunity to work on large-scale externally funded prevention research. Students are prepared for careers in health promotion; program design and evaluation; and prevention program development for state and local health departments, workplace health promotion programs, hospitals, international health agencies, mental health centers and non-profit organizations.

Students in the M.P.H. degree have the opportunity to complete a dual degree with the Doctor of Podiatric Medicine degree. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

Accreditation
The M.P.H. degree in Public Health is accredited by the Council on Education for Public Health (CEPH).

Admission Requirements
- Bachelor's degree from an accredited college or university
- Minimum 3.000 undergraduate GPA on a 4.000 point scale

Program Learning Outcomes

Graduates of this program will be able to:

1. Explain public health history, philosophy and values
2. Identify the core functions of public health and the 10 Essential Services
3. Explain the role of quantitative and qualitative methods and sciences in describing and assessing a population's health
4. List major causes and trends of morbidity and mortality in the US or other community relevant to the school or program
5. Discuss the science of primary, secondary and tertiary prevention in population health, including health promotion, screening, etc.
6. Explain the critical importance of evidence in advancing public health knowledge
7. Explain effects of environmental factors on a population's health
8. Explain biological and genetic factors that affect a population's health
9. Explain behavioral and psychological factors that affect a population's health
10. Explain the social, political and economic determinants of health and how they contribute to population health and health inequities
11. Explain how globalization affects global burdens of disease
12. Explain an ecological perspective on the connections among human health, animal health and ecosystem health (eg, One Health)
13. Apply epidemiological methods to the breadth of settings and situations in public health practice
14. Select quantitative and qualitative data collection methods appropriate for a given public health context
15. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate
16. Interpret results of data analysis for public health research, policy or practice
17. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings
18. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels
19. Assess population needs, assets and capacities that affect communities’ health
20. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs
21. Design a population-based policy, program, project or intervention
22. Explain basic principles and tools of budget and resource management
23. Select methods to evaluate public health programs

**Contact Information**

- Assistant Dean: Jen Miller | jnoble@kent.edu | 330-672-6500
- Speak with an Advisor

**Description**

The Public Health minor integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals.

Students who choose to augment their major by adding the public health minor increase their awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through applied public health research.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the
A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Understand the history and philosophy of public health, as well as its core values, concepts and functions across the globe and in society
2. Understand the basic concepts, methods and tools of public health data collection, use and analysis; in addition to why evidence-based approaches are an essential part of public health practice
3. Understand the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities

*Note* Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

**Description**

The Ph.D. degree in Public Health bridges public safety and health career pathways to address a nationwide shortage of public health workers. The Public Health major comprises the following concentrations:

- The **Epidemiology** concentration prepares students to examine the distribution and determinants of diseases in populations. Graduates are able to apply quantitative and qualitative methods to examine critical and/or emerging health issues, gain advanced ability to conduct large studies and analyze data sets in order to project health trends in populations of interest. Students in this concentration benefit from active faculty research agendas in biopreparedness, public health surveillance systems, chronic disease, cancer and infectious disease epidemiology.
- The **Health Policy and Management** concentration prepares students to design and implement studies and use advanced research methods to examine critical and emerging health issues. The heart of the concentration is a focus on interdisciplinary skills to meet the rapidly changing health needs of communities. Students benefit from active faculty research agendas in health systems research, occupational health and safety, reproductive health, HIV/AIDS, access to health care, health literacy, substance abuse prevention and community-based programming.
- The **Prevention Science** concentration is an interdisciplinary program aimed at promoting healthy behaviors in populations across the
life course. Graduates are prepared to design and evaluate public health interventions and have expertise in a variety of theoretical and substantive perspectives for conducting research within systems of the family, health and education, workplace and community. Active faculty research provide students the opportunity to work on community-based prevention research.

Accreditation
The Ph.D. degree in Public Health is accredited by the Council on Education For Public Health (CEPH).

** Description**

The Public Health undergraduate certificate integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals. The certificate program is aimed at students who are interested in gaining exposure to the field of public health, who do not intend to pursue a bachelor's degree or who already hold a bachelor's or associate degree and wish to broaden their knowledge of public health. Certificate graduates have an understanding of emerging issues in public health, the social and behavioral aspects to preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through applied public health research.
Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

College of the Arts

Mission of the College

The mission of the College of the Arts is to empower global leaders who ignite creativity, inspire discovery and transform all lives through the arts.

The College of the Arts uses its distinctive and innovative resources in the visual, performing and design arts to transform students’ lives through the arts and to engage local and global communities to imagine, create and transform the world. The college’s studios, exhibitions, performance spaces and lecture halls offer real-world experiences in which students learn and refine skills and put theory into practice. Students work side-by-side with faculty and professionals and create, conduct research and promote art, music, theatre, dance and fashion. Outreach to the larger community is manifested through exhibitions, performances, internships and experiential learning.

Physical Activity and ROTC Courses

No more than 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses or the first 16 credit hours of ROTC courses—Aerospace Studies (ASTU) and Military Studies (MSCI)—may apply to the 120 credit hours required for graduation.

Veterans who have completed a minimum of one year of active duty may receive PWS credit for military basic training according to branch of service, as follows:

- Army and Marine Corps, 3 credit hours;
- Navy and Coast Guard, 2 credit hours;
- Air Force, 1 credit hour.

Requirement Audit

Upon completion of 60 credit hours, each student is required to contact the College of the Arts Advising office to obtain a current evaluation of progress toward completion of the student's chosen degree program. Requirement evaluations are not a substitute for meeting with a faculty advisor. Students may access GPS (Graduation Planning System) audit through their FlashLine account which provides them with information about their academic progress. Questions about GPS audits are answered in the College of the Arts Advising office.

Requirements for Admission to Advanced Study for Art Education and Music Education

Admission to advanced study is required of all art education and music education majors and minors prior to enrolling in upper-division education courses. Upon completion of coursework, as determined by program area, students should have satisfied the prerequisites for admission to advanced study. Students must submit an application for advanced study by the second Friday of the term during which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which "Admission to Advanced Study" is a prerequisite. Students at the Kent Campus apply for Advanced Study through the College of Education, Health and Human Services Student Portal, which can be accessed through the Vacca Office of Student Services web page. Students completing a licensure program at a regional campus should check with that campus for instructions on how to apply for "Advanced Study." Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to teacher licensure. Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

Requirements for Admission to Advanced Study for Art Education and Music Education

- College Writing: Students are required to attain a minimum C grade in each writing courses (ENG 11011 and ENG 21011 or equivalent).
- Pre-Advanced Study Coursework: To be eligible for advanced study, students must earn a minimum C grade in CULT 29525 and a minimum C grade in one of the following courses (please note that a minimum C grade must be earned in all of the four courses for teacher licensure programs):
  - EPSY 29525
  - SPED 23000
- Grade Point Average:
  - Art Education majors must have earned a minimum 2.500 cumulative GPA in order to be admitted to Advanced Study.
  - Music Education majors must have earned a minimum 2.500 cumulative GPA and a minimum 2.750 major GPA at the time of application in order to be admitted to Advanced Study.
School of Music Graduate Study

Theory Placement Examination

All entering graduate students (except those in the online music education degree program) take a placement examination in music theory at the beginning of enrollment in a graduate degree program. Graduate theory coursework required as a result of this examination will be counted toward the degree requirements. Students who are not fully prepared for graduate-level work may be required to take the undergraduate Music Theory Practicum course (MUS 41111). Students may retake the examination once.

Program Requirements

Each student will be accepted as a major in a specific curricular area. It may be necessary for the student to complete Kent State University requirements for the appropriate undergraduate degree. Each student’s academic requirements are based on the catalog in force during his/her first semester at Kent State University. Students may elect to complete their degrees under the most recent catalog but must comply with all of the new requirements relevant to their program under the new catalog.

Master’s Thesis, Essay, Recital and Final Oral Examination

All Master of Arts candidates must write a thesis. All Master of Music candidates in Performance and Conducting must perform two recitals or one recital and write an essay depending on their specific degree requirements. Final Oral Examinations are required in all masters programs and this exam will include thesis defense for the Master of Arts candidates. The final oral examination may be attempted two times.

Research Tool Requirement

Candidates for the Master of Arts degree program in Ethnomusicology must demonstrate a reading and understanding knowledge of one foreign language. Credit hours earned in meeting this requirement are not applied toward the credit-hour requirement in the degree program.

For candidates for the Music Theory-Composition Ph.D. program, this requirement may be either a reading translating knowledge of one foreign language or a demonstrated competence in an area of research specified by the doctoral advisory committee and approved by the Graduate Studies Committee. Credit hours earned in meeting this requirement are not applied toward the credit-hour requirement in the degree program. For candidates for the Music Education Ph.D. program, this requirement is MUS 73283 and related research methods courses in the College of Education. These courses are applied toward the credit-hour requirement for the degree.

PhD. Candidacy Exams, Dissertation and Dissertation Defense

Doctoral candidates will take a comprehensive examination upon completion of their coursework and research tool requirement. This candidacy exam normally takes place within four years of beginning coursework. All doctoral candidates write a dissertation and defend this dissertation in a Final Oral Examination. The dissertation phase normally is completed within five years of passing the candidacy exams.

Time Limits

Master of Arts and Master of Music students must complete their degree within six calendar years after their first graduate registration at Kent State University. Any credit transferred for meeting degree requirements must also have been earned within the six-year period.

Ph.D. students must complete their degree within nine calendar years after their first doctoral registration at Kent State University. Any credit transferred for meeting degree requirements must also have been earned within the nine-year period.

Workshop Credit

A maximum of 4 credit hours of workshop credit may be applied to certain graduate degrees. The credit hours must pertain to the degree emphasis. Only workshop credits with grades of A or B may be transferred into a degree program.

School of Music Undergraduate Professional Standards

1. Ensemble Requirements

Ensemble participation is an integral part of every music major’s program. All full-time music majors must enroll for credit and participate in an ensemble appropriate to their major performance area until the number of semesters required in the program are completed.

Music minors in the College of the Arts must enroll in a major ensemble for a minimum of two semesters. Transfer music minors must enroll in a major ensemble for a minimum of one semester.

2. Recital Attendance

Required recital attendance is intended to enhance the musical perspective of all music majors and to give them exposure to a sampling of various genres and performing media. Transfer students must attend a minimum of 10 recitals per semester. Other undergraduate music majors are required to attend a minimum four-year total of 84 concerts or recitals. Attendance at an average of 10-12 School of Music concerts per semester is recommended. Students will be notified of their status in regard to this policy once per semester. Appropriate information for all students will be sent to the college office prior to graduation. Further information is available in the School of Music Office.

3. Applied Music Requirement for the Bachelor of Music

a. 36000-Level Requirements: All freshmen enter at the 36000 level of applied study. A minimum of four semesters of enrollment are required in the number of applied credit hours as prescribed by the degree program. A jury is performed at the end of each semester. At entrance all students are informed of the performance standards necessary to advance to the 64000 level as determined by the faculty of each applied area. Transfer students with a minimum of four semesters of applied study (or
b. **46000-Level Evaluation:** Students in the Bachelor of Music degree program will be evaluated during juries to determine if they meet the 46000-level entrance standard. The results of the 46000-level entry evaluation are:
   i. Pass to the 46000 level.
   ii. **Probation for one semester:** The students will register at the 46000 level and retake the upper-level entrance jury at the end of the probationary semester. If the 46000 entrance standard is not achieved, the students return to the 36000 level, repeating as needed.
   iii. **Failure to pass the entry-level evaluation:** The students remain at the 36000 level of applied study until the 46000 entry standard is met.

c. **Required Accumulation of 46000-Level Applied Credits**
   i. **Performance Concentration:** four semesters (16 credit hours)
   ii. **Education Majors:** three semesters (6 credit hours)
   iii. **Composition Concentration:** must pass the 46000-level entry evaluation prior to graduation.

d. **46000-Level Outcome Assessment/Recital**
   i. **Performance Requirement:** All Bachelor of Music performance degree candidates (piano, voice, instrumental) must perform both a one-half junior and a full senior recital; all other Bachelor of Music majors (composition, music education) must perform a half recital. Students who do not pass the recital must repeat 46000-level lessons until the recital is acceptable. Composition students may fulfill the one-half recital requirement in several ways.

**e. Applied Music Requirements for the Bachelor of Arts in Music**
Students in the Bachelor of Arts in Music program must meet the 46000 level as a graduation requirement and are not required to enroll at the 46000 level. Bachelor of Arts degree candidates are required to perform a half or full senior recital if approved by the faculty while enrolled in applied music or complete MUS 48598.

**f. Applied Music Requirements for the B.S. in Music Technology**
   i. Music technology majors are required to complete a total of six semesters (12 credit hours) of applied music. A jury is performed at the end of each semester of study. For the first two semesters (4 credit hours) students are required to register for the 26000 or 36000-level of applied music on the major instrument or voice. For students entering at the 26000 level, the faculty of each applied area will inform the students of the performance standards expected as an outcome of the first two semesters of study to be evaluated through a juried performance (36000 Threshold).
   ii. Having completed these 4 credit hours of 26000 or 36000-level applied music with a grade of C or above, and having met the performance standards by passing the 36000 Threshold, music technology majors may take either 36000 level applied music or 36000 level applied studio musicianship (ASM) to complete the remaining 4 semesters (8 credit hours) of applied study.
   iii. At the end of the last required semester of applied study expected performance outcomes will be evaluated at the 46000 Threshold consisting of a juried performance. Although not required, Bachelor of Science in music technology degree candidates may perform a half or full recital, or performance of original compositions, on the recommendation of a pre-hearing panel. Students who choose to complete all required six semesters of applied music through the 26000/36000 applied music series in place of 36000 ASM will be required to follow the performance standards guidelines and requirements for applied music established for the Bachelor of Arts degree in Music.

4. **Advanced Study Admission Requirements**
   All Bachelor of Music degree majors must fulfill certain requirements to enter appropriate advanced standing for program specific upper-division coursework in the School of Music. These requirements are as follows:
   a. **Performance Concentrations:** All students must meet the requirements for admission to 46000-level applied study as stated above.
   b. **Composition Concentration:** The composition faculty will evaluate each student's work during the semester in which MUS 21112 is taken to determine if the student should continue to pursue the concentration. A 3.00 GPA is required in music theory classes. A skills test and composition portfolio are required. Specific information may be obtained from the coordinator of theory and composition.
   c. **Music Education Concentration:** Music education majors must apply for admission into advanced study in the College of Education, Health, and Human Services prior to junior year. Music education majors must also pass the music education professional evaluation in the music education division limited to two attempts of the entire evaluation. Specific information may be obtained from the coordinator of music education.

5. **Grade Standard**
   Music majors and minors must earn the grade of C or better in all music courses in order to count them toward graduation and to meet prerequisites for subsequent courses. Music courses required to meet the Writing Intensive Course requirement must be passed with a C or better.

6. **Outcomes Assessment**
   To graduate from Kent State University with the degree B.M. or B.A. in music, it is required that students take a major field test in music history and music theory during their senior year. Specific score level achievement is not required. Music minors are not required to take this music exam. Specific information regarding test dates may be obtained from the Music Office, E101 Center for the Performing Arts. Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required. To graduate from Kent State University with the B.S. in music technology, students must have successfully completed a music technology Internship through an evaluation by the Music Technology coordinator. Students at the completion of all required music technology courses, must submit a senior portfolio appropriate to their concentration (audio recording and/or music production). The portfolio must pass an evaluation by a jury composed of the music faculty.

**Dual Degree/Double Major**
**School of Art**
Students are permitted to double major in more than one division of the School of Art or complete more than one concentration in the same division.
1. Students enrolling in more than one major within the school must complete all course requirements in each major. If the two majors represent different degree programs, a minimum of 140 credit hours must be completed.

2. Students enrolling in a double concentration within the B.F.A. program must complete at least 12 upper-division credit hours within each concentration. In addition, all reviews must be passed and a senior project must be completed in each concentration.

A student taking a second major in art history must complete the language requirement. The program requirements for a double major must be approved in advance in writing by either the director or the division coordinator and become a part of the student’s permanent file.

The Hugh A. Glauser School of Music

The Bachelor of Music, Bachelor of Arts degree in Music and the Bachelor of Science degree in Music Technology programs can be combined with approval by the faculty and director of the School of Music. In addition, double majors and more than one concentration within a major can be approved by the faculty and director of the School of Music.

Exhibitions

Students enrolled in a B.F.A. or B.A. program in studio arts, and in the B.A. in art education, must receive a rating of “satisfactory” on selected works exhibited during their portfolio review.

No-Credit Courses

Some courses do not generate credit within particular programs. ARTH 12001 does not generate credit for majors within the School of Art, but can be used to fulfill Kent Core requirements. Check course descriptions carefully for more information.

Transfer Students to the School of Art

Transfer students with more than two studio art courses should submit a portfolio of work for proper placement. The director of the School of Art may impose additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state Transfer Articulation Guidelines (TAG), although each student will be evaluated individually in terms of his or her ability to perform within the program. Transfer students should make every effort to complete admission requirements before the deadlines and to see an advisor in the School of Art for an evaluation of the portfolio and for schedule planning before registration.

ARTH 22010  INTRODUCTION TO ASIAN ART  3 Credit Hours  
The survey introduces arts of pre-modern Asia (with the exception of West Asia and Islamic art in general). Select artistic traditions in South, Southeast, and East Asia are considered against their religious, socio-political, and other cultural contexts. Major themes include (1) the rise of civilizations, (2) developments of various artistic forms and media, (3) the spread of Buddhism and other religions across the region and (4) transcultural relations.  
Prerequisite: None.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter
ARTH 22021  ART HISTORY: AFRICAN ART (DIVG) (KFA)  3 Credit Hours
An introduction to the arts of Africa with an emphasis on the historical traditions of major kingdoms. Covering a spectrum of regions, students examine primarily sculptural traditions (figural and masquerade) in both royal and ritual contexts. These arts are examined within their social and cultural contexts in the service of politics, as objects of ritual and religious practice, and as evidence of aesthetic choices and achievements. The final segment of the course will address the legacy of these traditions through the colonial period and into modern times.
Prerequisite: None.
Schedule Type: Lecture

Attributes: Diversity Global

ARTH 42028  CONTEMPORARY AFRICAN ART: 1980—PRESENT  3 Credit Hours
(Slashed with ARTH 52028) An in-depth study of African art since the late twentieth century. Focused on artists from the continent and the Diaspora, the course begins by examining the impact that colonialism, with its appropriation, exploitation, and reshaping of Africa, had on the arts in Africa (1960-1980). It then analyzes a broad spectrum of modern and contemporary African art forms (painting, printmaking, sculpture, textiles, photography, performance, and film) and related art history, exhibition and critical texts from the 1980s to the present, with an emphasis on such issues as patronage, the commodification of art, urbanism, national consciousness, identity formation, new media and the effects of globalization.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42036  MEDIEVAL ART  3 Credit Hours
(Slashed with ARTH 52036) Emphasis on major periods of Medieval art (Early Christian, Byzantine, Carolingian, Ottonian, Romanesque and Gothic), treating iconographic themes and styles in a variety of media. Works studied include architecture, manuscript painting, ivory carving, and goldsmith work, most of which were produced by or for members of the clergy, royalty, or the lay aristocracy. The course, therefore, involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. A strong emphasis is given to reading primary and secondary sources.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42041  ITALIAN RENAISSANCE ART  3 Credit Hours
(Slashed with ARTH 52041) Study of development of major themes in Italian art from 1200 until about 1450, emphasizing achievements of the masters and analyzing major ideas and theories of the period.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture

Grade Mode: Standard Letter

ARTH 42043  THE HIGH RENAISSANCE AND MANNERISM IN ITALY  3 Credit Hours
(Slashed with ARTH 52043) Covers late 15th century and 16th century painting, sculpture and architecture in Italy. Following discussion of the High Renaissance masters, students examine the works collectively known as the Mannerists. Course gives students a firm grounding in the manifold artistic activity of the 16th century.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42044  VENETIAN RENAISSANCE ART  3 Credit Hours
(Slashed with ARTH 52044) Course provides a survey of Venetian painting, sculpture and architecture from the late 1300s to the late 1500s. Upon completion students have a comprehension of the interrelationship of Venetian art with its unique environment and society.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture

Grade Mode: Standard Letter
ARTH 42045 ITALIAN ART FROM Giotto to Bernini 3 Credit Hours
(Slashed with ARTH 52045) Course explores the development of art and architecture in Italy from the late Middle Ages to the High Renaissance period. Through an in-depth analysis of the art and history of these periods, students develop an understanding of Italy’s role in the overall development of Western civilization. Particular emphasis is given to Florentine Art.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42046 BAROQUE ART OF THE 17TH CENTURY 3 Credit Hours
(Slashed with ARTH 52046) Study of the origins of Baroque art in Italy and its spread throughout Flanders, the Netherlands, France and Spain.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours
(Slashed with ARTH 52050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep of colonial expansion, a rise in industrialization, and a revolt against the French Salon. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters, and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours
(Slashed with ARTH 52056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationalhood in early American art that exploded by the Civil War.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours
(Slashed with ARTH 52057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography, and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism, and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome “foreign” influences in their work, debates over racial segregation and women’s suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware, and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42059 AFRICAN AMERICAN ART AND VISUAL CULTURE 3 Credit Hours
(Slashed with ARTH 52059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion, and food—students will study African American visual culture and its profound impact on American art at large. Students will also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students will consider the benefits and pitfalls of the field and the ways in which art historians, critics, and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42060 RUSSIAN ART 3 Credit Hours
(Slashed with ARTH 52060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia’s artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 42061  EARLY 20TH-CENTURY ART  3 Credit Hours  
(Slashed with ARTH 52061) This course explores the history of Early 20th-Century Modern Art up to the Second World War. Painting, sculpture, and architecture will be the dominant focus, coupled with alternative media that may include printmaking, photography, cinema, performance, and textile arts.  
Prerequisite: ARTH 22007.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

ARTH 42064  DADA AND SURREALISM  3 Credit Hours  
Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.  
Prerequisite: Junior or senior standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

ARTH 42065  FEMINIST AND QUEER ART AND CULTURAL THEORY  3 Credit Hours  
(Slashed with ARTH 52065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieux such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with 'influential' visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large, are applicable in the artist's studio and more broadly, in humanities scholarship.  
Prerequisite: Junior or senior standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

ARTH 42069  NATIONS AND BORDERS  3 Credit Hours  
(Slashed with ARTH 52069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel’s occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.  
Prerequisite: Junior or senior standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

ARTH 42073  Ephemeral Exhibitions: World Fairs, Festivals and Biennials  3 Credit Hours  
(Slashed with ARTH 52073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton’s Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.  
Prerequisite: Junior or senior standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter  

ARTH 42076  Histories and Theories of Photography and Visual Culture  3 Credit Hours  
(Slashed with ARTH 52076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography’s advent, 19th-century commodity, scientific manipulations, 20th century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography’s history, this is not taxonomy of related movements and moments.  
Prerequisite: ARTH 32066.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter
ARTH 42079 CONTEMPORARY CRAFT: HISTORY AND THEORY 3 Credit Hours  
(Slashed with ARTH 52079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with "craft" genres: ceramics, textiles/fibers, jewelry/metals, glass and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles, and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.  
Prerequisite: Junior or senior standing.  
Schedule Type: Lecture  
Contact Hours: 3 lecture  
Grade Mode: Standard Letter

ARTH 52064    DADA AND SURREALISM  3 Credit Hours
(Slashed with ARTH 42064) Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 52065  FEMINIST AND QUEER ART AND CULTURAL THEORY  3 Credit Hours
(Slashed with ARTH 42065) This advanced and interdisciplinary art history course explores feminist and queer visual cultures, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieus such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with influential visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large, are applicable in the artist's studio and more broadly, in humanities scholarship.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52069  NATIONS AND BORDERS  3 Credit Hours
(Slashed with ARTH 42069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalism as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel's occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52073  Ephemeral Exhibitions: World Fairs, Festivals and Biennials  3 Credit Hours
(Slashed with ARTH 42073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton's Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52076  Histories and Theories of Photography and Visual Culture  3 Credit Hours
(Slashed with ARTH 42076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography's advent, 19th-century commodity, scientific manipulations, 20th century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography's history, this is not taxonomy of related movements and moments.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52079  Contemporary Craft: History and Theory  3 Credit Hours
(Slashed with ARTH 42079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with "craft" genres: ceramics, textiles/fibers, jewelry/metals, glass, and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52089  International Experience: Art History  1-3 Credit Hours
(Repeatablne for credit) (Slashed with ARTH 42089) Travel-based international experience in art history. The primary benefit will be the observation and study of works of art firsthand, first hand, in addition to the presentation and discussion of historical and contextual factors. Time is made available for individual investigation of specific works sites.
Prerequisite: Graduate standing, and special approval.
Schedule Type: International Experience
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory

ARTH 52090  Study Away: Art History  1-3 Credit Hours
(Repeatablne for credit) (Slashed with ARTH 42090) Travel-based study away in art history to and at a site or sites away from Kent State University. The primary benefit will be the observation and study of works of art firsthand, in addition to the presentation and discussion of historical and contextual factors. Time is made available for individual investigation of specific works sites.
Prerequisite: Graduate standing.
Schedule Type: Lecture, Study Away
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory
This course examines both the visual and textual. As such we travel through contemporary moments such as Abstract Expressionism, Post-Painterly Abstraction, Nouveau Réalisme, Pop, Minimalism, Conceptual art and participatory art—to name a few. So too, this course entails a broad overview of critical and theoretical approaches often engaged by contemporary artists such as existentialism, psychoanalysis, structuralism, semiotics, feminism and queer theories, theories of modern sculpture, and theories of photography. When art and theory are taken together, modern and contemporary art underscores the cultural, sociopolitical and economic developments characteristic of the last half of the twentieth century. While time constraints restrict a consideration of every artist, a selection of practitioners will be addressed. That said, this course affirms the importance of questions rather than finite answers, celebrates ambiguity and neglects any attempt at surveying and summarizing the field of modern and contemporary art.

**Prerequisite:** Graduate standing.

**Schedule Type:** Lecture

**Contact Hours:** 3 lecture

**Grade Mode:** Standard Letter
ARTS 14001 DRAWING II 3 Credit Hours
Continued practice in drawing with emphasis upon dimensional representation, pictorial structure and the breakdown of formal elements. Work produced in this class must be retained for later portfolio presentation in ART 30001.
Prerequisite: ARTS 14000.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 24002 DRAWING AS A STUDIO PRACTICE 3 Credit Hours
An introduction to advanced concepts and ideas which enable the student to understand and professionally realize their drawings as a studio practice. Work produced in this course must be retained for later portfolio presentation in ART 30001.
Prerequisite: ARTS 14000 and ARTS 14001.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 24010 INTRODUCTION TO FINE ART PHOTOGRAPHY 3 Credit Hours
Introductory studio/lecture course which introduces fine art photography with an aesthetic, contemporary approach. Students learn traditional and digital photographic image-making applications and the historical underpinnings of the photograph in modern art. Research paper and portfolio required. Work produced in this class must be retained for later portfolio presentation in ART 30001.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 24010 INTRODUCTION TO PRINT MEDIA 3 Credit Hours
Course gives the beginning student an overview of basic printmaking techniques and an understanding of what a print is, its form in both unique and multiple formats, and how these function in culture. Printmaking processes result in a rich array of pictorial possibilities and methodological approaches. Students are exposed to the basic techniques and concepts of relief, intaglio and monotype applications for printmaking.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: TAG Arts and Humanities

ARTS 24051 INTRODUCTION TO SCULPTURAL PRACTICE 3 Credit Hours
Course provides a firm grounding in the rudiments of sculpture and sculpture’s expanding field. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture, students are guided toward the realization of three-dimensional form. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Students explore the formal properties and expressive potential of materials, including mold making and casting, wood, metal and experimental media. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 25300 TEXTILES: PATTERN 3 Credit Hours
Introduction to the concepts and processes of constructed pattern including plaiting, and weaving. Off-loom and floor loom explorations will emphasize the relationship of form and structure in textile art. An emphasis is placed on the resourceful use of nontraditional or experimental materials.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 25400 CERAMICS I 3 Credit Hours
Course introduces ceramics as an artistic medium, with focus on the handbuilding of clay objects using the pinch, coil and slab methods of construction.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: TAG Arts and Humanities

ARTS 25600 INTRODUCTION TO GLASS WORKING 3 Credit Hours
Introduction to studio glass through technique and brief history. Both basic glass blowing and glass casting techniques and problems are covered.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: TAG Arts and Humanities
ARTS 25700  INTRODUCTION TO JEWELRY METALS I  3 Credit Hours  
Introduction to basic jewelry and metalsmithing techniques including fabrication, forming and finishing. Emphasis on advancing design skills and critical analysis. Exposure to historical and contemporary works. 
Prerequisite: None. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 25701  INTRODUCTION TO JEWELRY/METALS FOR NON-ART MAJORS  3 Credit Hours  
Introduction to basic jewelry and metalsmithing techniques including fabrication, forming and finishing. Emphasis on advancing design skills and critical analysis. Exposure to historical and contemporary works. 
Prerequisite: Major that is not in the School of Art. 
Schedule Type: Studio 
Contact Hours: 5 other 
Grade Mode: Standard Letter 

ARTS 34002  FIGURE DRAWING  3 Credit Hours  
(Repeatable for credit) Extensive studio practice of traditional and contemporary approaches to the human figure. Critical analysis of the figure from the Renaissance through postmodernism. Students work from a nude model. 
Prerequisite: ARTS 24002. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34003  DRAWING: STRUCTURE AND EXPERIMENTATION  3 Credit Hours  
(Repeatable for credit) Extensive exploration of advanced drawing concepts and ideas as strategies for experimentation with process and materials. 
Prerequisite: ARTS 24002. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34043  INTAGLIO  3 Credit Hours  
(Repeatable for credit) This class is designed to give the intermediate student an overview of various intaglio processes in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles and aesthetics with ideas and conceptual content. 
Prerequisite: ARTS 24040. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34044  SCREENPRINT  3 Credit Hours  
(Repeatable for credit) This class is designed to give the intermediate student an overview of screenprint techniques in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles and aesthetics with ideas and conceptual content. 
Prerequisite: ARTS 24040. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34045  LITHOGRAPHY  3 Credit Hours  
(Repeatable for credit) This class is designed to give the intermediate student an overview of various lithographic processes in relationship to contemporary art practice. During this hands-on studio experience, students will apply principles and techniques taught in class into the evolution of their own personal aesthetics. The resulting visual statements will combine those principles and aesthetics with ideas and conceptual content. 
Prerequisite: ARTS 24040. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34050  SCULPTURE: LIFE MODELING  3 Credit Hours  
(Repeatable for maximum 6 credit hours) Continuation of the study of the human figure in sculpture. 
Prerequisite: ARTS 24051. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34051  SCULPTURAL OBJECT  3 Credit Hours  
Course builds on ARTS 24051 with a greater emphasis on content, proficiency, technical expertise, craftsmanship and understanding of contemporary sculpture. Students explore the object in space, delineating issues of scale, materiality, representation, abstraction, metaphor and hybridity. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture, students are guided toward the realization of more sophisticated and complex ways of handling materials and incorporating meaning. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding. 
Prerequisite: ARTS 24051. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter 

ARTS 34052  TIME ARTS  3 Credit Hours  
This interdisciplinary class investigates the fundamentals of time-based media and its intersection with sculptural practice. Students build on concepts from ARTS 24051 to gain a broader understanding of multiple methods of making including performance, video, site and situation-specific works, as well as the use of traditional sculptural materials. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work engendering a better understanding of how sculpture is situated within the contemporary art world. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding. 
Prerequisite: ARTS 24051. 
Schedule Type: Studio 
Contact Hours: 6 other 
Grade Mode: Standard Letter
ARTS 34053 SITE AND INSTALLATION 3 Credit Hours
This interdisciplinary course builds on concepts introduced in ARTS 24051, and expands on a variety of approaches in developing site-specific installations by considering the relationship between object/context, public/private, interior/exterior and urban/rural. Through the manipulation of materials, found objects and time-based media, students are introduced to concepts of space, intention, site and intervention through experimental approaches. Students further develop an understanding of material and context through in-depth readings, lectures and critical dialogue. Sculptural techniques, performance, photography and video art are covered and incorporated into the course. Studio time is supplemented by readings, lectures and site visits around campus.
Prerequisite: ARTS 24051.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34061 INTERMEDIATE PAINTING 3 Credit Hours
Continuation of painting from observation with an introduction to oil paints and mediums. Students will look outside of the still life at various subjects including spatial dynamics, the figure, and abstracted imagery. Introduction to oil painting tools, processes, and best studio practices.
Prerequisite: ARTS 24061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34062 PAINTING STRATEGIES: PROCESS AND CONTENT 3 Credit Hours
This course focuses on conceptual prompts relative to contemporary issues to encourage a variety of processes and material approaches to making paintings. Students continue the idea of building a painting through the iterative process of making, analyzing, and editing their work throughout the semester. The painting is a live surface, a place to collect and record information, and this course insists that students consider a wide range of formal and conceptual choices to best address content. Each project will be initiated with rigorous research and further supported by exposure to visual examples of historic and contemporary painting, readings, written responses, seminar-style discussions, and numerous critiques of both in-progress and finished work.
Prerequisite: ARTS 34061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34063 PAINTING STRATEGIES: IMAGE AND CONTENT 3 Credit Hours
This course investigates various contemporary painting strategies through the use of images as source materials, with a strong emphasis on narrative. Moving away from direct observation and towards the abstraction of imagery, students will be asked to approach their practice through research, preliminary studies and sketches, and a self-driven investigation of the use of images to create concept. Various prompts will be assigned and are designed to provide students with a stronger understanding of the use of found, self-produced, or appropriated imagery as reference for their work, while helping each student build a direction for their painting practice. We will look to other mediums such as film, photography, collage, and advertising to inform the painted image and improve the reading of contemporary painting. We will look to other mediums to better contextualize the painted image in contemporary art.
Prerequisite: ARTS 34061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35095 STUDIO ART: SPECIAL TOPICS 3 Credit Hours
(Repeatable for credit) Specialized courses in studio art that focus on specific techniques and media.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35300 TEXTILES: DIMENSIONAL 3 Credit Hours
An introduction to the development of unique sculptural objects in textile media. Students explore three-dimensional textile processes using the floor loom and various basketry techniques, including wrapping and coiling and off-loom weaving.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35301 TEXTILES: PRINT PATTERN 3 Credit Hours
Focus is on the unique aspects of printing repeat designs on cloth. Screenprinted pattern - developed through manual techniques and digital design - is considered in relation to the surface and the flexible plane of cloth. The development of design, craft skills, and critical evaluation are emphasized in relation to art and industry applications.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35302 TEXTILES: FELTMAKING 3 Credit Hours
An opportunity for the in-depth exploration of technical and aesthetic possibilities of this unique process. Layers and textures in two dimensions and processes for three-dimensional feltmaking are introduced and considered as an expressive vocabulary with potential as functional form. Dyeing of wool fleece plays a major role in the course.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 35303 TEXTILES: TAPESTRY  3 Credit Hours
An introduction to a variety of traditional pictorial tapestry, discontinuous weft-faced techniques, to be executed on the frame loom and floor loom. Both tapestry and carpet history are presented to reveal traditional processes, patterns, and images for inspiration in the creation of individual works. Dyeing will play a major role in the exploration.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35305 TEXTILES: ACCESSORIES - DESIGN AND PRODUCTION  3 Credit Hours
Focus is on the design and production of textile accessories using the structural process of weaving. Texture, material, and color are critically and creatively considered in relation to the development of unique functional objects. Professional design objectives are presented.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35306 TEXTILES: SURFACE COLOR AND DESIGN  3 Credit Hours
Introduction to coloring and patterning cloth through dyeing and resist techniques. Formal and conceptual aspects of surface design in relation to the flexible cloth plane are explored. Study of traditional historic and contemporary textile references provide a foundation for creative development.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35350 TEXTILES: DESIGN AND PRODUCTION  3 Credit Hours
A basic introduction to the mechanics of designing and constructing patterned and dyed cloth on the floor loom. Learning to use the computer for the designing of woven pattern is an expectation of the course. This course may be beneficial for fashion and interior designers, as well as anyone interested in the design and craft of weaving.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35400 FUNCTIONAL APPROACHES TO CLAY  3 Credit Hours
(Repeatable for credit) Continuation of ARTS 25400 emphasizing functional approaches to clay using the potters wheel and a variety of hand-building techniques.
Prerequisite: ARTS 25400.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35401 SCULPTURAL APPROACHES IN CLAY  3 Credit Hours
(Repeatable for credit) Continuation of ARTS 25400 emphasizing sculptural approaches to clay. This course may include explorations in three-dimensional form, the human figure, mold making, multiples and installation.
Prerequisite: ARTS 25400.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35602 FLAMEWERKED GLASS  3 Credit Hours
(Repeatable for credit) An investigation of techniques, tools, equipment and materials involved in glass lampworking processes. The course covers basic melting, shaping and blowing with a glass flameworking torch. Students will learn to create larger sculptural objects from modular components through glass “networking” and will explore more technical flameworking processes to become familiarized with glass as a sculptural material.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35603 GLASS BLOWING  3 Credit Hours
(Repeatable for credit) Further exploration of glass blowing techniques. Design, form, color and execution will be emphasized.
Prerequisite: ARTS 25600.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35604 SCULPTURAL AND KILN-FORMED GLASS  3 Credit Hours
(Repeatable for credit) An overview and exploration of sculptural and kiln-formed glass techniques. Casting, pattern making, mold making and cold construction will be covered. Design, form, content and technical execution and understanding operations of equipment are emphasized.
Prerequisite: ARTS 25600.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35700 JEWELRY CONCEPTS AND TECHNIQUES  3 Credit Hours
An in-depth exploration of jewelry making techniques such as casting, stone setting, mechanisms and fabrication. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 10023 and ART 10024 and ARTS 25700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35701 METALSMITHING CONCEPTS AND TECHNIQUES  3 Credit Hours
Course offers an in-depth exploration of hammerworking techniques such as raising, forging and shell forming. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 10023 and ART 10024 and ARTS 25700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35702 ENAMELING CONCEPTS AND TECHNIQUES  3 Credit Hours
An in-depth exploration of vitreous enameling techniques on two-dimensional surfaces. Porcelain enamel on steel is introduced. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ARTS 25700 and ARTS 35700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

developed in coursework to applications in new or different contexts,
demonstrating how this experience has broadened students’
derstanding of their discipline, and reflection on the significance of the
defined experience.
Prerequisite: A major in the School of Art; junior or senior standing; and
special approval of faculty sponsor.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement
ARTS 45080    KENT BLOSSOM ART 1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 55080) Studio exploration
of selected concepts in studio art: painting; drawing; sculpture and
expanded media; print media and photography; ceramics; glass; jewelry,
metals and enameling; textiles. Content varies with each section offered.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter-IP
ARTS 45089    INTERNATIONAL EXPERIENCE: STUDIO ART (ELR) 1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 55089) A Kent State faculty-
led study abroad experience in studio art that integrates traditional
classroom learning with experiential activities and site visits outside the
United States.
Prerequisite: Studio Art major; and special approval.
Schedule Type: International Experience, Lecture
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement
ARTS 45090    STUDY AWAY: STUDIO ART (ELR) 1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 55090) Study away in studio
art disciplines at a site at or away from Kent State University.
Prerequisite: Studio art major; and special approval.
Schedule Type: Study Away
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement
ARTS 45095    SPECIAL TOPICS: STUDIO ART 1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 55095) Specialized courses in
studio art that focus on specific techniques and media.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter
ARTS 45098    SENIOR THESIS RESEARCH AND PROPOSAL (ELR) 1 Credit Hour
(Repeatable for credit) Preparatory course, which acts as an exploratory
period for students to develop their ideas - conceptually, thematically and
materially - through research, writing and physical material studies. Upon
successful completion, students may continue with ARTS 45099.
Prerequisite: Major in Studio Art; senior standing; and special approval.
Schedule Type: Research
Contact Hours: 1.6 other
Grade Mode: Satisfactory/Unsatisfactory-IP
Attributes: Experiential Learning Requirement
ARTS 45099    SENIOR THESIS EXHIBITION (ELR) 3 Credit Hours
The course prepares students for the challenges of a creative
professional practice in their chosen discipline. As the culmination
of undergraduate studies, the course serves as a capstone experience for
students in their chosen concentration. Provides students an opportunity
to independently develop and create a body of work for exhibition and
oral review with faculty. Requires the completion of an undergraduate
thesis and professional caliber photo documentation of the exhibition.
Prerequisite: ART 30001; and special approval.
Schedule Type: Project or Capstone
Contact Hours: 3 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement
ARTS 45300    TEXTILES: JACQUARD WEAVING 3 Credit Hours
(Repeatable for maximum 6 credit hours) (Slashed with ARTS 55300)
Introduction to digital design and production of jacquard woven cloth on
state-of-the-art TC1 hand looms. The use of Pointcarré®, a specialized
weave software and Photoshop® provides a foundation of professional
design knowledge for application in a studio or industry context. Historic
and contemporary examples are studied as a foundation to enhance
individual exploration of this distinctive woven language for art and
design.
Prerequisite: ARTS 35350.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 45301    TEXTILES: ADVANCED STUDIO 3 Credit Hours
Structured time for individual investigations in textiles. Emphasis on self-
designed study. Bi-weekly presentations of contemporary work in textiles
and weekly discussions or critiques with open studio.
Prerequisite: ART 30001; and special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 45304    TEXTILES: PICTORIAL WEAVING 3 Credit Hours
(Slashed with ARTS 55304) Introduction to a range of weaving processes
traditionally associated with the creation of figured or pictorial cloth.
Techniques such as warp painting, supplementary weft and warp, pick-
up doubleweave and tapestry are explored as a means of creating a well-
composed art cloth. Textile history is presented as an important resource
for the development of woven studies and individually conceived
projects.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 45307 TEXTILES: WEAVING AND COLOR  3 Credit Hours
(Slashed with ARTS 55307) This course will provide students with an opportunity to explore numerous techniques that emphasize the interaction of color in relation to the unique interlacement process of weaving. Use of different looms (including the floor and frame) will provide the means to integrate color with patterns and image in the connection of warp and weft. Immersion dyeing will be introduced along with specialized direct dye application methods.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45308 TEXTILE ARTS AND GENDER  3 Credit Hours
(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism, and subversion.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45400 ADVANCED CERAMICS  3 Credit Hours
(Repeatable for credit) Individual problems in ceramics.
Prerequisite: ART 30001, ARTS 35400 and ARTS 35401.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45600 ADVANCED GLASS WORKING  3 Credit Hours
(Repeatable for credit) Individual exploration of sculptural and hot glass techniques. Design, form, content and execution strongly emphasized. Introduction to studio facility design, construction and maintenance.
Prerequisite: ART 30001, ARTS 35603 and ARTS 35604.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter

ARTS 45700 DESIGN AND PRODUCTION  3 Credit Hours
Course prepares students to enter the marketplace by examining production processes for creating multiples, industrial applications and marketing. Traditional rendering techniques are taught as a method for communicating with clientele in the custom design market. Design skills are emphasized.
Prerequisite: ARTS 35700 and ARTS 35701.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45701 TABLEWARE  3 Credit Hours
Course explores forms made for the table such as flatware, serving sets and containers. Traditional and experimental approaches are examined.
Prerequisite: ART 30001, ARTS 35700 and ARTS 35701.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45702 ADVANCED ENAMELING  3 Credit Hours
Course offers advanced vitreous enameling techniques on two- and three-dimensional surfaces. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 30001 and ARTS 35702.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45704 ADVANCED STUDIO JEWELRY METALS ENAMELING  3 Credit Hours
(Repeatable for maximum 9 credit hours) Course offers structured time for individual investigations in jewelry, metalsmithing and enameling. Emphasis on self-directed study with frequent critiques and technical demos as needed. Regular viewing and discussion of historical and contemporary works.
Prerequisite: ART 30001, ARTS 35700 and ARTS 35701; and senior standing.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45705 CAD FOR JEWELRY  3 Credit Hours
(Slashed with ARTS 55705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling and project planning, and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content. Software covered in this class includes Rhinoceros (3D modeling), Flamingo (endering), Adobe Illustrator (vector drawing) and Cubify (3D printing).
Prerequisite: ART 30001; and ARTS 25700 or ARTS 25701.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54002 ADVANCED DRAWING FOR ALL DISCIPLINES  3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 44002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54011 DIGITAL FINE ART PHOTOGRAPHY  3 Credit Hours
(Slashed with ARTS 44011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques and form an awareness of such techniques in contemporary photography.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter
ARTS 54045  ART OF THE BOOK  3 Credit Hours
(Slashed with ARTS 44045) An introduction to artist's books. A variety of
binding methods and strategies for creating art through alternative and
traditional book forms are introduced. Students complete projects and
develop a personal visual language through the book form.
Prerequisite: Master of Arts degree or Master of Fine Arts degree in the
School of Art.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54070  DIGITAL FABRICATION IN STUDIO ART  3 Credit Hours
(Slashed with ARTS 44070) This course is an introduction to digital
fabrication technologies as they relate to a studio practice. Mastery of
software skills enables one to better explore object-making as a medium
of personal expression. In addition to technical skills, the course will
introduce relationships between form, subject matter, and content.
Projects will include technical and conceptual problem solving, design
lessons, object making, and short student lead initiatives to connect to
makerspaces and industries that can support future making. Instructor
facilitated discussions between students will form a community of
mutual learning.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54091  VARIABLE CONTENT SEMINAR: STUDIO ART  3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 44091) Contemporary issues
related to visual arts are explored through presentation, lecture and
discussion. Guest speakers augment staff.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 54192  INTERNSHIP OR PRACTICUM IN STUDIO ART  1-6
Credit Hours
(Repeatable for credit) (Slashed with ARTS 44192) An undergraduate,
experience-based learning activity carried out in a visual arts setting.
Emphasis is on the goals of connecting ideas, concepts, and skills
developed in coursework to applications in new or different contexts,
demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.
Prerequisite: A major in the School of Art; and graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Standard Letter-IP

ARTS 55080  KENT BLOSSOM ART  1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45080) Studio exploration
in the visual arts, including ceramics, drawing, glass, jewelry-metals-
enameling, painting, print media and photography, sculpture and
expanded media and textiles.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter-IP

ARTS 55089  INTERNATIONAL EXPERIENCE: STUDIO ART  1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45089) A Kent State faculty-
led study abroad experience in studio art that integrates traditional
classroom learning with experiential activities and site visits outside the
United States.
Prerequisite: Studio Art major; and graduate standing; and special
approval.
Schedule Type: International Experience, Lecture
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory

ARTS 55090  STUDY AWAY: STUDIO ART  1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45090) Study away in studio
art disciplines at a site at or away from Kent State University.
Prerequisite: Studio Art major; and graduate standing; and special
approval.
Schedule Type: Lecture, Study Away
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory

ARTS 55095  STUDIO ART: SPECIAL TOPICS  1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45095) Specialized courses in
studio art that focus on specific techniques and media.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Studio

ARTS 64000  GRADUATE SEMINAR I: STUDIO ART   3 Credit Hours
(Repeatable for credit) This graduate seminar intends to bring together graduate students working across disciplines to facilitate their participation in creating a framework for understanding the practice of art-making in relation to the contemporary global and cultural terrain.
Prerequisite: ARTS 64000; and graduate standing.
Schedule Type: Seminar
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTS 64001  GRADUATE SEMINAR II: STUDIO ART   3 Credit Hours
(Repeatable for credit) This graduate seminar is an advanced course which intends to bring together graduate students working across disciplines to facilitate their participation in creating a framework for understanding the practice of art-making in relation to the contemporary global and cultural terrain.
Prerequisite: ARTS 64000; and graduate standing.
Schedule Type: Seminar
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTS 64040  GRADUATE STUDIO: PRINT MEDIA AND PHOTOGRAPHY I   1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Print Media and Photography concentration.
Prerequisite: Print media and photography concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 64041  GRADUATE STUDIO: PRINT MEDIA AND PHOTOGRAPHY II   1-9 Credit Hours
(Repeatable for credit) Advance research-based, hands-on studio course providing a context for individual creative projects in the Print Media and Photography concentration.
Prerequisite: ARTS 64040; and print media and photography concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 64050  GRADUATE STUDIO: SCULPTURE AND EXPANDED MEDIA I   1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Sculpture and Expanded Media concentration.
Prerequisite: Sculpture and expanded media concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 64051  GRADUATE STUDIO: SCULPTURE AND EXPANDED MEDIA II   1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects in the Sculpture and Expanded Media concentration.
Prerequisite: ARTS 64050; and sculpture and expanded media concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 64060  GRADUATE STUDIO: DRAWING AND PAINTING I   1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Drawing and Painting concentration.
Prerequisite: Drawing or painting concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP
ARTS 64061 GRADUATE STUDIO: DRAWING AND PAINTING II  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects in the Drawing or Painting concentration.
Prerequisite: ARTS 64060; and painting or drawing concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 64096 INDIVIDUAL INVESTIGATION STUDIO ART  1-3 Credit Hours
(Repeatable for credit) Independent study in studio art.
Prerequisite: Master of Art or Master of Fine Arts degree in the School of Art; and graduate standing; and special approval.
Schedule Type: Individual Investigation
Contact Hours: 3-9 other
Grade Mode: Standard Letter-IP

ARTS 64098 RESEARCH IN STUDIO ART  1-15 Credit Hours
(Repeatable for credit) Studio research in the visual arts.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Research
Contact Hours: 1-15 other
Grade Mode: Standard Letter

ARTS 65095 STUDIO ART: ADVANCED SPECIAL TOPICS  1-6 Credit Hours
(Repeatable for credit) Advanced specialized courses in studio art that focus on specific techniques and media.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter-IP

ARTS 65300 GRADUATE STUDIO: TEXTILES I  1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Textiles concentration.
Prerequisite: Textiles concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65301 GRADUATE STUDIO: TEXTILES II  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Textiles concentration.
Prerequisite: ARTS 65300; and textiles concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65400 GRADUATE STUDIO: CERAMICS I  1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Ceramics concentration.
Prerequisite: Ceramics concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65401 GRADUATE STUDIO: CERAMICS II  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Ceramics concentration.
Prerequisite: ARTS 65400; and ceramics concentration in the studio art; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65600 GRADUATE STUDIO: GLASS I  1-9 Credit Hours
(Repeatable for credit) Research-based, hands-on studio course providing a context for individual creative projects in the Glass concentration.
Prerequisite: Glass concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65601 GRADUATE STUDIO: GLASS II  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Glass concentration.
Prerequisite: ARTS 65600; and glass concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65700 GRADUATE STUDIO: JEWELRY, METALS, ENAMELING I  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Jewelry, Metals, Enameling concentration.
Prerequisite: Jewelry, metals and enameling concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65701 GRADUATE STUDIO: JEWELRY, METALS, ENAMELING II  1-9 Credit Hours
(Repeatable for credit) Advanced research-based, hands-on studio course providing a context for individual creative projects and cultivating a personal direction in the Jewelry, Metals, Enameling concentration.
Prerequisite: ARTS 65700; and jewelry, metals and enameling concentration in the studio art major; and graduate standing.
Schedule Type: Studio
Contact Hours: 2-18 other
Grade Mode: Standard Letter-IP

ARTS 65991 SEMINAR IN STUDIO ART  1-3 Credit Hours
(Repeatable for credit) Contemporary issues and professional concerns in studio art explored through presentations, lectures, and discussion. Graduate faculty and guest speakers.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 1-3 other
Grade Mode: Standard Letter
School of Fashion Design and Merchandising

Fashion Design and Merchandising (FDM)

FDM 10010  FASHION FUNDAMENTALS  3 Credit Hours
Introduction to the global fashion industry. Analysis of the business of fashion and how it is conceived, marketed, sold, and consumed. Overview of important resources, companies, career options and personnel who impact the industry.
Prerequisite: Fashion design, fashion merchandising or pre-fashion design and merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 10023  FASHION VISUALS  1 Credit Hour
The study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10024.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10024  FASHION VISUALS LABORATORY  2 Credit Hours
Laboratory applications in the study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10023.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10033  FASHION FABRICS  1 Credit Hour
Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care, and how they relate to textile end-use.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10030.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10034  FASHION FABRICS LABORATORY  2 Credit Hours
Study of fabrics, from fiber through finishing processes, with a concentration on differentiating between fibers, fabric construction methods, and other processes involved in production. Emphasis is on understanding fabric properties, including environmental impact, cost, care, and how they relate to textile end-use. Lab-specific content and assignments reinforce Lecture content.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10030.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10043  SUSTAINABLE FASHION THINKING  1 Credit Hour
An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Course focuses on understanding how and why those practices must change and examining burgeoning ideas, methods, practices and business structures shifting to a sustainable future.
Prerequisite: Fashion Design or Fashion Merchandising majors.
Corequisite: FDM 10044.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10044  SUSTAINABLE FASHION THINKING LABORATORY  2 Credit Hours
An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Lab focuses on practicing strategies, including critical thinking, human centered design, sustainable product service systems and corporate social responsibility to influence needed change within industry. Fashion design and fashion merchandising students work collaboratively in groups to explore solutions for a sustainable future in the fashion industry.
Prerequisite: Fashion Design or Fashion Merchandising majors.
Corequisite: FDM 10043.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10053  INTRODUCTION TO FASHION TECHNOLOGY  1 Credit Hour
Introduces students to the fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising and production contexts is presented.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10054.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10054  INTRODUCTION TO FASHION TECHNOLOGY LABORATORY  2 Credit Hours
Laboratory applications of fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising, and production contexts is presented and applied.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10053.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10140  FOUNDATIONS OF FASHION DRAWING  3 Credit Hours
Introduction to fashion drawing. Concentration on communicating through drawing the fashion figures and technical flats, accurate garment proportion and construction.
Prerequisite: Fashion design major.
Schedule Type: Combined Lecture and Lab
Contact Hours: 5 other
Grade Mode: Standard Letter
FDM 15055 BASICS OF APPAREL CONSTRUCTION 3 Credit Hours
Introduction to sewing techniques and application processes using industrial sewing machines and other related equipment in basic garment construction. Development of fundamental patternmaking skills.
Prerequisite: Fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20013 HISTORY OF COSTUME 3 Credit Hours
Chronological study and research of historic costume from the origin of clothing through the French revolutionary era, 19th and 20th century designers, and the influence on contemporary fashion.
Prerequisite: HIST 11050 or HIST 11051 or ARTH 22006 or ARTH 22007.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 20030 FASHION APPAREL ANALYSIS 3 Credit Hours
Analysis and evaluation of fashion apparel; quality standards of ready-to-wear apparel and factors that influence the aesthetic and functional performance of the end product.
Prerequisite: FDM 10033 and FDM 10034; and fashion merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 20050 FASHION TECHNOLOGY APPLICATIONS 3 Credit Hours
A continuation of content related to technology within the fashion industry. Pattern manipulation, basic technical packages, garment measuring specs, print design and computerized fashion illustration is addressed with the use of industry-specific and off-the-shelf software packages.
Prerequisite: FDM 10053 and FDM 10054; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other

Description
Arts Entrepreneurship is a mindset, a creative way of looking at opportunities, a passion, doing what one loves, a challenge, persistence and operating a business whether one owns it or not. The Arts Entrepreneurship interdisciplinary minor exposes students to that mindset and develops skills that can be applied to creating a new arts enterprise or developing opportunities for the individual artist.

Admission Requirements
Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

ART 10022 2D COMPOSITION  3 Credit Hours
This course is a basic introduction to flat pictorial composition. Students will explore the basic principles of design and the application of elements (line, shape, value, texture, and color) to the two-dimensional surface. Students will learn to work with traditional materials as well as new technology. In addition to developing technical proficiency with a variety of materials and tools, emphasis will be placed on visual literacy and critical thinking skills throughout this course. All work (preliminary and final) must be retained for the duration of the semester and beyond as required.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: TAG Arts and Humanities

ART 10023 3D COMPOSITION  3 Credit Hours
Course serves as the introductory three-dimensional experience, focusing on fundamental principles, elements and strategies of visual organization. Focus is on creative problem-solving using a variety of approaches and materials, and favors non-equipment intensive assignments. Students develop critical thinking and practical skills relating to three-dimensional form and space. This foundation-level course prepares students for subsequent study within all the visual arts.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: TAG Arts and Humanities

ART 10024 DIGITAL MEDIA  3 Credit Hours

Attributes: Diversity Global
ARTh 42028  CONTEMPORARY AFRICAN ART: 1980—PRESENT  3
Credit Hours
(Slashed with ARTH 52028) An in-depth study of African art since the late twentieth century. Focused on artists from the continent and the Diaspora, the course begins by examining the impact that colonialism, with its appropriation, exploitation, and reshaping of Africa, had on the arts in Africa (1960-1980). It then analyzes a broad spectrum of modern and contemporary African art forms (painting, printmaking, sculpture, textiles, photography, performance, and film) and related art history, exhibition and critical texts from the 1980s to the present, with an emphasis on such issues as patronage, the commodification of art, urbanism, national consciousness, identity formation, new media and the effects of globalization.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42036  MEDIEVAL ART  3 Credit Hours
(Slashed with ARTH 52036) Emphasis on major periods of Medieval art (Early Christian, Byzantine, Carolingian, Ottonian, Romanesque and Gothic), treating iconographic themes and styles in a variety of media. Works studied include architecture, manuscript painting, ivory carving, and goldsmith work, most of which were produced by or for members of the clergy, royalty, or the lay aristocracy. The course, therefore, involves significant material relating to political, economic and religious issues. It investigates problems in patronage, function, reception and censorship. A strong emphasis is given to reading primary and secondary sources.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42041  ITALIAN RENAISSANCE ART  3 Credit Hours
(Slashed with ARTH 52041) Study of development of major themes in Italian art from 1200 until about 1450, emphasizing achievements of the masters and analyzing major ideas and theories of the period.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42043  THE HIGH RENAISSANCE AND MANNERISM IN ITALY  3 Credit Hours
(Slashed with ARTH 52043) Covers late 15th century and 16th century painting, sculpture and architecture in Italy. Following discussion of the High Renaissance masters, students examine the works collectively known as the Mannerists. Course gives students a firm grounding in the manifold artistic activity of the 16th century.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42044  VENETIAN RENAISSANCE ART  3 Credit Hours
(Slashed with ARTH 52044) Course provides a survey of Venetian painting, sculpture and architecture from the late 1300s to the late 1500s. Upon completion students have a comprehension of the interrelationship of Venetian art with its unique environment and society.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42045  ITALIAN ART FROM GiotTO TO BERNINI  3 Credit Hours
(Slashed with ARTH 52045) Course explores the development of art and architecture in Italy from the late Middle Ages to the High Renaissance period. Through an in-depth analysis of the art and history of these periods, students develop an understanding of Italy's role in the overall development of Western civilization. Particular emphasis is given to Florentine Art.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42046  BAROQUE ART OF THE 17TH CENTURY  3 Credit Hours
(Slashed with ARTH 52046) Study of the origins of Baroque art in Italy and its spread throughout Flanders, the Netherlands, France and Spain.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42050  ART AND REVOLT IN THE NINETEENTH CENTURY  3 Credit Hours
(Slashed with ARTH 52050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep of colonial expansion, a rise in industrialization, and a revolt against the French Salon. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters, and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTh 42056  AMERICAN ART I: INDIAN WARS TO CIVIL WAR  3 Credit Hours
(Slashed with ARTH 52056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 42057  AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS  3 Credit Hours
(Slashed with ARTH 52057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography, and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism, and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome “foreign” influences in their work, debates over racial segregation and women's suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware, and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42059  AFRICAN AMERICAN ART AND VISUAL CULTURE  3 Credit Hours
(Slashed with ARTH 52059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion, and food—students will study African American visual culture and its profound impact on American art at large. Students will also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students will consider the benefits and pitfalls of the field and the ways in which art historians, critics, and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42060  RUSSIAN ART  3 Credit Hours
(Slashed with ARTH 52060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia’s artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42061  EARLY 20TH-CENTURY ART  3 Credit Hours
(Slashed with ARTH 52061) This course explores the history of Early 20th-Century Modern Art up to the Second World War. Painting, sculpture, and architecture will be the dominant focus, coupled with alternative media that may include printmaking, photography, cinema, performance, and textile arts.
Prerequisite: ARTH 22007.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42064  DADA AND SURREALISM  3 Credit Hours
Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42065  FEMINIST AND QUEER ART AND CULTURAL THEORY  3 Credit Hours
(Slashed with ARTH 52066) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieux such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with 'influential' visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large, are applicable in the artist's studio and more broadly, in humanities scholarship.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 42069 NATIONS AND BORDERS 3 Credit Hours
(Slashed with ARTH 52069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel’s occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42079 CONTEMPORARY CRAFT: HISTORY AND THEORY 3 Credit Hours
(Slashed with ARTH 52079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with “craft” genres: ceramics, textiles/fibers, jewelry/metal, glass and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles, and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 42089 INTERNATIONAL EXPERIENCE: ART HISTORY (ELR) 1-3 Credit Hours

ARTH 52001  ART HISTORY METHODOLOGIES  3 Credit Hours
(Slashed with ARTH 42001) This course is designed to introduce participants to the study of art history as a discipline increasingly marked by its diversity of approaches and emphasis on methodology and theory. This seminar will review the representative range of traditional art historical analyses and will study more recent theories of meaning and culture. The course will also examine art historical knowledge in relation to theoretical developments in other disciplines in the humanities.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTH 52025  ART OF WEST AFRICA  3 Credit Hours
(Slashed with ARTH 42025) Beginning with the art and architecture from major West African kingdoms, the course follows cultural production from the region through the colonial period and into modernism. The artists of newly-independent West African nations pioneered new visions for how Africans would participate in developing global networks.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52028  CONTEMPORARY AFRICAN ART: 1980—PRESENT  3 Credit Hours
(Slashed with ARTH 42028) An in-depth study of African art since the late twentieth century. Focused on artists from the continent and the Diaspora, the course begins by examining the impact that colonialism, with its appropriation, exploitation, and reshaping of Africa, had on the arts in Africa (1960-1980). It then analyzes a broad spectrum of modern and contemporary African art forms (painting, printmaking, sculpture, textiles, photography, performance, and film) and related art history, exhibition and critical texts from the 1980s to the present, with an emphasis on such issues as patronage, the commodification of art, urbanism, national consciousness, identity formation, new media and the effects of globalization.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52036  MEDIEVAL ART  3 Credit Hours
(Slashed with ARTH 42036) Emphasis on major periods of Medieval art (Early Christian, Byzantine, Carolingian, Ottonian, Romanesque and Gothic), treating iconographic themes and styles in a variety of media. Works studied include architecture, manuscript painting, ivory carving, and goldsmith work, most of which were produced by or for members of the clergy, royalty, or the lay aristocracy. The course, therefore, involves significant material relating to political, economic, and religious issues. It investigates problems in patronage, function, reception, and censorship. A strong emphasis is given to reading primary and secondary sources.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52038  HAND MADE BOOKS AND ART  3 Credit Hours
Course examines the history of (predominantly Western) books and reading; of books as locus of several types of visual art (decoration, illustration, vision, commentary); and of visual strategies for a range of communication tasks in selected books from the Middle Ages onward. Students are prepared to understand the variety and efficacy of approaches that have been used by those producing books by hand in the past and at present.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52041  ITALIAN RENAISSANCE ART  3 Credit Hours
(Slashed with ARTH 42041) Study of development of major themes in Italian art from 1200 until about 1450, emphasizing achievements of the masters and analyzing major ideas and theories of the period.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 52043 THE HIGH RENAISSANCE AND MANNERISM IN ITALY 3 Credit Hours (Slashed with ARTH 42043) Covers late 15th century and 16th century painting, sculpture and architecture in Italy. Following discussion of the High Renaissance masters students examine the works collectively known as the Mannerists. Course gives students a firm grounding in the manifold artistic activity of the 16th century. Prerequisite: Graduate standing. Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52044 VENETIAN RENAISSANCE ART 3 Credit Hours (Slashed with ARTH 42044) Course provides a survey of Venetian painting, sculpture and architecture from the late 1300s to the late 1500s. Upon completion students will have a comprehension of Venetian art with its unique environment and society. Prerequisite: Graduate standing. Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52045 ITALIAN ART FROM GIOTTO TO BERNINI 3 Credit Hours (Slashed with ARTH 42045) Course explores the development of art and architecture in Italy from the late Middle Ages to the High Renaissance period. Through an in-depth analysis of the art and history of these periods, students develop an understanding of Italy’s role in the overall development of Western civilization. Particular emphasis is given to Florentine Art. Prerequisite: Graduate standing. Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52046 BAROQUE ART OF THE 17TH CENTURY 3 Credit Hours (Slashed with ARTH 42046) A study of the origins of Baroque art in Italy and its spread throughout Flanders, the Netherlands, France and Spain. Prerequisite: Graduate standing. Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours (Slashed with ARTH 42050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep and architecture within the broader context of colonial expansion, a rise in industrialization and a revolt against the French Salon. Western culture and ideas. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color. Prerequisite: Graduate standing. Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours (Slashed with ARTH 42056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War. Prerequisite: Graduate standing Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours (Slashed with ARTH 42057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome “foreign” influences in their work, debates over racial segregation and women’s suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement. Prerequisite: Graduate standing Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter

ARTH 52059 AFRICAN AMERICAN ART AND VISUAL CULTURE 3 Credit Hours (Slashed with ARTH 42059) This course contextualizes American artists of African descent within the wider framework of U.S. art and visual culture. In looking at a wide range of media—across painting, photography, fashion, and food—students will study African American visual culture and its profound impact on American art at large. Students will also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students will consider the benefits and pitfalls of the field and the ways in which art historians, critics, and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics. Prerequisite: Graduate standing Schedule Type: Lecture Contact Hours: 3 lecture Grade Mode: Standard Letter
ARTH 52060 RUSSIAN ART 3 Credit Hours
(Slashed with ARTH 42060) This course explores the history of Russian art starting with the legacy of Byzantium and continuing up through the end of the Soviet era, from about 1000 CE to the present. Russia’s artistic movements have borrowed from a wide variety of cultures, both from groups that have attacked and conquered Russian territories as well as from groups that Russians themselves have conquered and attacked. We will focus on art that was produced in Russia as well as the cross-cultural influences that shaped and changed this art. Painting will be a dominant focus, coupled with a broad study including decorative arts like porcelain and embroidery as well as architecture, performance and illustration.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52061 EARLY 20TH-CENTURY ART 3 Credit Hours
(Slashed with ARTH 42061) This course explores the history of Early 20th-Century Modern Art up to the Second World War. Painting, sculpture, and architecture will be the dominant focus, coupled with alternative media that may include printmaking, photography, cinema, performance and textile arts.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52064 DADA AND SURREALISM 3 Credit Hours
(Slashed with ARTH 42064) Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52065 FEMINIST AND QUEER ART AND CULTURAL THEORY 3 Credit Hours
(Slashed with ARTH 42065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieux such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with ‘influential’ visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large, are applicable in the artist's studio and more broadly, in humanities scholarship.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52066 NATIONS AND BORDERS 3 Credit Hours
(Slashed with ARTH 42066) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel's occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52073 EPHEMERAL EXHIBITIONS: WORLD FAIRS, FESTIVALS AND BIENNALEs 3 Credit Hours
(Slashed with ARTH 42073) Revisiting a variety of time-based exhibition formats throughout recent history. From Joseph Paxton's Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
ARTH 52076  HISTORIES AND THEORIES OF PHOTOGRAPHY AND VISUAL CULTURE  3 Credit Hours
(Slashed with ARTH 42076) Photography is embedded in every aspect of visual culture. As such, this course is a socio-political and socio-cultural study of photography. This course focuses on major developments in the field, including photography's advent, 19th-century commodity, scientific manipulations, 20th-century Modernism and postwar aesthetics. Course also sketches political, cultural and theoretical developments and pertinent debates regarding emergence, significance, interpretation, perception and resonance. In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. While effort will be made to survey photography's history, this is not taxonomy of related movements and moments.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

ARTH 52079  CONTEMPORARY CRAFT: HISTORY AND THEORY  3 Credit Hours
(Slashed with ARTH 42079) This course is designed to provide an overview of the history, theory, and practice of modern and contemporary studio craft, with an emphasis on North America. Students will develop an enhanced ability to identify and describe various media and styles of artistic production normally associated with "craft" genres: ceramics, textiles/fibers, jewelry/metals, glass, and wood/furniture. Concurrently, an introduction to basic philosophies, pedagogical styles and controversial issues that have shaped this unique cultural, social and artistic history will provide a framework for understanding the intersection of art, craft and design in the 21st-century.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

Schedule Type: Research
Contact Hours: 3-9 other
Grade Mode: Standard Letter/IP

ARTH 52166  HISTORIES AND THEORIES OF MODERN AND CONTEMPORARY ART  3 Credit Hours
This course examines both the visual and textual. As such we travel through contemporary moments such as Abstract Expressionism, Post-Painterly Abstraction, Nouveau Réalisme, Pop, Minimalism, Conceptual art and participatory art—to name a few. So too, this course entails a broad overview of critical and theoretical approaches often engaged by contemporary artists such as existentialism, psychoanalysis, structuralism, semiotics, feminist and queer theories, theories of modern sculpture, and theories of photography. When art and theory are taken together, modern and contemporary art underscores the cultural, sociopolitical and economic developments characteristic of the last half of the twentieth century. While time constraints restrict a consideration of every artist, a selection of practitioners will be addressed. That said, this course affirms the importance of questions rather than finite answers, celebrates ambiguity and neglects any attempt at surveying and summarizing the field of modern and contemporary art
Prerequisite: Graduate standing.

ARTS 34051  SCULPTURAL OBJECT  3 Credit Hours
Course builds on ARTS 24051 with a greater emphasis on content, proficiency, technical expertise, craftsmanship and understanding of contemporary sculpture. Students explore the object in space, delineating issues of scale, materiality, representation, abstraction, metaphor and hybridity. Drawing on historical, aesthetic and technical strategies of generating and understanding sculpture, students are guided toward the realization of more sophisticated and complex ways of handling materials and incorporating meaning. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work, engendering a better understanding of how sculpture is situated within the context of culture and society at large. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.
Prerequisite: ARTS 24051.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34052  TIME ARTS  3 Credit Hours
This interdisciplinary class investigates the fundamentals of time-based media and its intersection with sculptural practice. Students build on concepts from ARTS 24051 to gain a broader understanding of multiple methods of making including performance, video, site and situation-specific works, as well as the use of traditional sculptural materials. Discussions of materials, processes and hands-on practice empower the student to move from concept to completed work engendering a better understanding of how sculpture is situated within the contemporary art world. Readings, slide presentations, discussions and critiques help provide the vocabulary for such an understanding.
Prerequisite: ARTS 24051.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34053  SITE AND INSTALLATION  3 Credit Hours
This interdisciplinary course builds on concepts introduced in ARTS 24051, and expands on a variety of approaches in developing site-specific installations by considering the relationship between object/context, public/private, interior/exterior and urban/rural. Through the manipulation of materials, found objects and time-based media, students are introduced to concepts of space, intention, site and intervention through experimental approaches. Students further develop an understanding of material and context through in-depth readings, lectures and critical dialogue. Sculptural techniques, performance, photography and video art are covered and incorporated into the course. Studio time is supplemented by readings, lectures and site visits around campus.
Prerequisite: ARTS 24051.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34061  INTERMEDIATE PAINTING  3 Credit Hours
Continuation of painting from observation with an introduction to oil paints and mediums. Students will look outside of the still life at various subjects including spatial dynamics, the figure, and abstracted imagery. Introduction to oil painting tools, processes, and best studio practices.
Prerequisite: ARTS 24061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 34062  PAINTING STRATEGIES: PROCESS AND CONTENT  3 Credit Hours
This course focuses on conceptual prompts relative to contemporary issues to encourage a variety of processes and material approaches to making paintings. Students continue the idea of building a painting through the iterative process of making, analyzing, and editing their work throughout the semester. The painting is a live surface, a place to collect and record information, and this course insists that students consider a wide range of formal and conceptual choices to best address content. Each project will be initiated with rigorous research and further supported by exposure to visual examples of historic and contemporary painting, readings, written responses, seminar-style discussions, and numerous critiques of both in-progress and finished work.
Prerequisite: ARTS 34061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 34063  PAINTING STRATEGIES: IMAGE AND CONTENT 3 Credit Hours
This course investigates various contemporary painting strategies through the use of images as source materials, with a strong emphasis on narrative. Moving away from direct observation and towards the abstraction of imagery, students will be asked to approach their practice through research, preliminary studies and sketches, and a self-driven investigation of the use of images to create concept. Various prompts will be assigned and are designed to provide students with a stronger understanding of the use of found, self-produced, or appropriated imagery as reference for their work, while helping each student build a direction for their painting practice. We will look to other mediums such as film, photography, collage, and advertising to inform the painted image and improve the reading of contemporary painting. We will look to other mediums to better contextualize the painted image in contemporary art.
Prerequisite: ARTS 34061.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35300  TEXTILES: DIMENSIONAL 3 Credit Hours
An introduction to the development of unique sculptural objects in textile media. Students explore three-dimensional textile processes using the floor loom and various basketry techniques, including wrapping and coiling and off-loom weaving.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35301  TEXTILES: PRINT PATTERN 3 Credit Hours
Focus is on the unique aspects of printing repeat designs on cloth. Screenprinted pattern - developed through manual techniques and digital design - is considered in relation to the surface and the flexible plane of cloth. The development of design, craft skills, and critical evaluation are emphasized in relation to art and industry applications.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35302  TEXTILES: FELTMAKING 3 Credit Hours
An opportunity for the in–depth exploration of technical and aesthetic possibilities of this unique process. Layers and textures in two dimensions and processes for three–dimensional feltmaking are introduced and considered as an expressive vocabulary with potential as functional form. Dyeing of wool fleece plays a major role in the course.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35303  TEXTILES: TAPESTRY 3 Credit Hours
An introduction to a variety of traditional pictorial tapestry, discontinuous weft faced techniques, to be executed on the frame loom and floor loom. Both tapestry and carpet history are presented to reveal traditional processes, patterns, and images for inspiration in the creation of individual works. Dyeing will play a major role in the exploration.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35305  TEXTILES: ACCESSORIES - DESIGN AND PRODUCTION 3 Credit Hours
Focus is on the design and production of textile accessories using the structural process of weaving. Texture, material, and color are critically and creatively considered in relation to the development of unique functional objects. Professional design objectives are presented.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35306  TEXTILES: SURFACE COLOR AND DESIGN 3 Credit Hours
Introduction to coloring and patterning cloth through dyeing and resist techniques. Formal and conceptual aspects of surface design in relation to the flexible cloth plane are explored. Study of traditional historic and contemporary textile references provide a foundation for creative development.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35350  TEXTILES: DESIGN AND PRODUCTION 3 Credit Hours
Focus is on the design and production of woven pattern is an expectation of the course. This course may be beneficial for fashion and interior designers, as well as anyone interested in the design and craft of weaving.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35400  FUNCTIONAL APPROACHES TO CLAY 3 Credit Hours
(Repeatable for credit) Continuation of ARTS 25400 emphasizing functional approaches to clay using the potter's wheel and a variety of hand-building techniques.
Prerequisite: ARTS 25400.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35401  SCULPTURAL APPROACHES IN CLAY 3 Credit Hours
(Repeatable for credit) Continuation of ARTS 25400 emphasizing sculptural approaches to clay. This course may include explorations in three-dimensional form, the human figure, mold making, multiples and installation.
Prerequisite: ARTS 25400.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 35602 FLAMEWORKED GLASS 3 Credit Hours
(Repeatable for credit) An investigation of techniques, tools, equipment and materials involved in glass lampworking processes. The course covers basic melting, shaping and blowing with a glass flameworking torch. Students will learn to create larger sculptural objects from modular components through glass “networking” and will explore more technical flameworking processes to become familiarized with glass as a sculptural material.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35603 GLASS BLOWING 3 Credit Hours
(Repeatable for credit) Further exploration of glass blowing techniques. Design, form, color and execution will be emphasized.
Prerequisite: ARTS 25600.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35604 SCULPTURAL AND KILN-FORMED GLASS 3 Credit Hours
(Repeatable for credit) An overview and exploration of sculptural and kiln-formed glass techniques. Casting, pattern making, mold making and cold construction will be covered. Design, form, content and technical execution and understanding operations of equipment are emphasized.
Prerequisite: ARTS 25600.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35700 JEWELRY CONCEPTS AND TECHNIQUES 3 Credit Hours
An in-depth exploration of jewelry making techniques such as casting, stone setting, mechanisms and fabrication. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 10023 and ART 10024 and ARTS 25700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35701 METALSMITHING CONCEPTS AND TECHNIQUES 3 Credit Hours
Course offers an in-depth exploration of hammerworking techniques such as raising, forging and shell forming. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 10023 and ART 10024 and ARTS 25700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35702 ENAMELING CONCEPTS AND TECHNIQUES 3 Credit Hours
An in-depth exploration of vitreous enameling techniques on two-dimensional surfaces. Porcelain enamel on steel is introduced. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ARTS 25700 and ARTS 35700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 35703 TEXTILE TECHNIQUES IN METAL 3 Credit Hours
Course applies textile techniques such as weaving, crocheting, knitting and basketry to create jewelry and objects in metal. Emphasis is on innovative approach to traditional processes.
Prerequisite: ARTS 25700.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 54002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.
Prerequisite: ART 30001; and ARTS 24002.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44010 ADVANCED FINE ART PHOTOGRAPHY 3 Credit Hours
Combined studio/lecture course offering more advanced, conceptual approaches to the contemporary applications of photographic imaging for artists. Students work with larger scale printing formats, more involved research and greater depth of involvement with the photographic medium.
Prerequisite: ARTS 24010 and ART 30001.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours
(Slashed with ARTS 54011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques, and form an awareness of such techniques in contemporary photography.
Prerequisite: Minimum C grade in ART 10022.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter

ARTS 44043 ADVANCED PRINT MEDIA 3 Credit Hours
(Repeatable for maximum 9 credit hours) Advanced printmaking course with emphasis on students producing new, individually conceived visual works in print media in close consultation with faculty.
Prerequisite: ART 30001; and ARTS 34043 or ARTS 34044 or ARTS 34045.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 44045 ART OF THE BOOK 3 Credit Hours
(Slashed with ARTS 54045) An introduction to artist’s books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.
Prerequisite: Minimum C grade in ART 10022.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter
ARTS 44051  ADVANCED SCULPTURAL PRACTICE  3 Credit Hours  
(Repeatable for credit) Course is self-directed, in which students create a series of sculptural works in consultation with the instructor and through on-going student lead presentations, discussions and in-progress and final critiques. Emphasis is on creating a body of work over the semester that is informed by and demonstrates an awareness of contemporary practice in terms of approaches to content, form and presentation. Students can work with in a variety of ways: object making, installation, site-based and/or time-based approaches. Research and writing are emphasized. Readings, slide presentations, discussions and critiques help provide context and vocabulary for student development.  
Prerequisite: ART 30001 and ARTS 24051; and ARTS 34051 or ARTS 34052 or ARTS 34053.  
Schedule Type: Studio  
Contact Hours: 6 other  
Grade Mode: Standard Letter  

ARTS 44060  ADVANCED PAINTING: PRACTICE AND THEORY 3 Credit Hours  
(Repeatable for credit) Advanced painting course with an emphasis on pursuing individually conceived problems in close consultation with faculty.  
Prerequisite: ART 30001; and ARTS 34061; and ARTS 34062 or ARTS 34063.  
Schedule Type: Studio  
Contact Hours: 6 other  
Grade Mode: Standard Letter  

ARTS 44070  DIGITAL FABRICATION IN STUDIO ART 3 Credit Hours  
(Slashed with ARTS 54070) This course is an introduction to digital fabrication technologies as they relate to a studio practice. Mastery of software skills enables one to better explore object-making as a medium of personal expression. In addition to technical skills, the course will introduce relationships between form, subject matter, and content. Projects will include technical and conceptual problem solving, design lessons, object making and short student lead initiatives to connect to maker spaces and industries that can support future making. Instructor facilitated discussions between students will form a community of mutual learning.  
Prerequisite: None.  
Schedule Type: Studio  
Contact Hours: 6 other  
Grade Mode: Standard Letter  

ARTS 44091  VARIABLE CONTENT SEMINAR: STUDIO ART 3 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 54091) Contemporary issues related to visual arts are explored through presentation, lecture, and discussion. Guest speakers augment staff.  
Prerequisite: Junior or senior standing.  
Schedule Type: Seminar  
Contact Hours: 3 other  
Grade Mode: Standard Letter  

ARTS 44096  INDIVIDUAL STUDY: STUDIO ART 1-6 Credit Hours  
(Repeatable for credit) Additional study in area of student's choice in consultation with advisor.  
Prerequisite: ART 30001; and a major in Studio Art; and special approval.  
Schedule Type: Individual Investigation  
Contact Hours: 2-12 other  
Grade Mode: Standard Letter  

ARTS 44098  RESEARCH IN STUDIO ART (ELR) 1-3 Credit Hours  
(Repeatable for credit) Studio research in the visual arts.  
Prerequisite: Junior or senior standing.  
Schedule Type: Research  
Contact Hours: 3-9 other  
Grade Mode: Standard Letter-IP  
Attributes: Experiential Learning Requirement  

ARTS 44192  INTERNSHIP OR PRACTICUM IN STUDIO ART (ELR) 1-6 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 54192) An undergraduate, experience-based learning activity carried out in a visual arts setting. Emphasis is on the goals of connecting ideas, concepts, and skills developed in coursework to applications in new or different contexts, demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.  
Prerequisite: A major in the School of Art; junior or senior standing; and special approval of faculty sponsor.  
Schedule Type: Practical Experience  
Contact Hours: 3-18 other  
Grade Mode: Standard Letter-IP  
Attributes: Experiential Learning Requirement  

ARTS 45080  KENT BLOSSOM ART 1-6 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 55080) Studio exploration of selected concepts in studio art: painting; drawing; sculpture and expanded media; print media and photography; ceramics; glass; jewelry, metals and enameling; textiles. Content varies with each section offered.  
Prerequisite: Special approval.  
Schedule Type: Studio  
Contact Hours: 2-12 other  
Grade Mode: Standard Letter-IP  

ARTS 45089  INTERNATIONAL EXPERIENCE: STUDIO ART (ELR) 1-3 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 55089) A Kent State faculty-led study abroad experience in studio art that integrates traditional classroom learning with experiential activities and site visits outside the United States.  
Prerequisite: Studio Art major; and special approval.  
Schedule Type: International Experience, Lecture  
Contact Hours: 1-3 other  
Grade Mode: Satisfactory/Unsatisfactory  
Attributes: Experiential Learning Requirement  

ARTS 45090  STUDY AWAY: STUDIO ART (ELR) 1-3 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 55090) Study away in studio art disciplines at a site at or away from Kent State University.  
Prerequisite: Studio art major; and special approval.  
Schedule Type: Study Away  
Contact Hours: 1-3 other  
Grade Mode: Satisfactory/Unsatisfactory  
Attributes: Experiential Learning Requirement  

ARTS 45095  SPECIAL TOPICS: STUDIO ART 1-6 Credit Hours  
(Repeatable for credit) (Slashed with ARTS 55095) Specialized courses in studio art that focus on specific techniques and media.  
Prerequisite: Special approval.  
Schedule Type: Studio  
Contact Hours: 2-12 other  
Grade Mode: Standard Letter
ARTS 45098  SENIOR THESIS RESEARCH AND PROPOSAL (ELR)  1 Credit Hour
(Repeatable for credit) Preparatory course, which acts as an exploratory period for students to develop their ideas - conceptually, thematically and materially - through research, writing and physical material studies. Upon successful completion, students may continue with ARTS 45099.
Prerequisite: Major in Studio Art; senior standing; and special approval.
Schedule Type: Research
Contact Hours: 1.6 other
Grade Mode: Satisfactory/Unsatisfactory-IP
Attributes: Experiential Learning Requirement

ARTS 45099  SENIOR THESIS EXHIBITION (ELR)  3 Credit Hours
The course prepares students for the challenges of a creative professional practice in their chosen discipline. As the culmination of undergraduate studies, the course serves as a capstone experience for students in their chosen concentration. Provides students an opportunity to independently develop and create a body of work for exhibition and oral review with faculty. Requires the completion of an undergraduate thesis and professional caliber photo documentation of the exhibition.
Prerequisite: ART 30001; and special approval.
Schedule Type: Project or Capstone
Contact Hours: 3 other
Grade Mode: Standard Letter-IP
Attributes: Experiential Learning Requirement

ARTS 45300  TEXTILES: JACQUARD WEAVING  3 Credit Hours
(Repeatable for maximum 6 credit hours) (Slashed with ARTS 55300) Introduction to digital design and production of jacquard woven cloth on state-of-the-art TC1 hand looms. The use of Pointcarré®, a specialized weave software and Photoshop® provides a foundation of professional design knowledge for application in a studio or industry context. Historic and contemporary examples are studied as a foundation to enhance individual exploration of this distinctive woven language for art and design.
Prerequisite: ARTS 35300.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45301  TEXTILES: ADVANCED STUDIO  3 Credit Hours
Structured time for individual investigations in textiles. Emphasis on self-designed study. Bi-weekly presentations of contemporary work in textiles and weekly discussions or critiques with open studio.
Prerequisite: ART 30001; and special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45304  TEXTILES: PICTORIAL WEAVING  3 Credit Hours
(Slashed with ARTS 55304) Introduction to a range of weaving processes traditionally associated with the creation of figured or pictorial cloth. Techniques such as warp painting, supplementary weft and warp, pick-up doubleweave and tapestry are explored as a means of creating a well-composed art cloth. Textile history is presented as an important resource for the development of woven studies and individually conceived projects.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45307  TEXTILES: WEAVING AND COLOR  3 Credit Hours
(Slashed with ARTS 55307) This course will provide students with an opportunity to explore numerous techniques that emphasize the interaction of color in relation to the unique interlacement process of weaving. Use of different looms (including the floor and frame) will provide the means to integrate color with patterns and image in the connection of warp and weft. Immersion dyeing will be introduced along with specialized direct dye application methods.
Prerequisite: Special approval.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45308  TEXTILE ARTS AND GENDER  3 Credit Hours
(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism, and subversion.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45400  ADVANCED CERAMICS  3 Credit Hours
(Repeatable for credit) Individual problems in ceramics.
Prerequisite: ART 30001, ARTS 35400 and ARTS 35401.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 45600  ADVANCED GLASS WORKING  3 Credit Hours
(Repeatable for credit) Individual exploration of sculptural and hot glass techniques. Design, form, content and execution strongly emphasized. Introduction to studio facility design, construction and maintenance.
Prerequisite: ART 30001, ARTS 35603 and ARTS 35604.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter

ARTS 45700  DESIGN AND PRODUCTION  3 Credit Hours
Course prepares students to enter the marketplace by examining production processes for creating multiples, industrial applications and marketing. Traditional rendering techniques are taught as a method for communicating with clientele in the custom design market. Design skills are emphasized.
Prerequisite: ARTS 35700 and ARTS 35701.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45701  TABLEWARE  3 Credit Hours
Course explores forms made for the table such as flatware, serving sets and containers. Traditional and experimental approaches are examined.
Prerequisite: ART 30001, ARTS 35700 and ARTS 35701.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter
ARTS 45702 ADVANCED ENAMELING 3 Credit Hours
Course offers advanced vitreous enameling techniques on two- and three-dimensional surfaces. Conceptual development and design skills are emphasized. To gain a deeper understanding of the subject, historical and contemporary works are viewed and discussed.
Prerequisite: ART 30001 and ARTS 35702.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45704 ADVANCED STUDIO JEWELRY METALS ENAMELING 3 Credit Hours
(Repeatable for maximum 9 credit hours) Course offers structured time for individual investigations in jewelry, metalsmithing and enameling. Emphasis on self-directed study with frequent critiques and technical demos as needed. Regular viewing and discussion of historical and contemporary works.
Prerequisite: ART 30001, ARTS 35700 and ARTS 35701; and senior standing.
Schedule Type: Studio
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 45705 CAD FOR JEWELRY 3 Credit Hours
(Slashed with ARTS 55705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling and project planning, and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content. Software covered in this class includes Rhinoceros (3D modeling), Flamingo (rendering), Adobe Illustrator (vector drawing) and Cubify (3D printing).
Prerequisite: ART 30001; and ARTS 25700 or ARTS 25701.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54002 ADVANCED DRAWING FOR ALL DISCIPLINES 3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 44002) An advanced drawing course, open to all studio disciplines, with an emphasis on students pursuing individually conceived problems in close consultation one-on-one with faculty.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54011 DIGITAL FINE ART PHOTOGRAPHY 3 Credit Hours
(Slashed with ARTS 44011) Students develop their technical and conceptual skills in fine art digital photography, and develop a contemporary approach to working with the medium. Students explore various photographic and digital techniques and form an awareness of such techniques in contemporary photography.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter

ARTS 54045 ART OF THE BOOK 3 Credit Hours
(Slashed with ARTS 44045) An introduction to artist's books. A variety of binding methods and strategies for creating art through alternative and traditional book forms are introduced. Students complete projects and develop a personal visual language through the book form.
Prerequisite: Master of Arts degree or Master of Fine Arts degree in the School of Art.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54070 DIGITAL FABRICATION IN STUDIO ART 3 Credit Hours
(Slashed with ARTS 44070) This course is an introduction to digital fabrication technologies as they relate to a studio practice. Mastery of software skills enables one to better explore object-making as a medium of personal expression. In addition to technical skills, the course will introduce relationships between form, subject matter, and content. Projects will include technical and conceptual problem solving, design lessons, object making, and short student lead initiatives to connect to makerspaces and industries that can support future making. Instructor facilitated discussions between students will form a community of mutual learning.

Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 54091 VARIABLE CONTENT SEMINAR: STUDIO ART 3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 44091) Contemporary issues related to visual arts are explored through presentation, lecture and discussion. Guest speakers augment staff.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

ARTS 54192 INTERNSHIP OR PRACTICUM IN STUDIO ART 1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 44192) An undergraduate, experience-based learning activity carried out in a visual arts setting. Emphasis is on the goals of connecting ideas, concepts, and skills developed in coursework to applications in new or different contexts, demonstrating how this experience has broadened students' understanding of their discipline, and reflection on the significance of the experience.
Prerequisite: A major in the School of Art; and graduate standing; and special approval.
Schedule Type: Practical Experience
Contact Hours: 3-18 other
Grade Mode: Standard Letter-IP

ARTS 55080 KENT BLOSSOM ART 1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45080) Studio exploration in the visual arts, including ceramics, drawing, glass, jewelry-metals-enameling, painting, print media and photography, sculpture and expanded media and textiles.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter-IP
ARTS 55089 INTERNATIONAL EXPERIENCE: STUDIO ART 1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45089) A Kent State faculty-led study abroad experience in studio art that integrates traditional classroom learning with experiential activities and site visits outside the United States.
Prerequisite: Studio Art major; and graduate standing; and special approval.
Schedule Type: International Experience, Lecture
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory

ARTS 55090 STUDY AWAY: STUDIO ART 1-3 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45090) Study away in studio art disciplines at a site at or away from Kent State University.
Prerequisite: Studio Art major; and graduate standing; and special approval.
Schedule Type: Lecture, Study Away
Contact Hours: 1-3 other
Grade Mode: Satisfactory/Unsatisfactory

ARTS 55095 STUDIO ART: SPECIAL TOPICS 1-6 Credit Hours
(Repeatable for credit) (Slashed with ARTS 45095) Specialized courses in studio art that focus on specific techniques and media.
Prerequisite: Graduate standing; and special approval.
Schedule Type: Studio
Contact Hours: 2-12 other
Grade Mode: Standard Letter

ARTS 55308 TEXTILE ARTS AND GENDER 3 Credit Hours
(Slashed with ARTS 55308) Textile Arts and Gender is designed as an exploratory learning experience. Through weekly readings and discussions, students will engage with historical and contemporary ideas of how textiles relate to gender and how this informs contemporary textile art practice. Simultaneously, students will be learning textile art techniques chosen because of their close association with historical notions of the feminine, the decorative, and the domestic. Students will also study the contemporary use of these same techniques in textile works that explore the concepts of gender, feminism and subversion.
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

ARTS 55705 CAD FOR JEWELRY 3 Credit Hours
(Slashed with ARTS 45705) Students develop a set of comprehensive computer-aided design (CAD) skills to be utilized in a variety of studies such as sculpture design, jewelry making and many others. CAD skills are developed through the investigation of laser cutting, 3D modeling and project planning, and 3D printing. Mastery of these techniques enable students to better explore object-making as a medium of personal expression. Although there are many technical components to learn, the instructor also focuses on the relationship between form, subject matter and content. Software covered in this class includes Rhinoceros (3D modeling), Flamingo (endering), Adobe Illustrator (vector drawing) and Cubify (3D printing).
Prerequisite: Graduate standing.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

**Description**
The Accessories minor gives students an opportunity to focus on the design and production of innovative and unique objects within the studio areas of jewelry, metals and textiles, which leads to the development of functional, decorative and wearable forms.

**Admission Requirements**
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

**Program Learning Outcomes**
Graduates of this program will be able to:

1. Demonstrate the ability to work within textile arts, jewelry, metals and enameling, and understand associated materials, processes and applications.
2. Demonstrate an understanding of larger contemporary and historical contexts within the creation of accessories, wearables and works for the body or domestic space.
3. Demonstrate a high degree of design and visual literacy in their work.

‘Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Arts degree in Art Education prepares students to effectively teach visual art by applying a learner-centered pedagogy to embrace the many dimensions of human intelligence and aesthetic education.

Art educators understand child development to successfully engage learners in the complete artistic process of thinking—perceptual, imaginative, formative, expressive and communicative—by combining a range of subject matter, symbols and ideas. They organize and evaluate teaching activities for creating and analyzing works of art and design from contemporary and past cultures. This involves using a variety of media, technology and community resources, making connections between visual art and other disciplines, as well as assessing the learning outcomes of their students.

In addition, art educators are prepared to meet the needs of all students with an understanding of the value of diversity. They create safe and equitable learning environments in which to nurture life-long skills in problem-solving, critical thinking, collaboration, creativity and constructing meaning.

Graduates of the degree program will be eligible to be certified for pre-K-12 visual art teacher licensure

Study Abroad/Away Opportunities:

- Travel opportunities to New York, London, Paris and China
- Study abroad through Kent State's Florence program in Florence, Italy (full semester or summer art and design experience)
- Ohio Art Education Association and National Art Education Association Travel Studies

Accreditation

National Association of Schools of Art and Design (NASAD).

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent.
Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

**Program Learning Outcomes**

Graduates of the program will be able to:

1. Articulate their beliefs about art education and defend their position, as well as demonstrate in-depth engagement in issues of the field
2. Research, plan, conduct and assess art experiences for preK-12 grade students, grounded in the National and Ohio Visual Art standards
3. Examine and learn from observed student and teacher behaviors to understand effective teaching practices
4. Comprehend the visual stages of development as they relate to mental, social, emotional and physical development of children in order to plan appropriate lesson instruction
5. Develop and articulate knowledge of various theories related to teaching artmaking, art criticism, art history and aesthetics, as well as theories related to instructional and interdisciplinary practices
6. Apply principles of classroom management, safety practices and motivational techniques in teaching
7. Organize and manage the time, space and resources of an instructional setting for teaching art
8. Learn to use community resources, such as museums and community artists, and make connections between communal needs, the learner and the art education curriculum
9. Effectively plan and install art exhibits
10. Competently use materials and media to communicate visually
11. Effectively communicate verbally and through writing their ideas of art education in relation to contemporary art education theory and the application of those ideas in art classrooms
12. Become advocates for the field of art education
13. Develop an understanding of their communal, national and global identities, in the context of the personal as well as professional as educators
14. Create and teach appropriate art curricula that meet the cultural, emotional, academic, physical, sensory and behavioral needs of students
15. Understand the significance of and apply curricula that promote appreciation and critical understanding of diversity, inclusivity and interdisciplinarity
16. Learn about career planning and related professional issues, such as national assessments, unions, professional development possibilities, graduate studies and life-long learning
17. Continue to reflect critically on their teaching practices
18. Be prepared in professional responsibilities as a member of the art education community
19. Adapt their curriculum accordingly
20. Use technology in an ethical, critical and creative manner as a means to acquire, provide, organize and communicate knowledge

**Professional Licensure Disclosure**

This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State’s website for professional licensure disclosure.

**Requirements for Admission to Advanced Study for Art Education and Music Education**

Admission to advanced study is required of all art education and music education majors and minors prior to enrolling in upper-division education courses. Upon completion of coursework, as determined by program area, students should have satisfied the prerequisites for admission to advanced study. Students must submit an application for advanced study by the second Friday of the term during which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which “Admission to Advanced Study” is a prerequisite. Students at the Kent Campus apply for Advanced Study through the College of Education, Health and Human Services Student Portal, which can be accessed through the Vacca Office of Student Services web page. Students completing a licensure program at a regional campus should check with that campus for instructions on how to apply for “Advanced Study.” Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to teacher licensure. Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

Requirements for Admission to Advanced Study for Art Education and Music Education

- College Writing: Students are required to attain a minimum C grade in each writing course (ENG 11011 and ENG 21011 or equivalent).
- Pre-Advanced Study Coursework: To be eligible for advanced study, students must earn a minimum C grade in CULT 29535 and a minimum C grade in one of the following courses (please note that a minimum C grade must be earned in all of the four courses for teacher licensure programs):
  - EPSY 29525
  - SPED 23000
- Grade Point Average:
  - Art Education majors must have earned a minimum 2.500 cumulative GPA in order to be admitted to Advanced Study.
  - Music Education majors must have earned a minimum 2.500 cumulative GPA and a minimum 2.750 major GPA at the time of application in order to be admitted to Advanced Study.
- Disposition Assessment/Professional Disposition Plans (PDPs): Students are required to have completed all professional dispositions plan (PDPs) at the time of application to be eligible for advanced study.
• Advising Appointment: Art Education and Music Education students should make an advising appointment with a professional advisor in the Vacca Office of Student Services (or Regional Campus advising office if completing the program at that campus) for information about applying for Advanced Study and educator licensure. Advising appointments at the Kent Campus are made through the Vacca Office of Student Services’ website at www.kent.edu/ehhs/services/voss.

• Teacher Candidate Acknowledgments and Legal Questions for Licensure: Candidates are required to electronically sign four statements acknowledging that they have read and understand the following areas: background check requirements; professional dispositions; licensure application information; legal questions asked on the licensure application. Statements can be found on the student portal.

University Requirements

All students in a bachelor's degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Progression requirements

Students must meet all professional requirements for admission to advanced study.
• Upon entry to this program, student must make an appointment to see an academic advisor to discuss application for advanced study.
• A 2.500 overall GPA and a 2.500 major GPA are necessary for admission to advanced study, student teaching and graduation in this program.
• Successful completion of the Ohio Assessments for Educators (OAE) are not required for graduation, but are required for licensure.

• Students must receive a rating of “satisfactory” on selected works exhibited during their portfolio review
• ARTH 12001 is designed for non-art majors, and will not fulfill major requirements for art majors.

### Licensure Information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Minimum Total Credit Hours: 6

1. Students must complete ARTE 61101, ARTE 61191 and ARTE 61291 and 3-5 credit hours in other program requirements before scheduling the candidacy examination.
2. The thesis is a significant project or body of work done independently of other coursework. Students are expected to demonstrate the ability to conduct research or produce a significant, original project in a discriminating and disciplined manner. The thesis topic should be one that will further the student’s knowledge and ability in the specialty by demonstrating skill as a researcher. The outcome should be an effort that serves as a foundation for the pursuit of independent work when the graduate program is completed. At this stage, students are expected to work in close consultation with their thesis advisor.
3. The non-thesis option is appropriate for students in contexts in which research can be completed on their own practice, in most cases in their own art classrooms or other educational venues. The master’s project involves research, which focuses on participant/researcher studies in curriculum, classroom settings, grant implementation and/or community-based projects. Students articulate and refine knowledge, reflective practice (including critical self-reflection) and develop goals...
to improve practice or further understanding of phenomena within the field of art education.

4 Students select an elective course in consultation with their program advisor.

Description
The Bachelor of Arts degree in Art History provides students with an understanding of major art and cultural achievements across historical periods, geographic regions and significant movements. The program fosters visual literacy, critical thinking, creative problem-solving and research development and writing competencies. Students are prepared for careers in non-profit and art organizations, graduate study in art history or museum studies and lifelong advocacy for the arts.

Study Abroad/Study Away Opportunities:
• Travel to New York and Paris
• Study Abroad in Florence, Italy, either for a full semester or a summer

Accreditation
National Association of Schools of Art and Design (NASAD).

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Transfer students with more than two studio courses should submit a portfolio of work for proper placement. The director of the School of Art may impose additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state Transfer Articulation Guidelines (TAG), although each student will be evaluated individually in terms of his or her ability to perform within
the program. Transfer students should make every effort to complete admission requirements before the deadlines and to see an advisor in the School of Art for an evaluation of the portfolio and for schedule planning before registration.

Program Learning Outcomes

Graduates in the program will be able to:

1. Demonstrate a comprehensive understanding of art from a range of historic and cultural traditions.
2. Observe, describe and interpret art objects, events and concepts within their cultural context.
3. Engage with a variety of methodologies and theories relevant to different fields of art history.
4. Demonstrate an advanced level of written and/or oral analysis.
5. Become engaged citizens of a global community and recognize the role of art and cultural production as they foster communities, reflect identities and understand social systems.

University Requirements

All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

Description

The Ceramics minor is designed to encourage students from all areas of the university to explore working creatively with clay. Students may explore making functional pots and sculptural objects using a variety of wheel throwing and hand-building techniques, or they may choose to work sculpturally in conjunction with other methods of creating three-dimensional objects. Flexibility in the curriculum affords students the opportunity to design a program intended to meet individual needs and freedom of expression.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Description
The Drawing minor provides an introduction to fundamental form, pictorial structure and media through work from observation and conceptual projects. Emphasis in the minor is on students' continued development in drawing toward individually conceived creative practice.

Admission Requirements
Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes
Graduates of this program will be able to:
1. Demonstrate the ability (skill) to work within their chosen medium/media, and understand associated materials and processes.
2. Demonstrate an understanding of larger contemporary and historical contexts.
3. Demonstrate a high degree of design and visual literacy in their work.

Description

The Print Media and Photography minor provides an introduction to printmaking and fine art photography. Students can pursue a study in traditional printmaking techniques such as intaglio, silkscreen and lithography, as well as digital applications. Students can also pursue a study in photography, including traditional darkroom and film alternative photographic techniques and fine art digital photography. Synergies between these two historically related disciplines provide ample room for experimentation and a course of study designed specifically to suit students' interests.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Description

The Sculpture and Expanded Media minor offers students a wide range of approaches, strategies and techniques to making dimensional and spatial work. Students learn to fabricate sculptural objects utilizing techniques in clay, plaster, wood, metal and non-traditional materials. In addition, they are exposed and learn to work in expanded media formats, such as installation art and time-based practices (video, sound, performance).

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). *Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Arts degree in Studio Art is a liberal arts program that provides students with the breadth of study that complements core work...
in the visual arts. Students may choose one or more studio art minors or a second major outside the arts to prepare themselves for a wide range of careers or for further specialized study.

Students in the program are encouraged to take advantage of travel opportunities to New York, Washington D.C., London, Paris and China. In addition, students can participate in study abroad full semester or summer experiences at Kent State’s Florence, Italy, location.

Accreditation
National Association of Schools of Art and Design (NASAD).

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Transfer applicants to the program who meet the general transfer admission requirements should schedule a meeting with the academic advisor in the School of Art and submit a portfolio to a studio art faculty member to review for proper course placement. The faculty member may specify additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state-wide Transfer Articulation Guides (TAG), although each student will be evaluated individually in terms of his or her ability to perform in the program. Transfer students should make every effort to complete admission requirements before the deadlines and to schedule a portfolio review with before registration.

Program Learning Outcomes
Graduates in the program will be able to:

1. Demonstrate the ability (skill) to do competent work within their chosen media and an understanding of the processes and materials involved.
2. Demonstrate an understanding of larger contemporary and historical contexts within which the visual arts have been created.
3. Demonstrate an understanding of design and visual literacy in their work.
4. Use skills in oral, written and digital presentation of work and of ideas associated with visual arts production, use and appreciation.

University Requirements

### Minimum Total Credit Hours: 120

1. Selected upper-division Studio Art courses (ARTS 30000 or 40000 level) may be taken without first successfully completing ART 30001. At the completion of eight specific courses (ART 10022, ART 10023, ART 10024, ARTH 22007, ARTS 14000, ARTS 14001 and two of the four foundations electives), students register for ART 30001 and submit a portfolio of representative studio work selected from these courses to a studio art faculty committee for review. An examination of knowledge of art history also will be included. Incoming transfer students are expected to provide examples of foundational coursework equivalent to School of Art requirements for ART 30001. The review is a formative assessment of the student’s foundations work including a digital portfolio, installation of sampling of works and proficiency in written and oral critical thinking.

2. A minimum C grade must be earned to fulfill the writing-intensive requirement.

3. A maximum 6 credit hours of ARTS 45090 may be applied toward Studio Art Electives. Students may apply this course toward fulfilling general electives, with no maximum credit hours required.

### Additional Requirements (courses do not count in major GPA)

- UC 10097: DESTINATION KENT STATE: FIRST YEAR EXPERIENCE (1 credit hour)

### Kent Core Requirement

- Kent Core Composition (6 credit hours)
- Kent Core Mathematics and Critical Reasoning (3 credit hours)
- Kent Core Humanities (3 credit hours)
- Kent Core Social Sciences (must be from two disciplines) (6 credit hours)
- Kent Core Basic Sciences (must include one laboratory) (6-7 credit hours)
- Kent Core Additional (6 credit hours)

### General Electives (total credit hours depends on earning 120 credit hours, including 39 upper-division credit hours) (31 credit hours)

1. Studio Art Upper-Division Elective (ARTS 30000 or 40000 level)
2. Studio Art Upper-Division Elective (ARTS 30000 or 40000 level)
3. Studio Art Upper-Division Elective (ARTS 30000 or 40000 level)

### Minimum Total Credit Hours: 120
The Studio Art major comprises the following concentrations:

- The **Ceramics** concentration offers students the opportunity to hone their command of ceramic material to create both artistic and functional forms. Students find new ways of practicing an ancient craft, drawing on both traditional and contemporary thought and practice. In addition, they investigate practices from around the world for a global context in understanding the medium.

- The **Drawing** concentration cultivates foundational through advanced observational, conceptual and experimental processes to enable students to explore ideas across media and disciplines. All majors in the School of Art are able to complete a sequence of drawing courses to strengthen their drawing as a tool for visual thinking and recording. The concentration encourages advanced students to work with a wide range of approaches and to pursue drawing in diverse contexts.

- The **Glass** concentration challenges students to explore glass as a creative medium, both technically and conceptually, within the broader context of contemporary art. In addition to the fundamentals of glassblowing, students learn glass casting, slumping, fusing, flameworking, enameling, cold-working and assembly. Both interdisciplinary and mixed media approaches are actively encouraged.

- The **Jewelry, Metals and Enameling** concentration guides students in developing their own artistic signatures by exploring historical and contemporary concepts. Students are able to absorb a range of techniques and technological processes, using such specialized equipment as 3-D printers and large-scale Ferro enameling kilns.

- The **Painting** concentration is rooted in observation and technique while stimulating abstract, conceptual or material-driven ideas about painting and contemporary art practices. The curriculum supports a variety of specific approaches to painting — including collage, figural, landscape and abstraction — while simultaneously promoting an interdisciplinary approach and emphasizing engagement with contemporary practices. Advanced painting students work in consultation with faculty advisors to pursue individual directions and interests.

- The **Print Media and Photography** concentration introduces students to all traditional print forms as a foundation for conceptual approaches. Students are able to learn print techniques such as intaglio, lithography, relief, silkscreen and large-format digital printing. In addition, students can explore traditional and experimental photography and develop print matrices. Students learn how to develop printed and photographic works of art through layering, problem solving and thoughtful material applications.

- The **Sculpture and Expanded Media** concentration encourages proficiency in foundational methods of making-modeling, carving and assembly. The concentration is a springboard for students to learn how to communicate ideas through sculptural works. Although sculpture classes are rooted in the history of object-making, new forms of sculptural practice (installation, time-based practice, sound and kinetic works) are all part of a comprehensive three-dimensional program.

- The **Textiles** concentration fosters creative thinking, critical inquiry and development of technical facility. Students study the artistic and cultural legacy of textiles in conjunction with historic and contemporary practices. Components of the program are the traditions of textile making (built on repetition, geometry and order) linked with digital design and technology. Students learn felt-making, surface design, screen-printing and weaving (hand-manipulated, loom-controlled and digital).

### Description

The Bachelor of Fine Arts degree in Studio Art is a pre-professional program that develops students’ conceptual prowess, technical competency and independent problem-solving to meet the challenges of a career or advanced study in the visual arts. Through studio critiques, the study of sophisticated art and design concepts, mastery of skills and technologies and critical analysis of historical and contemporary issues, students learn to analyze and evaluate visual art and to apply this knowledge to their own creative practice. Graduating students demonstrate their competence by producing a cohesive body of work presented in their senior thesis exhibition to a panel of faculty reviewers.
A concentration does not need to be declared upon admission, but students should declare a concentration no later than completion of ART 30001.

Students in the program are encouraged to take advantage of travel opportunities to New York, Chicago, London, Paris and China. In addition, students can participate in study abroad full semester or summer experiences at Kent State's Florence, Italy location.

**Accreditation**
National Association of Schools of Art and Design (NASAD)

**Admission Requirements**
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**First-Year Students on the Kent Campus:** First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

**First-Year Students on the Regional Campuses:** First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Transfer applicants to the program who meet the general transfer admission requirements should schedule a meeting with the academic advisor in the School of Art and submit a portfolio to a studio art faculty member to review for proper course placement. The faculty member may specify additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the state-wide Transfer Articulation Guides (TAG), although each student will be evaluated individually in terms of his or her ability to perform in the program. Transfer students should make every effort to complete admission requirements before the deadlines and to schedule a portfolio review with before registration.

**Program Learning Outcomes**
Graduates of the program will be able to:

1. Demonstrate the ability (skill) to work within their chosen medium/media, and understand associated materials and processes.
2. Demonstrate an understanding of larger contemporary and historical contexts.
3. Demonstrate a high degree of design and visual literacy in their work.
4. Articulate their individual vision in both written and oral form.

**University Requirements**
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

1 Students may register for selected Studio Art upper-division courses (ARTS 30000 or 40000 level) prior to successfully completing ART 30001. At the completion of eight specific courses (ART 10022, ART 10023, ART 10024, ARTH 22007, ARTS 14000, ARTS 14001 and two foundation electives), students register for ART 30001 and submit a portfolio of representative studio work selected from these courses to a studio art faculty committee for review. The review is a formative assessment of the student’s foundations work including a digital portfolio, installation of sampling of works and proficiency in written and oral critical thinking.

2 A minimum C grade must be earned to fulfill the writing-intensive requirement.

3 Students are required to plan and execute independently a senior thesis exhibition in the area of their declared concentration. The exhibition is presented for review to a committee of at least three School of Art faculty. In addition to presenting the project or exhibition, students must submit a written proposal and written summation (or artist’s statement). Students must submit photographic documentation along with the requisite written components at the completion of the committee defense. Students should work closely with a studio art faculty advisor on all aspects of the senior project.

4 A maximum 6 credit hours of ARTS 45090 may be applied toward studio art electives. Students may apply this course toward fulfilling general electives, with no maximum credit hours required.

1 After completing 16 credit hours of coursework, students present a body of current art work to a committee of three to five faculty members for review and discussion. Students may take major electives through cross-discipline, seminar-style courses, graduate studio, travel study and/or independent study. Maximum 6 credit hours of travel study courses, and maximum 20 credit hours of graduate studio courses may be applied toward the M.A. degree.

2 Students’ thesis may comprise an installation or a series of collective works, in addition to a written thesis. The written thesis must document and substantiate the visual works through historical context, process or other theoretical premises. Students must present an oral defense of the works to a committee of three to five faculty members, in addition to mounting the installation and preparing the written thesis.

Candidacy Examination
Successful completion of the candidacy review examination is a requirement in every School of Art graduate program. In the studio majors, it is scheduled after half of the program has been completed. Successful completion of the examination designates the student as a candidate for the degree.

Description
The Master of Fine Art degree in Studio Art is designed to prepare students for careers as independent visual arts through the cultivation and refinement of a successful studio practice. The program emphasizes intensive personal investigation and the development of strong aesthetic
and conceptual understanding. In addition to time in their own studio, students have opportunities to enhance existing skills and knowledge by observing undergraduate class demonstrations and critiques.

The M.F.A. is the terminal degree in the studio arts and is a requirement for those who intend to teach visual arts in higher education.

The Studio Art major comprises the following concentrations:

- **The Ceramics** concentration offers an intense focus on artistic development. Through mentorship and a broad spectrum of course offerings, students work closely with faculty advisors to find their own voice as artists. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.

- **The Drawing** concentration draws upon contemporary practices and discourse in the field to prepare students for a life in the arts. Students are encouraged to work across disciplines and techniques in order to develop a body of work that reflects their independent investigations in drawing. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.

- **The Glass** concentration is based on the belief that successful creative work results from spending time with one’s ideas and receiving constructive and supportive criticism from faculty and peers. The concentration aims to create an atmosphere where students pursue ideas and engage in an extended scholarly dialogue. While building on the legacy of the American Studio Glass Movement, students are fostered to be leaders in redefining the future of studio glassmaking.

- **The Jewelry, Metals and Enameling** concentration allows students to build individual research strategies for developing a coherent and distinctive body of work. Investigations of inter-media and interdisciplinary relationships are part of the curricular focus. Students are expected to be conscious of and involved in contemporary practices, discourse and trends, nationally and globally, among the field and within the larger arts/crafts/design movements. In addition to time in their own studio, students have opportunities to enhance existing skills and knowledge by observing undergraduate class demonstrations and critiques. Students are encouraged to use both traditional and contemporary technology go hand-in-hand with traditional fiber art techniques, while pushing students to think conceptually, experimentally and across disciplines.

- **The Painting** concentration draws upon contemporary practices and discourse in the field to prepare students for a life in the arts. Students are encouraged to work across disciplines and techniques in order to develop a body of work that reflects their independent investigations in painting. Studio practice is supplemented with art history seminars, visiting artist lectures, summer workshops and travel study programs to New York City, culminating in a solo M.F.A. thesis exhibition.

- **The Print Media and Photography** concentration aims to strengthen the students’ personal vision through emphasis on the conceptual aspects of the printmaking and photography disciplines. Students have access to studios for lithography, etching, relief, silkscreen and digital media, in addition to a darkroom, press room and digital fabrication laboratory. Enrollment is deliberately kept small enough to make possible the faculty mentor/student relationship.

- **The Sculpture and Expended Media** concentration encourages proficiency in foundational methods of making-modeling, carving and assembly. The concentration is a springboard for students to learn how to communicate ideas through sculptural works. Although sculpture classes are rooted in the history of object-making new forms of sculptural practice (installation, time-based practice, sound and kinetic works) are all part of a comprehensive three-dimensional program.

- **The Textiles** concentration focus on guiding young artists into the world of the professionally active studio artist. Digital design and technology go hand-in-hand with traditional fiber art techniques, while pushing students to think conceptually, experimentally and across disciplines.

Description

The Textiles minor gives students an opportunity to focus on the craft, design and art of making textiles using a range of processes and materials associated with this distinctive field.

Admission Requirements

Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate the ability to work within textile arts and understand associated materials, processes and applications.
2. Demonstrate an understanding of larger contemporary and historical contexts within the creation of works of textile arts.
3. Demonstrate a high degree of design and visual literacy in their work.

Fashion Design and Merchandising (FDM)

FDM 10010 FASHION FUNDAMENTALS 3 Credit Hours
Introduction to the global fashion industry. Analysis of the business of fashion and how it is conceived, marketed, sold, and consumed. Overview of important resources, companies, career options and personnel who impact the industry.
Prerequisite: Fashion design, fashion merchandising or pre-fashion design and merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 10023 FASHION VISUALS 1 Credit Hour
The study of fashion information, research sources, color theory, two-and three-dimensional design and visual presentation formats as they apply to the fashion industry.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10024.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10043 SUSTAINABLE FASHION THINKING 1 Credit Hour
An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Course focuses on understanding how and why those practices must change and examining burgeoning ideas, methods, practices and business structures shifting to a sustainable future.
Prerequisite: Fashion Design or Fashion Merchandising majors.
Corequisite: FDM 10044.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10044 SUSTAINABLE FASHION THINKING LABORATORY 2 Credit Hours
An introductory exploration of the current fashion industry and the urgent need to create sustainable change. After a survey of fashion industry functions from concept to consumer, students identify current practices and areas of concern. Lab focuses on practicing strategies, including critical thinking, human centered design, sustainable product service systems and corporate social responsibility to influence needed change within industry. Fashion design and fashion merchandising students work collaboratively in groups to explore solutions for a sustainable future in the fashion industry.
Prerequisite: Fashion Design or Fashion Merchandising majors.
Corequisite: FDM 10043.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10053 INTRODUCTION TO FASHION TECHNOLOGY 1 Credit Hour
Introduces students to the fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising and production contexts is presented.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10054.
Schedule Type: Lecture
Contact Hours: 1 lecture
Grade Mode: Standard Letter

FDM 10054 INTRODUCTION TO FASHION TECHNOLOGY LABORATORY 2 Credit Hours
Laboratory applications of fundamental concepts, procedures, and techniques used in digital imaging software and information database software. A survey of current and emerging technologies used in fashion design, merchandising, and production contexts is presented and applied.
Prerequisite: Fashion design or fashion merchandising major.
Corequisite: FDM 10053.
Schedule Type: Combined Lecture and Lab
Contact Hours: 1 lecture, 2 lab
Grade Mode: Standard Letter

FDM 10140 FOUNDATIONS OF FASHION DRAWING 3 Credit Hours
Introduction to fashion drawing. Concentration on communicating through drawing the fashion figures and technical flats, accurate garment proportion and construction.
Prerequisite: Fashion design major.
Schedule Type: Combined Lecture and Lab
Contact Hours: 5 other
Grade Mode: Standard Letter
FDM 15055  BASICS OF APPAREL CONSTRUCTION  3 Credit Hours
Introduction to sewing techniques and application processes using industrial sewing machines and other related equipment in basic garment construction. Development of fundamental patternmaking skills.
Prerequisite: Fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20013  HISTORY OF COSTUME  3 Credit Hours
Chronological study and research of historic costume from the origin of clothing through the French revolutionary era, 19th and 20th century designers, and the influence on contemporary fashion.
Prerequisite: HIST 11050 or HIST 11051 or ARTH 22006 or ARTH 22007.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 20030  FASHION APPAREL ANALYSIS  3 Credit Hours
Analysis and evaluation of fashion apparel; quality standards of ready-to-wear apparel and factors that influence the aesthetic and functional performance of the end product.
Prerequisite: FDM 10033 and FDM 10034; and fashion merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 20050  FASHION TECHNOLOGY APPLICATIONS  3 Credit Hours
A continuation of content related to technology within the fashion industry. Pattern manipulation, basic technical packages, garment measuring specs, print design and computerized fashion illustration is addressed with the use of industry-specific and off-the-shelf software packages.
Prerequisite: FDM 10053 and FDM 10054; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20121  FASHION DRAWING  3 Credit Hours
Study of communicating design ideas, rendered fabrics, consumer types, technical flats, and the depiction of garment construction through the use of digital toolsets and illustration technology. Emphasis will be placed on the depiction of a variety of body types, demographics (gender identity, differently-abled, race/ethnicity, age, culture), fabric types (weight, end use, pattern/print, color, etc.) on the figure.
Prerequisite: FDM 10023 and FDM 10024; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20123  FASHION DESIGN CONCEPTS  3 Credit Hours
An introduction to the process and methodology of creating fashion products with considerations of sustainable practice and diverse consumer markets. Students will apply fashion communication skills and combine with visual thinking practices. Emphasis will be on design thinking, sustainable methodology, creative experimentation, and a variety of body types and markets.
Prerequisite: FDM 10043 and FDM 10044 and FDM 20121.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20153  FLAT PATTERN  3 Credit Hours
Development of basic muslins and slopers. Patternmaking principles of dart manipulation and added fullness. Construction techniques for bodice, skirt, sleeve, collar, and pant variations.
Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20154  DRAPING  3 Credit Hours
Development of basic garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. Construction techniques for boned bodice garments and using knit and bias cut fabrics.
Prerequisite: FDM 10033 and FDM 10034; and FDM 15055; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20155  MACHINE KNITTING  3 Credit Hours
Basic machine knitting techniques, including structure and shaping on industrial handflat knitting machine. Development and analysis of knitted textiles.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20156  2-D FASHION DESIGN PRACTICE  3 Credit Hours
Development of two-dimensional patterns for three-dimensional figures/shapes using digital toolsets. Execution of virtual and traditional construction of two-dimensional pattern designs. Emphasis will be placed on the techniques used to develop apparel patterns for both knit and woven textiles and how to fit garments to the body. Students will develop garments for a variety of target markets and a variety of body types. Minimizing waste in pattern layouts and yardage allocation will be addressed.
Prerequisite: FDM 10033 and FDM 10034 and FDM 15055; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20157  3-D FASHION DESIGN PRACTICE  3 Credit Hours
Study of draping as a technique for developing two-dimensional patterns for three-dimensional shapes. The techniques used for working with woven fabric and knit fabric will be addressed. Students will be required to drape on dress forms representing a variety of body shapes. Minimizing waste through shape and form will be addressed.
Prerequisite: FDM 10033 and FDM 10034 and FDM 15055; and fashion design major.
Schedule Type: Studio
Contact Hours: 6 other
Grade Mode: Standard Letter

FDM 20263  FASHION RETAIL INDUSTRY  3 Credit Hours
Study of retail organizations and structures within the fashion industry. Analysis of supervision organization and operations management of fashion retail institutions.
Prerequisite: FDM 10010; and fashion merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
FDM 25011  FASHION BRANDING  3 Credit Hours
An overview of branding in the fashion industry. Analysis of strategies for creating (brand awareness), maintaining (brand management) and enhancing the strength (brand asset management) of fashion brands. Class members work individual an as part of a group.
Prerequisite: FDM 10010; and fashion merchandising major.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 30013  FASHION AND POP CULTURE  3 Credit Hours
An examination of the relationship between different types of design and popular culture in America and Europe in the 20th and 21st centuries.
Prerequisite: ARTH 22006 or ARTH 22007 or HIST 11050 or HIST 11051.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 30050  FASHION TECHNOLOGY: COMPUTER INTEGRATED TEXTILE DESIGN  3 Credit Hours
The use of Computer Integrated Design tools to produce textile prints, wovens and knits for professional presentation scenarios.
Prerequisite: FDM 10053 and FDM 10054.
Schedule Type: Studio
Contact Hours: 5 other
Grade Mode: Standard Letter

FDM 30083  PROFESSIONAL SEMINAR  3 Credit Hours
Professional development strategies for fashion and related careers. Emphasis is on verbal and written communication skills.
Prerequisite: FDM 20030 and fashion merchandising major; and junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

FDM 30124  TECHNICAL DESIGN IN THE FASHION INDUSTRY  3 Credit Hours
Students learn seamstitch classifications, costing, sourcing and lab testing quality assurance. Assembly-line and modular manufacturing are discussed.
Prerequisite: FDM 10033, FDM 10034 and FDM 20050.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 5 other
Grade Mode: Standard Letter

FDM 30132  APPAREL CONSTRUCTION FOR SPECIALTY MARKETS  1 Credit Hour
Construction details specific to a market are researched, discussed and duplicated. Only one specialty market covered each class. Markets vary by class.
Prerequisite: None.
Schedule Type: Combined Lecture and Lab
Contact Hours: 1.5 other
Grade Mode: Standard Letter

FDM 30151  ADVANCED PATTERNMAKING  3 Credit Hours
Flat pattern assignments for advanced, complex garments. Suits, outerwear, cutsew knits will all be covered. Students will make patterns by traditional methods as well as by computer.
Prerequisite: FDM 20153 and FDM 20154.
Schedule Type: Studio

Description
The Bachelor of Arts degree in Fashion Design integrates conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production. These processes include color, design and trend research; technical sketching and rendered illustration; pattern-making and garment construction; analysis of appropriate fit and fabric selection; best practices in sustainable methods and knowledge and the ability to communicate specifications for production using industry standards appropriate to specific markets.

The B.A. degree in Fashion Design promotes an emphasis on the diversity of studio practice and liberal art experiences with the most up to date technology applications. Students have the option to select coursework offerings to gain expertise in a variety of specialties that connect directly to fashion design, such as wearable technology applications, sustainable development and design, garment knitting, illustration and/or accessory design.

The degree program prepares students for professional careers by developing technical competency, creative/independent problem solving and conceptual understanding necessary for the challenges of a career in the creative industries. Students develop portfolios for presentation at industry interviews and are prepared to be strongly competitive for any entry-level design position in the industry. In addition, students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City and Florence, Italy, as well as through collaborative partnership programs with the Paris American Academy, Hong Kong Polytechnic University and Regent’s University in London.

When enrolled in junior-level fashion design studio courses, fashion design students may complete the application process to declare the Bachelor of Fine Arts degree or chose to continue pursing the B.A. degree. The decision as to which degree is best for a particular student depends on the student’s educational and career goals, academic standing, performance in studio coursework and an approved “B.F.A. Proposal.”

Accreditation
National Association of Schools of Art and Design (NASAD).

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students: Admission to the Fashion Design major is selective. Prospective applicants must have a minimum 3.000 overall grade point average (on a 4.000 scale); and a minimum 21 ACT composite score or a minimum 1060 SAT score.
**Transfer Students:** Admission to the Fashion Design major requires a minimum 2.750 overall GPA based on minimum 24 credit hours of college-level coursework at an accredited institution. Those students meeting this GPA requirement but with fewer than 24 credit hours will be evaluated as new freshmen.

Students who do not meet the criteria for admission to the Fashion Design major may be eligible for admission to the Pre-Fashion Design and Merchandising non-degree major. In addition, students who do not meet the admission criteria may initiate the process for declaring the B.A. degree in Fashion Design after completing minimum 12 credit hours of non-developmental coursework at Kent State University and earning a minimum 2.750 overall GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services
2. Demonstrate understanding of integrating conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production.
3. Apply knowledge and skills in the use of basic tools, techniques and processes sufficient to produce work from draft or specifications to finished product, including skills in portfolio preparation.
4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Articulate professionalism and communication skills in the appropriate creative industry.

**University Requirements**

All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

### Description

The Bachelor of Fine Arts degree in Fashion Design integrates conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production. These processes include color, design and trend research; technical sketching and rendered illustration; pattern-making and garment construction; analysis of appropriate fit and fabric selection; best practices in sustainable methods and knowledge and the ability to
communicate specifications for production using industry standards appropriate to specific markets.

The degree program prepares students for professional careers by developing technical competency, creative/independent problem solving and conceptual understanding necessary for the challenges of a career in the creative industries. Students develop portfolios for presentation at industry interviews and are prepared to be strongly competitive for any entry-level design position in the industry. In addition, students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City and Florence, Italy, as well as through collaborative partnership programs with the Paris American Academy, Hong Kong Polytechnic University and Regent’s University in London.

The B.F.A. degree in Fashion Design engages students in a focused-study thesis project (collection development) as a capstone experience that results in submitting their collection for formal review by faculty and industry designer-critics, followed by public presentation in a fashion venue and completion of a thesis "magazine" (print collateral).

Accreditation
National Association of Schools of Art and Design (NASAD)

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students: Admission to this degree is selective. The B.F.A. degree requires applicants to have a minimum 2.750 overall Kent State GPA and the support of the Fashion Design faculty. To be considered for the Bachelor of Fine Arts degree, students must be enrolled in junior-level fashion design studio courses and need to submit a "Letter of Intent" and a "B.F.A. Proposal" by the established deadlines.

Transfer Students: Admission to the Fashion Design major requires a minimum 2.750 overall GPA based on minimum 24 credit hours of college-level coursework at an accredited institution. Those students meeting this GPA requirement but with fewer than 24 credit hours will be evaluated as new freshmen.

Students who do not meet the criteria for admission to the Fashion Design major may be eligible for admission to the Pre-Fashion Design and Merchandising non-degree major. In addition, students who do not meet the admission criteria may initiate the process for declaring the B.A. degree in Fashion Design after completing minimum 12 credit hours of non-developmental coursework at Kent State University and earning a minimum 2.750 overall GPA.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services
2. Demonstrate understanding of integrating conceptual, technical and production design knowledge and skills, leading to a synthesis of the design process from concept to production.
3. Apply knowledge and skills in the use of basic tools, techniques and processes sufficient to produce work from draft or specifications to finished product, including skills in portfolio preparation.
4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Articulate professionalism and communication skills in the appropriate creative industry.

1 To earn the M.F.I.S. degree, each student must complete a written thesis accompanied by a visual presentation/representation that is successfully defended and approved by a committee of faculty with feedback from an industry partner. The thesis must demonstrate an innovative and pragmatic research-based solution applicable to the fashion industry.

Graduation Requirements

- Students in the M.F.I.S. degree are required to complete 24 credit hours of graded graduate coursework and a minimum of 6 credit hours of thesis.
- Students without a fashion background may be required to complete foundational coursework, FDM 10033 and FDM 10034 concurrently during the first semester, and either FDM 30260 or FDM 30262. Students must complete these courses within the first 18 credit hours of graduate study. These undergraduate credit hours are in addition to the 30 graduate credit hours required for the M.F.I.S. degree.

Description

The Fashion Media minor is for students studying either fashion merchandising or a major in the school of media and journalism.
Fashion merchandising students take the Media Track to learn about the fashion media and better prepare them to understand this industry. The track includes a trip to New York City as a requirement.

Media and Journalism students take the Fashion Track to learn about the fashion publishing industry to better prepare them for work in this business. The track includes a trip to New York City to study fashion media.

**Admission Requirements**

Admission to the minor is selective, open only to students declared in the Fashion Merchandising major or in a major in the School of Media and Journalism.

To declare the Fashion Media minor, students must have a minimum 2.000 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

**Program Learning Outcomes**

For fashion merchandising students, the minor better prepares them to understand their industry from the media perspective. For media and journalism, the minor exposes them to the fashion publishing industry to better prepare them for work in this business.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Science degree in Fashion Merchandising allows students to acquire a thorough background in the business aspects of the fashion industry, whereby they develop competencies in fashion theory, retail operations, management and buying, fashion forecasting and promotion, the merchandising for apparel manufacturing and the development and marketing of fashion goods.

Students participate in a study abroad/away experience, which includes opportunities to study for a semester in New York City and Florence, Italy, as well as through collaborative partnership programs with the Paris American Academy, Hong Kong Polytechnic University and Regent's University in London.

In addition, students in the Fashion Merchandising major have the opportunity to enroll in the combined degree program with the Master of Business Administration degree. The combined B.S./M.B.A. degree program allows high-achieving undergraduate students early admission into graduate school. Students enrolled in the combined degree program will complete a maximum of 9 credit hours of graduate-level coursework for the M.B.A. degree during their senior year. This allows a student to accelerate their completion of the M.B.A degree after being awarded their undergraduate degree. Students complete a minimum of 150 credit hours (120 representing the B.S. degree in Fashion Merchandising and at least an additional 30 representing the M.B.A. degree). To be eligible for the combined program, students must first complete a minimum of 90 credit hours in the fashion merchandising degree with at least a 3.300 overall grade point average. Upon achieving these requirements, students submit an admissions application to the M.B.A program by the set application deadline. Students need to satisfy all requirements for the admissions application, including the GMAT exam.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students: Admission to the Fashion Merchandising major is selective. Prospective applicants must have a minimum 3.0 overall grade point average (on a 4.0 scale); and a minimum 21 ACT composite score or a minimum 1060 SAT score.

Transfer Students: Admission to the Fashion Merchandising major requires a minimum 2.750 overall GPA based on minimum 24 credit hours of college-level coursework at an accredited institution. Those students meeting this GPA requirement but with fewer than 24 credit hours will be evaluated as new freshmen.

Students who do not meet the criteria for admission to the Fashion Merchandising major may be eligible for admission to the Pre-Fashion Design and Merchandising non-degree major. In addition, students who do not meet the admission criteria may initiate the process for declaring the B.S. degree in Fashion Merchandising after completing minimum 12 credit hours of non-developmental coursework at Kent State University and earning a minimum 2.750 overall GPA.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Understand the fashion industry, fashion markets, fashion products and services
2. Demonstrate knowledge and skills of the fashion industry through reflective experiential learning.
3. Apply integration of the key knowledge of various segments of industry from fiber to finished product, products/services, consumer markets and technology in relation to the fashion industry.
4. Articulate conceptual and critical thinking applicable to the fashion industry.
5. Employ research processes and practices employed in the fashion industry.
6. Demonstrate their professionalism and communication skills required in the fashion industry through visual, oral and written forms.

Description
The Audio Recording minor is designed to give students a strong
foundation in the rapidly developing field of audio recording technologies.
Coupled with courses in music, the minor provides students with the
necessary tools to be successful in studio equipment, techniques and
standards.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree,
the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized
Program major). Students declared only in the A.A. or A.S. degree or the
A.T.S. degree in Individualized Program may not declare a minor. Students
may not pursue a minor and a major in the same discipline.

Description

The Master of Arts degree in Ethnomusicology is designed to offer students a solid foundation in regional studies of music style, performance practice, history and cultural associations in order to prepare students for continued graduate studies at the doctoral level and/or public sector careers in world music. The program integrates theoretical perspectives relevant to the discipline with these practical aims, so that students can communicate effectively with persons within and outside the field of ethnomusicology.

While a balanced global coverage is emphasized, Kent State music faculty focus on studies in Central Africa, mainland Southeast Asia, East Asia, the Caribbean, North and South America and the Middle East, as well as popular music studies. Theoretical concerns include sociocultural identity, semiotics, gender studies, politics and power, ritual studies, globalization and hybridity, as well as studies in inter-related arts (e.g., dance and theatre).

Description
The Jazz Studies minor promotes the development of fundamental skills in jazz. The minor provides instruction in performance, composition and arranging.

Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Jazz Studies minor, students must audition to music faculty in voice or on an instrument.

Description
The Bachelor of Arts degree in Music gives music majors an opportunity to study music and liberal arts with an optional minor, available in most academic areas of the university, or as a dual degree program with a major in another field. Although not as music intensive as the Bachelor of Music (B.M.) degree, the B.A. degree includes study on a main instrument and ensemble participation throughout the program.

The Music major includes the following optional concentrations:

• The Contemporary Popular Music concentration provides students the opportunity to study contemporary instruments such as electric guitar, electric bass and voice, as well as participate in a variety of styles including rock, pop, Motown and other popular styles.
• The Jazz Studies concentration provides students the opportunity to study jazz improvisation, arranging and composing.

Accreditation
National Association of Schools of Music.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. Students must audition before being admitted to the Music major. Inquiries can be directed to the coordinator of admissions and scholarships, School of Music, E-101 Music and Speech, Kent State University, Kent, OH 44242-0001 (or call 330-672-2172).

For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen and the admissions website for transfer, transitioning and former students.

English Language Proficiency Requirements for International Students:
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

1 The Senior Recital may be used to satisfy the Experiential Learning Requirement (ELR), with approval.
2 Applied Music: Students not declaring a concentration will need to take a total of 6 semesters and 12 credit hours of Applied Music or replace up to 2 semesters of applied music with MUS 21213 and MUS 21214. Based on instrument of music degree acceptance. Students must meet the 46000 entry level prior to graduation. The 46000 level may be taken following a successful 46000-level barrier exam. One semester of MUS 21213 can replace one semester of MUS 31211.
3 Piano Class (2 credit hours): placement test required. Students who have piano as their main instrument and students placed into applied Music-Piano replace with music (MUS) electives.
4 Major ensemble (8 separate semesters of music ensemble are required): Students must enroll in a major ensemble appropriate to their major performance area.

1 Only available at the Stark Campus.
2 MUS 36913 Applied Studio Musicianship (Senior Recital) may be used to satisfy the Experiential Learning Requirement (ELR), with approval.
3 Applied Music: Students in the Contemporary Popular Music concentration must take 2 semesters and 4 credit hours of Applied Music and 8 credit hours of MUS 36913, MUS 36914, MUS 36915, MUS 36916, MUS 36917, MUS 36918, MUS 36919, MUS 36920, MUS 36921, MUS 36922, MUS 36923, MUS 36924 or MUS 31211 (one semester of MUS 21213 can be included). Students must also meet the 46000 entry level prior to graduation, the 46000 level may be taken following a successful 46000-level barrier exam. One semester of MUS 21213 can replace one semester of MUS 31211.
4 Electric Guitar and Electric Bass students, based upon the audition, can be placed in either MUS 16914 or MUS 16915. Upon successful completion of two semesters of MUS 16914/MUS 16915 students continue with applied study as indicated in footnote 3.
Applied Music: Students in the Jazz Studies concentration must take one semester and 2 credit hours of Applied Music and two semesters and 4 credit hours of MUS 36011.

2 MUS 36011 Applied Music Jazz (Senior Recital) may be used to satisfy the Experiential Learning Requirement (ELR), with approval.

3 Major Ensemble (8 separate semesters of music ensemble are required): Students in the Jazz Studies concentration take one semester of major ensemble and 4 semesters of MUS 45231 and 4 semesters of MUS 45312. Voice students in the Jazz Studies concentration replace MUS 45321 with MUS 45313.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Bachelor of Music degree in Music is a professional degree. The primary emphasis is on the development of the skills, concepts and sensitivity essential for those wishing to pursue music as a profession.

The Music major comprises the following concentrations:

- **The Composition** concentration provides preparation for graduate study in the field, a credential for private instruction and the ability to compose and use technology in a variety of musical styles.
- **The Instrumental Performance** concentration provides preparation for graduate study in the field, a credential for private instruction and the ability to perform as a soloist, in chamber music and in large ensembles. This program is available on the following instruments: violin, viola, violoncello, double bass, flute, oboe, clarinet, bassoon, saxophone, trumpet, horn, trombone, euphonium, tuba and percussion.
- **The Piano Performance** concentration provides preparation for graduate study in the field, a credential for private instruction and the ability to perform as a soloist, as an accompanist, in chamber music and in large ensembles.
- **The Voice Performance** concentration provides preparation for graduate study in the field, a credential for private instruction and the ability to perform as a soloist, in opera, in chamber music and in large ensembles.

Accreditation
The B.M. degree in Music is approved by the National Association of Schools of Music.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. Students must audition before being admitted to the Music major. Inquiries can be directed to the coordinator of admissions and scholarships, School of Music, E-101 Center for the Performing Arts, Kent State University, Kent, OH 44242-0001 (or call 330-672-2172).

For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen and the admissions website for transfer, transitioning and former students.

English Language Proficiency Requirements for International Students:
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of these programs will be able to:
1. Demonstrate knowledge of music history and theory
2. Demonstrate beginning professional skills in recitals

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

¹ A minimum 3.000 GPA is required in music theory courses (MUS 11121, MUS 11122, MUS 21111, MUS 21112) in the Composition concentration.

² Eight separate semesters of major ensemble are required. Students must enroll in a major ensemble appropriate to their major performance area. Piano performance majors satisfy the eight-semester ensemble requirement as follows: 4 credit hours of MUS 45321, 2 credit hours of MUS 45321 and 2 credit hours selected from chamber music or a major vocal or instrumental ensemble or 1 credit hour selected from chamber music or a major vocal or instrumental ensemble and DAN 28010. Composition majors may use MUS 45271 for maximum four semesters of the eight-semester requirement.
exam, incorporating score reading, sight singing, keyboard harmony and written analysis; and (2) receive approval from the theory and composition faculty based on a portfolio of compositions.

Applied music (six semesters and 12 credit hours): Students whose main instrument is piano may fulfill this requirement with piano only or can include one or two semesters with a different instrument. Students whose main instrument is not piano must take two semesters of Applied Music-Piano. A piano placement test or piano audition is required and additional remedial courses may be necessary. Students must meet the 46000-entry-level prior to graduation.

</tbody>
</table>

- Completion of the Major Field Test (MFT) in music history and music theory during senior year (specific score level achievement is not required)
- Minimum C grade required in all music courses
• Attendance at minimum 10 concerts or recitals during semesters of Applied Music registration. Composition students use semesters of registration in MUS 21213, MUS 21214, MUS 31211 and MUS 41211.

• Students in the Music Composition concentration must pass a theory/composition piano proficiency exam as a prerequisite for required courses MUS 41131, MUS 41151 and MUS 48251; and present a senior recital.

• Students in the Instrumental Performance, Piano Performance and Voice Performance concentrations must complete one-half junior and one full- senior recital and register for applied music courses (46000 level) during a degree recital semester. The senior recital may be used to satisfy the Experiential Learning Requirement (ELR).

• MUS 11110, MUS 11111, MUS 16914 and MUS 16915 will not count as credit for graduation in this program.

**Description**

The Music minor provides a basic understanding of music literature, theory and performance. Study on voice or selected instruments is available to students in other fields who desire private instruction in addition to ensemble participation.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.
To declare the Music minor, students must complete theory placement test and audition in piano, voice or on a traditional orchestral/band instrument.

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

### Description

The Master of Arts degree in Music Composition is designed to advance the music composition creative skills of advanced students and to prepare them for admission to doctoral study. The program emphasizes mastery of composition of large-scale works for media, including orchestra, choir, band and/or chamber music ensembles.

Based on a solid undergraduate music degree, the M.A. degree further develops abilities in music theory, including analytical, aural, written, keyboard and pedagogical skills. The program further develops breadth and depth in the area of Western music history and literature.

### Accreditation

National Association of Schools of Music

Professional Licensure Disclosure
This program is designed to prepare students to sit for applicable licensure or certification in Ohio. If you plan to pursue licensure or certification in a state other than Ohio, please review state educational requirements for licensure or certification and contact information for state licensing boards at Kent State's website for professional licensure disclosure.

Requirements for Admission to Advanced Study for Art Education and Music Education
Admission to advanced study is required of all art education and music education majors and minors prior to enrolling in upper-division education courses. Upon completion of coursework, as determined by program area, students should have satisfied the prerequisites for admission to advanced study. Students must submit an application for advanced study by the second Friday of the term during which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which "Admission to Advanced Study" is a prerequisite. Students at the Kent Campus apply for Advanced Study through the College of Education, Health and Human Services Student Portal, which can be accessed through the Vacca Office of Student Services web page. Students completing a licensure program at a regional campus should check with that campus for instructions on how to apply for "Advanced Study." Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to teacher licensure. Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

Requirements for Admission to Advanced Study for Art Education and Music Education

- College Writing: Students are required to attain a minimum C grade in each writing course (ENG 11011 and ENG 21011 or equivalent).
- Pre-Advanced Study Coursework: To be eligible for advanced study, students must earn a minimum C grade in CULT 29535 and a minimum C grade in one of the following courses (please note that a minimum C grade must be earned in all of the four courses for teacher licensure programs):
  - EPSY 29525
  - SPED 23000
- Grade Point Average:
  - Art Education majors must have earned a minimum 2.500 cumulative GPA in order to be admitted to Advanced Study.
  - Music Education majors must have earned a minimum 2.500 cumulative GPA and a minimum 2.750 major GPA at the time of application in order to be admitted to Advanced Study.
- Disposition Assessment/Professional Disposition Plans (PDPs): Students are required to have completed all professional dispositions plan (PDPs) at the time of application to be eligible for advanced study.
- Advising Appointment: Art Education and Music Education students should make an advising appointment with a professional advisor in the Vacca Office of Student Services (or Regional Campus advising office if completing the program at that campus) for information about applying for Advanced Study and educator licensure. Advising appointments at the Kent Campus are made through the Vacca Office of Student Services' website at www.kent.edu/ehhs/services/voss.
• Teacher Candidate Acknowledgments and Legal Questions for Licensure: Candidates are required to electronically sign four statements acknowledging that they have read and understand the following areas: background check requirements; professional dispositions; licensure application information; legal questions asked on the licensure application. Statements can be found on the student portal.

Minimum Total Credit Hours: 75

1 Students may be required to take courses in music theory, which will be applied toward the Musical Literacy requirement of the degree. Requirements will be determined based on the results of a diagnostic exam as stated in the Music Graduate Handbook. Remaining Musical Literacy credit hours are fulfilled by taking courses in music theory, music history, ethnomusicology, composition, conducting, music performance or other related topics of student interest as approved by the academic advisor.

2 Upon successful completion of the candidacy examination, students take a dissertation topic from the proposal stage through approval, writing, submission and an oral defense process with a faculty committee comprised of the music education advisor, one additional music education faculty member, one representative from music education or education, a member from another music discipline area or education and an appointed graduate faculty representative. Each doctoral candidate, upon admission to candidacy, must register for MUS 88199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MUS 88299, each semester, until all requirements for the degree have been met.

**Graduation Requirements**

**Residency Requirements**

Student must complete a residency requirement of minimum 9 credit hours each year until qualifying exams.

**Candidacy Requirements**

For the Ph.D. a comprehensive, qualifying, candidacy examination is taken when the student has substantially completed his/her coursework and has received the consent of the advisor committee to attempt the examination. The examination includes an extensive written section consisting of proctored and non-proctored questions, and an oral section taken before a faculty committee. Material for both written and oral sections is drawn from the coursework taken during the degree program, current professional research literature, and current topics in music education. Students who fail the candidacy examination two times will be dismissed from the doctoral program.

**Music Technology - B.S.**

College of the Arts
The development of music technology has had an enormous impact on the music industry. There are many career opportunities for talented musicians in music technology. Skilled musicians can apply formal training to recording careers, studio performance, arranging or producing, and live performances. Opportunities are also available in non-traditional, contemporary popular music venues, the movie industry, television, multimedia events, and music for advertising as well as traditional performing arts venues. The growth of music technology has made knowledge and experience in this area a necessity for all students preparing for a career in any area of the music industry. To compete effectively in the contemporary music world, one must possess a strong traditional music background, plus the technical expertise required to make the most of a rapidly changing and developing technology.

The Music Technology major comprises the following concentrations:

- The Audio Recording concentration provides students the opportunity to learn advanced audio recording techniques.
- The Music Production concentration provides students the opportunity to learn how to use technology to realize creative work such as original music, arranging and production.
- The Performance concentration provides students who want to perform to have the necessary technological tools to succeed in the modern music industry.

Accreditation
The B.S. degree in Music Technology is approved by the National Association of Schools of Music.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. To be admitted to the Music Technology major, students audition their primary instrument and/or with a portfolio and complete theory and keyboard placement tests.

For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen and the admissions website for transfer, transitioning and former students.

English Language Proficiency Requirements for International Students:
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of this program will be able to:

1. Function as competent and versatile professional studio musicians who perform in diverse commercial music venues
2. Compose and arrange music
3. Create appropriate sound for visual media
4. Create music productions of professional quality
5. Produce professional audio recordings, both live and in studio, from start to finish

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

**Minimum Total Credit Hours:** 23

1. A minimum C grade must be earned to fulfill the writing-intensive requirement.
2. Major ensemble (8 separate semesters): All music technology majors must enroll in an ensemble appropriate to their major performance area. Two credit hours must be taken in major ensemble. Major ensemble credit can be earned for MUS 25011 and MUS 25225, as approved by faculty. Students may choose to complete the remaining 6 credit hours with MUS 35213, or 4 credit hours with MUS 35213 or major ensemble and 2 credit hours with ensemble electives (such as MUS 45231 and MUS 25311 for students whose instrument is guitar) as approved by faculty.
3. Applied Studio Musicianship and Applied Music (4 semesters and 8 credit hours): Students must take at least 4 credit hours at 2 credits per semester of Applied Music (MUS 26xxx or MUS 36xxx) and meet Applied Music 36000 entry-level. Students may complete the other 4 credit hours by taking either Applied Music (MUS 36111-MUS 36912) or Applied Studio Musicianship (ASM) to meet graduation requirements. Students must also meet the 46000-credit level requirement in either Applied Music or in Applied Studio Musicianship for graduation.
4. Students who enter at the 36000 level need 2 semesters and 4 credit hours of MUS 36xxx Applied Music and 2 semesters and 4 credit hours of either MUS 36xxx Applied Music or Applied Studio Musicianship
5. Students register for MUS 36913 for all other popular music instruments not listed.
6. Electric Guitar and Electric Bass students, based upon the audition, can be placed in either MUS 16914 or MUS 16915. Upon successful completion of two semesters of MUS 16914/MUS 16915 students continue with applied study as indicated in footnote 3. Students who have completed the Applied Studio Musicianship and Applied Music requirement on piano may replace requirement with music (MUS) electives.
Students must also meet the 46000-entry-level requirement in either Applied Music or in Applied Studio Musicianship for graduation.

Students must take four semesters of four credits of applied studies musicianship courses. Students must meet the 46000 ASM Threshold and must complete one-half junior and one full senior recital and register for applied music courses during a degree recital semester. Integrated Study and Special Topics courses may be included with approval.

- Location: Stark Campus

Description
The Music Technology minor is designed to give students a strong foundation in the rapidly developing field of music production and audio recording technologies. Coupled with courses in applied music, the minor provides students with the necessary tools to be successful in studio equipment, techniques and standards.

Admission Requirements
Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

1 Electives must have been approved in student's prospectus.
2 Each doctoral candidate, upon admission to candidacy, must register for MUS 88199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MUS 88299, each semester, until all requirements for the degree have been met. All students writing a dissertation must pass a dissertation defense. Dissertation defense may be attempted two times.

Candidacy Requirement

This examination will normally be taken when the student has substantially completed his/her coursework and has received the consent of the advisory committee to attempt the examination. The written portion of the examination will cover the major and supportive areas of study and will be followed by a comprehensive oral examination. Students who fail the candidacy examination two times will be dismissed from the doctoral program.

Residency Requirement

Students in the Ph.D. must complete a minimum of 15 credit hours of study within one calendar year in residence.

Description

The World Music minor provides concentrated study of traditional and popular world music (style, performance, history, cultural associations and related arts). Students of any major can pursue this minor as part of their degree program.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

### Description

The Bachelor of Fine Arts in Dance develops technically sound, intellectually diverse and creatively expressive dance artists who can contribute significantly to the art form and society. The curriculum provides students with opportunities for strong and varied technical preparation in contemporary dance forms, including modern, ballet, jazz and improvisation. Opportunities for performance and choreography, along with dance theory courses, complete a degree focused on the artist/scholar.

### Accreditation

National Association of Schools of Dance (NASD).

### Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. Students must audition before being admitted to the Dance major. Inquiries can be directed to the coordinator of the Dance Division, D-101C Center for the Performing Arts, Kent State University, Kent, OH 44242-0001 (or call 330-672-2069).

For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen and the admissions website for transfer, transitioning and former students.

**English Language Proficiency Requirements for International Students:**  
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Bachelor of Arts degree in Dance Studies allows students who have previous dance experience and a strong interest in another subject area, within or outside of the arts, the opportunity to combine the two into one plan of study. The curriculum provides students with a solid foundation in dance techniques and dance academics while allowing flexibility to incorporate another area or minor.

The B.A. degree program encourages exploration of areas that can be combined with dance to enhance opportunities for future employment.

Accreditation
National Association of Schools of Dance (NASD).

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. Students must audition before being admitted to the Dance Studies major. Inquiries can be directed to the coordinator of the Dance Division, D-101C Center for the Performing Arts, Kent State University, Kent, OH 44242-0001 (or call 330-672-2069).

For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen and the admissions website for transfer, transitioning and former students.

English Language Proficiency Requirements for International Students:
All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of this program will be able to:
1. Articulate and perform standards and skills in one or more areas of dance.
2. Communicate an understanding of the vocabulary of dance and employ this knowledge to work conceptually with the elements of dance.
3. Articulate and communicate an understanding of choreographic processes, aesthetic properties of style and the ways these elements shape and are shaped by artistic and cultural ideas and contexts.
4. Develop and defend critical evaluations.
5. Through a Capstone project or presentation, students will articulate and communicate a relationship between their dance studies and a secondary concentration, minor or double major, if applicable.

University Requirements
All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Description

The Bachelor of Fine Arts degree in Musical Theatre prepares students for life as working artists in the musical theatre field. Practical training and creative experiences are coupled with an interdisciplinary liberal arts curriculum and a foundation in theatre history, analysis and criticism.

Students will be able to study and perform in the school’s theatrical and dance productions. Kent State’s Center for the Performing Arts houses three theatres, performance and rehearsal spaces, costume shop and laboratories for costumes, drafting, lighting and scenery. In addition, the School of Theatre and Dance oversees the outdoor venue Porthouse Theatre.

Students in their senior year may participate in the annual New York City Musical Theatre Showcase, which enables students to perform for prospective casting directors, talent managers and theatrical and commercial agents.

Accreditation

National Association of Schools of Theatre (NAST).
Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. Applicants must pass an audition in each of the three performance areas—dance, singing and acting—to be admitted. Students who pass the audition will be admitted directly into the major in the first semester of their first year at Kent State. In exceptional cases, students may be admitted to the program in the second semester of their first year.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education’s admission website.

Program Learning Outcomes
Graduates of this program will be able to:

1. Demonstrate proficiencies that are equal to entry-level positions in the profession or as expected for admission into the Master of Fine Arts degree as a singer, actor and/or dancer.
2. Demonstrate and articulate proficiency and understanding in and of music performance and theory, basic dance performance and technique and acting and acting theory/systems.
3. Demonstrate understanding of how acting and storytelling are the foundation of all three interrelated areas of performance (acting, singing and dance).
4. Demonstrate correct and aesthetically pleasing technique in movement and dance.
5. Demonstrate and articulate correct and aesthetically pleasing technique in the execution of vocal performance, sight-singing, musicianship and music theory.
6. Demonstrate and articulate correct and aesthetically pleasing technique in acting and acting theory/systems.
7. Perform in workshops and full productions of musical theatre in a variety of formal and informal settings.
8. Develop substantial and appropriate audition repertoire.
9. Demonstrate proficiency in audition technique.
10. Demonstrate professional behavior in respect for the craft.

Kent State University Catalog 2022-2023
Progression Requirements

- In order to continue and graduate with the B.F.A. degree, students are expected to develop skills equal to entry-level positions in the profession or as expected for admission into a M.F.A. degree program.
- Students on academic probation may not participate in School of Theatre and Dance productions.
- Students may be immediately dismissed from the program for failure to maintain a 2.500 major GPA. Students should strive to maintain a 3.000 overall GPA.
- Students are required to participate in biannual B.F.A. evaluations/ interviews/meetings, and must must pass annual evaluation reviews to remain in the program.
- Students are required to participate in annual school screening auditions and, if qualifying, must participate in at least one unified audition.
- Students are required to audition for all main-stage theatre productions and accept roles as cast.
- Students may be subject to probation or dismissal for failing to audition for main-stage productions, for not accepting a role that is offered or for failure to demonstrate continuous skill development and growth in all areas of the program as defined by the Musical Theatre Student Handbook. At the time a student is placed on probation, he or she will be provided written information regarding specific areas for improvement.

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Fine Arts degree in Theatre Design and Technology is a terminal degree designed for those who are interested in achieving the artistry and skills necessary to qualify as practicing professionals in the entertainment industry and/or professional theatre educators. The program is a three-year course of study with a flexible curriculum for students to explore areas of special interest.

The Theatre Design and Technology major comprises the following concentrations:
- The Costume Design and Technology concentration prepares students for careers in the entertainment industry, professional theatre or theatre education. Students study both design and technology, including related areas such as dye techniques, costume crafts and wigs and makeup. Students also design costumes for main-stage departmental productions. The curriculum includes core classes in theatre history, dramatic theory and historical periods.
- The Lighting Design concentration balances instruction and experience in lighting design with instruction and experience in lighting technology. Studies include digital rendering, CAD, lighting technology and automated lighting. Students research and study all of aspects of theatrical lighting, including the design process from concept to execution, communication skills, integration of technology into design, documentation of the work and critical evaluation of the work.
- The Scene Design concentration balances focused classroom instruction with practical design and production experience. Students also study related artisan areas such as digital and traditional rendering techniques, 3D CAD, props, fabrication, scene painting and presentation techniques with particular emphasis on integrating contemporary digital techniques into the design process. The curriculum contains courses in construction theory, rigging, costume crafts and projection/media design.

Examples of Possible Careers*

**Progression Requirements**

Students must pass semester reviews and are expected to participate in at least one main-stage production each semester, which may be in addition to any production design assignment.

**Graduation Requirements**

The culminating project requirements include documentation, portfolio presentation and an exit interview. Documentation consists of a design analysis, process journal, relevant research and other supporting materials (e.g., photos, links to the candidate's website). The scope of work may include, but not necessarily be limited to, evidence of research, drawing and drafting, rendering and associated digital image, video or audio files, which will be presented at an exit interview. The topic of each M.F.A. candidate's culminating project will be proposed by the candidate and based on faculty feedback from yearly portfolio and academic assessments. The student will register for THEA 61310 for the student's project assignment. The process is then documented in a format appropriate for the project and presented to the faculty advisor.

**Admission Requirements**

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special
talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language profiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the University Registrar’s website for details.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate ability to conceptualize and realize a design aesthetic consistent with the overall artistic concepts of a production.
2. Demonstrate ability to understand and articulate basic elements and principles of design theory.
3. Demonstrate ability to understand and articulate basic elements and principles of composition related to line, shape, color, texture and sound.
4. Demonstrate an understanding of the aesthetic use of color.
5. Demonstrate understanding of aesthetic use of sound.
6. Demonstrate ability to communicate design ideas and realities to other personnel involved in the production, including directors, other designers, stage managers and actors.
7. Demonstrate ability to produce and communicate design ideas with freehand drawings.
8. Demonstrate ability to provide formalized, accurate production models and drawings by hand and/or through the use of current industry standard software programs.
9. Demonstrate fundamental knowledge of the total design process, including the progression of raw materials through multiple design "shops" and the roles that various craftspeople play in the creation of a finished product.
10. Acquire knowledge of federal, state and local health and safety codes, best practices and industry standards as they relate to theatrical venues and production elements.
11. Prepare and present a professional resume and a portfolio of design-and technology-related work that demonstrate one's abilities, strengths, processes and experiences.
12. Acquire experiences in the design/technology aspects of theatre in a variety of formal and informal settings.

Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Accreditation
The B.A. degree in Theatre Studies is accredited by the National Association of Schools of Theatre (NAST).

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Program Learning Outcomes
Graduates of this program will be able to:
1. Understand procedures and approaches for realizing a variety of theatrical styles and techniques.
2. Understand the playwriting and production processes, aesthetic properties of style, and the way these shape and are shaped by artistic and cultural forces.
3. Develop intermediate to advanced competence in one or more theatre specializations in creation, performance or scholarship.
4. Become acquainted with a diverse selection of theatre repertory, including the principal eras, genres and cultural sources.
5. Understand the basic process involved in mounting a theatre production through both verbal and written articulation of ideas and vocabulary, as well as in actual practice.
6. Form and defend value judgments about theatre.
7. Know common theatrical elements and the interaction of those elements through both written and practicum work.
8. Think conceptually and critically about text, performance and production.
**University Requirements**

All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

**NOTE:** University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

### Honors College

Honors College
20 Stopher Hall
Kent Campus
330-672-2312
honors@kent.edu
www.kent.edu/honors
Mission of the College

The mission of the Honors College is to provide an enriched educational experience for academically motivated and talented students at Kent State University. Both in and out of the classroom, the college’s learning environment provides students with opportunities to interact and share ideas with other bright, motivated students and mentoring professors.

Founded in 1933, the Honors College is at the center of Kent State University’s tradition of providing special attention to undergraduates with outstanding intellectual and creative ability. Within the framework of the larger university, with its diverse academic programs and excellent research and library facilities, the Honors College offers students enriched and challenging courses and programs, opportunities for close relationships with their peers and faculty, and careful advising to meet their interests and goals.

Scholarships

All new freshman who are admitted to the Honors College will automatically be considered for an Honors College scholarship award. Honors College scholarships are renewable for maximum eight semesters of undergraduate work, provided students remain in good standing with the Honors College. These scholarships are in addition to university awards.

The Honors Concept

The Honors College is guided by two basic principles:

- The first is a responsibility to provide academic work that offers intellectual challenge to the best students in the university and demands of them the best effort of which they are capable. To this end, courses are designed to stretch the mind, sharpen skills and encourage high standards of performance.
- The second principle is a belief that, regardless of degree program, students should be liberally educated. That is, they should understand and appreciate the language, literature and history of our culture; the social, political and economic structure of our society; the creative achievements that enrich our lives; and the basic assumptions and substance of the natural sciences. Honors students are, therefore, encouraged to select courses that provide an understanding of the arts, humanities and sciences.

Honors Advising

Students meet with their Honors College advisors at least once per semester. During advising meetings, students are encouraged to develop long-range plans to organize their academic work and co-curricular experiences in accordance with their interests and career aspirations.

Community

The Stopher-Johnson complex is located at the center of campus. Honors student living there have the best of worlds - a nurturing and stimulating experience with other Honors students as well as convenient access to the surrounding Kent State campus community.

The Honors complex includes the three-story Johnson and Stopher Residence Halls, a library/computer room, a reception lobby and advising offices. Students live just steps from the Honors College dean and its academic advisors.

Student involvement in the affairs of the college is a tradition. For example, Honors students are eligible to serve on the Honors College Policy Council (HOCOPOCO).

Admission Requirements

The Honors College recruits incoming students who demonstrate the potential for superior academic and creative ability at Kent State University. Admission to the Honors College for new freshmen is by invitation only. In addition to the Kent State undergraduate admission application, admission is based on holistic review of many variables, including, but not limited to: high school performance (curriculum, grade point average), essay, extra-curricular activities, work experiences. Standardized tests are considered but not required for admission.

Honors Work

Honors courses can be used to meet requirements in all degree granting colleges and schools of the university and to also satisfy Kent Core requirements. All honors freshmen are enrolled in the year-long Freshman Honors Colloquium. The colloquium is designed to be a rigorous course in reading, thinking and writing about literature and ideas. The goal of the course is to develop habits of intellectual inquiry, mature understanding and effective communication that will serve the students through the college years and afterward.

Beyond the freshman honors colloquium, many Honors courses are offered by distinguished faculty from academic departments throughout the university. Although these courses differ significantly in content, from art to zoology, they share a common form. Class enrollments are small, and students can get to know each other and their professors in an environment that encourages learning through discussion, reading, individual work and writing.

Seniors in the Honors College can conclude their undergraduate careers by completing a sustained scholarly or creative project under faculty guidance. Theses and projects have been submitted by seniors from all of the degree-granting colleges and schools at Kent State University and have ranged over many disciplines and areas of creative endeavor. Novels and plays have been written; research has been undertaken in the natural and social sciences; historical events and periods have been critically analyzed; architectural models have been proposed for urban renewal sites; and paintings and films have been created and exhibited. Each thesis/project attests to the willingness of Honors students to extend learning beyond the classroom to self-directed efforts appropriate to the conclusion of an enriched program of study.

Graduation from the Honors College

The college offers three programs for Graduation with Honors. Although each has minimum cumulative GPA requirements, the primary emphasis is on the successful completion of an undergraduate degree program, including a Senior Honors Thesis or Project.

- Graduation with Departmental Honors requires completion of a Senior Honors Thesis or Project and a minimum 3.5 cumulative GPA. The requirements are sufficiently flexible to enable undergraduates who join the college in their junior year to participate in this program.
- Graduation with General Honors requires completion of a Senior Honors Thesis or Project plus 24 Honors College credit hours and a minimum 3.5 cumulative GPA.
- Graduation with University Honors requires completion of a Senior Honors Thesis or Project plus 24 Honors College credit hours and a minimum 3.8 cumulative GPA.

Students who do not wish to complete a Senior Honors Thesis or Project to graduate with Honors may alternatively finish 24 Honors College credit
Design Innovation (DI)

DI 10010 SURVEY OF DESIGN INNOVATION NODES 3 Credit Hours
Develop awareness and actively utilize the wide array of shared-resource laboratories and environments across Kent State University’s eight campus system that are connected as part of the Design Innovation (DI) Ecosystem. Explore the context of maker-communities, emerging technologies and social innovation resources while working in collaborative cross-disciplinary teams to tackle projects that intentionally connect the capabilities of multiple DI Nodes.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

DI 20020 BE SMARTER THAN YOUR SMARTPHONE 3 Credit Hours
This course uses the development of the smartphone to illustrate the multi-disciplinary nature of design and innovation. It provides an understanding of the technologies that make the smartphone possible. Specifically, the course covers the role of research and design in product development, the changed in patterns and nature of our communications through smartphones, and the implications for businesses, markets and society. The aim of this course is to introduce the multidisciplinary nature of innovation using the smartphone as an example. It presents the complexities, challenges, and opportunities that the smartphone has created.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

DI 20100 INTRODUCTION TO DESIGN INNOVATION 3 Credit Hours
This course blends analytical skills, intuition and creative thinking to develop practical solutions to real world problems. Gain a high-level understanding of the design process through team-based projects tackling challenges. Design thinking, methods and strategies offer novel ways to discover market opportunities, experiment to validate concepts and mitigate risk, and deliver value to all. This will be a reflective lecture and small project-based course that addresses the programmatic, technical, business, social and human factors of design in a way that leads to innovation(s) in the development of integrated solutions. Learn how to engage with end users, effectively frame problems, identify potential solutions, build prototypes to test assumptions and learn what works (and doesn’t). Then dive into a range of ways large and small to bring design innovation into your daily life.
Prerequisite: None.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab
Contact Hours: 2 lecture, 3 lab
Grade Mode: Standard Letter

DI 30099 CHALLENGE-BASED INNOVATION (ELR) 3 Credit Hours
(Repeatable for credit) Challenge-Based Innovation (CBI) is a project and problem-based learning course, where multidisciplinary student teams and their instructors collaborate with faculty researchers, community and industry partners to discover novel solutions for the future of humankind. The projects are an elaborate mixture, proposed by cross-disciplinary faculty teams and derived from using research to tackle messy or complex problems to meet societal, human-driven needs. The multidisciplinary student teams act as catalysts in creating novel solutions to pressing problems.
Prerequisite: None.
Schedule Type: Laboratory, Lecture, Combined Lecture and Lab, Project or Capstone
Contact Hours: 2 lecture, 3 lab
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

DI 49095 SPECIAL TOPICS IN DESIGN INNOVATION STUDIO 1-6 Credit Hours
(Repeatable for credit) Analysis and cross-disciplinary problem-solving of significant and current issues in design innovation not covered in existing design innovation courses. This studio course is offered when opportunities and resources permit; the topic is announced when the course is scheduled.
Prerequisite: None.
Schedule Type: Studio
Contact Hours: 2-6 other
Grade Mode: Standard Letter

DI 49099 SPECIAL TOPICS IN DESIGN INNOVATION WORKSHOP (ELR) 1-4 Credit Hours
(Repeatable for credit) This course supports brief, intensive and interactive activities that address a narrowly defined range of problems in which the content is practical and concentrates on the acquisition of specific information and skills related to practices in design innovation. The variable credit format allows for intensive challenges that might occur in short periods, and that might be focused on a single problem.
Prerequisite: None.
Schedule Type: Project or Capstone, Workshop
Contact Hours: 1-4 other
Grade Mode: Satisfactory/Unsatisfactory
Attributes: Experiential Learning Requirement

DI 49995 SPECIAL TOPICS IN DESIGN INNOVATION 1-3 Credit Hours
(Repeatable for credit) Analysis and cross-disciplinary problem-solving of significant and current issues in design innovation not covered in existing design innovation courses. This course is offered when opportunities and resources permit; the topic is announced when the course is scheduled.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 1-3 lecture
Grade Mode: Standard Letter
DI 49999  DESIGN INNOVATION GRAND CHALLENGES STUDIO PROJECT (ELR)  3 Credit Hours
(Repeatable for credit) A cross disciplinary project-based capstone course that collaboratively focuses on a single grand challenge. Challenges range from those identified by GrandChallenges.org, "solving global health and development problems for those most in need" to one of the "Grand Challenges for Engineering", to one from the list regularly updated by the National Science Foundation, to a pressing challenge identified by the faculty. Taught by a multidisciplinary team of primary instructors with input from industry leaders with complementary expertise, the collaborative effort of students, faculty members, industry partners and/or community leaders, focuses on developing robust multi-perspective, actionable solutions considering multiple criteria including but not limited to technical, socio-cultural and economic dimensions. Outcomes range from early designs, to physical prototypes or policy solutions with an understanding of how to take them to a next phase. Travel component may be included.
Prerequisite: None.
Schedule Type: Project or Capstone
Contact Hours: 6 other
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

Honors (HONR)
HONR 10010  HONORS LEADERSHIP ACADEMY  2 Credit Hours
This course will examine effective leadership in the public and nonprofit sectors from both a theoretical and practical perspective. Using course readings, discussions, and assignments students will be challenged and equipped to serve as actively engaged citizens at the university and in the greater community. Students will examine the complexities of generational leadership, working in groups, using effective communication, inspiring a shared vision and purpose, group problem solving, and decision making, ethical leadership, civic engagement, and leading in communities of difference. This class will feature multiple learning methods including lectures, class discussion, case studies, group exercises, in and out-of-class assignments, presentations, and self-reflection. This course aims to teach first semester Honors freshmen students how to be engaged Honors College leaders from the beginning of their college career.
Prerequisite: None.
Schedule Type: Seminar
Contact Hours: 2 lecture
Grade Mode: Standard Letter
HONR 10096  INDIVIDUAL HONORS WORK  1-4 Credit Hours

Mission of the College

The mission of the University College is to help students explore, engage and succeed with purpose.

The college's record of innovation includes 14 national awards, three internationally certified programs and nearly $8 million in grant funding in the past several years.

Initiatives in the University College for students to succeed include the following:

- Involvement in Destination Kent State: New Student Orientation increases students feeling connected to campus, ability to find resources they need and increases their feeling of being prepared to start college.
- Students who regularly attend services offered by the Academic Success Center are 11.4 percent more likely to return for the next academic year than their classmates.
- Students who attend six or more Academic Success Center sessions per semester earn 0.65 higher course GPA on average.
- The college's Office of Career Exploration and Development helps our students find on-campus employment, and these students are more likely to earn higher grades and stay in school.
- “Early and Often Advisement” – First-year students engage in career experiences at the same rate as senior students.
- Students who participate in the Exploratory Advising Center's EXCEL Living Learning Community are nearly 10 percent more likely to return to Kent State compared to their peers.
- Student Support Services exceeded all Ohio Department of Education performance goals by 10 percent or more.

Students in Kent State University's Cooperative Education Program (co-op) enhance their degree program by relating theory to practice and applying what they have learned in the classroom to real-life workplace scenarios. This process of "learning by doing" increases student motivation and employability after graduation and maximizes student growth and development. Through a co-op experience, students explore career and academic options, test career choices, increase professional skills and earn money to contribute to educational expenses. Cooperative education experiences are highly desired, selective and in the student's chosen field.

All students participating in a co-op experience must register for COOP 20092 (non-credit, offered through University College) and pay the co-op fee. Enrollment in the course is restricted by special approval, and students may only register after submission and approval of all application forms. Enrollment in the course will ensure the student is designated and reported as a full-time student and permit the student to have access to all student services and resources during the co-op semester. Students participating in a cooperative education course do not earn credit hours the semester away. As a result, students are not eligible to receive federal or state grants, student loans or institutional scholarships. However, students will be reported to their federal loan services as enrolled full-time, allowing for student loans to remain in the in-school deferment status and therefore not enter repayment.

Admission Requirements

- Students must have one semester as a degree-seeking student at Kent State prior to their first co-op rotation.
- Students must be enrolled as a half- or full-time student (minimum 6 credit hours) in the semester prior to enrollment in the co-op education program.
- Students must have earned a minimum 2.000 overall GPA at the time of their co-op application.
- Students must have no holds on their student's record from any source (financial, academic, conduct).
- Cooperative position must be approved and relevant to students' career direction.
- Students must have received a completed grade and have resolved any outstanding non-completed grades for previous co-op rotations.
- International students must receive work authorization prior to enrolling in each co-op rotation.

The University College will work with the student's college to assess all applicants holistically, considering their academic progress, related experience, academic and extracurricular activities, among others, to evaluate the student's likelihood of success in the program.

Exploratory Program

The Exploratory pre-major affords a tremendous opportunity for students explore, engage and succeed with purpose—confidently declaring their major. Students benefit from the guidance, advising and support offered in the Exploratory Program. Beginning in a student's first semester, academic advisors partner with students through their exploration process with a personalized Exploratory Plan.

Examples of Declared Majors

The top majors declared by students earning a degree from Kent State in 2021 who started in the Exploratory program:

- Psychology
- Nursing
- Public Health
- Human Development and Family Studies
- Criminology and Justice Studies
- Business Management
- Communication Studies
- Biology
- Marketing
- Finance
- Public Relations
- English
The Exploratory pre-major does not lead to a degree. Students must declare a degree major by the time they have earned 45 credit hours at Kent State University.

The Exploratory pre-major comprises the following interest areas.

- **Aeronautics, Applied Engineering and Technology.** Are you curious about how things work? Are you a great problem solver, have a flare for detail and organizing and an interest in green technologies that can improve the quality of life for people? Maybe you enjoy using technology to get things done or to solve problems when they arise, or you spend time playing flight simulation video games. If so, you might wish to consider careers in aviation, emerging technologies, production or manufacturing and sustainability.

- **Biological Sciences, Health and Wellness.** Are you committed to improving the health and well-being of others? Do you like to study human behavior or want to pursue a career in nursing, nutrition, speech pathology and audiology, counseling or other health-related fields? You may want to consider a major in the area of biological sciences, health and wellness where you will learn to use the knowledge and techniques of biological and biomedical science as well as the knowledge of the helping professions to promote the maintenance of health and the prevention of illness.

- **Business.** Are you a problem solver and good communicator? Do you like to think strategically and lead others? You may find that a major in the area of business is right for you. Learn to analyze business problems through the development of skills in accounting, finance, economics and information systems and gain an understanding of real-world business problems through case studies and simulations.

- **Communications, Journalism and Media.** If you can imagine yourself writing for a major news organization, producing television shows and movies, providing corporate training and development, designing political or health campaigns, working as a social media manager, creating advertising or public relations campaigns or working as a speech writer for CEOs or political leaders, majors in this field will appeal to you. Opportunities spanning multiple industries await you in TV, radio, film, print or electronic media, corporate communications, international business and diplomacy. Learn different aspects of communication and information theory, research, use and practice while engaging in scholarly investigations and practical applications of the elements and means of creating, managing, using and evaluating messages.

- **Computers, Mathematics and Information Sciences.** Can you easily solve a Rubik’s cube or disentanglement puzzle, figure out logic teasers or optical illusions and decrypt secret message codes? These games of strategy are good indicators that your problem-solving and critical thinking skills could be applied to the study of information and computation, as well as the new area of digital sciences. Understand the properties, uses and impact of the programs used to implement software and use that understanding to create new programs or improve existing ones.

- **Design.** Do you enjoy the process of communicating through visual means – using illustration, photography, motion graphics or the Internet to express a concept or solve a problem? Are you intrigued by the use of lights, stage props and sound in theatre and dance productions to create unique environments? Or perhaps the environment you are interested in is one of residential and commercial spaces – the lighting, interior materials and color, signage and graphics or the very structure and form of a building. Are you admired for your sense of fashion and have an ability and interest in designing and constructing your concepts? A wide range of academic programs in design provide students with an opportunity to merge a creative life with a profession and to work individually, collaboratively or within an organization to bring value and beauty to our global community.

- **Education and Teaching.** Can you envision yourself shaping young minds and preparing them for a successful future? Do those who know you well describe you as nurturing, patient, organized, a multi-tasker good at explaining things and somewhat conventional in your views? If these adjectives resonate with you, then you’ll probably find a rewarding career as an educator. For those interested in advanced degrees in schools, schooling, education in non-school settings and leadership positions, there are opportunities to add endorsements, licenses or degrees to strengthen knowledge in teaching, learning, administration and leadership in a variety of disciplines.

- **Government, Public Policy and Justice.** Are you able to resolve disputes? Are you committed to the pursuit of truth? If you are also a detailed problem solver, articulate communicator, and passionate about righting wrongs, you should explore majors in this area. Study the action, regulatory measures, laws, social service agency engagement, social justice and funding priorities developed by government, agencies or representatives, and use qualitative and quantitative methods to understand and assess their impact.

- **Human Services and Social Sciences.** Do you want to make a difference in the lives of others? As long as you are resourceful, committed, empathic and empowering, you can help to change the world. Start living out your calling by providing a voice for the people who need it most.

- **Languages, Literature and Culture.** Have you wondered about people and their roots and history? Do you enjoy languages? Study the creation, organization and use of human knowledge, belief and behavior. Investigate how the development of symbolic languages and social learning have impacted shared attitudes, values, goals and practices associated with human institutions, organizations and groups.

- **Physical Sciences and the Environment.** If you are intrigued by the natural world and its sustainability, you may have happened upon your ideal area of study. You should be highly inquisitive, detail oriented, analytical and adventurous. Or, you may choose to prepare for scientific careers in the fascinating world of physical science, which uses experimental and quantitative methods to study, model and understand natural and physical phenomena.

- **Sport, Recreation and Hospitality.** Do you want to be in the business of playing? Your competitive, persistent nature will serve you well on the athletic field, as well as in sports management or marketing/promotion. You may also consider the hospitality industry and event planning or community-based park and wellness facilities. The ability to plan activities, motivate and involve participants is critical.

- **Visual and Performing Arts.** Do you find it exciting to express your ideas and emotions through art, music or dance? Are you intrigued by the process of staging productions? Do you enjoy studying the history of visual and performing arts? If you are disciplined, energetic and drawn to challenging artistic environments that demand your best, then a major in the visual and performing arts could be the right choice for you. Study at the graduate level fosters an exciting intersection between professional training and academic excellence where you are encouraged to create artistic projects that combine theory, history, criticism, pedagogy and interdisciplinary studies.

To assist students in making informed major choices by the time they reach 45 credit hours, all Exploratory students participate in personalized
Exploration Plan. There are six main components of the Exploration Plan that students participate. Students will:

1. Select one of **13 areas of interest** to begin exploring. This is the first step and will be completed before the student's first semester.
2. Create a **Major Action Plan** using the results of a career readiness inventory and continuously update the plan until a major is declared.
3. Engage in the **First Year Experience** course (UC 10097), which will focus on the transition to college and utilizes a curriculum developed specifically for exploratory students, including career exploration, developing an awareness of diverse perspectives, learning about their strengths, interests and much more.
4. Enroll in **Coursework with Peers**, providing students with the opportunity to network with fellow peers and create study groups. Some of the courses include Kent Core and introductory courses.
5. Enroll in **Career Navigation** in the student's second semester. In this course, students explore themselves, explore careers, make connections and set career-related goals. As a bonus, if students are part of the Exploratory Learning Community, they will take this course with other learning community students.
6. Participate in the **Exploratory Learning Community**. The Exploratory Learning Community is designed to assist students in confidently selecting their major with programming focused on exploration of careers and majors, leadership and academic success. Joining the learning community is a great way for students to build connections with their peers and gain access to more support through their career and major exploration. The Exploratory Learning Community is housed in Lake Hall for students living on campus; however, Honors College students living in honors housing and students who commute may also join.

Each Exploratory student is assigned an academic advisor. The expert academic advisors are focused on partnering with the student. This partnership includes guiding students through their personalized Exploration Plan, keeping them on track to declare their major (and staying on track to graduate as planned), and celebrating their major declaration and graduation. Exploratory academic advisors are housed in the Exploratory Advising Center; students have a minimum of one required meeting with an advisor each semester.

**Admission Requirements**

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**First-Year Students on the Kent Campus:** First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

**First-Year Students on the Regional Campuses:** First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

**Roadmap**

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

A and AS Levels

Kent State accepts for credit the successful completion of A (Advanced) Level and AS (Advanced Subsidiary) Level qualification conferred as part of the General Certificate of Education administered by AQA, Edexcel or the University of Cambridge International Examinations.

The A and AS Levels Credit Chart gives information about these exams and credits earned for passed exam reports. The chart reflects Cambridge exam numbers and syllabi, but exams from other sources will be cross-referenced by the Office of Global Education in consultation with faculty upon evaluation of scores.

An official score report must be submitted to Kent State before A- and AS-level credit can be applied to a student’s academic record. Specific questions regarding how these credits apply to program requirements should be directed to the student’s major program’s college office.

Academic Standing - Graduate Student

Good academic standing indicates that students are meeting university and program requirements and are making satisfactory progress towards their degree. The definition of satisfactory performance and progress toward completion of the degree may differ among degree programs; therefore, it is imperative that each graduate program have these requirements in writing in their graduate handbook and distribute them to graduate students when they matriculate into the program.

Progress Toward Degree Completion

All graduate students are expected to meet university and program requirements, and to make systematic progress toward completion of their degree. This progress includes satisfying the conditions listed below and achieving the requirements set by the individual degree program.

Students who fail to satisfy the requirements of their degree program and/or the conditions outlined below may be dismissed from the program.

1. Students must maintain their status as degree-seeking student by registering for at least 1 graduate credit hour that contributes to their degree requirements as determined by their graduate program each year (defined as three consecutive terms, including summer as one term) or by taking an approved leave of absence. Courses taken for audit and course withdrawals will not be counted as fulfilling the minimum enrollment requirements. Meeting this minimum enrollment requirement does not guarantee students will meet the minimum requirements of other programs, offices or agencies.

2. Students are expected to maintain a minimum 3.000 grade point average (GPA). A graduate student who receives more than 8 credit hours of grades lower than B or more than 4 credit hours of grades lower than C is subject to dismissal. Some programs impose higher standards.

3. Doctoral students must comply with the time limits for passing candidacy (five years from first enrollment) and for passing the final oral examination (five years from candidacy). Individual degree programs may have shorter time limits.

4. Students must comply with the time limits for graduation (six years from first enrollment for master’s students and 10 years from first enrollment for doctoral students). Individual degree programs may have shorter time limits. Students in the College of Podiatric Medicine must successfully complete graduation requirements within six years of their first enrollment. Exceptions to this time limit must be approved by the Council on Podiatric Medical Education.

In addition to the performance and progress made upon the conditions listed above, individual degree programs will review student performance in the fulfillment of the degree program’s requirements. Consideration may include, but is not limited to, such factors as performance during informal coursework and seminars, research capability and performance, professional standards of conduct and the number of grades of AU (Audit), IN (Incomplete), IP (In Progress) and W (Withdrawal) on a student’s record.

Grades below C are not counted toward completion of requirements for any graduate degree, but are counted in the graduate GPA. Credit hours earned in undergraduate courses are not counted toward completion of any graduate degree and are not counted in the graduate GPA. A change by a graduate student from one department or program to another does not remove from the student’s GPA the grades that were earned in the first enrollment. Refer to the Grading Policies and Procedures in the University Catalog for information on grades and administrative marks and their application to the GPA.

Review of Academic Performance

Each graduate program should review the academic performance and progress of its students, according to university and program requirements, at least once per academic year. Reviews may result in one of four outcomes (six outcomes for students in the College of Podiatric Medicine):

- Dean’s list
- Good standing
- No action
- Warning
- Probation
- Dismissal

DEAN’S LIST

Full-time students in the College of Podiatric Medicine who have a minimum 3.500 current GPA for the fall and spring semesters and earned no grade below a C or S (Satisfactory) in all course/rotation work will be cited on the Dean’s List at the end of each semester. Only students taking a full course load will be eligible for the Dean’s List.

GOOD STANDING

Students in the College of Podiatric Medicine are considered to be in good standing if they are meeting course and/or program expectations and have not failed any requirements.

NO ACTION

If a student’s performance and progress are satisfactory, the program may provide the student with written communication regarding the student’s satisfactory performance and progress in the degree program.

WARNING

A warning may be issued to a student if the student’s performance and/or progress falls slightly below expectations (e.g., failure to make timely progress on thesis or dissertation; overall GPA is 3.000 or higher, but term GPA is below 3.000).
The department chair, school director or program coordinator administrating the program will provide the student with written communication regarding the warning, including expectations for future performance and a timetable for the correction of deficiencies. Warnings are documented by the graduate program and may be communicated to the college dean, or designee.

PROBATION
Review of a student’s performance and progress may result in probation. Probation may be issued for a student who deviated suddenly and substantially from program expectations, for a student who was previously issued a warning and did not correct the deficiency that caused the warning, or for a student who was previously issued a warning and corrected the deficiency but failed additional performance requirements. A graduate program may issue multiple semesters of probation for a student, but only one semester may be issued at a time. Students in the College of Podiatric Medicine will have the probation noted on their student record, including the official transcript.

The department chair, school director or program coordinator administrating the program will provide the student with written communication regarding the probation including expectations for future performance and a timetable for the correction of deficiencies. Probations are documented by the graduate program and communicated to the college dean, or designee.

A student on probation will be reviewed by the program at least once each semester. The review may result in return to good academic standing, continued probation or dismissal from the program. To return to good academic standing, the student must have corrected the deficiency that caused the probation decision, as well as continued to meet other program and university requirements. Coursework used in raising the student’s grade point average must be a part of normal degree requirements and must be approved in advance by the program. The department chair, school director or program coordinator must notify the college dean, or designee, of the review outcome.

ACADEMIC DISMISSAL
Review of a student’s performance, progress and adherence to professional standards in a graduate program may result in a recommendation for academic dismissal. Refer to the Dismissal and Appeal—Graduate policy in the University Catalog for more information.

1 Refer to the College of Podiatric Medicine’s section in the University Catalog for GPA expectations for students seeking the Doctor of Podiatric Medicine degree.
2 College of Podiatric Medicine students are ranked at the end of each semester according to their overall grade point averages. Ranking is done on an individual basis by class year.
3 A student on an official leave of absence cannot be issued probation. A student may not be appointed or reappointed as a graduate assistant while on probation.

Academic Standing - Undergraduate Student
Because undergraduate students must earn a minimum 2.000 overall grade point average (GPA) to graduate from the university, they must maintain that average throughout the undergraduate years. Students whose GPA falls below 2.000 should make a positive effort to improve their academic performance. Such students should devote their entire attention and energies to their studies by improving study habits and concentrating on such basic skills as composition, reading and mathematics.

The following academic standing designations apply to undergraduate students:

President’s List
In recognition of an extremely high level of academic excellence, a President’s List is compiled each academic semester. To qualify, students must have a 4.000 GPA in the semester and must have completed 15 or more credit hours (all of which must have regular letter grades) by the end of that semester. This notation will be printed on students’ official transcripts.

Dean’s List for Full-Time Students
In recognition of academic excellence, a Dean’s List is compiled each academic semester. To qualify, students must have a minimum 3.400 GPA in the semester and must have completed 12 or more regular letter-graded credit hours by the end of that semester. This notation will be printed on students’ official transcripts.

Dean’s List for Part-Time Students
A Dean’s List for Part-Time Students is compiled after spring semester grades are issued. To qualify, students must have a minimum 3.400 GPA in 12 or more regular letter-graded hours taken during the previous summer, fall and spring semesters. Such students must have registered for fewer than 12 hours in each of the semesters under consideration. This notation will be printed on students’ official transcripts.

In Good Academic Standing
Students with a minimum 2.000 GPA are in good academic standing. Students with an overall GPA below 2.000 are placed on academic probation. Good academic standing is not the same as eligibility for financial aid or for participation in other activities of the university such as athletics, student organization leadership, extracurricular activities, etc. For information about eligibility standards, students should contact the appropriate office or organization.

Midterm Warning
Students who earn a midterm GPA of less than 2.000 will be placed on midterm warning.

Semester Warning
Students with a minimum 2.000 overall GPA who earn a semester GPA of less than 2.000 in any given semester will be placed on semester warning.

Selected Academic Program Warning
If a student’s GPA does not meet the standards required for a selective program, the dean may place the student on selective academic program warning. The student would be allowed to remain enrolled in the selective major while attempting to improve academic performance.

Not Permitted to Continue
Students not progressing academically in their selected academic program will be deemed not permitted to continue based on criteria.

1 Refer to the College of Podiatric Medicine’s section in the University Catalog for GPA expectations for students seeking the Doctor of Podiatric Medicine degree.
2 College of Podiatric Medicine students are ranked at the end of each semester according to their overall grade point averages. Ranking is done on an individual basis by class year.
3 A student on an official leave of absence cannot be issued probation. A student may not be appointed or reappointed as a graduate assistant while on probation.
established by their program area. Refer to the Not Permitted to Continue policy in the University Catalog for more information.

**Academic Probation**

Students who fail to maintain a minimum 2.000 overall GPA will be placed on academic probation. This probation signifies that the cumulative performance is below the minimum university requirement for graduation. Probation is an emphatic warning to the students that the quality of their academic performance must improve if they are to obtain the minimum grades required for graduation. Students on probation must show considerable improvement in their academic work or they will be dismissed from the university. Students on probation must reduce their course load to 15 hours and may receive a prescription from the dean of their college or campus that they further reduce their hours carried until removed from probation. The students also should reduce participation in social and extracurricular activities. Students are removed from probation only when they have achieved a minimum 2.000 overall GPA. Students on probation will be notified by their dean's office.

In addition, the following students will be placed on academic probation:

1. Students reinstated to the university after being dismissed because of poor scholarship.
2. Transfer students whose cumulative records at all previous institutions do not meet the minimum GPA requirements of Kent State University.

**Academic Dismissal**

Students whose academic performance indicates a limited chance of obtaining the minimum grades required for graduation will be subject to dismissal from the university. Refer to the Dismissal, Appeal and Reinstatement—Undergraduate policy in the University Catalog for more information.

**Advanced Placement (AP)**

The College Board Advanced Placement (AP) program awards college credit based on college-level high school courses and tests administered through the high schools. The State of Ohio, working through the University System of Ohio, has initiated policies to facilitate the ease of transition from high school to college as well as between and among Ohio's public colleges and universities.

Beginning in fall 2009:

- Students obtaining an AP exam score of 3 or above will be awarded the aligned course(s) and credits for the AP exam area(s) successfully completed.
- General education courses and credits received will be applied towards graduation and will satisfy a general education requirement (Kent Core) if the course to which the AP area is equivalent fulfills a requirement.
- If an equivalent course is not available for the AP exam area completed, elective or area credit will be awarded in the appropriate academic discipline and will be applied towards graduation where such elective credit options exist within the academic major.
- Additional courses or credits may be available when a score of 4 or 5 is obtained. Award of credit for higher score values varies depending on the academic discipline.
- In academic disciplines containing highly dependent sequences (e.g., sciences, technology, engineering and mathematics), students are strongly advised to confer with their advisor to ensure they have the appropriate foundation to be successful in advanced coursework within the sequence.

Kent State will not accept AP credit from a high school or out-of-state transcript. Students must submit either an official score report from the College Board or, upon special request, a transcript from an Ohio college or university with the AP credit displayed. Visit the Credit Transfer Office’s AP website for more information on scores and credits earned.

**Alternative Credit Programs**

After enrollment at Kent State in an undergraduate degree or certificate program, students may be awarded credit toward their academic program through methods other than completing Kent State coursework. This credit may shorten the time required to complete a Kent State degree.

For information on credit awarded for transfer coursework earned before or after matriculation at Kent State, refer to the Transfer of Undergraduate Credit policy in the University Catalog.

Credit will not be awarded for any exam or content that duplicates the content of a college course for which a student has already received credit or if a student has completed more advanced study, i.e. beyond the level covered by an exam. Evaluation of credit earned by alternative methods is based on articulated course and requirement equivalencies in effect at the time the credit is requested. General guidelines for alternative credit types accepted by the university are described in the sections below.

A and AS Levels
Kent State accepts for credit the successful completion of A (Advanced) Level and AS (Advanced Subsidiary) Level qualification conferred as part of the General Certificate of Education administered by AQA, Edexcel or the University of Cambridge International Examinations.

The A and AS Levels Credit Chart gives information about these exams and credits earned for passed exam reports. The chart reflects Cambridge exam numbers and syllabi, but exams from other sources will be cross-referenced by the Office of Global Education in consultation with faculty upon evaluation of scores.

An official score report must be submitted to Kent State before A- and AS-level credit can be applied to a student’s academic record. Specific questions regarding how these credits apply to program requirements should be directed to the student’s major program’s college office.

College Level Examination Program (CLEP)
Students may earn academic credit through the College Board’s College Level Examination Program (CLEP) administered at Kent State by the Office of Academic Engagement and Degree Completion. CLEP allows a student to earn college credit for prior knowledge and move on to more advanced coursework sooner. Credit hours, but no letter grade, is granted for scores that meet the minimum for each exam as determined on the CLEP guide for the Kent State University Catalog in effect at the time of the exam.

For additional CLEP information, including available tests, Kent State course equivalents and test dates, visit the Office of University Advising and Testing’s website. Refer to the Alternative Credit-Testing Eligibility policy at the end of this section for more regulations on earning credit through testing.

College Tech Prep (CTP)
Kent State University will award college credit to students who successfully complete an approved College Tech Prep (CTP) program. Credit received through the CTP program is applied toward an appropriate degree at Kent State as identified in the signed articulation agreement. A student-articulated credit application for CTP credit is available from the CTP teacher or high school guidance counselor or on the Kent State Tech Prep website.

To earn Kent State University credit, students must:
• Complete the state-approved CTP program with a minimum B grade
• Graduate from high school
• Enroll at Kent State and request credits within three years after high school graduation
• Meet any additional criteria identified on the articulated credit application

Credit By Examination (CBE)
Students with demonstrable ability and knowledge in a particular subject area may earn credit in selected courses though Credit-By-Examination (CBE), coordinated by the Office of the University Registrar. Students who wish to pursue CBE must complete the CBE application to gain appropriate college and departmental permission. The appropriate academic department administers the exam, which may include the completion of additional assignments. The minimum passing standard for CBE is the equivalent of a C grade. However, no letter grade, only credit hours, are posted to the academic transcript for CBE.

For the CBE application, per-credit-hour fee and a list of available courses, visit the Office of the University Registrar’s CBE website. Refer to the Alternative Credit-Testing Eligibility policy at the end of this section for more regulations on earning credit through testing.

DANTES Subject Standardized Tests (DSST)
Formerly known as the Defense Activity for Non-Traditional Educational Support (DANTES) exams, the DANTES Subject Standardized Tests (DSST) is a nationally recognized program that gives students the opportunity to receive college credit for learning acquired outside the traditional college classroom. Kent State accepts the American Council on Education (ACE) recommendations for the minimum score required and the amount of credit awarded. Official score reports or a joint services transcript (JST) must be submitted to Kent State before the credit can be applied to a student’s academic record.

For information on credit options for military students, visit the Credit Transfer Office website.

Industry-Recognized Certifications, Examinations and Professional Training
Kent State accepts many industry-recognized certifications, examinations and professional training as prior learning credit applicable toward degree programs upon programmatic approval. Kent State awards academic credit following recommendations from the American Council on Education (ACE) and the Ohio Department of Higher Education. Official documentation from the issuing company or professional organization must be submitted to Kent State before credit can be applied to a student’s academic record.

Industry-recognized certifications, examinations and professional training that is not evaluated by ACE may be considered for academic credit. Students who wish to request credit for training not yet evaluated must complete the industry/training credit application, including submission of all documentation to determine whether academic credit is to be awarded. All credit for industry/professional training appears on the student transcript without a grade.

Students should contact the Credit Transfer Office for more information on the types of certifications, examinations and professional training accepted and the approval process. Official documentation from the issuing agency must be submitted to Kent State before the credit can be applied to a student’s academic record.

International Baccalaureate (IB)
Students who complete the International Baccalaureate (IB) Diploma Programme, a rigorous two-year course of pre-university studies in their high school, may be awarded credit toward a degree or certificate at Kent State. An official IB transcript must be submitted to Kent State before the credit can be applied to a student’s academic record. (A notation on a high school transcript will not be accepted.)
Kent State accepts scores of 5, 6 or 7 for higher-level (HL) and standard-level (SL) IB exams toward specific course equivalencies and general education requirements (e.g., Kent Core, diversity). Visit the Credit Transfer Office’s IB website for more information on these scores and credits earned.

**Military Training**

Kent State University awards academic credit for military coursework according to recommendations listed on the Joint Services Transcript (JST). All eligible credits must be recognized by the American Council on Education (ACE). Kent State awards Military Transfer Assurance Guide (MTAG) coursework for articulated credit as established by the Ohio Department of Higher Education. Service members can visit Kent State’s Credit Transfer Office website for information regarding requesting and submitting military transcripts.

Service Examinations: Credit is awarded for some experiences in basic training that are equivalent to specific beginning Physical Activity, Wellness and Sport (PWS) courses at Kent State University. Credit is awarded on the basis of recommendations from the School of Teaching, Learning and Curriculum Studies in the College of Education, Health and Human Services.

In order for credit to be granted in any of the above areas, a transcript or certificate of completion or a veterans DD 214 form is required. In addition, Kent State reserves the right to set the percentile score that is necessary for satisfactory performance in a course and for the granting of credit. Credit will not be given for duplicate work taken through any of these agencies.

**Military Transfer Credit Appeals Process**

Students must submit, in writing, a letter of appeal regarding their military transfer credit to the Credit Transfer Office c/o Kent State University. Upon recommendation by the Transfer Review Committee, students will be notified of the outcome, in writing. Information regarding the standards for satisfactory performance or to submit an appeal may be found on the Credit Transfer Office website.

**Retroactive Credit**

Undergraduate students currently enrolled in a degree or certificate program who are placed into an advanced course through assessment or departmental review may earn retroactive credit for designated lower level course(s) in the subject. The advanced courses approved for earning retroactive credits are listed below.

To apply for retroactive credit, students must submit an application for retroactive credits to the Office of the University Registrar.

The following stipulations apply:

- Students must complete the advanced course at Kent State with a minimum C or S (Satisfactory) grade to be eligible for retroactive credit. Courses taken for the pass/fail grade or audit mark will not be accepted for retroactive credit.
- Students who withdraw from or fail to meet the minimum C or S grade in the advanced course may retake the course and apply for retroactive credit once the minimum C or S grade is achieved and posted.
- Course credits earned through the retroactive policy are not assigned a letter (A-F) grade. The mark CR will be posted to a student’s transcript for the enrolled term the student applied for the retroactive credit.
- Retroactive credit will count toward students’ class standing, total credit hours earned for graduation and hours required for graduation honors.
- Retroactive credit will not count in students’ grade point average (GPA), quality points and residence requirement.
- Students are not eligible for retroactive credit if they previously earned college credit for a course that is comparable to a lower level course in the same subject of the advanced course. Previous college credit includes credit earned through exam (e.g., AP, CLEP), courses transferred from other college-level institutions, tech prep programs or dual enrollment in a high school; or any other alternative credit listed in the University Catalog.
- Not all courses that offer retroactive credits are available each semester.
- Retroactive credit is not available for graduate courses.
- Students may apply for retroactive credit following the posting of the grade at any time before graduation, but no later than the second Sunday of the semester in which they are graduating.

A fee per credit hour is charged for processing and posting of the credit on the student’s transcript. The Kent State Retroactive Credit Chart provides information about eligible courses and credits earned.

**Alternative Credit-Testing Eligibility**

The student’s college determines eligibility for testing. The following regulations govern credit through testing:

1. Credit is awarded on a course-by-course basis. Students may be tested for Credit-By-Examination (CBE) only once for any given course. Students may not attempt a course CBE for which they have previously attempted through the College Level Examination Program (CLEP).
2. New students may take the CLEP before beginning work at Kent State University. CBE is available to currently enrolled degree- and certificate-seeking Kent State students only.
3. Students are allowed to take CBE only if they are in good standing (i.e., not on probation).
4. Students may not take CLEP or CBE for any course:
   a. In which they have audited
   b. In which they are currently enrolled
   c. In which they have previously enrolled and earned a grade, including withdrawal (A-F, AU, IN, IP, NF, NR, S, SF, U, W, Y or Z)

In subject fields in which knowledge is sequential or accumulative (e.g., mathematics, foreign language), courses are structured in prescribed sequences. Students who have received credit for, or established proficiency at, one level in such a sequence (either by testing or by enrolling in and completing the course) cannot subsequently earn CLEP or CBE credit for any prior course in the sequence or in any lower level sequence. Students who want to earn CBE for more than one course in such a sequence must complete CBE one course at a time, beginning with the lowest level course for which they want to receive academic CBE credit.

Students approaching graduation must complete all CBE and CLEP credit by at least the semester proceeding the semester in which they plan to graduate.
Students who sign up for CBE must take the exam within 60 days of the payment date of application. If they do not, they forfeit any fees paid and must reapply to take the exam.

**Alternative Credit-Testing Eligibility**

The student’s college determines eligibility for testing. The following regulations govern credit through testing:

1. Credit is awarded on a course-by-course basis. Students may be tested for Credit-By-Examination (CBE) only once for any given course. Students may not attempt a course CBE for which they have previously attempted through the College Level Examination Program (CLEP).

2. New students may take the CLEP before beginning work at Kent State University. CBE is available to currently enrolled degree- and certificate-seeking Kent State students only.

3. Students are allowed to take CBE only if they are in good standing (i.e., not on probation).

4. Students may not take CLEP or CBE for any course:
   a. In which they have audited
   b. In which they are currently enrolled
   c. In which they have previously enrolled and earned a grade, including withdrawal (A-F, AU, IN, IP, NF, NR, S, SF, U, W, Y or Z)

In subject fields in which knowledge is sequential or accumulative (e.g., mathematics, foreign language), courses are structured in prescribed sequences. Students who have received credit for, or established proficiency at, one level in such a sequence (either by testing or by enrolling in and completing the course) cannot subsequently earn CLEP or CBE credit for any prior course in the sequence or in any lower level sequence. Students who want to earn CBE for more than one course in such a sequence must complete CBE one course at a time, beginning with the lowest level course for which they want to receive academic CBE credit.

Students approaching graduation must complete all CBE and CLEP credit by at least the semester proceeding the semester in which they plan to graduate.

Students who sign up for CBE must take the exam within 60 days of the payment date of application. If they do not, they forfeit any fees paid and must reapply to take the exam.

**Award of a Master's Degree to a Doctoral Student**

A student who has been admitted to and is currently pursuing a doctoral degree may apply for a master’s degree in the same department in which the doctorate is to be taken. Upon certification that the student has met the requirements for the master’s degree in that department, the degree may be awarded. The total number of graduate hours required for the doctorate shall not be altered thereby.

**Candidacy for Doctoral Degree**

To become a candidate for the doctorate, a student must pass a candidacy (comprehensive) examination in the field of the major subject. This examination will be taken when departmental requirements have been met, but it should not be taken later than nine months before the student expects to receive the degree. The content and scope of the examination are determined by the department concerned. The examination may be either written or oral or both. The student is not permitted to continue with the dissertation unless this requirement is satisfied. Failure on the candidacy examination and a subsequent prescription and reexamination are subject to departmental policy. When opportunities for such reexamination are exhausted without success, the student will be dismissed from graduate study.

For candidacy of the Doctor of Podiatric Medicine degree, refer to the college policies in the College of Podiatric Medicine section of the University Catalog.

**Catalog Rights and Exclusions**

**Policy Statement**

The university has established the following Catalog rights and exclusions relating to requirements for students in an academic program (major, minor, certificate). While these Catalog rights establish specific academic program requirements for students, the exclusions noted ensure that the knowledge and skills acquired by students will be current with the state of knowledge in their fields of study.

**Rights**

1. The students’ academic requirements for graduation are based on the Catalog year that is assigned initially to the student’s first term of enrollment in a degree or certificate program at Kent State University.

2. Students are permitted to complete an academic program (major, minor, certificate) under a more recent Catalog year. When changing Catalog year, students must comply with all the requirements relevant to their program in the newer Catalog year. After a Catalog year is updated, students are not permitted to revert to an older catalog year.

3. Students may declare a different Catalog year for a minor, certificate or second major/degree. However, students must comply with all the requirements relevant to the additional program in the different Catalog year.

4. Catalog rights may be granted through mutual agreements with other institutions. Such rights are subject to the same exclusions noted below.

**Exclusions**

1. Students are governed by the academic policies in the Catalog in effect for the current academic year, regardless of students’ first term of enrollment.

2. Students who transfer to another university and return to Kent State are readmitted under the Catalog in effect for the term of readmission.

3. Dismissed students are reinstated under the Catalog in effect for the term of reinstatement.

4. Undergraduate students who interrupt their enrollment at the university for one full academic year or longer, consecutively, including summer, are updated to the Catalog in effect for the term of their most recent re-enrollment. Transfer work and alternative credit do not qualify as enrollment at Kent State University.

5. Kent State will not permit admission or reentry into programs that are no longer offered.

6. Undergraduate students who are enrolled continuously in a degree or certificate program in a catalog older than six years may be required to update to a more recent Catalog.

7. The university reserves the right to change academic requirements to keep programs in compliance with accreditation, certification, licensure or industry standards. In these situations, the college...
administering the program may update students to a more recent Catalog year.

8. The university reserves the right to change academic requirements due to financial urgency, unavailability of faculty or unavailability of other instructional resources. Where programmatic changes are required that do not alter the core academic requirements of the university, the students’ college dean will identify available alternatives for currently enrolled students to complete their declared program(s).

9. Course specifications such as title, credit hours, prerequisites, status (e.g., Kent Core), etc., are based on the term for which the student registered for the course. If the course is revised after the student completed it, the student does not gain or lose anything with that revision. In the event that a change in prerequisite, for example, would substantially disadvantage a continuously enrolled student by unreasonably adding one or more courses to that student’s academic requirements, the college administering the student’s program may authorize course substitutions, waiver(s) or some other appropriate alternative.

10. The university reserves the right to change course specifications; cancel a scheduled course; and change the time, location or delivery of class meetings for a scheduled course. If a course is canceled, every attempt will be made to contact the registered students. Students registered in canceled courses will be given the opportunity to change to another course with seats available.

Revision History
Amended August 2020: Revised policy clarifies how catalog year is assigned and the meaning of a catalog year; adds limitation that students cannot revert after updating catalog year; replaces term “in force” with “in effect”; adds disclaimer that colleges may approve appropriate substitutions or waivers if changes to courses substantially disadvantage enrolled students; and adds university’s rights to cancel courses and change the time, location or delivery of a scheduled course.

Change in Graduate Program of Study
Because admission to a graduate degree program involves admission to both the program and the university, a change in program of study (degree, major, concentration or catalog year) requires approval. Admission to a new program is not automatic.

A graduate assistantship normally does not transfer with students who are approved for admission into a different graduate program. Doctoral candidacy status does not transfer to a new graduate program. International students must consult with the Office of Global Education to determine how a change of program affects their visa status.

Procedures
Students interested in changing their program of study should first contact the graduate coordinator of the proposed program to gain a clear understanding of the program’s requirements. Admission requirements, deadlines and required application materials vary by graduate program, and it is the student’s responsibility to adhere to the requirements and deadlines.

Students must contact the graduate coordinator of the proposed program to determine whether they submit either a Change in Program of Study form or a new application. The determination of whether a form or application should be submitted is based on the proposed program’s judgment about the amount, and availability, of application materials needed by the program in order to make an informed admission decision. More significant program changes (e.g., change to a major within a different department/school) likely will require a new application, while less significant changes (e.g., change to another concentration within the same major in the same department/school) likely will require completion of the Change in Program of Study form.

In some cases, the proposed program will accept application materials that had been submitted to the student’s original graduate program. In other cases, new materials may be required. If the proposed program will accept materials that were submitted along with the student’s application to the current program, the student must contact the Division of Graduate Studies to request that the materials be added to the new application.

The proposed program will review the application/form and all materials according to established procedures. Applicants who do not meet the minimum university and/or program requirements may be considered for conditional admission. If the student is admitted into the program, the program will determine how much of the student’s previously completed work may be applied toward the new graduate degree, in accordance with the university’s transfer of credit policy.

Class Attendance and Absence
Regular attendance in class is expected of all students at all levels at the university. The individual instructor has both the responsibility and the prerogative for managing student attendance. The instructor’s policy regarding attendance for each course should be written in the course syllabus and communicated to students during the first week of the term.
The policy may take alternate forms within the bounds of appropriate instructional techniques.

If students anticipate an absence, they should consult with the instructor individually. Legitimate reasons for an “excused” absence include, but are not limited to, illness and injury, disability-related concerns, military service, death in the immediate family, religious observance, academic field trips, participation in an approved concert or athletic event and direct participation in university disciplinary hearings.

Even though any absence can potentially interfere with the planned development of a course, and the student bears the responsibility for fulfilling all course requirements in a timely and responsible manner, instructors will, without prejudice, provide students returning to class after a legitimate absence with appropriate assistance and counsel about completing missed assignments and class material. Neither academic departments nor individual faculty members are required to waive essential or fundamental academic requirements of a course to accommodate student absences. However, each circumstance will be reviewed on a case-by-case basis.

In all instances of absences, students shall be responsible for all material covered in class during their absence. Students are responsible for completing any makeup work resulting from their absence. In no case is an excuse from class to be interpreted as a release from class responsibility.

The general procedures and responsibilities for requesting and determining legitimate class absence can be found in policy 3-01.2 of the University Policy Register.

Classification of Undergraduate Students

An undergraduate student is classified as follows:

- FRESHMAN — 0 to 29 credit hours of earned credit
- SOPHOMORE — 30 to 59 credit hours of earned credit
- JUNIOR — 60 to 89 credit hours of earned credit
- SENIOR — 90 credit hours to graduation

College Credit Plus

College Credit Plus is offered through the University College for middle/high school students (grades 7-12) who want to take Kent State courses at any Kent State campus, online, hybrid in-class/online or at their middle/high school. The course is taught by either a Kent State faculty member or a Kent State-qualified secondary instructor.

A College Credit Plus course offered in middle/high schools through the university must duplicate the course offered by Kent State to matriculated students. Courses must be approved for College Credit Plus status, and credit awarded must be deemed acceptable for transfer by the appropriate Kent State academic department/school.

Students enrolled in College Credit Plus courses must adhere to the deadline dates specified by Kent State for registration, drop, withdrawal and refund. Kent State may give priority to matriculated students for course registration over College Credit Plus students. However, once a College Credit Plus student has been registered into a course, Kent State will not displace that student for another student.

Kent State will provide students full access to Kent State libraries and electronic databases, as appropriate, and general academic support services, including academic advising, regardless of whether the course is taken in person, online or at a middle/high school.

Kent State is responsible for maintaining a College Credit Plus student’s college transcript. Courses will be identified on the Kent State transcript as a college-level course. The middle/high school is responsible for maintaining the student’s middle/high school transcript. The evaluation of courses when transferring to a college or university other than Kent State is the purview of that college or university.

College Credit Plus students are limited to a maximum of 30 credit hours per academic year and a maximum of 120 credit hours overall prior to high school graduation. Students who wish to continue at Kent State University after high school graduation should apply for admission as new freshmen during the fall of their senior year.

For more information, please visit Kent State’s College Credit Plus website.

College Level Examination Program (CLEP)

Students may earn academic credit through the College Board’s College Level Examination Program (CLEP) administered at Kent State by the Office of Academic Engagement and Degree Completion. CLEP allows a student to earn college credit for prior knowledge and move on to more advanced coursework sooner. Credit hours, but no letter grade, is granted for scores that meet the minimum for each exam as determined on the CLEP guide for the Kent State University Catalog in effect at the time of the exam.

For additional CLEP information, including available tests, Kent State course equivalents and test dates, visit the Office of University Advising and Testing’s website. Refer to the Alternative Credit-Testing Eligibility policy at the end of this section for more regulations on earning credit through testing.

College Tech Prep (CTP)

Kent State University will award college credit to students who successfully complete an approved College Tech Prep (CTP) program. Credit received through the CTP program is applied toward an appropriate degree at Kent State as identified in the signed articulation agreement. A student-articulated credit application for CTP credit is available from the CTP teacher or high school guidance counselor or on the Kent State Tech Prep website.

To earn Kent State University credit, students must:

- Complete the state-approved CTP program with a minimum B grade
- Graduate from high school
- Enroll at Kent State and request credits within three years after high school graduation
- Meet any additional criteria identified on the articulated credit application

Combined Bachelor’s/Master’s Degree Program

Date Revised: May 11, 2020

Classification of Undergraduate Students
Policy Statement

A combined bachelor's/master's degree program allows exceptional, well-prepared Kent State University undergraduate students early admission into a graduate program. Students in a combined degree program take graduate-level coursework as undergraduate students, thus enabling courses to be applied toward both degree programs.

Students in a combined degree program must meet the minimum requirements for each degree earned. Undergraduate requirements must be fully satisfied before a bachelor's degree will be awarded. Until that time, students continue to have undergraduate student status and are charged undergraduate tuition and fees. Following the awarding of the undergraduate degree, their status is changed to that of graduate student.

Eligibility for Admission

To be eligible for admission to a combined degree program, undergraduate students must meet the following stipulations:

1. Earn a minimum 60 credit hours (junior standing)
2. Achieve a minimum 3.000 overall Kent State GPA (some combined degree programs may require a higher GPA)
3. Complete a standard online graduate application, including paying the application fee
4. Meet all admissions requirements for the master's degree program (consult the University Catalog for specific requirements)
5. Be admitted to the master's degree program
6. Submit the Combined Bachelor's/Master's Degree Form prior to the first semester of enrollment in the combined program

Application of Graduate Credit

Undergraduate students in a combined degree program may complete 9-12 credit hours of graduate-level coursework, depending on the approved combined degree program (see list), and apply the courses and credit hours toward their undergraduate degree. Once students complete the undergraduate degree and enter graduate student status, their graduate-level coursework may be applied toward the graduate degree (i.e., courses are double counted). Students who undertake a combined bachelor's/master's degree program must complete a minimum 141 unique credit hours, with a minimum 30 of those credit hours applied toward the master's degree.

To be eligible for double counting, the coursework must meet all the following criteria:

1. Be of graduate level – under no circumstances will undergraduate-level coursework be applied toward the master's degree
2. Apply to degree requirements for the bachelor's and master's degrees
3. Are not awarded as credit by examination
4. Meet minimum standards as described in the Academic Standing - Graduate policy in the University Catalog

Revision History

Amended August 2020: Revised policy replaces specific GPA per credit hours with a minimum 3.000 overall GPA for eligibility for a combined degree program; removes requirement that a letter grade must be earned in courses that will be doubled counted toward both the bachelor's and master's degrees; and removes categories of formal and informal combined degree programs.

Course Numbering System

Kent State University's numbering system for courses is as follows:

<table>
<thead>
<tr>
<th>Range</th>
<th>Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>00000-09999</td>
<td>Developmental level</td>
</tr>
<tr>
<td>10000-19999</td>
<td>Freshman level</td>
</tr>
<tr>
<td>20000-29999</td>
<td>Sophomore level</td>
</tr>
<tr>
<td>30000-39999</td>
<td>Junior level</td>
</tr>
<tr>
<td>40000-49999</td>
<td>Senior level</td>
</tr>
<tr>
<td>50000-59999</td>
<td>Master's level</td>
</tr>
</tbody>
</table>
Developmental courses (00000-09999) are considered pre-college level. Refer to the Developmental Coursework policy in the University Catalog for more information.

Undergraduate courses (10000-49999) are generally open to students of a class rank equivalent to the levels indicated. Students participating in the Honors, Early Admissions and Advanced Placement (AP) programs, as well as those who otherwise present evidence of qualifications beyond their class rank, may enroll in the appropriate undergraduate courses with the approval of their advisors and the instructors or departments offering the courses.

Most courses are offered in a regular sequence to meet students’ programmatic needs; however, the availability of any specific course in a given semester is subject to sufficient student demand and available resources. Some courses require that a special fee be paid in addition to instructional and general fees. A listing of courses with these special fees can be found on the Bursar’s Office website.

Courses numbered 50000 and above are for graduate students only and are referred to as graduate courses. Many of the 50000-level courses are also offered at the 40000 level for undergraduates. Students who have already completed 40000-level courses may not repeat the courses at the 50000-level for credit toward a graduate degree. No more than one-half of a graduate student’s coursework may be taken in 50000-level courses.

Course Privilege for Doctoral Students

A doctoral student will be allowed, with the consent of the advisor and of the instructor concerned, to enroll in any course offered at Kent State University.

Course Repeat

Policy Statement

Students must register and pay tuition and any applicable fees when repeating a class. All course attempts and grades appear on the student transcript, including grades not calculated in the GPA. A student’s Kent State GPA will not be affected by repeating courses at another institution. The university is not obligated to offer courses so that students can repeat them. If students plan to repeat a course, they are to work with their advisor to identify resources for academic support. Repeating courses could affect students’ financial aid, scholarships or other assistance. Students should consult the appropriate office prior to registration. Students may repeat courses taken at Kent State University subject to the following provisions:

Undergraduate Courses

Students may repeat undergraduate courses (00000-40000 levels) no more than two times (a maximum of three attempts per course). The university will use only the highest grade and the credit hours associated with that highest grade in all attempts of the same course in the calculation of the overall undergraduate GPA, program GPA, credit hour totals and requirements for students’ program.

Additional conditions for the repeating of undergraduate courses:

- After the third attempt (second repeat), the student is restricted from registering for the course again.
- Withdrawal from a course is counted as an attempt.
- Courses designated as “repeatable for credit” (see section below) are exempt from the three-attempt limit.
- Recalculation of the student’s GPA occurs automatically at the end of the semester in which the student completes the repeated course.
- All grades for all attempts at a course are used in the GPA calculation for determining Latin honors (e.g., summa cum laude) and class standing (e.g., dean’s list). These GPA calculations are independent of the overall GPA as it appears on the student transcript.
- All grades for all attempts may be counted for admission to or progression in specific programs, for admission to graduate programs or for admission to other institutions.

This policy is in effect for all undergraduate courses repeated in or after the fall 2019 semester.

Graduate Courses

Students may repeat graduate courses (50000-80000 levels), and the university will use all grades (passed and failed) in the calculation of the overall graduate GPA. Earned credit for a course applies only once toward meeting program requirements and credit hour totals.

Repeatable-for-Credit Courses

Some undergraduate and graduate courses are identified as “repeatable for credit” in the course description. Typically, a repeatable-for-credit course offers a different instructional experience and learning outcomes each time students take the course (e.g., internship, special topics, applied music). For those courses, students earn credit for each successful attempt, and the university uses all grades (passed and failed) for all attempts in the calculation of the GPA.

Students repeating a repeatable-for-credit course should consult the University Catalog and their advisor because some academic programs have a limit on the total number of credit hours that may be applied for these types of courses.

Reason for Policy

Students may need to repeat a course to fulfill a requirement to earn a degree or certificate. This policy outlines limitations when repeating a course and the effect of a repeated course on the student’s GPA.

Frequently Asked Questions

1. What has changed with the course repeat policy?
   A major change is that, effective fall 2019, students may repeat any undergraduate course (00000-40000 levels), and the university will count only the highest grade from all attempts of the same course in the student's undergraduate GPA. Before fall 2019, this policy extended only to lower-division (0000-20000 levels) courses.

2. Will the revised course repeat policy affect current or returning students even if they are not in the 2019 catalog (or later)?
   The revised policy affects all students IF they repeat an upper-division course in fall 2019 or later. Below are some scenarios:
   a. Student repeated an upper-division course prior to fall 2019. Both grades (initial attempt and repeat) count in the student's GPA under them previous course repeat policy.
   b. Student attempted an upper-division course prior to fall 2019 and repeats the course in fall 2019 or later. The highest grade from the two attempts counts in the student's GPA.
   c. Student repeated an upper-division course prior to fall 2019. The GPA includes both grades. Then, the student repeats the course a second time in fall 2019 or later. The highest grade from the three attempts (initial attempt and two repeats) counts in the student's GPA.

3. If a student who repeated a course under the previous course repeat policy upgrades to the 2019 catalog, will the student be able to take advantage of the revised policy?
   No, the revised policy is enacted by a student's course repeats in fall 2019 or later, and not by the student's catalog year.

Revision History

Amended August 2019: Revised policy allows all repeated undergraduate courses to be eligible for GPA recalculation for graduation.

Amended August 2015: Revised policy limits the number, to three, of overall attempts to an undergraduate course before a student can no longer register for that course. The student must then meet with meet with an advisor to decide next steps.

Amended August 2010: Revised policy clarifies that any student who has already received a bachelor's degree from any college or university is ineligible to use a course repeat to remove a grade from the GPA.

Amended August 2008: Revised policy allows lower-division courses taken for an earned associate degree to be repeated for a GPA recalculation; but prohibits course repeats for GPA recalculation after conferral of the bachelor's degree.

Amended January 2008: Revised policy counts only the highest grade earned in a repeated lower-division course in the GPA, subject to specific provisions.

Amended August 1987: Revised policy allows the grade in the second attempt of a passed undergraduate course (with approval) to count toward graduation.

Amended August 1980: Revised policy allows the grade in the second attempt of a passed undergraduate course (with approval) to count in the GPA, although the grade does not count toward graduation.

Amended September 1971: Revised policy limits the credit hours and grade in the second attempt of a passed undergraduate course (with approval) from counting toward graduation and in the GPA. Students may repeat courses that are identified as repeatable for credit.

Amended September 1970: Revised policy requires dean approval for students to repeat an undergraduate course in which the student already received a passing grade, and the credit hours and grade in the second attempt do not count toward graduation. All grades count in the GPA.

Effective September 1952: Establishes a formal course repeat policy that specifies that students are not eligible automatically to repeat an undergraduate course. However, under certain conditions and with dean and department head approval, only the grade in the second attempt may be used for the student's scholastic standing.

Credit By Examination (CBE)

Students with demonstrable ability and knowledge in a particular subject area may earn credit in selected courses through Credit-By-Examination (CBE), coordinated by the Office of the University Registrar. Students who wish to pursue CBE must complete the CBE application to gain appropriate college and departmental permission. The appropriate academic department administers the exam, which may include the completion of additional assignments. The minimum passing standard for CBE is the equivalent of a C grade. However, no letter grade, only credit hours, are posted to the academic transcript for CBE.

For the CBE application, per-credit-hour fee and a list of available courses, visit the Office of the University Registrar’s CBE website. Refer to the Alternative Credit-Testing Eligibility policy at the end of this section for more regulations on earning credit through testing.

Credit-Hour Requirement for Graduation

Undergraduate Students

All students in bachelor's degree programs must satisfactorily earn (with passing grades) a minimum of 120 credit hours of coursework to graduate. Associate degrees are awarded for the successful completion of a minimum of 60 credit hours of coursework. Some bachelor's and associate degree programs require more hours than the 120 and 60, respectively.
As part of this requirement, students must complete a minimum 36 credit hours of the Kent Core for the bachelor’s, Associate of Arts and Associate of Science degrees. Students must complete a minimum 15 credit hours of the Kent Core for applied and technical associate degrees.

Students who have had coursework or credits waived may be allowed to graduate from their program when they earn fewer than the minimum credit hours stated for that program in the University Catalog provided that they fulfill all requirements for the program and meet the university minimum credits hours for graduation.

Graduate Students
All master’s degree students must satisfactorily complete a minimum 30 credit hours applicable toward a master’s degree in order to graduate. Some master’s degree programs require more credit hours.

While the well-prepared doctoral candidate may expect to meet formal course requirements (exclusive of dissertation) for the doctoral program by completing a minimum of two years of full-time work beyond the baccalaureate, departments may require more extensive preparation where needed. In order to qualify for a doctoral degree, students must present a minimum of 90 credit hours beyond the bachelor’s degree, or 60 credit hours beyond the master’s degree. These hours may include registration for coursework, individual investigation or research courses and dissertation. Only work of high quality is approved for doctoral credit.

DANTES Subject Standardized Tests (DSST)
Formerly known as the Defense Activity for Non-Traditional Educational Support (DANTES) exams, the DANTES Subject Standardized Tests (DSST) is a nationally recognized program that gives students the opportunity to receive college credit for learning acquired outside the traditional college classroom. Kent State accepts the American Council on Education (ACE) recommendations for the minimum score required and the amount of credit awarded. Official score reports or a joint services transcript (JST) must be submitted to Kent State before the credit can be applied to a student’s academic record.

For information on credit options for military students, visit the Credit Transfer Office website.

Destination Kent State: First Year Experience
All undergraduate students are required to satisfactorily complete the Destination Kent State: First Year Experience course at any one of Kent State’s eight campuses with the following exceptions:

1. Incoming students who are designated by Kent State admissions as adult students (21 years or older). These students are encouraged to contact the Center for Adults and Veteran Services or a Regional Campus advising office for information regarding the availability of special orientation programs for adult students.
2. Students who transfer 25 or more credit hours from another higher education institution, excluding post-secondary and dual-enrollment credit (College Credit Plus).

Full-time students are expected to complete the First Year Experience course during their first semester of enrollment. Part-time students are expected to complete the course before they attain sophomore standing (30 credit hours).

Developmental Coursework
“Developmental” means a course that is below college level and cannot be applied toward a certificate or degree program. At Kent State, course numbers that begin with a “0” (e.g., MATH 00022) are designated as developmental and may be prescribed or recommended through placement testing. Although these courses will count toward the course load for financial aid and other purposes, credit hours earned in these courses will be subtracted from the students’ total before graduation. None of these courses may be taken pass/fail.

Students placed into any developmental course must continuously enroll in the course(s) each semester until they successfully complete the course or sequence of courses. Students who delay the start of their developmental mathematics coursework more than one semester must be reassessed for placement (a fee may be charged). Students who are placed into a developmental mathematics course and whose program has a specific mathematics requirement must continuously enroll in the course(s) each semester, beginning with their first semester at Kent State, until they successfully complete their first non-developmental mathematics requirement.

Dismissal and Appeal - Graduate
Academic Dismissal
Review of a graduate student’s performance, progress and adherence to professional standards in a graduate program may result in a recommendation for academic dismissal. Expectations for academic performance, progress and professional standards must have been communicated to students in writing at the time of matriculation into the program.

The decision for academic dismissal rests with the department chair, school director or program coordinator administering the program. Students who have been dismissed will be provided the decision in writing along with information on their right to appeal the decision (see dismissal appeal section below).

Students who are dismissed from their degree program—or from all programs for students admitted to a dual degree or multiple programs—are dismissed from Kent State University. The college notifies the Office of the University Registrar to remove the student immediately from the program(s) and from any future-registered courses. The University Registrar will note on the student’s record, including the student’s official transcript, that the student was academically dismissed as of the term of the dismissal decision.

Students admitted to a dual-degree or multiple programs who are dismissed from only one of the programs are not dismissed from the university and may continue in the other program. Undergraduate students admitted to a combined bachelor’s/master’s degree program who have been dismissed from the undergraduate program are dismissed from the graduate program.

Dismissed students who wish to enroll in a different graduate program or in coursework at Kent State must complete an application for admission and follow the graduate admission procedures found in the University Catalog.

DANTES Subject Standardized Tests (DSST)
In the College of Podiatric Medicine, determinations for dismissal are made in accordance with the grading policy. The final decision rests with the Academic Appeals Committee. The director of academic services and institutional research is responsible for providing the student with written communication regarding the dismissal decision and notifying the university registrar to remove the student from the program and all registered courses. For more information on that college's policy for dismissal, refer to the College of Podiatric Medicine section of the University Catalog.

**Appeal of Dismissal**

Students who are dismissed have the right to appeal the decision. Students who are dismissed from more than one program must appeal each dismissal separately.

**Appeal Process**

Students may appeal to the college dean, or designee, for the dismissal decision made at the department, school or program level in that college. If conditions or causes exist requiring a modification of the time limits listed below, it is the responsibility of the college dean, or designee, to assess such circumstances and determine the nature or extent of any such modification. If the college dean, or designee, decides to modify the time limits, the college dean, or designee, immediately will inform all parties involved.

1. If the student decides to appeal the dismissal decision, the student must submit the appeal in writing to the appropriate college dean, or designee, within 10 weekdays of receipt of the decision for dismissal. In the written appeal statement, the student must state clearly the reasons why the decision is being appealed, the nature of the appeal, the facts and circumstances leading to the appeal, reasons in support of the appeal and the remedy or remedies requested. The appeal statement submitted by the student becomes the basis for all further consideration of the matter.

2. Upon receipt of the student's appeal statement, the dean, or designee, convenes the college's dismissal and appeals committee to review and make a recommendation on the appeal.

3. The college dean, or designee, must send a copy of the appeal statement to the chair, director or coordinator who issued the dismissal decision. The chair, director or coordinator may respond to the student's appeal and include any information or documentation related to the response. The chair, director or coordinator will provide that written response to the college's dismissal and appeals committee, with a copy sent to the student.

4. The college's dismissal and appeals committee shall examine and evaluate fully the dismissal decision, including any supporting documentation submitted by the student or by the chair, director or coordinator who issued the dismissal. At its discretion, the committee may interview the student and/or the chair, director or coordinator and/or consult with any others who the committee believes may assist in the review of the appeal.

5. The college's dismissal and appeals committee is expected to conduct its review as expeditiously as possible. If a full committee is unable to convene in a timely manner, the college dean, or designee, will determine—with input from the student and the chair, director or coordinator who issued the dismissal decision—if the appeal review process will proceed with limited committee members or will be scheduled to convene at a later, predetermined time.

6. Once the review of the appeal is completed, the committee's chair must forward a written recommendation to the college dean, or designee. The recommendation becomes part of the student's record.

7. The college dean, or designee, shall make the final decision and provide that decision in writing to the student, with a copy sent to the university registrar, the college's dismissal and appeals committee and the chair, director or coordinator who issued the dismissal.

8. If the appeal is approved, the university registrar will re-enroll the student into the program, and the student may re-register for courses. The notation of the student's dismissal is updated or removed from the student's record (depending on the decision).

**College of Podiatric Medicine**: For dismissal appeal procedures in the College of Podiatric Medicine, refer to that college's section in the University Catalog. Dismissed students who are reinstated are placed on academic probation with a notation on their transcript, until outstanding failures have been satisfactorily resolved. Students who are officially dismissed from the college for any other reason are not eligible for re-admission consideration at any time. Any student who has been officially dismissed two times from the college is ineligible for re-admission consideration at any time.

---

1 A student on an official leave of absence cannot be dismissed.

**Dismissal, Appeal and Reinstatement - Undergraduate**

**Academic Dismissal**

Undergraduate students whose academic performance indicates a limited chance of obtaining the minimum grades required for good academic standing will be subject to dismissal from the university.

The provost may dismiss a student if any of the following conditions apply to that student:

1. Any student who earns between a 0.000 and 0.500 grade point average (GPA) in the student's first semester at Kent State.

2. Any continuing student who is:
   a. Placed on academic probation (0.000 to 1.999 overall GPA) for the last term of attendance at the undergraduate level, and
   b. Earns between 0.000 and 1.999 semester GPA in the term under review, and
   c. Earns one of the following:
      i. Between 0.000 and 1.099 overall GPA for students with 0.000 to 29.999 GPA credit hours* or
      ii. Between 0.000 and 1.499 overall GPA for students with 30.000 to 59.999 GPA credit hours* or
      iii. Between 0.000 and 1.749 overall GPA for students with 60.000 to 89.999 GPA credit hours* or
      iv. Between 0.000 and 1.999 overall GPA for students with 90.000 or more GPA credit hours*.

3. Any full-time student in the student's first semester at Kent State or on academic probation who receives 9 or more credit hours of any combination of the following grades or marks in the semester under review: F (Fail), NF (Never Attended--Fail), SF (Stopped Attending--Fail), U (Unsatisfactory). This policy applies without regard to whether the designated grades were included or excluded from the student's overall GPA.
4. Any less-than-full-time student in the student’s first semester at Kent State or on academic probation who receives 6 or more credit hours of any combination of the following grades or marks in the semester under review: F (Fail), NF (Never Attended—Fail), SF (Stopped Attending—Fail), U (Unsatisfactory). This policy applies without regard to whether the designated grades were included or excluded from the student’s overall GPA.

A student who is dismissed should expect to be away from the university for a minimum of 12 consecutive months. A dismissed student may not register for any coursework at any campus of Kent State University. The notation of academic dismissal will be printed on the student’s official transcript. For further information concerning the conditions of academic probation and dismissal, students should contact their college or campus advising office. See guidelines for dismissal appeals below.

* "GPA credit hours" are credit hours earned with a Kent State grade that counts toward the student’s GPA (e.g., 3 credit hours earned with a B grade at Kent State).

Dismissal Appeal

A student who is dismissed has the right to appeal the decision. Appeals must be based on recent circumstances that were beyond the control of the student. Appeals must be made in writing to the college or campus at which the student was enrolled at the time of the dismissal.

The appeal letter must be composed, typed and signed by the student. The appeal letter may be delivered personally or sent by mail, fax or e-mail from the student’s Kent.edu account, and must include all pertinent documentation for the appeal to be considered. Appeal letters for dismissals must be received by the college or campus no later than 10 calendar days after final grades are posted on the student’s FlashLine account. Dates when final grades are posted can be found at the calendar page of the Office of the University Registrar website.

Appeal letters must include the following:

1. An explanation of the extenuating circumstances, such as personal illness/injury, critical family illness or other situations of sufficient severity that they may have adversely affected academic performance. These circumstances must be documented by providing physician statements or other appropriate official documents.
2. Proof of consistent satisfactory academic performance prior to the occurrence of the circumstances believed to be the cause of the dismissal. These efforts must be documented by course instructors, and their statements must be submitted on university letterhead or sent from each instructor’s Kent State e-mail address. If errors have occurred for one or more reported grades, the course instructor must verify that a grade change has been submitted.
3. An explanation of why action such as course withdrawal, complete term withdrawal, request for an incomplete grade, etc., was not taken before the end of the semester.
4. A detailed plan of action for achieving academic success for any future enrollment at Kent State University.
5. The student’s full name, Kent State ID number, current and permanent mailing addresses, current and permanent telephone numbers and Kent State e-mail address.

Appeals that do not meet these guidelines will not be reviewed.

Reinstatement

Reinstatement after dismissal from Kent State University is neither automatic nor guaranteed. A student may be reinstated only if the student provides convincing evidence of probable academic success if permitted to return to the university. A dismissed student who has previously accumulated a substantial number of credit hours and/or an excessively low GPA should expect that reinstatement is not likely to be approved.

Application for reinstatement after the required period of time away from the university should be to the dean of the college or campus that houses the major program the student wishes to enter. Students wanting to be reinstated into a program with selective admission requirements, specified certification standards or additional graduation requirements may be approved to be reinstated into the university but not into that particular program. The application should include convincing evidence of the student’s motivation to continue and of the student’s specific efforts during the period of dismissal to eliminate previous weaknesses. After evaluating the application for reinstatement and all supporting materials, the dean will inform the student of the reinstatement decision.

A student who is reinstated is automatically placed on academic probation until good academic standing (minimum 2.000 overall GPA) is attained. Academic requirements will be determined by the Catalog-in-force at the time the student re-enrolls at the university. For further information concerning reinstatement, students should consult their college or campus advising office.

Dissertation for the Doctoral Degree

Policy Statement

A dissertation is required of each candidate for the Ph.D. degree. The dissertation must demonstrate that the student has acquired the ability to conduct research in a discriminating and original manner. The dissertation should make a significant enough contribution to the field in which it is written that at least one scholarly article suitable for publication in a professional journal may be derived from it or that the findings of the dissertation would be otherwise publishable.

Dissertation Registration and Applicability Toward Degree

Each doctoral student, upon admission to candidacy, must register continuously for Dissertation I (8x199) each semester (fall, spring) for a total of 30 credit hours. A student who has completed the required 30 credit hours of Dissertation I but has not finished the dissertation is expected, thereafter, to register continuously for Dissertation II (8x299) each semester (fall, spring) until all degree requirements are met.

Students who are planning to defend their dissertation in summer or early fall, or who are requiring access to university resources during the summer months — including, but not limited to, feedback or mentoring from their dissertation advisors, use of university buildings and other research resources — must register for dissertation in the summer term. For students in good standing, those credit hours will be approved by the academic unit administrator. The student receives an In-Progress (IP) administrative mark until the dissertation is completed, at which time the IP mark is changed to either the Satisfactory (S) or Unsatisfactory (U) grade.
No more than 30 credit hours of Dissertation I may be counted toward completion of degree requirements. Credit hours earned in Dissertation II do not, under any circumstances, count toward the degree.

**Dissertation Prospectus**
The dissertation topic must be approved by the academic unit and filed with the college dean no later than one semester preceding that in which the candidate expects to receive the degree. Each graduate unit has adopted a procedure for the preparation of a dissertation prospectus. This document will normally include an outline of the parameters of the projected dissertation topic with a statement of the problem to be undertaken, the procedure or methodology to be used in the research, a preliminary review of the literature substantiating the need for the study, and the principle sources of information for the dissertation. The prospectus must be in writing, but an oral presentation may also be required.

**Dissertation Committee**
When the student has developed a dissertation topic acceptable to the advisor, a dissertation committee is convened, responsible for overseeing the progress of the candidate's dissertation. The graduate/program coordinator appoints the members of the committee in consultation with the student and the student's advisor. This group will consist, at minimum, of four members:

1. The advisor, who chairs the committee
2. Two additional members from the candidate's program
3. One faculty member from a discipline outside the program

The advisor and two committee members must be members of the graduate faculty who have been approved to direct dissertations. The remaining members of the committee must have associate or full graduate faculty status and be approved to serve on a dissertation committee. A co-advisor, if used, will count as one of the above members.

Special permission must be obtained from the college dean for anyone on the dissertation committee who does not meet the qualifications stated above.

**Examination Committee**
When the advisor believes the candidate's dissertation is ready for preliminary approval, the advisor will convene an examination committee. The examining committee will consist of members of the dissertation committee and an appointed graduate faculty representative. The procedures for appointing the graduate faculty representative are detailed in the procedures section below.

Once the graduate faculty representative is appointed, the advisor will submit the dissertation to the members of the committee for a 10-day reading period of the dissertation. Following the reading period, the advisor will convene the examining committee to evaluate the dissertation. The advisor will note and communicate to the candidate any revisions recommended by the committee. When, in the opinion of the advisor and the candidate, the appropriate revisions have been made, the advisor will inform the graduate/program coordinator, the academic unit's lead administrator and the college dean.

**Final Examination (Oral Defense)**
Upon completion of the revisions, if any, the student will be required to defend the findings before a committee of graduate faculty members, including the dissertation committee and others chosen by the academic unit and college dean. The final oral defense will be open to the university community. The procedures for the defense are detailed in the procedures section below.

**Dissertation Submission**
After passing the oral examination, doctoral candidates must submit their dissertation in electronic form to the OhioLINK Electronic Thesis or Dissertation (ETD) Center, where the dissertation is made publicly available. The dissertation must include an abstract of maximum 350 words. Information on the process can be found on the University Libraries guidelines for ETD preparation website. The dissertation must be prepared according to established guidelines, which are available in the college office.

Individual units may still require submission of a paper copy for their archives, and the deadline for the dissertation to be filed in the college office is the last day of classes for the term of graduation (some colleges may require an earlier deadline). It is the responsibility of the doctoral student to fulfill this requirement.

All dissertations must be published according to a plan provided by ProQuest for the purposes of archiving, indexing and dissemination. All communications and relations between faculty or students and ProQuest shall be carried out only through the Kent State University librarian. Publication of the complete dissertation or significant parts of it through other avenues is expected, but this is not to be used in lieu of the requirement stated herein.

**Reason for Policy**
Policy enforces uniform standards for the doctoral dissertation submission and oral defense and defines the dissertation committees and applicability toward the doctoral degree.

**Procedures**

**Procedures for Appointing the Graduate Faculty Representative**
The college dean, or designee, will appoint the graduate faculty representative to the examining committee after consultation, when appropriate, with the advisor or lead administrator of the academic unit. The graduate faculty representative must have the following credentials:

- Directed a dissertation to completion
- Familiar with the general content area of the candidate's dissertation
- Outside the candidate's program or outside the candidate's area of focus

The graduate faculty representative may be appointed from outside the university but still must have directed a dissertation to completion.

The principal responsibility of the graduate faculty representative is to preside and moderate the final examination (oral defense) and to note whether the nature of the questioning of the faculty and the responses of the candidate meet highly respectable scholarly standards. Any concerns must be presented immediately to the college dean or designee. As moderator, the graduate faculty representative should ensure that all participants in the defense act in a civilized, polite and proper manner. The graduate faculty representative should be familiar with the procedures of the oral defense and has the authority to suspend the examination should a situation arise that would not be conducive to a fair examination.

The graduate faculty representative is expected to question the candidate and to vote on the passing of the final examination.

If a separate moderator for the final oral defense is desired, that individual will be selected by the dissertation committee from the members of
the graduate faculty who have been approved to direct dissertations. The separate moderator will not be a faculty member in the candidate’s program.

Procedures for the Final Examination (Oral Defense)
When the dissertation committee has met and has agreed to proceed to the final examination, the advisor will designate the time and place of the final oral defense and notify the student and all members of the examining committee.

The oral defense is open to any member of the University wishing to attend and, therefore, a facility adequate to meet this requirement should be provided. The defense should be scheduled to allow a minimum of 10 days for all members of the examining committee to review the dissertation; this is in addition to the 10-day period preceding the dissertation committee meeting.

In the absence of the advisor, the lead administrator of the academic unit may postpone the oral defense. In the case of long-term absence or enduring illness of the advisor, the lead administrator, in consultation with the college dean, should make appropriate arrangements for a substitute.

The dissertation must be in final form (not merely a late draft but also not necessarily the final typed copy) prior to the final oral defense. Students are permitted to number their pages in pencil to reduce the cost of final changes that may result from the oral defense. If, in the opinion of more than one member of the examining committee, the dissertation is not in acceptable final form, the oral defense will not be held. An acceptable final form refers to the substance and usefulness of the dissertation as well as the quality of the writing. The decision to halt the defense is to be determined by vote prior to the final oral examination and without the candidate or others being present. If a negative vote occurs, the candidate may be called in to provide clarification.

A rescheduling of the oral defense, if necessary, will occur when, in the opinion of the advisor and the student, the dissertation has been modified to incorporate the suggested changes. The dissertation must be acceptable, with no more than one dissenting vote, before the rescheduled final oral can be held. If the dissertation is not in suitable form at this second scheduled oral, the advisor will notify the college dean. Further action is then the responsibility of the college dean.

The final oral defense will be open to the university community. The advisor should notify the academic unit of the time and place of the so that it may be announced in a suitable way. The student should provide copies of the dissertation abstract to the academic unit so that it will be available to interested individuals prior to the defense to familiarize members of the graduate faculty with the methodology and findings.

Students may participate in the oral defense in a different location than the committee members (i.e., by web conferencing) if they are declared in a fully online degree program or have obtained permission in advance from the committee chair. See the policy on remote participation in a thesis or dissertation defense in the University Catalog.

The candidate will open the defense with a brief presentation of dissertation findings, after which the members of the examining committee will question the candidate in an order to be determined by the moderator. When, in the opinion of the moderator, members of the examining committee have had an adequate opportunity to question the candidate, the moderator may open the examination to appropriate questions from others present. Questions dealing with the substance, meaning and usefulness of the research in the dissertation are of greatest propriety. Questions or comments dealing with punctuation or grammatical minutiae, spelling, etc., are out of order and should be written out and privately submitted to the advisor.

If, in the opinion of the moderator or upon motion duly passed by a majority of the committee, it should be deemed necessary to discontinue the defense, the moderator may recess the defense until a time mutually agreeable to the moderator, the advisor, the candidate and the college dean.

When the questioning has run its course, the moderator will adjourn the defense, and the room will be cleared of everyone except the members of the examining committee. Parliamentary procedure will be observed to determine the success or failure of the candidate, with the moderator acting as chair without a vote. The committee should evaluate the candidate upon both (a) the overall quality and significance of the dissertation, and (b) the oral defense of the findings.

All members of the examining committee will sign the Report of Final Examination form, recording their votes of “yes” or “no.” Committee members may not abstain in this vote. A candidate passes the final oral defense if there is no more than one dissenting vote. The moderator and lead administrator of the academic unit must then sign the report, which is forwarded to the college for the signature of the dean. The college returns a copy of the completed form to the academic unit.

Only members of the examining committee who voted “yes” are required to sign the dissertation signature page.

Frequently Asked Questions
There is no FAQ associated with this policy.

Definitions
Academic Unit: an academic department, school or a designated graduate program within a college, department or school.

Defense: refers to students presenting, explaining and defending their ideas submitted in their dissertation. The defense is designed so that faculty members can ask questions to ensure that students understand their chosen field and focus area.

Dissertation: a highly individualized investigative study that results in the development and writing of a scholarly, comprehensive paper and fulfills the culminating requirement for a Ph.D. degree. The dissertation must demonstrate that the student has acquired the ability to conduct research in a discriminating and original manner. The dissertation should make a significant enough contribution to the field in which it is written that at least one scholarly article suitable for publication in a professional journal may be derived from it or that the findings of the dissertation would be otherwise publishable.

Revision History
Amended August 2020: Revised policy clarifies that a dissertation is required for the Ph.D. degree, rather than all doctoral degrees; replaces language regarding dissertation committees with more up-to-date information; removes graduate faculty status levels; eliminates summer registration requirement; add credit hours earned in Dissertation II do not count toward the degree; and adds deadline for filing the dissertation.

Diversity Course Requirement

The purpose of Kent State’s diversity requirement is to help educate students to live in a world of diverse communities, many of which are becoming increasingly permeated with cultural and ideological differences. The study of diversity is intended to promote awareness of local and global differences, to identify shared values, to improve understanding of one’s own culture, and to encourage people to explore and respect differences.

The diversity requirement is part of the university’s broader efforts to encourage, both at the university and beyond, the development of communities in which all members and their contributions are recognized and valued. Diversity courses provide opportunities for students to learn about such matters as the history, culture, values and notable achievements of people other than those of their own national origin, ethnicity, religion, sexual orientation, age, gender, physical and mental ability, and social class. Diversity courses also provide opportunities to examine problems and issues that may arise from differences, and opportunities to learn how to deal constructively with them.

Courses that satisfy the diversity requirement aim to give students significant opportunities to:

• Address diversity issues, particularly those involving unequal and/or discriminatory treatment
• Compare positive and negative implications of various parochial or “...centric” perspectives
• Encourage global awareness and sensitivity
• Engage issues of racial or ethnic perceptions, attitudes and stereotypes
• Examine patterns and trends of diversity in the United States
• Explore ways to communicate and participate constructively in a diverse community
• Foster appreciation of aesthetic dimensions of other traditions and cultures
• Learn systematic approaches to understanding cultural differences and commonalities
• Learn systematic techniques for dealing constructively with problems arising out of cultural differences
• Participate in special programs that promote understanding other peoples
• Study Western and non-Western cultures in a world context or from a comparative perspective
• Understand how one’s own culture shapes one’s perceptions, ideology and values

It is understood that not every course will address all of these criteria.

Requirements
As part of the requirements for any bachelor’s degree at Kent State, all students must satisfy the diversity requirement, consisting of one course addressing domestic (U.S.) issues and one course addressing global issues.

At least one course must come from the Kent Core. Students may satisfy the second diversity requirement in one of three ways:

1. They may complete the second diversity course from the Kent Core, which also will count toward fulfilling the Kent Core.
2. They may complete any non-Kent Core diversity course. This course may also count toward major or minor program requirements or may be used as an elective.
3. They may, with approval from their dean, satisfy the second diversity requirement by completing one semester of study in another country.

Dual Degrees and Double Majors

Date Revised: May 11, 2020
Date Effective: August 27, 2020

Policy Statement

Undergraduate

Kent State University students may be able to simultaneously pursue two associate or bachelor's degree programs through either a double major or a dual degree. A double major combines two majors within the same degree (e.g., Accounting and Finance majors in the B.B.A. degree). A dual degree combines two majors within different degrees (e.g., Architectural Studies major in the B.A. degree and Construction Management major in the B.S. degree).

Certain major combinations are not permitted by the colleges. Students interested in a double major or dual degree must consult with their advisor (and an advisor for the second major if in a different college) to determine whether the desired combination of majors is permitted. Declaring a double major or dual degree in the same department or school is allowed only when the department or school offers different majors. For example, a student may declare the Spanish major and the French major even though both majors are offered by the Department of Modern and Classical Language Studies. Some departments or schools may allow a student who earned a Bachelor of Arts degree to return to complete a Bachelor of Science degree in the same major.

Because of their generalist nature, the Associate of Technical Study degree (Individualized Program), Bachelor of Science degree in Educational Studies and Bachelor of Integrative Studies degree may not be earned as a double major or dual degree with another major and cannot be earned as an additional degree after another degree at the same level has been earned previously.

In addition, due to the similarity in program requirements, the Associate of Arts and the Associate of Science degrees may not be earned concurrently with each other; nor may either be awarded as an additional degree when one has been earned previously.

Students cannot be on academic probation and declare another major or degree at either the associate or bachelor's level.

Students pursuing a double major or dual degree concurrently or subsequently must be officially admitted to the programs and complete all requirements for both in addition to the university's undergraduate and residence requirements.

Graduate

Graduate dual degree programs allow students to simultaneously pursue two graduate degrees at the same level (two master’s degrees or two doctoral degrees) or two graduate degrees at different levels (one master’s degree and one doctoral degree). Rather than sequentially completing first one degree and then the other, the amount of time required to complete both sets of degree requirements may be reduced by completing the programs in a coordinated way. Graduate dual degrees are distinct from combined degree programs, which allow students to simultaneously pursue two degrees at the undergraduate and graduate levels (see policy on Combined Bachelor’s/Master’s Degree Program in the University Catalog for details).

Coursework common to both programs must constitute a well-planned and meaningful part of each program. A minimum of 60 percent of the total credit hours required for each degree program must be unique to that degree program, after which some courses may be double counted. The percentage of unique hours that must be completed in each degree program may vary from the 60 percent minimum only when the graduate dual degree program has been formally approved by the university.

Graduate credit transferred from another institution is limited to a maximum of 12 credit hours across both degree programs. Doctoral-level courses may be applied toward a master's degree. Under no circumstances may master’s-level courses be applied toward a doctoral degree.

The maximum time limits for completing degree requirements and graduation apply to each degree individually (see the policy on Academic Standing—Graduate Student in the University Catalog for details).

Kent State University allows for both informal and formal dual degree programs, as described below.

Informal Dual Graduate Degree Programs

Students may simultaneously pursue two graduate degrees in different programs through an informal dual degree program (those that have
not received official university approval). Informal dual degree programs offer students the flexibility to double-count some coursework, given that the two programs in question approve the arrangements. Once admitted to both degree programs, the student and advisor(s) must plan an integrated course of study. The plan must be approved by both programs and filed with the respective college(s). Culminating experiences (e.g. capstone courses, theses, dissertations, applied projects) and comprehensive examinations cannot be shared.

Formal Dual Graduate Degree Programs
A formal dual degree program is one that has been officially approved by the university. It has one curriculum established by two programs resulting in the completion of two graduate degrees at the same level. The following programs have been formally approved by the university:

- Master of Architecture degree / Master of Business Administration degree
- Master of Architecture degree / Master of Urban Design degree
- Master of Arts degree in Communication Studies / Master of Business Administration degree
- Master of Arts degree in Translation / Master of Business Administration degree
- Master of Business Administration degree / Master of Science in Nursing degree
- Master of Business Administration degree / Master of Library and Information Science degree
- Master of Education degree in Educational Technology / Master of Library and Information Science degree in School Library Media K-12

1 This policy does not apply to dual concentrations. Students should contact their program coordinator if they are interested in completing dual concentrations.

Reason for Policy
Policy enforces uniform standards for students seeking to pursue multiple degree programs, either concurrently or subsequently.

Procedures
Undergraduate Dual Degrees and Double Majors
Undergraduate students request the second major/degree through the Manage My Program application in FlashLine and review program requirements in their GPS degree audit.

Graduate Dual Degrees
An applicant who is not currently a graduate student at Kent State University must submit an application and pay an application fee for each program.

Students who are currently enrolled in one graduate program at Kent State University must submit an application and pay an application fee for the second program, indicating on the application that the intent is to complete both degrees rather than to transfer from the first to the second program.

If applying to a formal degree program (see list above), the applicant/student should indicate the specific dual-degree concentration in the program.

If admitted to an informal degree program, the student and advisor(s) must plan an integrated course of study. The plan must be approved by both programs and filed with the respective college(s).

Definitions
Degree: an award for completion of a course of study at a specific level designated by the customary titles of associate, bachelor's, master's, specialist or doctorate. Examples: Associate of Arts degree, Bachelor of Arts degree, Master of Arts degree, Doctor of Philosophy degree.

Double Counting: allowance of a course (and its credit hours) to count toward the requirements of two programs.

Double Major: combines two majors with the same degree; e.g., Bachelor of Arts degree in Psychology and the Bachelor of Arts degree in Sociology.

Dual Degree: combines two majors with different degrees, e.g., Bachelor of Arts degree in Fashion Merchandising and Bachelor of Business Administration degree in Business Management.

Formal Dual Graduate Degree: dual graduate degree program that has been officially approved by the university; the curriculum for the dual degree is published in the University Catalog.

Informal Dual Graduate Degree: an agreement between two program areas to allow a student admitted to both degree programs to double-count specific coursework toward both.

Major: a set of requirements for completion of a degree as authorized by the Kent State Board of Trustees and the Ohio Department of Higher Education. Examples: Geography major, Nursing major, Public Health major.

Revision History
Amended August 2020: Revised to redefine “double major,” eliminate the 140-credit hour requirement for dual degrees; eliminate additional 15 credit hours for concurrent or subsequent associate degrees; provide more information on certain major/degree combinations that are not permitted; restrict students on academic probation from declaring multiple majors; and include master’s/doctrinal degrees in the graduate dual degrees policy.
Eligibility for a Doctoral Degree

The student will ordinarily observe the following procedure in order to be eligible for the doctoral degree:

- Indicate the intention to meet specifications of the departments concerned by applying for admission. The college or independent school and the department together will determine acceptability.
- Fulfill the credit requirements of the department in which the major work is done.
- Fulfill the residence requirements (if any).
- Satisfy the language or research tool requirements of the department.
- Pass the candidacy (comprehensive) examination in the field of the major subject.
- Carry out a suitable scholarly research or creative program.
- Write a dissertation that shows high attainment and creativity.
- Successfully defend the findings of the dissertation in public before a committee of the graduate faculty.
- Have registered for a minimum of 90 credit hours beyond the bachelor’s degree, or 60 credit hours beyond the master’s degree (registration for thesis, dissertation and research may be included in this total).

For eligibility for the Doctor of Podiatric Medicine degree, please refer to the college policies in the College of Podiatric Medicine section of this Catalog.

Enrollment - Graduate

Graduate students shall enroll for at least one term each year (three consecutive terms, including summer as one term) to maintain status as a degree-seeking student. Meeting this minimum enrollment requirement does not guarantee the student will meet the minimum requirements of other programs, offices or agencies.

Students not meeting the minimum enrollment requirement for maintaining status as a degree-seeking graduate student will be considered as having voluntarily withdrawn from the university. After three consecutive terms of non-enrollment, students will be inactivated as a degree-seeking student.

Students who withdrew and wish to have their graduate standing reinstated must follow the same admission procedures as those required of new applicants, including submission of a non-refundable application fee and application materials. Acceptance back into a graduate program is not guaranteed even if the student departed in good standing. Students who apply and are admitted will be re-instated under the catalog-in-force at the time of admission. The program determines how much of the previously completed work may be applied toward the graduate degree program.

Students on an approved leave of absence may return to their program of study by completing the Application for Graduate Re-Enrollment form found on the Graduate Studies website.

Experiential Learning Requirement

Kent State University’s experiential learning requirement (ELR) provides students with the opportunity to initiate lifelong learning through the development and application of academic knowledge and skills in new or different settings.

Kent State recognizes that there are diverse ways to fulfill the experiential learning requirement. To accommodate such diversity, an experiential learning activity may fall into one or more of the following categories:

- Civic Engagement enables Kent State students to interact with people from diverse backgrounds; to challenge their understanding of community needs and the systems addressing those needs; and to explore ways of improving community life. The primary purpose for activities that fall into this category encompasses community involvement, awareness, learning or reflection.
- Creative/Artistic activities enable Kent State students to engage in various forms of creative expression to produce works that reflect a synthesis of knowledge and skills. These works may be original or interpretative and may be expressed through performances, portfolios, exhibits, pieces of work or other significant projects.

Amended August 2015: Revised to reflect university minimum semester credit hours for a degree was decreased, from 121 to 120 for one major or double majors. Minimum semester credit hours for dual degrees remains at 140. Disclaimer on dual concentrations within one major is added.

Amended August 1995: Revised to reflect university minimum semester credit hours for a degree was decreased, from 129 to 121 for one major or double majors and from 148 to 140 for dual degrees.

Amended August 1995: Distinction between double majors and dual degrees are made, with no minimum credit hours for double majors beyond what is required for one degree (129 semester credit hours). Minimum semester credit hours for dual degrees remains at 148.

Amended August 1988: Application fee for graduation is eliminated.

Amended August 1979: Revised to reflect the university's conversion from quarters to semesters; total semester credit hours for two degrees is increased, from 147 (220 quarter credit hours) to 148.

Amended September 1974: Disclaimer added that some degree combinations are not permitted. Students are now allowed to declare and earn two degrees simultaneously. Required additional coursework (30-35 quarter credit hours) is eliminated. A deadline and fee are added for applying for graduation.

Amended September 1965: Allowance on qualifying for a degree in absentia is removed.

Amended June 1952: New allowance on qualifying for a degree in absentia after three years of work at Kent State University.

Amended June 1948: Total quarter credit hours for two degrees is decreased, from 234 to 220. Additional coursework is revised from one year to 30-35 quarter credit hours. Now recommends declaration in second degree as early as possible, changing it from junior to sophomore year. Second degree must be earned after first degree (no awarding of two simultaneously).

Amended June 1942: Revised to reflect the university's conversion from semesters to quarters (now requiring 234 quarter credit hours); procedures added for students to seek college dean approval for a dual degree before the start of junior year.

Effective June 1939: Establishes a policy requiring students to complete 156 semester credit hours and one year (or six summer terms) of residence beyond four years to earn two degrees in any two colleges or two degrees in the same college.
• **Practical Experiences** enable Kent State students to actively extend learning to new contexts outside the typical classroom environment. These experiences allow students to use skills and concepts related to their career path while engaging in work-like settings that are common to their field of study.

• **Research** activities enable Kent State students to engage in systematic inquiry that contributes to the discovery or interpretation of knowledge significant to their field of study. This research can be applied, creative/artistic, descriptive, experimental, historical, inferential, observational or theoretical.

• **Study abroad/Away** activities enable Kent State students to be immersed in an off-campus environment. These experiences contribute to a student’s understanding of culture, customs, diversity, history, language, politics, religion, society and/or traditions.

### Requirements

1. As part of the requirements for any baccalaureate, all students must satisfy the experiential learning requirement.

2. The requirement may be fulfilled by a course, a component of a course or a non-credit paid or unpaid experience. Courses may be at the lower- or upper-division level.

3. For non-course options, students must obtain prior approval from their program faculty for the experience.

4. The requirement may be fulfilled individually or collaboratively.

5. Students must meet the learning outcomes listed below and any additional learning outcomes as defined by their program.

6. Satisfactory completion of this requirement will be determined by the faculty.

7. Experiential learning opportunities must be completed while enrolled at Kent State University.

8. These experiential learning opportunities must meet existing university regulations and guidelines (e.g., institutional review board approval for research with animals or human subjects, memoranda of affiliation/understanding with community partners).

### Learning Outcomes

Students will be able to:

- Connect ideas, concepts and skills developed at the university with their applications to new and different contexts.
- Demonstrate the implementation of ideas, concepts and/or skills studied at the university in new and different contexts.
- Demonstrate how this experience has broadened their understanding of the discipline, the world of themselves as learners.
- Reflect on the meaning of the experience for their current and future learning.

**Exploratory and General Majors**

Kent State offers the non-degree Exploratory major on all campuses and generalist majors within most colleges to enable undergraduate students
to explore academic areas and/or meet minimum program requirements. Baccalaureate-seeking students in these non-degree majors must declare a degree major by the time they have earned 45 credit hours at Kent State University. Students needing assistance with selecting a major must consult with an academic advisor.

**Grade Point Average (GPA)**

### Overall GPA for Graduation

To graduate from Kent State University with an associate degree, bachelor’s degree, undergraduate minor or undergraduate certificate, all students must earn a minimum 2.000 overall grade point average (GPA). Some programs require a higher overall GPA for graduation, and these are noted on the program’s page in the University Catalog and in the GPS degree audit.

A student’s overall GPA is calculated using all coursework taken at Kent State, with the exception of grades exempted through Kent State’s course repeat or academic forgiveness policies.

### Major, Minor and Certificate GPA for Graduation

To graduate with a declared undergraduate major, minor or certificate, all students must earn a minimum 2.000 GPA in the program. Some programs require a higher GPA for graduation, and these are noted on the program’s page in the University Catalog and in the GPS degree audit.

A student’s major, minor or certificate GPA is calculated using only the courses that complete the requirements in that major, minor or certificate. When multiple courses may be used to complete a specific requirement (e.g., “choose from” or either/or choice), the course with the highest passing grade will complete the requirement and be used in the calculation of the major, minor or certificate GPA.

The major, minor and certificate GPA can be found in the student’s GPS degree audit; they are not displayed on the student transcript or diploma and are not stored in the university's student information system.

### Latin Honors GPA

For information on how the GPA is calculated for Latin Honors (bachelor’s degrees) and for Distinction (associate degrees), refer to the Honors at Graduation policy in the University Catalog.

### Graduate Students

To be considered “in good standing,” a 3.000 average or better in all graduate and required undergraduate work undertaken at Kent State University should be maintained by graduate students. In order to qualify for graduation, the student must have a 3.000 average in all graduate courses attempted. The grade point average of a student who enlists in the military service after work is begun toward a graduate degree may, at the student's request upon return from military service, exclude the grades earned in the last semester in which that student is in residence prior to induction.

1 Students seeking the Doctor of Podiatric Medicine degree are expected to maintain a minimum 2.000 grade point average.

### Calculating Grade Point Average

Quality points are awarded on the following scale:

- 1 credit hour of A equals 4.000 points
- 1 credit hour of A- equals 3.700 points
- 1 credit hour of B+ equals 3.300 points
- 1 credit hour of B equals 3.000 points
- 1 credit hour of B- equals 2.700 points
- 1 credit hour of C+ equals 2.300 points
- 1 credit hour of C equals 2.000 points
- 1 credit hour of C- equals 1.700 points
- 1 credit hour of D+ equals 1.300 points
- 1 credit hour of D equals 1.000 point
- 1 credit hour of F equals 0.000 points
- 1 credit hour of NF equals 0.000 points
- 1 credit hour of SF equals 0.000 points
- 1 credit hour of U equals 0.000 points

A grade point average is determined by dividing the total number of points earned by the number of quality hours taken. Totals are extended to three decimal points and are not rounded up.

As an example, assume a student has completed 30 credit hours with a grade distribution of 3 credit hours of A, 3 credit hours of B, 3 credit hours of B-, 15 credit hours of C, 4 credit hours of D and 2 credit hours of F.

Dividing 63.100 by 30, a GPA of 2.103 is obtained, which is slightly above a C average. Overall GPA is computed by dividing the total quality points by the total quality hours. Grades of S (Satisfactory), Y (Pass) and Z (Fail) are not included in the GPA.

### Grade Point Average (GPA) Adjustment

**Policy Statement**

The Grade Point Average (GPA) Adjustment policy provides students the opportunity to make progress toward degree completion by allowing them to remove a maximum of six courses with grades C- or lower from the calculation of their overall GPA and earned hours.

**Eligibility**

To be eligible for a GPA adjustment, students must meet all the following conditions at the time of the request:

- Officially admitted, reenrolled or reinstated to Kent State *
- Undergraduate and seeking a degree or certificate
- Enrolled in Kent State credit courses

* Students who are dismissed may apply for grade adjustment if they appeal and are reinstated.

Students with a previous undergraduate degree or certificate and currently enrolled in a subsequent undergraduate program are eligible with the following stipulations:

- Students who earned a Kent State associate or bachelor’s degree or certificate may request a grade adjustment for failed grades (F, NF, SF,
U) and only C-, D+ and D grades for the courses that were not used toward earning the previous degree or certificate.

- Students who earned a non-Kent State associate or bachelor’s degree or certificate may request a grade adjustment for failed grades (F, NF, SF, U) earned before or after the awarded degree or certificate and only C-, D+ and D grades earned after the awarded degree or certificate.

**Reason for Policy**

This GPA Adjustment policy is an alternative to the Course Repeat policy and allows students to request specific course grades to be removed from their GPA and overall credit hours subjected to specific conditions for eligibility and approval.

**Procedures**

To apply for a GPA adjustment, students must complete the following steps:

1. Meet with an academic advisor to begin an application
2. Provide a written statement describing their plan to assure successful academic performance in the future
3. Select a maximum of six courses with grades C-, D+, D, F, NF, SF, M and/or U to be forgiven
4. Successfully pass (100%) an online quiz to ensure they understand the outcomes of the policy and the resources available to them to be successful

Once the steps outlined above have been completed, the Office of the University Registrar will remove the student-selected grades from the calculation of the student’s GPA and earned hours. The grades will be retained on the student’s transcript with the notation of an “E” (excluded) in the repeat column. The official grade for the courses will be changed to X* (e.g., XC, XD) to denote a grade adjustment.

The following stipulations to course forgiveness will be enforced:

- The GPA Adjustment policy applies only to coursework taken at Kent State University and only to the students’ Kent State transcript. Students cannot request the policy for grades earned from transfer courses.
- Students cannot request the policy for courses taken for a pass/fail grade.
- The course must officially be recorded on the student’s transcript for grade adjustment to be considered.
- Students selecting a GPA adjustment for a course required to graduate with their declared program must retake this course unless the dean of the college in which they are enrolled approves a suitable substitution.
- The original GPA (includes any courses under the GPA Adjustment policy) will be used in determining eligibility for Latin honors, distinction or other recognition, as well as satisfactory academic progress eligibility for federal financial aid, based upon the entirety of students’ undergraduate academic career and record of academic performance.
- A student may submit multiple requests for GPA adjustment until the maximum six courses is met or the student graduates with that degree or certificate, whichever comes first. Students cannot request this policy for a course in a degree or certificate program after that degree or certificate has been awarded.
- Students who participated in academic forgiveness in the past may request the policy if they had fewer than six courses removed from their GPA and earned hours under the previous policy. Maximum six courses may be removed under previous and current policy, combined.
- Once the course grade and credit hours have been removed from the student’s GPA and earned hours, they will not, under any circumstances, be reinstated.
- A graduate school may review a student’s complete undergraduate record (including any courses under the GPA Adjustment policy) when making admission decisions.

**Forms/Instructions**

Students must contact an academic advisor to begin an application.

**Frequently Asked Questions**

1. **How does the new GPA Adjustment policy differ from the Academic Forgiveness policy?**

   The Academic Forgiveness policy has been revised and renamed GPA Adjustment. The process for applying and the eligibility requirements have been modified to simplify the process and remove unintended barriers for students to receive a second chance at pursuing their academic goals and progress for degree completion.

2. **What is the difference between the GPA Adjustment policy and the Course Repeat policy?**

   GPA Adjustment allows for students to select a maximum of six courses with grades C- and lower to be removed from the calculation of their GPA and overall credit hours

   Course Repeat also allows for courses taken to be excluded the student’s GPA; however, in contrast to the GPA Adjustment Policy, students must take the same course again (i.e., repeat), and have only the highest grade earned in the attempts be applied to the GPA.

   You should consult with your academic advisor regarding both policies to help them determine which one applies best to your circumstances.

3. **How will using Grade Adjustment affect my financial aid?**

   Courses forgiven under GPA Adjustment still will be used in determining your financial aid eligibility. Grades and credit hours (earned and attempted) from forgiven courses will be reflected in your Satisfactory Academic Progress calculation found in FlashLine.

**Additional FAQ: GPA Adjustment**

**Definitions**

**Admitted:** Offered admission to enroll in a program at Kent State University.

**Earned Hours:** Credit hours for courses that the student completed with a grade or administrative mark that is considered passing.

**Enrolled:** Student has completed course registration for a specific term.

**GPA (Grade Point Average):** An indication of a student’s academic achievement at Kent State University, determined by the number of credit hours attempted at Kent State University and the grades received. The
Kent State GPA is calculated to three places past the decimal point and not rounded.

GPS Degree Audit: A summary of all official program requirements merged with the student’s academic record to provide a real-time assessment of progress toward graduation.

Reenrolled: Act of being restored to active-student status in order to register for courses and pursue completion of an academic program after an absence of one full academic year or longer.

Reinstated: Act of being restored to active-student status after academic dismissal in order to register for courses and pursue completion of an academic program.

Student Transcript: The accurate and complete record of a student’s academic coursework attempted at an institution, presented in either electronic format or paper format.

Revision History

Amended August 2012: Revised policy revises the clause for Kent State associate degree holders to allow forgiveness to be applied toward any course not used for a previous associate or certificate degree, rather than any course after earning the previous credential.

Amended August 2011: Revised policy decreases the time away from three (two for veterans) to one year for all students; and removes stipulation that students cannot take coursework elsewhere for at least three years. Students who earned a Kent State associate degree are now eligible for coursework taken after that degree.

Amended August 2005: Revised policy add C- to the list of grades that are forgiven after eligibility.

Amended August 1981: Revised policy decreases the time away only for students who were enlisted in the armed forces, from three to two years. Former students who did complete coursework elsewhere may be eligible if three years passed since that study. Revision also adds an eligibility requirement of 15-30 credit hours of graded coursework with a 2.000 GPA. Once eligible, all grades D or lower are forgiven.

Effective September 1976: Establishes a formal Academic Forgiveness policy for all undergraduate students. To be eligible, former students must be away from the university for three or more calendar years and have not attended another university during that time.

Effective September 1968: Establishes an administrative policy regarding academic forgiveness for former students who had left the university to serve in the armed forces. To be eligible, students must be away from the university for three or more calendar years.

Grade-/Mark-To-Grade Change Policy

With the exception of the IN, IP and NR marks, once grades or marks are submitted, they are final and will not be changed except in cases of administrative error. Grades will not be changed by allowing the students to do additional work (e.g., retaking exams; redoing papers; submitting extra credit papers, reports) or by using criteria other than those applied to all students in the class.

In the event of a possible administrative error, the students must contact the instructor as soon as possible following the awarding of the grade. If the instructor is not available, the department/school chair/director should be contacted.

Grade appeals for reasons other than administrative error must follow established policy and procedures for student academic complaints, see policies 4-02.3 for Kent Campus and 8-01.4 for regional campuses in the University Policy Register.

Approved grade change requests for reasons other than removal of the IN, IP and NR marks must be submitted no later than the end of three consecutive terms after the grade was submitted or before the student’s degree is posted officially to the permanent academic record, whichever comes first. No challenge will be considered or adjustment made after that period. Deadline for removing the IN mark is noted in the Administrative Marks section above.

Grading Policies and Procedures

The transcript is an accurate and complete historical record of work attempted at the university. Changes to transcript entries that alter the enrollment history of a student are not to be made.

Academic Grades

The following grades are determined and assigned by faculty based upon appraisal and evaluation of student performance in completing requirements of a course:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>(4.000) Denotes &quot;superior scholarship.&quot;</td>
</tr>
<tr>
<td>A-</td>
<td>(3.700)</td>
</tr>
<tr>
<td>B+</td>
<td>(3.300)</td>
</tr>
<tr>
<td>B</td>
<td>(3.000) Denotes &quot;good performance&quot; for students in undergraduate courses and &quot;average performance&quot; for students in graduate courses.</td>
</tr>
<tr>
<td>B-</td>
<td>(2.700)</td>
</tr>
<tr>
<td>C+</td>
<td>(2.300)</td>
</tr>
<tr>
<td>C</td>
<td>(2.000) Denotes &quot;fair or average performance&quot; for students in undergraduate courses and &quot;below average performance&quot; for students in graduate courses.</td>
</tr>
<tr>
<td>C-</td>
<td>(1.700)</td>
</tr>
<tr>
<td>D+</td>
<td>(1.300)</td>
</tr>
<tr>
<td>D</td>
<td>(1.000) Denotes &quot;poor (but passing) performance&quot; for students in undergraduate courses and &quot;far below average performance&quot; for students in graduate courses.</td>
</tr>
<tr>
<td>F</td>
<td>(0.000) Denotes failure of the student’s overall performance. This grade is earned and is not used for students who never attended or stopped attending the course (see NF and SF marks in Administrative Marks section below).</td>
</tr>
</tbody>
</table>
The grade **S** (Satisfactory) denotes passing performance and is used for courses where S/U grading, rather than letter grading, is permitted. The credit hours are awarded, but the grade is not counted in grade point averages. Work earning an S grade may be applied toward meeting degree requirements.

The grade **U** (Unsatisfactory) denotes failing performance and is used for courses where S/U grading, rather than letter grading, is permitted. This grade is earned and is not used for students who never attended or stopped attending the course (see NF and SF marks in Administrative Marks section below). Credit hours are recorded as attempted, and the grade is counted as an F (zero quality points) in grade point averages.

The grade **Y** denotes a passing grade in undergraduate courses in which students have elected the pass/fail grading option. The credit hours are awarded, but the grade is not counted in grade point averages.

The grade **Z** denotes failing performance in undergraduate courses in which students have elected the pass/fail grading option. The credit hours are recorded as attempted, and the grade is not counted in grade point averages.

1 Please refer to the Pass/Fail Grade policy below for conditions governing the acceptability of pass/fail (Y/Z) grades at Kent State.

### Administrative Marks

The following administrative marks are assigned when a letter grade is not appropriate.

<table>
<thead>
<tr>
<th>Mark</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AU</td>
<td>The mark AU (Audit) denotes enrollment in a course without benefit of a grade or credit, typically for purposes of self-enrichment and academic exploration. Students may audit any course subject to space availability and prior departmental approval. To audit a course, students must go through registration procedures and be assessed registration fees. An audited course cannot be applied toward a student's degree or certificate. An instructor may impose whatever attendance requirements deemed necessary upon the students registered for audit. The students must be informed of these requirements at the beginning of the semester. Failure to meet such attendance requirements subjects the students to being withdrawn from the course by the instructor. The AU mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>CP</td>
<td>The mark CP (Complete) denotes completion of requirements for registered course COOP 20092 Cooperative Education. The CP mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>CR</td>
<td>The mark CR (Credit) denotes credit hours, but not letter grade, earned through successful completion of an alternate credit program (e.g., exam credit, trade competency or other non-institutional credit). The CR mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>IN</td>
<td>The mark IN (Incomplete) may be given to students who—due to extenuating circumstances—are unable to complete the required work between the course withdrawal deadline and the end of classes. The timeline shall be adjusted appropriately for summer sessions and flexibly scheduled courses. The IN mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>IP</td>
<td>The mark IP (In Progress) may be given to students to indicate that work is in progress toward a thesis, dissertation, research, individual investigation or a similar effort that requires additional time beyond a semester. A grade will be given when the work is completed. The IP mark can be utilized only in designated courses and remains a terminal mark if the student does not complete the requirements for the course. For courses required for a degree or certificate, a grade must be given before the credential may be granted. The IP mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>M</td>
<td>The mark M (Missing) was used until 1980. It is similar to the NF and SF marks (see below) and counts as an F grade (zero quality points) in grade point averages.</td>
</tr>
<tr>
<td>NC</td>
<td>The mark NC (Not Complete) denotes requirements have not been completed for registered course COOP 20092 Cooperative Education. The NC mark is not counted in grade point averages.</td>
</tr>
<tr>
<td>NF</td>
<td>The mark NF (Never Attended—Fail) denotes that the student neither attended any class session nor formally withdrew from the course. The NF mark counts as an F grade (zero quality points) in grade point averages. In the case of undergraduate courses taken pass/fail, the NF mark will be changed to a Z (fail) grade.</td>
</tr>
<tr>
<td>NR</td>
<td>The mark NR (Not Reported) indicates the instructor did not submit a grade. For courses required for a degree or certificate, a grade must be given before a credential can be granted. The NR mark is not counted in grade point averages.</td>
</tr>
<tr>

A grade point average is determined by dividing the total number of points earned by the number of quality hours taken. Totals are extended to three decimal points and are not rounded up.

As an example, assume a student has completed 30 credit hours with a grade distribution of 3 credit hours of A, 3 credit hours of B, 3 credit hours of B+, 15 credit hours of C, 4 credit hours of D and 2 credit hours of F.

Dividing 63.100 by 30, a grade point average of 2.103 is obtained, which is slightly above a C average. Cumulative averages are computed by dividing the total quality points by the total quality hours. Grades of S, Y and Z are not included in grade point average.

### Grade Reports

Final grades are reported at the close of each academic term and become a part of the students’ permanent records. Grades are available in FlashLine.

### Pass/Fail Grade Policy

Students who wish to pursue an unfamiliar field or otherwise expand their educational boundaries beyond the requirements of any declared academic program may request to take certain undergraduate courses on a pass/fail basis. The purpose of this option is to foster experimentation by providing students with the opportunity to explore a broad range of coursework without affecting their grade point average.

Students may not request the pass/fail grading option for the following types of courses:

- Courses used to meet requirements in a student’s major, minor, concentration or certificate program, or to meet college general requirements for the student’s degree.
- Courses designated as Kent Core (general education requirement).
- Courses numbered 00000-09999 (developmental).
- Courses numbered 50000-89999 (graduate).
- Courses graded Satisfactory/Unsatisfactory (S/U).

Pass/fail grading is subject to the following conditions:

1. Students whose overall GPA is below 2.000 after their most recent graded term are not eligible to request the pass/fail grading option. Transfer students admitted on probation are not eligible to request the pass/fail grading option in their first term.
2. Students may take only one course per term on a pass/fail basis.
3. Instructors will not be informed of students’ selection of the pass/fail grading option. Regular passing letter grades (e.g., B, C, D) that are reported by the instructor will be converted to a Pass (Y) grade. Letter grades of F (Fail), NF (Never Attended–Fail) and SF (Stopped Attending–Fail) reported by the instructor will be converted to a Fail (Z) grade.
4. Under no circumstances will Pass (Y) or Fail (Z) grades be converted to regular grades.

5. Students who earn Pass (Y) grades and later declare a major, minor, concentration or certificate program must follow the pass/fail credit to program requirements, if applicable, but all subsequent required coursework must be completed with regular grading.

6. A minimum 12 hours of Pass credit may be applied toward a declared undergraduate program.

7. Pass (Y) and Fail (Z) grades are not used in computing grade point averages and do not satisfy specific required grades (other than the minimum D grade) in course prerequisites and program requirements.

In order to request the pass/fail grading option, students must submit a Pass/Fail Grade Request form to the Office of the University Registrar.

The student or university-approved designee must request the IN mark from the instructor of the course, and it is the responsibility of the student to arrange to make up the incomplete work. After the instructor approves the request, the instructor must initiate the request by submitting an Incomplete Mark Contract workflow to the department chair/school director prior to the grading deadline. This electronic workflow includes justification for awarding the Incomplete, describes the work to be completed for the course and specifies the grade to be assigned if the work is not completed (default grade). The Incomplete Mark Contract is sent electronically to the student.

When the work is completed, an appropriate grade will be assigned—based on the instructor’s evaluation of the work submitted—and a new grade point average computed.

If the student does not complete and receive a grade, or is not granted an extension, the student’s IN mark for the course automatically will lapse to the default grade designated on the Incomplete Mark Contract:

1. at the end of one semester for undergraduate courses or
2. at the end of three consecutive terms for graduate courses.

If the student is granted an extension and does not complete and receive a grade by the deadline, the student’s IN mark for the course automatically will lapse to the default grade designated on the Incomplete Mark Contract at the end of the term in which the extension deadline occurs.

Grade-/Mark-To-Grade Change Policy

With the exception of the IN, IP and NR marks, once grades or marks are submitted, they are final and will not be changed except in cases of administrative error. Grades will not be changed by allowing the students to do additional work (e.g., retaking exams; redoing papers; submitting extra credit papers, reports) or by using criteria other than those applied to all students in the class.

In the event of a possible administrative error, the students must contact the instructor as soon as possible following the awarding of the grade. If the instructor is not available, the department/school chair/director should be contacted.

Grade appeals for reasons other than administrative error must follow established policy and procedures for student academic complaints, see policies 4-02.3 for Kent Campus and 8-01.4 for regional campuses in the University Policy Register.

Approved grade change requests for reasons other than removal of the IN, IP and NR marks must be submitted no later than the end of three consecutive terms after the grade was submitted or before the student’s degree is posted officially to the permanent academic record, whichever comes first. No challenge will be considered or adjustment made after that period. Deadline for removing the IN mark is noted in the Administrative Marks section above.

Midterm Evaluation

A midterm evaluation grade is completed between the fourth and seventh week for all students in lower-division undergraduate courses (levels 00000, 10000, 20000). Midterm evaluation grades are not given for summer or flexible-scheduled courses due to the short duration of these offerings. Midterm results are available to academic advisors and college/school/campus deans for the purpose of intervening when achievement is considered unsatisfactory according to program or university requirements. Students will be able to view their midterm grades in FlashLine for the fall or spring semester in progress. Midterm grades are not included as part of the students’ academic transcript.

Graduation

Each Kent State University college awards one or more undergraduate and graduate degrees and certificates at commencement exercises in December, May and August. The graduation requirements for these degrees are outlined in the various college sections of the University Catalog.

Undergraduate and graduate students applying for graduation should complete the online graduation application available in their Graduation Planning Tools channel (Student Tools and Courses tab) in FlashLine by the published deadlines. The online graduate application is used for all degrees and certificate programs. If students fail to carry out the proper application procedures by the published deadlines, the degree will not be granted until the next graduation date. Associate degrees are conferred at each Regional Campus at the end of the academic term in which all requirements are successfully completed. Application deadlines may be obtained from the Office of the University Registrar as well as from the various college and campus offices.

For commencement dates for each campus, refer to Kent State University’s Academic Calendar.

Application for Graduation

Prospective graduates for degrees and certificates must complete the online application for graduation (available in FlashLine) by the following deadlines:
• December Graduation: The application for a bachelor's degree or undergraduate certificate must be submitted by the 15th day of the preceding March. The application for an associate degree, graduate degree (master's, post-master's or doctoral) or graduate certificate must be submitted by the Friday of the first week of the fall term in which graduation will occur.

• May Graduation: The application for a bachelor's degree and/or undergraduate certificate must be submitted by the 15th day of the preceding September. The application for an associate degree, graduate degree (master's, post-master's or doctoral) or graduate certificate must be submitted by the Friday of the first week of the spring term in which graduation will occur.¹

• August Graduation: The application for a bachelor's degree or undergraduate certificate must be submitted by the 15th day of the preceding December. The application for an associate degree, graduate degree (master's, post-master's or doctoral) or graduate certificate must be submitted by the Friday of the first week of the summer term in which graduation will occur.

¹ Candidates for the Doctor of Podiatric Medicine degree must meet all graduation requirements before June 30 immediately following the May graduation. Completion of program requirements after June 30 but before the conclusion of the calendar year will result in a December graduation. After December, candidates will not be eligible for graduation until the following May. Attendance at the graduation ceremony is required.

Failure to adhere to the posted deadlines may result in a late fee. The Late Graduation Application form is accessible in the Student Tools and Courses tab in FlashLine. Exceptions to the policies above shall be made only by the respective collegial deans or their appointed representative, based upon unusual circumstances.

Postings of Degrees

The integrity of academic transcripts is fundamental to the validity of coursework and degrees certified by the university. Therefore, all student transcript entries (grades and other notations) are finalized when the degree is officially posted to the permanent academic record. Degrees are posted to students' permanent academic records approximately 30 days following the effective date of graduation.

Graduation Planning System (GPS)

The Graduation Planning System (GPS) provides students with a comprehensive and understandable pathway to graduation. It begins with the roadmap, a semester-by-semester mapping of properly sequenced degree requirements. From the roadmap, students will meet with their advisor, who will create a degree plan for them. The degree plan is an online version of the roadmap, individualized to meet each student's specific requirements. The degree audit is a summary of the student's degree requirements that is merged with the student's academic record. The audit provides a real-time assessment of the student's progress toward graduation and is the official document that determines eligibility for graduation.

All Kent State University students in the 2010 University Catalog and beyond will have a GPS degree audit and plan. Kent State uses data from the plan to determine future course offerings.

Honors at Graduation

Date Revised: April 8, 2019
Date Effective: December 2019

Policy Statement

Graduation with Latin Honors

Candidates for bachelor's degrees who demonstrate high levels of scholarship throughout their undergraduate years will graduate with Latin honors. To graduate with this recognition at Kent State University, students must achieve one of the following criteria:

• Earn a minimum 60 credit hours at Kent State and earn a minimum 3.500 Kent State GPA; or
• Earn at least 30 but fewer than 60 credit hours at Kent State and earn a minimum 3.500 Kent State GPA and earn a minimum 3.500 transfer GPA

There are three levels of Latin honors at graduation with a bachelor's degree:

• Cum laude — Student has earned a Kent State GPA of 3.500 to 3.699.
• Magna cum laude — Student has earned a Kent State GPA of 3.700 to 3.899.
• Summa cum laude — Student has earned a Kent State GPA of 3.900 to 4.000.

The Kent State GPA for determining Latin honors is calculated from all grades earned in undergraduate courses at Kent State University, including original grades forgiven and/or recalculated under other policies. The transfer GPA is calculated from all grades earned in undergraduate transfer courses that were awarded college credit by Kent State and completed prior to the student's most recent admission to Kent State. The GPA for both is extended to three decimal places and not rounded up.

Because grades in courses taken in the student's final term are not official until after commencement, Latin honors candidates will be recognized at the commencement ceremony based on all their Kent State academic work completed prior to those courses. However, the final term grades will be used in determining honors posted to the transcript and the diploma. Honor citations are inscribed on diplomas as follows: cum laude, magna cum laude and summa cum laude.

Graduation with Distinction

Candidates for associate degrees who demonstrate high levels of scholarship throughout their coursework will graduate "with distinction." To graduate with this recognition, students must achieve the following criteria:

• Earn a minimum 30 credit hours at Kent State University, and
• Earn a minimum 3.500 Kent State University GPA

A Kent State GPA is calculated from all grades earned in undergraduate courses at Kent State University, including original grades forgiven and/or recalculated under other policies. The GPA used to determine the "with distinction" designation is extended to three decimal places and not rounded up.

Because grades in courses taken in the student's graduation term are not official until after commencement, distinction candidates will be recognized at the commencement ceremony based on all their Kent State
academic work completed prior to those courses. However, the final term grades will be used in determining the “graduated with distinction” recognition posted to the transcript and the diploma.

Reason for Policy
Students who achieve high academic performance as evidenced in their grade point average receive recognition on their transcript and diploma and during the commencement ceremony.

Forms/Instructions
There are no forms associated with this policy.

Frequently Asked Questions
1. **Can any student earn Latin honor?**
   To qualify for Latin honors, students must (1) be awarded a bachelor’s degree, (2) earn a minimum of 60 semester credit hours of Kent State courses and (3) meet the minimum criteria for one of the three honors level as listed in the policy. Students who are being awarded a bachelor’s degree with fewer than 60 semester credit hours of Kent State courses still may qualify for Latin honors if they have a minimum 3.500 transfer GPA and meet the minimum criteria for one of the three honors level at listed in the policy.

2. **Will a student’s transfer GPA (if one) always be calculated for eligibility for Latin honors?**
   No, the transfer GPA will factor into eligibility only for students being awarded a bachelor’s degree with fewer than 60 credit hours of Kent State courses.

3. **How is a student’s transfer GPA calculated for eligibility for Latin honors?**
   The transfer GPA is calculated from all grades for undergraduate transfer courses awarded college credit at Kent State and completed prior to the student’s most recent admission to Kent State.

Additional FAQ: Graduation Honors

Definitions
- **Cum laude**: A recognition with honor; from the Latin *cum* (“with”) and *laude* (ablative of *laurea*, “praise”).

- **GPA (Grade Point Average)**: An indication of a student’s academic achievement at Kent State University, determined by the number of credit hours attempted at Kent State University and the grades received. The Kent State GPA is calculated to three places past the decimal point and not rounded.

- **Magna cum laude**: A recognition with great honor; from the Latin *magna* (plural of *magnum*, “great”) and *laude* (ablative of *laurea*, “praise”)

- **Summa cum laude**: A recognition with the highest honor; from the Latin *summa* (feminine of *summus*, “highest,” “greatest”), *cum* (“with”) and *laude* (ablative of *laurea*, “praise”)

Revision History
- **Amended December 2019**: Institutional Honors for bachelor’s degree students is revised to allow eligibility for students who do not meet the requirement of 60 Kent State semester credit hours but have a minimum 3.500 transfer GPA at the point of admission to Kent State. Policy is renamed Latin honors. Graduation with Distinction for associate degree students is revised to determine minimum Kent State credit hours for eligibility, from 32 to 30 semester credit hours.

- **Amended May 2016**: Institutional Honors for bachelor’s degree students is revised to increase minimum overall GPA criteria to earn cum laude (from 3.300 to 3.500), magna cum laude (from 3.600 to 3.700) and summa cum laude (from 3.800 to 3.900).

- **Amended August 2012**: Institutional Honors for bachelor’s degree students is revised to extend the GPA to three decimal points and not round up to determine honors. Graduation with Distinction for associate degree students is revised to extend the GPA to three decimal points and not round up to determine distinction.

- **Amended May 2008**: Institutional Honors for bachelor’s degree students is revised to round up the GPA to determine honors. Graduation with Distinction for associate degree students is revised to round up the GPA to determine distinction.

- **Amended May 1996**: Graduation with Distinction for associate degree students is revised to remove inclusion of other institution grades, with the GPA calculated with only Kent State courses. Revised policy also establishes a requirement that students earn minimum 32 semester credit hours at Kent State for distinction eligibility.

- **Amended December 1995**: Honors for bachelor’s degree students is revised to increase the required Kent State credit hours for honors eligibility, from the minimum credit hours required for a bachelor’s degree to 64 semester credit hours. Revised policy also removes inclusion of other institution grades, with the GPA calculated with only Kent State courses. Policy is renamed Institutional Honors.

- **Amended December 1995**: Honors is revised to clarify that the GPA to determine honors is extended two decimal points and not rounded up.

- **Amended August 1976**: Honors is revised to decrease the required Kent State credit hours for honors eligibility, from 96 quarter credit hours (64 semester credit hours) to the minimum credit hours required for a bachelor’s degree (48 quarter or 32 semester credit hours). Graduation “With Distinction” is established for students earning an associate degree with a minimum overall 3.5 GPA earned at Ken State and other institutions.

- **Amended March 1968**: Honors for High Scholarship is revised to clarify that students must have minimum 96 quarter credit hours (64 semester credit hours) of Kent State coursework to be eligible. Policy is renamed Honors.

- **Amended June 1956**: Honors for High Scholarship is revised to base honors eligibility on only students’ overall GPA with stipulation that at least one half of the students’ courses must be taken at Kent State.

Incomplete Mark Policy

To be eligible to request an incomplete mark for a course that was not completed due to extenuating circumstances, undergraduate students must be earning a minimum D grade, and graduate students must be earning a minimum C grade, in the course at the time of the request. Appropriate documentation is required to support the extenuating circumstance.

The student or university-approved designee must request the IN mark from the instructor of the course, and it is the responsibility of the student to arrange to make up the incomplete work. After the instructor approves the request, the instructor must initiate the request by submitting an Incomplete Mark Contract workflow to the department chair/school director prior to the grading deadline. This electronic workflow includes justification for awarding the Incomplete, describes the work to be completed for the course and specifies the grade to be assigned if the work is not completed (default grade). The Incomplete Mark Contract is sent electronically to the student.

When the work is completed, an appropriate grade will be assigned—based on the instructor’s evaluation of the work submitted—and a new grade point average computed.

If the student does not complete and receive a grade, or is not granted an extension, the student’s IN mark for the course automatically will lapse to the default grade designated on the Incomplete Mark Contract:

1. at the end of one semester for undergraduate courses or
2. at the end of three consecutive terms for graduate courses.

If the student is granted an extension and does not complete and receive a grade by the deadline, the student’s IN mark for the course automatically will lapse to the default grade designated on the Incomplete Mark Contract at the end of the term in which the extension deadline occurs.

Industry-Recognized Certifications, Examinations and Professional Training

Kent State accepts many industry-recognized certifications, examinations and professional training as prior learning credit applicable toward degree programs upon programmatic approval. Kent State awards academic credit following recommendations from the American Council on Education (ACE) and the Ohio Department of Higher Education. Official documentation from the issuing company or professional organization must be submitted to Kent State before credit can be applied to a student’s academic record.

Academic credit following recommendations from the American Council on Education (ACE) may be considered for academic credit. Students who wish to request credit for training not yet evaluated must complete the industry/training credit application, including submission of all documentation to determine whether academic credit is to be awarded. All credit for industry/professional training appears on the student transcript without a grade.

Students should contact the Credit Transfer Office for more information on the types of certifications, examinations and professional training accepted and the approval process. Official documentation from the issuing agency must be submitted to Kent State before the credit can be applied to a student’s academic record.

International Baccalaureate (IB)

Students who complete the International Baccalaureate (IB) Diploma Programme, a rigorous two-year course of pre-university studies in their high school, may be awarded credit toward a degree or certificate at Kent State. An official IB transcript must be submitted to Kent State before the credit can be applied to a student’s academic record. (A notation on a high school transcript will not be accepted.)

Kent State accepts scores of 5, 6 or 7 for higher-level (HL) and standard-level (SL) IB exams toward specific course equivalencies and general education requirements (e.g., Kent Core, diversity). Visit the Credit Transfer Office’s IB website for more information on these scores and credits earned.

Kent Core (General Education Requirement)

The Kent Core is the foundation of the university’s mission to prepare students to live in today’s complex, global society. It broadens intellectual perspectives, fosters ethical and humanitarian values and prepares students for responsible citizenship and productive careers. Through this learning experience, students develop the intellectual flexibility they need to adapt to an ever-changing world.

Kent Core courses enable students to:

- Acquire critical-thinking and problem-solving skills
- Apply principles of effective written and oral communication
- Broaden their imagination and develop their creativity
- Cultivate their natural curiosity and begin a lifelong pursuit of knowledge
- Develop competencies and values vital to responsible uses of information and technology
- Engage in independent thinking, develop their own voice and vision and become informed, responsible citizens
- Improve their understanding of issues and behaviors concerning inclusion, community and tolerance
- Increase their awareness of ethical implications of their own and others’ actions
- Integrate their major studies into the broader context of a liberal education
- Strengthen quantitative reasoning skills
- Understand basic concepts of the academic disciplines

Although not every Kent Core course will address all these goals, learning within the Kent Core as a whole enables students to acquire the tools for living rich and meaningful lives in a diverse society.
Requirements

- As part of the requirements for any bachelor's degree and the Associate of Arts and Associate of Science degrees, all students must complete a minimum 36-37 credit hours of the Kent Core distributed as indicated within the specific categories.
- As part of the requirements for any applied and technical associate degrees (A.A.B, A.A.S, A.T.S.), all students must complete a minimum 15 credit hours of the Kent Core distributed as indicated within the specific categories.
- Colleges or degree programs may augment the university's minimum Kent Core, and they may specify for their students certain courses in fulfillment of the requirements. It is essential, therefore, that students consult that section of the catalog for their college and degree program.
- The Kent Core should normally be completed within the 60 credit hours that immediately follow the first date of enrollment in a bachelor's degree program.
- Honors equivalents shall satisfy the Kent Core.
- None of the courses on the Kent Core list may be taken pass/fail.

Transfer Credit, Proficiency Testing and Other Options in Meeting the Kent Core

1. Certain alternatives to formal Kent State coursework may be recognized in the fulfilling of the Kent Core.

2. Credits earned for specified courses within the Kent Core course list through external credit-conferring testing programs, such as the College Board Advanced Placement and College Level Examination Program (CLEP), will be applied toward the fulfillment of the Kent Core as appropriate for the specific courses for which credit is received.

3. Courses transferred from accredited post-secondary institutions will be applied toward fulfillment of the Kent Core as appropriate for the specific courses for which credit is awarded.

4. The university's Credit-By- Examination (CBE) program may be utilized in fulfillment of the Kent Core within the conditions, guidelines and policies established for that program and for the course (s) for which credit is sought.

5. Proficiency, as established by placement examinations or other recognized procedures and mechanisms for this purpose, can be used to fulfill Categories I (Composition) and II (Mathematics and Critical Reasoning) of the Kent Core. For example, students who are placed into ENG 21011 and complete it with a passing grade will have met the Category I. It is assumed that students who are placed at and pass the higher level of one of these sequenced courses have also mastered the content of the prerequisite course. While students may meet the requirements of Categories I and II through proficiency, minimum credit hours must be met in Categories III, IV, V and VI. Students meeting Categories I and II requirements through proficiency must substitute other courses, which shall be elective, to earn the minimum credit hours required for the bachelor's or associate degree.

To fulfill the purposes of general education, any of the above alternatives to the fulfillment of the Kent Core by formal coursework at Kent State University must be exercised by the students within the first 60 credit hours of academic credits earned at and/or transferred to Kent State University.

Students who transfer to the university with more than 45 credit hours of applicable credits (including students with associate's degrees in technology from the Kent State University Regional Campuses or those who transfer to bachelor's-level programs from associate-level technology programs) must exercise such option(s) within the first calendar year of their Kent State University enrollment.

Post-undergraduate students who have earned a baccalaureate from a regionally accredited institution will be deemed to have completed the equivalent of the university's Kent Core requirement. By virtue of having earned a bachelor's degree, these students will be recognized as having completed their general education requirements. If they pursue an academic program at Kent State University that requires specific courses that are also in the Kent Core but are unmet, they can be held to those requirements because the courses are considered program requirements first and foremost.

Kent State students who update their official catalog from a year prior to 2010 to the current catalog year will be given special consideration in determining completion of the Kent Core. If students have met all of the general education requirements (or Liberal Education Requirement) in their prior catalog, their Kent Core will be considered complete. Students must contact their advisor to determine eligibility.

Language Requirement for Graduate Students

All students must demonstrate proficiency in both oral and written English, which is the language of graduate study at Kent State. Judgment of such competence rests with the appropriate major department. Deficiency in English is cause for dismissal from any graduate program.

There is no universal foreign language or research tool requirement. Individual departments or discipline areas may have specific requirements. Students should consult their individual departments. The appropriate languages are determined by the student’s major department. Language requirements (if any) must be completed before doctoral students are admitted to candidacy. Special arrangements for examinations in other languages must be made by the student’s major department in consultation with the chair of the Department of Modern and Classical Language Studies. Where required, the language examination used to establish a student’s language proficiency is determined by the student’s department. The examination may be a departmentally designed and administered test. Dates for departmentally administered tests are set by the department.

A series of courses has been instituted in French and German to develop "reading" proficiency in these languages. Reading proficiency in a foreign language is demonstrated when the student completes one of the following sequences with a minimum B grade in each course of the sequence. Credit hours earned in this language sequence are not applicable toward the completion of the hour requirement in a student’s graduate program and do not count toward the minimum 8-credit-hour semester load required.

- FR 63201
- GER 61901 and GER 61902

Leave of Absence for Graduate Students

A leave of absence is granted for degree-seeking graduate students in active status who must be away from their studies for one or more semesters for personal, family, financial or other compelling reasons. Prior to applying for a leave of absence, students should consider its potential implications for such matters as funding (including assistantships and veterans benefits), loan repayment, immigration status, health insurance, university housing and time-to-degree completion.

International students should contact the Office of Global Education before the initiation of a leave of absence and before returning to campus to ensure compliance with immigration regulations and visa restrictions.

To be eligible for a leave of absence, a student must be seeking a graduate degree, have completed at least one full term of enrollment prior to the date a leave is to begin, be in good academic standing and be making reasonable progress toward the degree. Leaves will not be granted to students who fit one of the following criteria:

- Completed less than one full term of enrollment
- Not in good academic standing
- Received an extension of the degree time limit

Leaves of absence are granted for a maximum of three consecutive terms (e.g., fall, spring, summer). Students may request an extension for maximum one additional term. Although a leave may be taken for as many as 12 months, students are encouraged to return to graduate study as soon as is reasonably possible to minimize the impact of the leave on degree progress. The time taken on an approved leave of absence is not included in the time limitations for degree completion and advancement to candidacy, with the exception of the Doctor of Podiatric Medicine degree.

1 Refer to the College of Podiatric Medicine section in the University Catalog for leave of absence time limits and procedures for requesting a leave of absence for the Doctor of Podiatric Medicine degree.

The Request for Leave of Absence form should be submitted prior to the start of the term for which the leave is requested, when the necessity for leave is foreseeable. If the need for a leave is not foreseeable, the request should be submitted as soon as possible, but no later than the last day of classes in the term during which the leave has been taken. A retroactive leave of absence will not be granted.

When a department/school grants a leave of absence, it implies the program will be willing to re-admit the student. A plan for re-admission, including any conditions that must be met, should be put in writing and clearly understood by all parties prior to the start of the leave.

Students who are registered for courses must drop or withdraw from all courses prior to taking leave. Course withdrawal does not negate a student's financial obligation, and students will be held responsible for all balances due to the university. Any applicable refunds will be processed per university policy 7-06 regarding student fee refunds, see the Policy Register. Students are advised to check with the Office of the Bursar prior to taking an approved leave of absence in order to determine the status of their student accounts. Accounts that are overdue will be subject to regular procedures in accordance with university guidelines, notwithstanding any approved leave of absence.

Course withdrawal is not permitted after the tenth week of the fall and spring semesters (or the prorated deadline for flexibly scheduled sections and summer terms). Students applying for a leave of absence after the course withdrawal deadline should address grading and course completion issues with their individual instructors. To consider any variation from this rule for reasons of extenuating circumstances, the student must submit a Petition for Exception to Registration to the University Registrar.

Students on a leave of absence are not registered and, therefore, do not have the rights and privileges of registered students, including course pre-registration and access to the libraries, recreational center and health services. They cannot fulfill any official department or university requirements during the leave period, such as taking qualifying exams or submitting a dissertation/thesis. Students on an approved leave must complete the Application for Graduate Re-Enrollment form in order to register for classes and have the rights and privileges of registered students.

If a student does not return to the graduate program within the approved period for which the leave of absence was granted, he or she will be considered as having permanently withdrawn from the university. To

Science-related major course; not recommended for non-science majors.
be reconsidered for graduate study, students who have permanently withdrawn must formally apply to their program of interest, including the submission of an application, the non-refundable application fee and any necessary application materials.

**Midterm Evaluation**

A midterm evaluation grade is completed between the fourth and seventh week for all students in lower-division undergraduate courses (levels 00000, 10000, 20000). Midterm evaluation grades are not given for summer or flexible-scheduled courses due to the short duration of these offerings. Midterm results are available to academic advisors and college/school/campus deans for the purpose of intervening when achievement is considered unsatisfactory according to program or university requirements. Students will be able to view their midterm grades in FlashLine for the fall or spring semester in progress. Midterm grades are not included as part of the students’ academic transcript.

**Military Training**

Kent State University awards academic credit for military coursework according to recommendations listed on the Joint Services Transcript (JST). All eligible credits must be recognized by the American Council on Education (ACE). Kent State awards Military Transfer Assurance Guide (MTAG) coursework for articulated credit as established by the Ohio Department of Higher Education. Service members can visit Kent State's Credit Transfer Office website for information regarding requesting and submitting military transcripts.

Service Examinations: Credit is awarded for some experiences in basic training that are equivalent to specific beginning Physical Activity, Wellness and Sport (PWS) courses at Kent State University. Credit is awarded on the basis of recommendations from the School of Teaching, Learning and Curriculum Studies in the College of Education, Health and Human Services.

In order for credit to be granted in any of the above areas, a transcript or certificate of completion or a veterans DD 214 form is required. In addition, Kent State reserves the right to set the percentile score that is necessary for satisfactory performance in a course and for the granting of credit. Credit will not be given for duplicate work taken through any of these agencies.

**Military Transfer Credit Appeals Process**

Students must submit, in writing, a letter of appeal regarding their military transfer credit to the Credit Transfer Office c/o Kent State University. Upon recommendation by the Transfer Review Committee, students will be notified of the outcome, in writing. Information regarding the standards for satisfactory performance or to submit an appeal may be found on the Credit Transfer Office website.

**Minors**

An academic minor is a curriculum component, smaller than the major, which enables a student to make an inquiry into a discipline or field of study or to investigate a particular theme. The purpose of a minor is to provide formalized guidance to students in selecting courses in a field or content area that is outside the major and to provide formal recognition of that work on the transcript. The courses in the minor may be centered in a specific department or be drawn from several departments, as in the case of an interdisciplinary topical or thematic focus.

Students may not pursue a minor and a major in the same discipline. A minimum of 6 credit hours in the minor must be outside of the course requirements for any major or other minor the student is pursuing.

**Undergraduate Minors**

An undergraduate minor is minimum 12 credit hours and normally contains between 18 and 25 credit hours, with a minimum of 6 of those hours being upper-division credit and a minimum 50 percent of the total hours in residence.

Students must formally declare a minor, similar to the process by which they declare the major. Students in a bachelor's or an applied associate degree (e.g., A.A.B., A.A.S.) or the Associate of Technical Study (A.T.S.), of which there is a major, may declare a minor. Students in a generalist associate degree (e.g., A.A., A.S., A.T.S.–Individualized Program) may not declare a minor.

**Graduate Minors**

A graduate minor is minimum 9 credit hours, with a minimum 50 percent of the total credit hours taken at Kent State.

Students must be admitted to a master's, post-master's or doctoral degree to declare a graduate minor. Students formally declare a minor through the change of program application, which must be approved by the college administrating the students' major and the college administrating the chosen minor.

**Not Permitted to Continue**

Undergraduate students not progressing academically in their selected academic program will be deemed not permitted to continue based on criteria established by their program area. The criteria set forth by each program area can be found under the program section of the University Catalog. Students enrolled in a program that has not permitted to continue criteria will be notified upon entrance to the program.

Prior to being deemed not permitted to continue, students will receive a minimum of one warning and will be required to work with an advisor in their academic unit to develop a plan for continuation. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. Students who have received a warning the previous term will be reviewed during end-of-term processing to determine their status regarding continuation in their current program.

Students deemed ineligible to continue in their current program and who have not identified and declared a different program within two weeks after grades post will be administratively moved to the Degree Pathways Alternatives non-degree program. They also will be removed from all applicable courses in their former major. Students administratively moved to Degree Pathways Alternatives and enrolled at the Kent Campus will receive academic advising in the University College; regional campus students will receive advising in their assigned advising unit.

Students deemed not permitted to continue and who are subsequently enrolled in Degree Pathways Alternatives will not be able to register for courses until they meet with an advisor to complete a new plan for continuation, which will include selecting a degree program at a time specified on the plan. In addition, they will no longer be eligible to receive Federal Title IV or state financial aid until they enroll in a degree-granting program or a federal Title IV aid-eligible certificate program.
Ohio Articulation and Transfer Policy

Institutional Transfer

The Ohio Department of Higher Education in 1990, following a directive of the 118th Ohio General Assembly, developed the Ohio Articulation and Transfer Policy to facilitate students' ability to transfer credits from one Ohio public college or university to another in order to avoid duplication of course requirements. A subsequent policy review and recommendations produced by the Articulation and Transfer Advisory Council in 2004, together with mandates from the 125th Ohio General Assembly in the form of Amended Substitute House Bill 95, have prompted improvements of the original policy. Additional legislation from the 125th Ohio General Assembly also initiated the development of a statewide system for articulation agreements among state institutions of higher education for transfer students pursuing teacher education programs.

Action by the 126th Ohio General Assembly led to the establishment of criteria, policies, and procedures for the transfer of technical courses completed through a career-technical education institution; and standards for the awarding of college credit based on Advanced Placement (AP) test scores.

Legislation from the 130th Ohio General Assembly required public institutions of higher education to: use baseline standards and procedures in the granting of college credit for military training, experience, and coursework; establish an appeals process for resolving disputes over the awarding of credit for military experience; provide specific assistance and support to veterans and service members; adopt a common definition of a service member and veteran; and establish a credit articulation system in which adult graduates of public career-technical institutions who complete a 900 clock-hour program of study and obtain an industry-recognized credential approved by the chancellor shall receive 30 college technical credit hours toward a technical degree upon enrollment.

While all public colleges and universities are required to follow the Ohio Articulation and Transfer Policy, independent colleges and universities in Ohio may or may not participate in the Transfer Policy. Therefore, students interested in transferring to independent institutions are encouraged to check with the college or university of their choice regarding transfer agreements. In support of improved articulation and transfer processes, the Ohio Department of Higher Education has established an articulation and transfer clearinghouse to receive, annotate, and convey transcripts among public colleges and universities. This system is designed to provide standardized information and help colleges and universities reduce undesirable variability in the transfer credit evaluation process.

Acceptance of Transfer and Articulated Credit

To recognize courses appropriately and provide equity in the treatment of incoming transfer students and students native to the receiving institution, transfer credit will be accepted for all successfully completed college-level courses completed in or after fall 2005 from Ohio public institutions of higher education. Students who successfully completed Associate of Arts (A.A.) or Associate of Science (A.S.) degrees prior to fall 2005 with a 2.0 or better overall grade-point average would also receive credit for all college-level courses they have passed. While this reflects the baseline policy requirement, individual institutions may set equitable institutional policies that are more accepting.

Pass/Fail courses, credit-by-examination credits, experiential learning courses and other non-traditional credit courses that meet these conditions will also be accepted and posted to the student record.

Application of Transfer and Articulated Credit

Application of credit is the decision process performed by the receiving institution to determine how the credits it has accepted and recorded on the student’s official academic transcript will or will not apply toward program and degree requirements. While the receiving institution makes this decision, it will do so within the parameters of this Policy.

The following guidelines and requirements shall govern the application of transfer and articulated credit:

Ohio Transfer 36

The Ohio Department of Higher Education’s Articulation and Transfer Policy established the Ohio Transfer 36 (previously Ohio Transfer Module or OTM), which may be a subset or the entire set of a public higher education institution’s general education curriculum in Associate of Arts (A.A.), Associate of Science (A.S.) and bachelor’s degree programs. Students in applied associate degree programs may complete some individual Ohio Transfer 36 courses within their degree program or continue beyond the degree program to complete the entire Ohio Transfer 36. The Ohio Transfer 36 contains 36-40 semester or 54-60 quarter hours of course credit in English composition (minimum of 3 semester or 5 quarter hours); mathematics, statistics and logic (minimum of 3 semester or 3 quarter hours); arts and humanities (minimum of 6 semester or 9 quarter hours); social and behavioral sciences (minimum of 6 semester or 9 quarter hours); and natural sciences (minimum of 6 semester or 9 quarter hours). Oral communication and interdisciplinary areas may be included as additional options. Additional elective hours from among these areas make up the total hours for a completed Ohio Transfer 36.

Courses for the Ohio Transfer 36 should be 100- and 200-level general education courses commonly completed in the first two years of a student’s course of study. Each public university and technical and community college is required to establish and maintain an approved Ohio Transfer 36.

Ohio Transfer 36 course(s) or the full 36 completed at one college or university will automatically meet the requirements of individual Ohio Transfer 36 course(s) or the full Ohio Transfer 36 at another college or university once the student is admitted. Students may be required, however, to meet additional general education requirements at the institution to which they transfer. For example, a student who completes the Ohio Transfer 36 at Institution S (sending institution) and then transfers to Institution R (receiving institution) is said to have completed the Ohio Transfer 36 portion of Institution R’s general education program. Institution R, however, may have general education courses that go beyond its Ohio Transfer 36. State policy initially required that all courses in the Ohio Transfer 36 be completed to receive its benefit in transfer. However, subsequent policy revisions have extended this benefit to the completion of individual Ohio Transfer 36 courses on a course-by-course basis.

Transfer Assurance Guides

Transfer Assurance Guides (TAG) comprise Ohio Transfer 36 courses and additional courses required for an academic major called TAG courses.
A TAG is an advising tool to assist Ohio university and community and technical college students in planning for specific majors and making course selections that will ensure comparable, compatible, and equivalent learning experiences across Ohio's public higher education system. A number of area-specific TAG pathways in meta-majors including the arts, humanities, business, communication, education, health, mathematics, sciences, engineering, engineering technologies, social sciences and foreign languages have been developed by faculty teams.

TAGs empower students to make informed course selection decisions and plans for their future transfer. Advisors at the institution to which a student wishes to transfer should also be consulted during the transfer process. Students may elect to complete the full TAG or any subset of courses from the TAG. Because of specific major requirements, early identification of a student’s intended major is encouraged.

**Career-Technical Assurance Guides**

Collaboration among the Ohio Department of Higher Education, the Ohio Department of Education and other key stakeholders led to the development of policies and procedures to create statewide career-technical discipline specific articulation agreements and further ensure that students completing coursework at an adult or secondary career-technical institution can articulate and transfer agreed-upon technical courses/programs to any Ohio public institution of higher education and among Ohio public institutions of higher education “without unnecessary duplication or institutional barriers.”

Career-Technical Assurance Guides (CTAG) are statewide articulation agreements that guarantee the recognition of learning which occurs at public adult and secondary career-technical institutions and have the opportunity for the award of college credit toward technical courses/programs at any public higher education institution. CTAG serve as advising tools, identifying the statewide content guarantee and describing other conditions or obligations (e.g., program accreditation or industry credential) associated with the guarantee.

**Military Transfer Assurance Guides**

In response to the legislative requirement (Ohio Revised Code 3333.164) to create a military articulation and transfer assurance guide for college-level learning that took place through military training, experience, and coursework, college credit will be granted to students with military training, experience, and/or coursework that is recognized by the American Council on Education (ACE) or a regionally accredited military institution, such as Community College of the Air Force.

In order to streamline the awarding, transferability and applicability of college credit, service members and veterans are guaranteed to earn certain types of credit(s) or course(s) as specified in the Military Transfer Assurance Guides (MTAG), which are based on the endorsed baseline standards and procedures by the chancellor. Equivalent course(s), credits for courses or block of credit is to be awarded and applied towards general education and/or major course requirements at the receiving institution in accordance with the MTAG guarantee. There is some training, experience, and coursework that the receiving institution may be able to award college credit only toward general or free electives.

In addition, public institutions of higher education shall ensure that appropriate equivalent credit is awarded for military training, experience, and coursework that meet the baseline standards and procedures according to the Ohio Revised Code 3333.164. This requirement goes beyond credit/course awarded based on the MTAG alignment process.

**Apprenticeship Pathway Programs**

The apprenticeship pathways initiative advocates for individuals completing apprenticeships by incorporating their learning into academic credit, thereby saving them time and money and encouraging them to advance their academic credentials to contribute to a strong, educated workforce.

Ohio apprenticeship programs partner with public two-year institutions to provide technology-specific statewide articulation agreements that recognize non-traditional prior learning. College credit is awarded toward a technical associate degree. Each agreement simplifies student advising by outlining how apprenticeship training in a certain pathway applies to an applied associate degree and lists remaining courses required to complete the degree. The application of the credit toward a technical associate degree in these agreements is guaranteed at the participating receiving institutions.

**Advanced Placement (AP) Exams**

The State of Ohio, working with public institutions of higher education, has initiated policies to facilitate the ease of transition from high school to college, as well as between and among Ohio’s public colleges and universities.

Beginning in the fall semester 2009:

1. Students obtaining an Advanced Placement (AP) exam score of 3 or above will be awarded the aligned course(s) and credits for the AP exam area(s) successfully completed.
2. General education courses and credits received will be applied towards graduation and will satisfy a general education requirement if the course(s) to which the AP area is equivalent fulfill(s) a requirement.
3. If an equivalent course is not available for the AP exam area completed, elective or area credit will be awarded in the appropriate academic discipline and will be applied towards graduation where such elective credit options exist within the academic major.
4. Additional courses or credits may be available when a score of 4 or 5 is obtained. Award of credit for higher score values varies depending on the institution and academic discipline.

In academic disciplines containing highly dependent sequences (Sciences, Technology, Engineering and Mathematics – STEM) students are strongly advised to confer with the college/university advising staff to ensure they have the appropriate foundation to be successful in advanced coursework within the sequence.

**College-Level Examination Program (CLEP)**

The State of Ohio, working with public institutions of higher education and statewide faculty panels, has developed policies to recognize students’ prior learning and to facilitate the articulation and guaranteed transfer of such learning between Ohio's public colleges and universities.

College credit is guaranteed for students who achieve an established College-Level Examination Program (CLEP) test score for exams that have been endorsed statewide as college level. Statewide faculty panels aligned CLEP exams to equivalent Ohio Transfer 36 and Transfer Assurance Guide (TAG) courses, as appropriate. If an equivalent course...
is not available for the CLEP exam area, by default, endorsed elective or area credit will still be awarded and applied towards graduation.

Specific endorsed alignments and scores for individual CLEP exams that are outlined in the College-Level Examination Program (CLEP) Endorsed Alignment Policies document are available on the Ohio Department of Higher Education website.

One-Year Option Credit Award
The One-Year Option builds upon Ohio’s articulation and transfer system to help more adults accelerate their preparation for work by earning a technical associate degree. Consistent with the philosophy of the Career-Technical Assurance Guides (CTAG), the One-Year Option guarantees that college credit will be awarded for college-level learning that occurs through adult programs at public career-technical institutions.

Adults who complete a career-technical education program of study consisting of a minimum of 900 clock-hours and achieve an industry-recognized credential approved by the chancellor shall receive 30 semester credit hours of technical course credit toward a standardized Associate of Technical Study Degree (A.T.S.) upon matriculation at a public institution of higher education that confers such a degree. The 30 semester credit hours will be awarded as a block of credit rather than credit for specific courses. Proportional credit is to be awarded toward the A.T.S. degree for adults who complete a program of study between 600 and 899 clock hours and achieved an industry-recognized credential approved by the chancellor.

The credit earned through the One-Year Option will be applied to A.T.S. degrees bearing the following standardized degree titles:

1. Associate of Technical Study in Building and Industrial Technology
2. Associate of Technical Study in Business Technology
3. Associate of Technical Study in Health and Allied Health Technology
4. Associate of Technical Study in Information Technology
5. Associate of Technical Study in Services Technology

Conditions for Transfer Admission

1. Graduates who are considered transfer students under the Integrated Postsecondary Education Data System (IPEDS) definition with associate degrees from Ohio's public institutions of higher education and a completed, approved Ohio Transfer 36 shall be admitted to a public institution of higher education in Ohio, provided their cumulative grade-point average is at least 2.0 for all previous college-level courses and other institutional admission criteria, such as space availability, adherence to deadlines, payment of fees and grade-point average that are fairly and equally applied to all undergraduate students, have also been satisfied. Further, these students shall have admission priority over graduates with an out-of-state associate degree and other transfer students with transferable and/or articulated college credit.

2. Associate degree holders who are considered transfer students under the IPEDS definition and have not completed the Ohio Transfer 36 from an Ohio public institution of higher education will be eligible for preferential consideration for admission as transfer students as long as the institution's admission criteria, such as the minimum academic standards, space availability, adherence to deadlines and payment of fees, are fairly and equally applied to all undergraduate students.

3. In order to encourage completion of the bachelor's degree, students who are not enrolled in or who have not earned an degree but have earned 60 semester/90 quarter hours or more of credit toward a bachelor’s degree with a cumulative grade-point average of at least a 2.0 for all previous college-level courses will be eligible for preferential consideration for admission as transfer students as long as the institution's admission criteria, such as the minimum academic standards, space availability, adherence to deadlines and payment of fees, are fairly and equally applied to all undergraduate students.

4. Students who have not earned an associate degree or who have not earned 60 semester/90 quarter hours of credit with a grade-point average of at least a 2.0 for all previous college-level courses will be eligible for admission as transfer students on a competitive basis.

5. Incoming transfer students admitted to a college or university shall compete for admission to selective programs, majors, and units on an equal basis with students native to the receiving institution.

The admission of transfer students by an institution, however, does not guarantee admission to any majors, minors or fields of concentration at the institution. Some programs have additional academic and non-academic requirements beyond those for general admission to the institution (e.g., background check, a grade-point average higher than a 2.0 or a grade-point average higher than the average required for admission to the institution). Once admitted, transfer students shall be subject to the same regulations governing applicability of catalog requirements as native students. Furthermore, transfer students shall be accorded the same class standing and other privileges as native students on the basis of the number of credits earned. All residency requirements must be completed at the receiving institution.

Responsibilities of Students
To maximize transfer credit application, prospective transfer students must take responsibility for planning their course of study to meet both the academic and non-academic requirements of the institution to which they desire to articulate or transfer credit as early as possible. The student is responsible to investigate and use the information, advising and other available resources to develop such a plan. Students should actively seek program, degree and transfer information; meet with an advisor from both the current and receiving institutions to assist them in preparing a course of study that meets the academic requirements for the program/degree to which they plan to transfer; use the various electronic course/program transfer and applicability database systems, including Ohio Transfer to Degree Guarantee web resources; and select courses/programs at their current institution that satisfy requirements at the receiving institution to maximize the application of transfer credit. Specifically, students should identify early in their collegiate studies an institution and major to which they desire to transfer. Furthermore, students should determine if there are foreign language requirements or any special course requirements that can be met during the freshman or sophomore year. This will enable students to plan and pursue a course of study that will better articulate with the receiving institution’s major.

Appeals Process
Following the evaluation of a student transcript from another institution, the receiving college institution will provide the student with a Statement of Transfer and Articulated Credit Applicability (Degree Audit Report). Students disagreeing with the application of transfer and/or articulated credit by the receiving institution must file their appeal in writing within 90 days of receipt of the Statement of Transfer and Articulated Credit Applicability. The institution shall respond to the appeal within 30 days of the receipt of the appeal at each appeal level.
Student Complaints Following Transfer Appeals at the Receiving Institution

After a student exhausts the appeals process at the receiving institution and chooses to pursue further action, the Ohio Department of Higher Education (ODHE) responds to formal written complaints related to Ohio Articulation and Transfer Policy against public, independent nonprofit, and proprietary institutions of higher education in Ohio. While the ODHE has limited authority over colleges and universities and cannot offer legal advice or initiate civil court cases, staff will review written complaints submitted through its established process and work with student complainants and institutions.

Orientation for Graduate Students

All new teaching assistants are required to attend and participate in the university’s Graduate Student Orientation program prior to the beginning of the semester. The program is also open to all new graduate students and current graduate students with new teaching responsibilities. Departments may also require attendance at departmental orientation meetings.

Pass/Fail Grade Policy

Students who wish to pursue an unfamiliar field or otherwise expand their educational boundaries beyond the requirements of any declared academic program may request to take certain undergraduate courses on a pass/fail basis. The purpose of this option is to foster experimentation by providing students with the opportunity to explore a broad range of coursework without affecting their grade point average.

Students may not request the pass/fail grading option for the following types of courses:

- Courses used to meet requirements in a student’s major, minor, concentration or certificate program, or to meet college general requirements for the student’s degree.
- Courses designated as Kent Core (general education requirement).
- Courses numbered 00000-09999 (developmental).
- Courses numbered 50000-89999 (graduate).
- Courses graded Satisfactory/Unsatisfactory (S/U).

Pass/fail grading is subject to the following conditions:

1. Students whose overall GPA is below 2.00 after their most recent graded term are not eligible to request the pass/fail grading option. Transfer students admitted on probation are not eligible to request the pass/fail grading option in their first term.
2. Students may take only one course per term on a pass/fail basis.
3. Instructors will not be informed of students’ selection of the pass/fail grading option. Regular passing letter grades (e.g., B, C, D) that are reported by the instructor will be converted to a Pass (Y) grade. Letter grades of F (Fail), NF (Never Attended–Fail) and SF (Stopped Attending–Fail) reported by the instructor will be converted to a Fail (Z) grade.
4. Under no circumstances will Pass (Y) or Fail (Z) grades be converted to regular grades.
5. Students who earn Pass (Y) grades and later declare a major, minor, concentration or certificate program may apply the pass/fail credit to program requirements, if applicable, but all subsequent required coursework must be completed with regular grading.
6. A maximum 12 hours of Pass credit may be applied toward a declared undergraduate program.
7. Pass (Y) and Fail (Z) grades are not used in computing grade point averages and do not satisfy specific required grades (other than the minimum D grade) in course prerequisites and program requirements.

In order to request the pass/fail grading option, students must submit a Pass/Fail Grade Request form to the Office of the University Registrar. Students may not change grading options, including pass/fail, after the final day of course registration. Information about schedule adjustment deadlines, which includes deadlines for changes to grading options, is located in the Registration policy in the University Catalog.

Qualifying Examination for Master’s Degree

In some departments, graduate students are required to take a qualifying examination. Each student should inquire of the major department whether such an examination is required and when it should be taken. The student is responsible for making the arrangements for taking the examination. Students working for a degree requiring a thesis may have their thesis topic approved as soon as they pass the qualifying examination.

Registration

Only students who have been formally admitted to Kent State University may register for coursework and pay the appropriate fees. An official registration is a record of a student’s schedule of classes maintained online in the university’s student information system, Banner. Students who are not officially registered for a course by published university deadlines should not attend classes and will not receive credit or a grade for the course. Students are responsible for their schedules and have the ultimate responsibility to confirm the accuracy frequently during the semester before posted deadline dates. Allowing a member of the university staff to make schedule changes does not relieve the student of his or her responsibilities.

Students register for courses online through FlashLine. Students must clear any registration holds before adjusting their class schedule. Refer to the Office of the University Registrar website for registration information, instructions, dates, deadlines and procedures. New freshmen and new transfer students register through the various campus advising and registration orientation programs.

All changes to a student’s course schedule must be completed by published university deadlines. Students can find registration deadlines on their course schedule and in the Schedule of Classes in FlashLine.

Kent State University reserves the right to change the time of a course if it is deemed necessary, and it reserves the right to drop any course from the Schedule of Classes if there is insufficient student demand or if resources are unavailable to offer the course.

Late Registration Fee

Students who are not officially enrolled for any coursework (i.e., neither registered nor paid fees) as of the end (11:59 p.m.) of the seventh calendar day for the fall or spring semester will have a non-refundable late registration fee assessed for any initial registration processed. A non-payment fee will be assessed for registrations not paid by the end
(11:59 p.m.) of the 14th calendar day of the semester. Visit the Office of the Bursar website for information on students’ fees.

Add, Drop and Other Schedule Adjustments

Schedule adjustments are changes to a class schedule for students who have already enrolled in at least one course (1 credit hour or more) for that semester. During registration, students may make adjustments or requests in FlashLine by the following deadlines:

- Deadline is the end (11:59 p.m.) of the seventh calendar day of the fall or spring semester (prorated deadline for summer or flexibly scheduled courses):
  - Adding a course or changing the section of a course
- Deadline is the end (11:59 p.m.) of the 14th calendar day of the fall or spring semester (prorated deadline for summer or flexibly scheduled courses):
  - Adding a course or changing the section of a course with instructor approval
  - Dropping a course/section
  - Changing credit hours for a variable-credit-hour course
  - Changing from graded to pass/fail or audit status
  - Changing from pass/fail or audit to graded status

Students must submit a Petition for Exception to Registration form to the One Stop for Student Services when requesting schedule adjustments after the university deadlines listed above. There are no processing fees for schedule adjustments, but tuition and fees assessment may be affected.

1 The ability to add a course (or change the section of a course) after the semester begins will depend on available seats in the course section and the student satisfying course prerequisites and other registration requirements.

Course Withdrawal

Course withdrawal indicates that a student intends to stop attending any or all classes for the current term. Course withdrawal is permitted through the end (11:59 p.m.) of the 70th calendar day of the fall or spring semester (prorated deadline for summer or flexibly scheduled courses). The spring semester course withdrawal deadline may be adjusted for spring break. After that time, students are considered to be committed to all remaining courses and must complete them.

Students will use FlashLine to withdraw from one or more courses by the deadline. If students are unable to complete the term because of extreme circumstances that first occur after the deadline, they should consult their college or campus dean’s office. Any course withdrawal(s) processed on or after the 15th calendar day of the fall or spring semester (or prorated deadline for summer or flexibly scheduled courses) will appear on the students’ academic record with the Withdrawal (W) administrative mark. For more information on the W mark, refer to Grading Policies and Procedures in the University Catalog. Any applicable tuition credit (policy published on the Office of the Bursar website) is determined by the date the transaction is processed on FlashLine.

International students on J1 and F1 visas are required to contact the Office of Global Education if a course withdrawal causes them to be less than full time.

Graduate students who withdraw from all courses with an intention to return at a later date may be eligible for a leave of absence (refer to Leave of Absence for Graduate Students policy in the University Catalog).

Students in the College of Podiatric Medicine who fail to complete registration requirements by the deadline will not be enrolled in classes for the following academic year and may be withdrawn from the college. These students may also be subject to a professionalism deficiency evaluation. Podiatric Medicine Students who request withdrawal after seven weeks of course instruction will receive on their academic record the administrative mark WP or WF if passing or failing, respectively, for each withdrawn course. Refer to the college policies in the College of Podiatric Medicine section of the University Catalog for more information on the procedures for withdrawal.

Course withdrawal does not negate a student’s financial obligation, and students will be held responsible for all balances due to the university.

Registration Cancellation

To receive a full refund of tuition, students who register and decide not to attend the university must cancel their registration as early as possible, and no later than the end (11:59 p.m.) of the seventh calendar day of the fall and spring semester (prorated deadline for summer or flexibly scheduled courses). This may be accomplished by the student dropping all courses in FlashLine during registration periods.

Any paid registration not canceled by the end (11:59 p.m.) of the seventh calendar day of the fall and spring semester (prorated deadline for summer or flexibly scheduled courses) will be subject to the refund policy published on the Office of the Bursar website.

Any applicable refund is determined by the date the transaction is processed in the student information system.

Flexibly Scheduled Course Sections

Some courses are offered as flexibly scheduled sections, that is, the course does not meet for the full semester. Eligibility for processing registration transactions for these courses (adding, dropping or withdrawing) is determined by the beginning and ending dates of the section. Students can find registration deadlines on their course schedule and in the Schedule of Classes in FlashLine.

Enrollment Definitions

For financial aid eligibility and enrollment certification for loan deferrals, insurance coverage and other purposes, the enrollment status of students is defined as the following:

**Undergraduate Students**

<table>
<thead>
<tr>
<th>Enrollment Type</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-time</td>
<td>12+</td>
</tr>
<tr>
<td>Three-quarter-time</td>
<td>9-11</td>
</tr>
<tr>
<td>Half-time</td>
<td>6-8</td>
</tr>
<tr>
<td>Less-than-half-time</td>
<td>1-5</td>
</tr>
</tbody>
</table>

**Graduate Students**

<table>
<thead>
<tr>
<th>Enrollment Type</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-time</td>
<td>8+</td>
</tr>
<tr>
<td>Three-quarter-time</td>
<td>6-7</td>
</tr>
<tr>
<td>Half-time</td>
<td>4-5</td>
</tr>
<tr>
<td>Less-than-half-time</td>
<td>1-3</td>
</tr>
</tbody>
</table>
For summer, the statues listed above may be fulfilled by enrollment in one or more sessions within the summer semester, including summer intersession. Courses receiving an AU, NF or SF mark are not counted in enrollment credit hours. This definition differs from the one used for assessing tuition and fees (for more information, see Office of the Bursar website).

**Registration Limits**

Undergraduate students are able to register each fall and spring for a maximum of 18 credit hours.

Graduate students are able to register each fall and spring for a maximum of 16 credit hours, with the exception of students in the Doctor of Podiatric Medicine degree who may be required to be registered for more.

For the summer term, undergraduate and graduate students have the following registration limits:

- Maximum 6 credit hours in a single five-week summer session
- Maximum 10 credit hours in an eight-week summer session
- Maximum 10 credit hours in overlapping summer sessions
- Maximum 12 credit hours for all summer sessions combined, including summer intersession

**Course Overload For Undergraduate Students**

Eligible undergraduate students wanting to register for more than the maximum listed under registration limits may do so through an automated overload process.

**Criteria for eligibility**

- Students who have a minimum 12 Kent State earned credit hours and the following GPA are eligible for an automatic overload:

<table>
<thead>
<tr>
<th>GPA</th>
<th>Overload Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.500-2.749</td>
<td>students may register for 19 credit hours in fall and spring</td>
</tr>
<tr>
<td>2.750-2.999</td>
<td>students may register for 19-20 credit hours in fall and spring</td>
</tr>
<tr>
<td>3.000-4.000</td>
<td>students may register for 19-21 credit hours in fall and spring</td>
</tr>
</tbody>
</table>

- First-semester transfer students and freshmen without a Kent State GPA are excluded from qualifying for an automatic overload. They must seek approval from their advising office.
- Students not meeting the above criteria or requesting more than 21 credit hours in the fall or spring semester (more than 12 credit hours in all summer terms) will be blocked from registering for an overload unless approval is granted from their advising office.
- Students on academic probation may not register for more than 15 credit hours and may receive a prescription from the dean of their college or campus that they further reduce the credit hours carried until removed from probation.

Exceptions to this rule must be approved by the appropriate college dean.

**Course Overload For Graduate Students**

Graduate students wanting to register for more than the maximum listed under registration limits should request permission from their advisor, who will consider such factors as academic standing, progress to degree and the rigor of their proposed course schedule in deciding whether to approve the overload. Graduate students with an approved overload will have their course limit adjusted to register for the approved overload class(es).

**Remote Participation in a Thesis or Dissertation Defense**

*Date Effective: August 27, 2020*

**Policy Statement**

Under normal circumstances, all members of a dissertation committee must be physically present in the examination room during the entire dissertation defense and during the committee’s private deliberations following the examination. In most cases, the chair of the dissertation committee and the graduate faculty representative are expected to be physically present in the examination room.

Students enrolled in a fully online degree program are not required to be physically present for their dissertation defense.

For on-ground and hybrid (online/on-ground) degree programs, remote participation by web conferencing is permitted only if the student and/or committee member has obtained permission in advance from the chair of the thesis/dissertation committee in consultation with committee members. They must provide a compelling reason and/or explanation as to why they cannot be physically present.

With any dissertation defense that is approved to be conducted with remote participation, the following rules must be enforced:

- The web-conferencing software to be used allows all participants to see and hear each other during the defense.
- The defense remains open and available to the university community.
- The program pays for any costs associated with the remote participation.
- The chair of the dissertation committee is responsible for ensuring that all requirements for remote participation are met, that the remote participation was uninterrupted and, if interrupted, that the defense was paused until all remote participations were fully restored.
- Participation by telephone only is not permitted under any circumstances.

**Reason for Policy**

To establish consistent practices when a student and/or a committee member are not able to be physically present for the student’s defense of a thesis or dissertation.

Definitions

**Defense**: refers to students presenting, explaining and defending their ideas submitted in their thesis or dissertation. The defense is designed so that faculty members can ask questions to ensure that students understand their chosen field and focus area.

**Dissertation**: a highly individualized investigative study that results in the development and writing of a scholarly, comprehensive paper and fulfills the culminating requirement for a Ph.D. degree. The dissertation must demonstrate that the student has acquired the ability to conduct research in a discriminating and original manner. The dissertation should make a significant enough contribution to the field in which it is written that at least one scholarly article suitable for publication in a professional journal may be derived from it or that the findings of the dissertation would be otherwise publishable.

**Thesis**: a highly individualized investigative study that results in the development and writing of a scholarly, comprehensive paper and fulfills the culminating requirement for a master's degree. The thesis topic is formulated by the student in consultation with the advisor and should be one that will further the student's educational development by developing research or other skills that will help the student keep abreast of the field and enable the student to pursue independent work.

**Web-conferencing software**: allows participants to conduct or attend meetings via the internet. The software allows participants in different locations to connect to each other for voice and video chat, instant messaging and file and screen sharing. Examples of software include Skype, Zoom, Webex Meetings, GoToMeeting and Blackboard Collaborate.

**Revision History**

**Effective August 2020**: Establishes a formal policy for graduate students to defend their thesis or dissertation through remote participation.

**Residence Requirement**

Residence is defined as academic credit earned at Kent State University. In this context, residence does not refer to whether a student lives on campus; it refers to the hours required to earn a degree or certificate from Kent State University.

**Undergraduate Students**

For bachelor’s degree programs, students must complete a minimum of 30 passed hours in residence, of which 9 passed hours must be at the upper division (30000, 40000) level in the major. For associate degree programs, students must complete a minimum of 15 passed hours in residence. For certificate and minor programs, students must complete a minimum 50 percent of the program’s total required passed hours in residence. Some certificate and minor programs may require more. Passed hours comprise graded coursework, including those receiving an S (satisfactory) or Y (pass) grade. Information on specific degree or certificate requirements may be obtained in the college section of the University Catalog. Kent State study-abroad and study-away programs that count toward a student’s Kent State University hours may be taken as part of the residence requirement.

Credit earned by means of transfer courses does not count toward residence. Transient study will not count toward the hours of residence, but it will not invalidate residence requirements in progress. Students eligible to take transfer coursework at other institutions are discouraged from taking these courses during their last semester because of the time necessary to receive and process transcripts, which may delay clearing the student for graduation. Under unusual circumstances, students may request a minor modification of this requirement by contacting their college prior to registration elsewhere.

**Graduate Students**

Residence requirements are determined by the graduate departments. Please consult the appropriate department as to its residence requirement for the degree.

**Retroactive Credit**

Undergraduate students currently enrolled in a degree or certificate program who are placed into an advanced course through assessment or departmental review may earn retroactive credit for designated lower level course(s) in that subject. The advanced courses approved for earning retroactive credits are listed below.

To apply for retroactive credit, students must submit an application for retroactive credits to the Office of the University Registrar.

The following stipulations apply:

- Students must complete the advanced course at Kent State with a minimum C or S (Satisfactory) grade to be eligible for retroactive credit. Courses taken for the pass/fail grade or audit mark will not be accepted for retroactive credit.
- Students who withdraw from or fail to meet the minimum C or S grade in the advanced course may retake the course and apply for retroactive credit once the minimum C or S grade is achieved and posted.
- Course credits earned through the retroactive policy are not assigned a letter (A-F) grade. The mark CR will be posted to a student’s transcript for the enrolled term the student applied for the retroactive credit.
- Retroactive credit will count toward students’ class standing, total credit hours earned for graduation and hours required for graduation honors.
- Retroactive credit will not count in students’ grade point average (GPA), quality points and residence requirement.
- Students are not eligible for retroactive credit if they previously earned college credit for a course that is comparable to a lower level course in the same subject of the advanced course. Previous college credit includes credit earned through exam (e.g., AP, CLEP), courses transferred from other college-level institutions, tech prep programs or dual enrollment in a high school; or any other alternative credit listed in the University Catalog.
- Not all courses that offer retroactive credits are available each semester.
- Retroactive credit is not available for graduate courses.
• Students may apply for retroactive credit following the posting of the grade at any time before graduation, but no later than the second Sunday of the semester in which they are graduating.

A fee per credit hour is charged for processing and posting of the credit on the student’s transcript. The Kent State Retroactive Credit Chart provides information about eligible courses and credits earned.

Selective Service Requirement

Pursuant to Ohio Law, House Bill 845, all Ohio resident male students between the ages of 18 and 26 not registered with Selective Service System must file a statement ofSelective Service registration with the Office of the University Registrar. If students have not already registered with the Selective Service System, they will be contacted regarding their non-compliant status. Failure to comply will result in the assessment of nonresident tuition fees to their account and the cancellation of all state-based financial aid. Further questions may be directed to the Office of the University Registrar.

Semester System

The academic year at Kent State University consists of two semesters—fall and spring—each approximately 15 weeks in length. The normal bachelor’s degree program is designed to be completed in four academic years, or eight semesters. The normal associate degree is designed to be completed in two academic years, or four semesters. In addition, the university conducts four sessions during the summer term:

• one three-week intercession
• two five-week sessions
• one eight-week session

Each credit hour of coursework is called a “credit hour,” as distinguished from the quarter system used at some other universities and colleges. An academic year under the quarter system consists of three 10-week quarters, and one credit hour of coursework is called a “quarter credit hour.”

One quarter credit hour of coursework is equivalent to two-thirds of a credit hour (1 quarter credit hour = 0.67 credit hour); one credit hour is equivalent to one and one-half quarter credit hours (1 credit hour = 1.50 quarter hours). A transfer student with a number of quarter credit hours should multiply that number by two-thirds to determine the equivalent credit hours at Kent State University. For example, a student with 48 quarter credit hours would receive 32 credit hours of transfer credit, providing the previous work meets university academic standards.

Sequential Coursework

In certain subject fields, such as mathematical sciences, foreign languages, English composition and some of the basic natural sciences, knowledge is sequential or cumulative at the lower levels of study, and courses are structured in clear sequences. Students who already have received credit for, or established proficiency at, one level in such a sequence of courses may not receive academic credit counting toward graduation for a prior course in the sequence or for a course in a lower sequence.

Chemistry Course Sequencing Policy

Because of the similar level of course content in specific chemistry courses, credit hours toward graduation can be earned for only one course in each of the following groups:

Group Courses
Group A CHEM 10050, CHEM 10060, CHEM 10970
Group B CHEM 10050, CHEM 10061, CHEM 10971
Group C CHEM 10052, CHEM 20481, CHEM 30481
Group D CHEM 10052, CHEM 20482, CHEM 30482
Group E CHEM 10053, CHEM 10062
Group F CHEM 10053, CHEM 10063

• Students who have successfully completed CHEM 10060 may bypass CHEM 10050. However, students who have successfully completed CHEM 10050 may not bypass CHEM 10060.
• Students who have successfully completed CHEM 10062 may bypass CHEM 10053. However, students who have successfully completed CHEM 10053 may not bypass CHEM 10062.
• Students who have successfully completed CHEM 20481 or CHEM 30481 may bypass CHEM 10052.

Standardized Test Score Reports

Kent State University only accepts official standardized test score reports sent directly by the testing center. Graduate Record Examination (GRE) scores are sent directly by the Educational Testing Service, and Graduate Management Admission Test (GMAT) test scores are sent directly by the Graduate Management Admission Council. Consistent with the policies of both the Educational Testing Service and the Graduate Management Admission Council, GRE and GMAT scores are valid for five calendar years. Thus, GRE and GMAT scores taken more than five calendar years prior to the date of application to Kent State University will not be accepted.

Student Conduct

The Kent State University Code of Student Conduct applies to both graduate and undergraduate students. Students are subject to educational sanctioning, including, but not limited to, probation, suspension or dismissal for violations of the code.

University policies regarding behavioral conduct and cheating/plagiarism are available on the Office of Student Conduct website and the Plagiarism website. Furnishing false or incomplete information to the university with intent to deceive or forge, alter or misuse university documents or other official documents that serve as the basis for admission and graduation may result in the revocation of admission, academic dismissal or revocation of a degree or certificate.

It is the policy of Kent State University that:

1. Students are to perform their own academic work according to the standards set by faculty members, departments, schools and colleges of the university.
2. To take and present as one’s own a material portion of the ideas or words of another, or to present as one’s own an idea or work derived from an existing source, without full and proper credit to the source of the ideas, words or works is considered plagiarism/cheating and will result in university sanctioning.
3. University rules and regulations form parameters for individual behavior on and off campus, and follow the normative standards of behavior adhered to by the City of Kent and Kent State University communities. By virtue of a student’s enrollment at Kent State University, he/she consents to follow the policies and procedures of the university, including those outlined in the Code of Student Conduct. It is the student’s responsibility and in his/her interest to be familiar with all applicable conduct-related policies.

Student Responsibilities

Each Kent State University student is responsible for:

1. Pursuing successful completion of all courses for which he or she enrolls.
2. Meeting with an advisor to develop an academic plan. However, the final responsibility for following procedures and meeting university, college and program requirements as outlined in the University Catalog rests solely with the student.
3. Being familiar with the current academic calendar, including, but not limited to, deadlines for course registration, course withdrawal and application for graduation.
4. Knowing his or her academic record, including student schedule (found on the Student Printable Schedule in FlashLine) for each semester, and academic progress toward program completion.
5. Maintaining a current and accurate mailing address, phone number and Kent State e-mail address in FlashLine, and reading and responding promptly to all communications from the university.
6. Being familiar with and adhering to the university’s rules, regulations and policies as published in the University Catalog and University Policy Register.

Thesis for the Master’s Degree

Policy Statement

The writing of an acceptable thesis is mandatory or an option in certain master's degree programs.

Thesis Topic

The thesis topic must be approved by the student’s academic unit and filed with the college dean no later than the semester preceding that in which the candidate expects to receive the degree. The thesis topic should be one that will further the student’s educational development by developing research or other skills that will help the student keep abreast of the field and enable the student to pursue independent work. The thesis topic is formulated by the student in consultation with the advisor and submitted to the academic unit for approval according to normal procedures for that academic unit.

All students preparing a thesis are required to file a Notification of Approved Thesis Topic form. After the topic has been approved by the student’s advisor and a committee has been formed, the advisor, members of the committee, graduate/program coordinator and lead administrator of the academic unit sign the form and forward it to the college dean for approval. The college office returns a copy of the completed form to the academic unit.

When submitting the form, the student should attach a short summary of the thesis (no more than a paragraph) that includes a clear statement of the problem to be undertaken and the procedure or methodology to be used in the research.

Thesis Committee

When the student has developed a thesis topic acceptable to the advisor, a thesis committee is convened, responsible for overseeing the progress of the candidate’s thesis. The graduate/program coordinator appoints the members of the committee in consultation with the student and the student’s advisor. This group will consist, at minimum, of three members:

- The advisor, who chairs the committee
- Minimum two additional members from the candidate’s academic unit
- If appropriate, one or more committee members also may be selected from other academic units. However, the majority of the committee members must be from the student’s home academic unit.

The advisor must be a member of the graduate faculty who has been approved to direct theses. The other members of the committee must have associate or full graduate faculty status and be approved to serve on a master’s committee. A co-advisor, if is used, will count as one of the required members from the student’s academic unit.

Special permission must be obtained from the college dean for anyone on the thesis committee who does not meet the qualifications stated above.

The graduate/program coordinator, in consultation with the graduate studies committee will, as necessary, review the composition of the proposed committee for appropriate balance, and the topic for strength and suitability.

Thesis Registration and Applicability Toward Degree

Upon approval of the thesis topic, the student is required to register continuously for Thesis I (6x199) each semester (fall, spring) for a total of 6 credit hours. A student who has completed the required 6 credit hours of Thesis I but has not finished the thesis is expected thereafter to register continuously for Thesis II (6x299) each semester (fall, spring) until all degree requirements are met. Students who are planning to defend their thesis in summer or early fall, or who are requiring access to university resources during the summer months — including, but not limited to, feedback or mentoring from their thesis advisors, use of university buildings and other research resources — must register for thesis in the summer term. For students in good standing, those credit hours will be approved by the academic unit administrator. The student receives an In-Progress (IP) administrative mark until the thesis is completed, at which time the IP mark is changed to either the Satisfactory (S) or Unsatisfactory (U) grade. No more than 6 credit hours of Thesis I may be counted toward completion of degree requirements. Credit hours earned in Thesis II do not, under any circumstances, count toward the degree.

Student must register for thesis no later than the last semester they are in residence. The thesis must be completed and in the hands of the examining committee by the deadline as determined by the college and communicated in advance to the student.

Final Examination (Oral Defense)

In some academic units, a final examination (oral defense), open to the university community, may be required of candidates writing a thesis. This examination is directed primarily toward the thesis but may contain other topics with which the committee feels the candidate should be familiar. The procedures for the final examination are detailed in the procedures section below.
Thesis Submission
Master's candidates are required to submit their thesis in electronic form to the OhioLINK Electronic Thesis or Dissertation Center, where the thesis is made publicly available. Information on the process can be found on the University Libraries guidelines for ETD preparation website. The thesis must be prepared according to established guidelines, which are available in the college office. Individual units may still require submission of a paper copy for their archives and the deadline for the thesis to be filed in the college office is the last day of classes for the term of graduation (some colleges may require an earlier deadline). It is the responsibility of the master's student to fulfill this requirement.

Reason for Policy
Policy enforces uniform standards for the master's thesis submission and oral defense and defines the thesis committee and applicability toward the master's degree.

Procedures
Procedures for the Final Examination (Oral Defense)
When the thesis has been accepted by a student's advisor, the advisor will arrange for the final examination, and the student will distribute the thesis to members of the thesis committee. The advisor will designate the time and place of the oral defense and notify the student and all members of the thesis committee. The oral defense should be scheduled to allow a minimum of 10 days for all members of the thesis committee to review the thesis. The college dean will be kept informed of the time and place of the examination and the composition of the examining committee.

In the absence of the advisor, the graduate/program coordinator will postpone the oral defense. In the case of long-term absence or enduring illness of the advisor, the lead administrator of the academic unit, in consultation with the graduate studies committee and the original advisor, should make arrangements for a substitute.

The oral defense will be open to the university community. The advisor should notify the academic unit of the time and place of the so that it may be announced in a suitable way. The student should provide copies of the thesis abstract to the academic unit so that it will be available to interested individuals prior to the defense to familiarize members of the graduate faculty with the methodology and findings.

Students may participate in the oral defense in a different location than the committee members (i.e., by web conferencing) if they are declared in a fully online degree program or have obtained permission in advance from the committee chair. See the policy on remote participation in a thesis or dissertation defense in the University Catalog.

The thesis advisor will act as the moderator at the oral defense. The duties of the moderator are to preside and ensure that all participants act in a civilized, polite and proper manner. The advisor should be familiar with the procedures of the oral defense and has the authority to suspend proceedings should a situation arise that would not be conducive to a fair examination. The student will open the defense with a brief presentation of the thesis findings, after which the members of the thesis committee will question the student in an order determined by the advisor. Questions dealing with the substance, meaning and usefulness of the research in the thesis are of greatest priority. Inquiries or comments dealing with punctuation, grammatical minutiae, spelling, etc., are out of order and should be written out and privately submitted to the student and the advisor.

When, in the judgment of the advisor, members of the thesis committee have had an adequate opportunity to question the student, the advisor may open the examination to non-committee members of the graduate faculty, then, as the advisor deems appropriate, to others present. If, in the opinion of the advisor or upon a motion duly passed by a majority of the committee, it is deemed desirable to discontinue the oral defense, the advisor may recess the oral defense until a time mutually agreeable to the advisor, the student and the thesis committee.

The advisor and members of the thesis committee will sign the Report of Thesis Final Examination form, and all register their vote of "pass" or "fail." Thesis committee members may not abstain in this vote. A student passes the oral defense and becomes a "candidate" for the degree if there is no more than one dissenting vote. The graduate/program coordinator and lead administrator of the academic unit also signs the report, and the document is forwarded to the college for the signature of the dean. The college returns a copy of the completed form to the academic unit.

Following any revisions required by the committee, the advisor and the lead administrator of the academic unit must approve the final version of the thesis document by signing the signature page of the Thesis and the Thesis Preparation Approval Form when the student submits the thesis.

Definitions
Academic Unit: an academic department, school or a designated graduate program within a college, department or school

Defense: refers to students presenting, explaining and defending their ideas submitted in their thesis. The defense is designed so that faculty members can ask questions to ensure that students understand their chosen field and focus area.

Thesis: a highly individualized investigative study that results in the development and writing of a scholarly, comprehensive paper and fulfills the culminating requirement for a master's degree. The thesis topic is formulated by the student in consultation with the advisor and should be one that will further the student's educational development by developing research or other skills that will help the student keep abreast of the field and enable the student to pursue independent work.

Time Limits for Graduate Degrees

Master's degree students will normally complete work within six calendar years after the students' first graduate registration at Kent State University. Any credit being transferred for meeting degree requirements should also have been earned within the six-year period. Departments with time limits that vary from these norms will notify their students in writing.

It is expected that the doctoral degree students entering Kent State with a baccalaureate will complete the degree in no more than 10 years. Normally, doctoral degree students entering with a master's degree will complete the degree in no more than nine years. Students proceeding from the baccalaureate will normally pass the candidacy examination within five years, and students already possessing a master's degree will pass the candidacy examination within four calendar years of the first graduate registration at Kent State University. A doctoral candidate is expected to satisfactorily complete the dissertation and pass the final oral examination within five calendar years after having passed the candidacy examination. Individual disciplines may have shorter time limits, and students should consult with their specific program's department.

When an extension of any of these time limits seems to be necessary and proper, the student and advisor will petition the student's department for an extension. The extension may be denied, in which case the student will be dismissed, or it may be granted with qualification. The student, advisor and college dean must be informed of the decision in writing. If the extension exceeds one year, the approval of the college dean is required. Requests for time extensions exceeding one year must be submitted to the college dean with evidence that the degree candidate is current in his/her field of study.

Students who must be away from their studies for one or more semesters for personal, family, financial or other compelling reasons may apply for a leave of absence. More information can be found in the Leave of Absence policy in this Catalog.

Upon receiving their graduate degree, students are inactivated and are no longer eligible to register for courses at Kent State University. If students wish to continue their studies at Kent State, they will need to reapply to the appropriate academic unit and be accepted for another graduate degree program or as a non-degree student.

Candidates for the Doctor of Podiatric Medicine degree must successfully complete all graduation requirements within six years of their initial matriculation. The six-year limitation includes any leaves of absence, withdrawals or any other interruptions of the students' program.

Transcripts

The integrity of a student's academic transcript is fundamental to the validity of coursework and degrees certified by the university. Therefore, all student transcript entries (grades and other notations) are finalized when the degree is officially posted to the permanent academic record following the effective date of graduation. Visit the University Registrar website for the degree-posting deadline.

All financial obligations to Kent State University must be satisfied before a transcript is released. For information on ordering transcripts, refer to the Office of the University Registrar website.

Transfer of Graduate Credit

Graduate credit earned either at Kent State University or another university before admission into a given graduate program may be transferred into that program. A maximum of 12 credit hours may be transferred into the master's degree, the Educational Specialist degree or the doctoral degree. Some programs may have a lower maximum. Credits should be transferred at the time the student is admitted to the program, but no later than the end of the second semester of enrollment in that program.

Students who wish to have credits considered for transfer should petition the graduate program. The program can accept or reject such credits at its own discretion, regardless of the discipline or institution in which the credits were earned.

The following conditions must be satisfied in order to transfer graduate credit:

1. The credit was earned at an accredited university (or international equivalent).
2. The credit was not used for a previously awarded degree.
3. The student earned, at minimum, a grade of B or satisfactory (S) in each course for which credit is to be transferred.
4. The work fits into the student's program of study.
5. The credit is less than six years old for a master's degree and less than nine years old for a doctoral degree at the time the degree is conferred.
6. The student's petition for transfer credit is filed with the program and college. If the credit was earned at another university, an official transcript must be filed with the petition for transfer credit.
7. The student's advisor, department chair/school director and college dean approve.

Transfer credits from another university count in the student's total earned hours but do not count in the student's graduate grade point average (GPA). Credits transferred from Kent State University count in the student's total earned hours but do not count in the student's graduate grade point average (GPA). Credits transferred from Kent State University count in the student's total earned hours and in the student's graduate GPA.

Normally, the number of credit hours transferred from a particular course cannot exceed the number of credit hours given for a Kent State course that covers equivalent material.

Students who wish to transfer credits taken outside the university after matriculating into a Kent State University program must obtain approval from their program for those transfer credits in advance of taking the outside courses.
Transfer of Undergraduate Credit

Students may transfer academic credit to Kent State University as new students, as active students or as returning students.

Transfer credit will be accepted for college-level courses (e.g., not remedial/developmental, eligible to count toward a degree) from regional accredited or international equivalent institutions as determined by Kent State’s Credit Transfer Office per the following conditions:

College or University in Ohio

- The student earned a minimum D (1.000 or Pass or Satisfactory) grade in fall 2005 or later.
- The student earned a minimum C (2.000) grade prior to fall 2005.
- The student earned a minimum D (1.000 or Pass or Satisfactory) grade in fall 1990 or later that was applied toward an earned Associate of Arts or Associate of Science degree with a minimum overall 2.000 GPA.

College or University Outside Ohio

- The student earned a minimum D (1.000 or Pass or Satisfactory) grade in fall 2010 or later.
- The student earned a minimum C (2.000) grade prior to fall 2010.

Effective fall 2010, upper-division and lower-division credit hours are awarded for transfer based upon the level of course to which they are equated at Kent State.

Accepted transfer credits are posted on the Kent State University transcript in semester hours and count toward class standing and total credit hours earned for graduation at Kent State. Transfer credits and grades will not count toward the students’ Kent State Grade Point Average (GPA), residence requirement and graduation honors; nor will a transfer grade replace a grade earned in an equivalent course at Kent State. Transfer grades, however, may be considered for prerequisites to a specific course or admission to and/or progression for a specific program. Kent State prerequisite requirements will be taken into consideration before students enroll in coursework at another institution.

The Kent State college that houses the student’s major determines the applicability of these courses toward the desired degree or certificate. Some programs may require students to earn higher grades in specific courses or requirements. Students will be held to the required grade and GPA standards for admission to and graduation from these programs.

Students who have attended schools that are not regionally accredited or that are not candidates for such accreditation are not granted credit by the Credit Transfer Office for work completed there. The students’ Kent State college, however, may grant such credit at its discretion. Although the evaluation of a student’s performance at a non-accredited institution is considered in the admissions decision, any work completed at an accredited institution takes precedence. See the Alternative Credit policy in the University Catalog for more information on limits of credit hours.

Transfer Credit Appeals Process: Students must submit, in writing, a letter of appeal regarding their transfer credit to the Kent State University Credit Transfer Office. Upon recommendation by the Transfer Review Committee, students will be notified of the outcome in writing.

New Students: An official evaluation of transfer credit is completed for undergraduate students who have been admitted to the university and have submitted official transcripts from all post-secondary institutions previously attended.

Active Students: An "active" student is one who is enrolled at Kent State University for a minimum 1 credit for one semester of longer without more than a one-year interruption. Active undergraduate students who wish to take college-level coursework at another institution (as described in the policies above) while continuing their studies at Kent State need to complete the steps listed below before enrolling at the other institution. Completing these steps will ensure students enroll in coursework that will transfer back to Kent State. Not completing these steps will not guarantee the coursework will transfer as expected. Thus, students who do not complete the following steps when transferring coursework do so at their own risk.

1. Meet with their academic or faculty advisor to review program requirements, course prerequisites, remaining coursework, possible impact if repeating courses and transfer course equivalencies.
2. Complete the Transfer Course Planning form.
   a. The form is valid for one term only (quarter, semester, etc.), or for one academic year for year-long study abroad/away opportunities.
   b. The form is subject to all restrictions of the dean of the student’s college or regional campus offering a College of Applied and Technical Studies program.
3. Submit an Ad Hoc Consortium Agreement to the Office of Student Financial Aid if applying for financial aid during the term at the institution or to continue eligibility.

After completing the transfer coursework, students are responsible for submitting an official transcript from the other institution to the admissions office of the Kent State campus enrolled. Students are discouraged from taking transfer coursework during their last semester because of the time necessary to receive and process transcripts, which may delay the student’s graduation.

Returning Students: All transfer policies described above apply to Kent State students who interrupted their studies at the university for one or more years, completed coursework at another college or university and are now returning to Kent State.

Kent State students who have not attended for one year, were not academically dismissed and completed coursework at another college or university during their absence should refer to the "former undergraduate student" section in Admission Information page in the University Catalog. Kent State students who were academically dismissed and completed coursework at another college of university during their absence should refer to the Dismissal, Appeal and Reinstatement policy in the University Catalog.

Undergraduate Students Enrolling in Graduate Courses

Undergraduate students who have earned a minimum of 90 credit hours and minimum 3.300 overall GPA may enroll in a maximum of 12 credit hours of graduate coursework and apply these hours to the completion of the bachelor’s degree. These credit hours cannot be applied to a future graduate degree at Kent State University (nor can the student take the course again). Enrollment in graduate coursework is limited to master’s (50000 and 60000) level courses, and students must obtain permission in advance.
To obtain permission to enroll in the course, the student must complete a Permission for Undergraduate Students to Enroll in Graduate Courses form. The request form must be approved by the instructor of the graduate course.

To obtain permission to apply graduate coursework to the bachelor’s degree, the student must meet with their undergraduate advisor to complete a Petition for Exception to Undergraduate Program Requirements form. The advisor may approve the request if all of the following conditions apply:

- Student has earned the minimum undergraduate semester credit hours and minimum GPA requirement.
- Graduate course will provide enrichment while the student pursues the undergraduate degree.
- Student does not exceed the maximum 12 graduate credit hours.

Another option for undergraduate students to take graduate level coursework is through a combined bachelor’s/master’s degree program. See the Combined Bachelor’s/Master’s Degree Program policy for more details.

**University Readiness Standards and Placement Assessment**

In 2012, the Ohio Department of Higher Education established uniform statewide standards and college testing thresholds for remediation-free status for undergraduate students. Students meeting these standards and thresholds are deemed remediation-free and are eligible to enroll in college-level courses in the respective subjects. These standards and thresholds do not replace Kent State’s placement assessment policies.

**Kent State University Placement Assessment**

Kent State University uses ACT, SAT, GED, high school GPA and/or placement assessment(s) to determine appropriate course placement in mathematics, English, foreign language and critical and core reading strategies. Any required placement assessments must be completed before a student registers for classes in order to ensure student readiness and correct course placement. Any student required to attend a campus-specific orientation program (e.g., Destination Kent State: Advising and Registration) will be required to complete all appropriate assessments prior to the orientation program.

Students who earn college credit before enrolling at Kent State may be exempt from taking some or all placement assessments. Students must submit their college transcripts (including College Credit Plus and dual enrollment credit), Advanced Placement (AP), International Baccalaureate (IB) and military transcript(s) for review and consideration of transfer credits in order to be exempt from taking some or all placement assessments.

Most assessments are accessible online. Students will be provided with information about assessments that are required and how to access the assessment, either by e-mail, “My Lists” Checklist or some other form of communication.

**Time Limits:** ACT, SAT, ALEKS mathematics and Accuplacer scores are accepted for two years from the date of the assessment and can be used for placement in mathematics, English and critical and core reading strategies. Placement assessment scores for Foreign Language provided through WebCape can be used for one year from the date of assessment.

**Mathematics Placement**

In addition to the remediation-free standards established by the Ohio Department of Education, Kent State’s Department of Mathematical Sciences accepts the following for students in a program that does not require higher levels of mathematics (i.e., non-algebra track):

- Students with a 3.00 overall high school GPA or higher may take MATH 10040 or MATH 10050, regardless of their score on assessments mentioned in the standards listed above.
- Students with a 3.50 overall high school GPA or higher may take MATH 10041 or MATH 10051 regardless of their score on assessments mentioned in the standards listed above.

All undergraduate degree programs require the successful completion of the Kent Core Mathematics and Critical Reasoning requirement. Some programs may require specific mathematics course(s). Placement into mathematics courses is determined by a student’s score on the ALEKS placement assessment and/or the ACT or SAT score or scores on the other listed assessments. Not all students need to take the ALEKS mathematics placement assessment, and students should check their “My Lists” checklist in FlashLine for that determination. However, all students scoring below 22 on ACT mathematics or below 530 on SAT mathematics or below the threshold in the other listed assessments need to take the ALEKS placement assessment.

Students may improve their initial placement score by working in an individualized learning module on ALEKS, then retaking the ALEKS mathematics placement assessment. They have free access to their learning modules and reassessment for one year from their initial assessment. Students who score 80 percent mastery in the learning modules have an excellent chance of improving their placement through a proctored reassessment.

Students deemed remediation-free in mathematics, as described in the table above, or with an overall 3.5 high school GPA or higher, may register for one of the following courses, as required by their major:

- Algebra Track: MATH 10675, MATH 10771, MATH 10772
- Non-Algebra Track: MATH 10041, MATH 10051, MATH 11008
Remediation-free students who want to register for a course other than the ones listed above may take the ALEKS mathematics placement assessment.

Students who are not deemed remediation-free in mathematics, as described in the table above, must take the ALEKS mathematics placement assessment to determine the course they should take as required by their major.

Additional information regarding placement after taking the ALEKS assessment may be found on the Department of Mathematical Sciences website.

**English Placement**

All undergraduate degree programs require successful completion of the Kent Core Composition requirement. Placement into the appropriate starting course in the sequence is determined by ACT English or SAT evidence-based reading and writing or high school GPA. In the event students do not have ACT, SAT scores or qualifying high school GPA and are attending a Kent State University regional campus, they will take Accuplacer Next Generation reading and Writeplacer. This assessment is available on site or remotely. Students who have taken Accuplacer sentence skills, Writeplacer or reading comprehension at another institution within two years of their initial start date may opt to transfer those scores to Kent State University.

Students enrolled at a Kent State University regional campus who do not meet the university readiness standards will be required to enroll in Stretch sequence and given the option to enroll in Stretch, regardless of placement. Regional Campus students should also be informed about the Stretch sequence and given the option to enroll in Stretch, regardless of placement. Regional Campus students should also be informed about the Stretch sequence and given the option to enroll in Stretch, regardless of placement. Regional Campus students should also be informed about the Stretch sequence and given the option to enroll in Stretch, regardless of placement.

Students who do not have ACT/SAT scores or high school GPA older than two years are acceptable for English placement. Students who do not have ACT/SAT scores or qualifying high school GPA and are attending a Kent State University regional campus, they will take Accuplacer Next Generation reading and Writeplacer. This assessment is available on site or remotely. Students who have taken Accuplacer sentence skills, Writeplacer or reading comprehension at another institution within two years of their initial start date may opt to transfer those scores to Kent State University.

To provide more opportunities to all students, ACT/SAT scores and/or high school GPA older than two years are acceptable for English placement. Regional Campus students should also be informed about the Stretch sequence and given the option to enroll in Stretch, regardless of their older ACT/SAT or GPA. Students who do not have ACT/SAT scores or high school GPA will take Accuplacer Reading and Writeplacer.

**Foreign Language Placement**

Students intending to study Chinese, French, German, Italian, Russian or Spanish should take the placement assessment 48 hours before their academic advising appointment.

Students planning to study a language other than the ones listed above should contact the Department of Modern and Classical Language Studies via email (mcls@kent.edu) or website for further placement instructions. All students should begin foreign language study in the appropriate course, which may be determined in one of the following ways:

1. Webcape Placement Exam available on the Placement Channel in FlashLine for Chinese, French, German, Italian, Russian and Spanish.
2. Placement interview with a faculty member in the Department Modern and Classical Language Studies for languages for which there is no Webcape Placement Exam.
3. Placement based on alternative credits accrued per one of the approved methods specified in the University Catalog.

**Foreign Language Requirements:** Generally, foreign language requirements are met by passing the highest level course in the language requirement or a course beyond the highest level in the requirement. Students should review the University Catalog and consult with their academic advisor(s) to determine specific language requirements for their college and program. Some students may begin their university foreign language experience beyond the Elementary I level without receiving credit for the previous course(s) and, thus, may complete the requirement with fewer credit hours and fewer courses than specified.
in their language requirement. In this case, the credit hours not used for the language requirement may be still required for graduation, but may be applied toward coursework in the student’s major or minor or as electives.

Foreign Language Proficiency Waiver: Students able to demonstrate foreign language proficiency comparable to the highest course in their foreign language requirement may be able to have their language requirement waived. Students should review the University Catalog and consult with their academic advisor(s) and the Department of Modern and Classical Language Studies to verify eligibility. Proficiency waivers will be granted to:

1. **International students** who were educated through high or secondary school in a language other than English. Foreign language waivers will be granted to international students who have (a) TOEFL, IELTS, MELAB, PTE Academic score recorded in their Kent State University academic record; (b) completed English-as-second-language courses at Kent State; or (c) provided documentation that they attended a secondary or high school in a country in which courses were taught in a language other than English (e.g., high school transcripts or diploma in the original language along with a certified English translation).

2. **American Council on the Teaching of Foreign Languages (ACTFL) Exams**

   The tests are administered by Language Testing International. Students are responsible for the costs of the exam(s) and for providing the Department of Modern and Classical Language Studies with a copy of the certificate(s). Instructions for taking the ACTFL Exams may be found on the department’s website.

   a. A proficiency waiver will be granted through Elementary II of a foreign language to students who provide either:
      i. an official ACTFL Oral Proficiency Interview (OPI) certificate.
      ii. comparable qualifying score on an ACTFL-based proficiency exam such as those accepted for the Ohio Seal of Biliteracy confirming oral proficiency of at least an intermediate low level.

   b. A proficiency waiver will be granted through Intermediate II of a foreign language to students who provide either:
      i. an official ACTFL Oral Proficiency Interview (OPI) and Writing Proficiency Test (WPT) certificates.
      ii. comparable qualifying ACTFL-based proficiency exams such as those accepted for the Ohio Seal of Biliteracy confirming oral proficiency and writing proficiency of at least an intermediate low level.

3. **Common European Framework of Reference for Language (CEFR) Ratings**

   A proficiency waiver will be granted through Elementary II of a foreign language to students who provide an official (European) CEFR certificate confirming oral proficiency of at least the B1.1 level. A proficiency waiver will be granted through Intermediate II of a foreign language to students who provide an official CEFR certificate confirming oral and writing proficiency of at least the B1.2 level. Students are responsible for providing the Department of Modern and Classical Language Studies with a copy of the certificate(s).

4. **Defense Language Proficiency Test (DLPT)**

   A proficiency waiver will be granted through Elementary II of a foreign language to students who were tested during military service and provide an official DLPT certificate confirming oral proficiency of at least ILR 1. A proficiency waiver will be granted through Intermediate II of a foreign language to students who provide an official DLPT certificate confirming oral proficiency of at least ILR 1+.

5. **Ohio Seal of Biliteracy**

   A proficiency waiver will be granted through Intermediate II of a foreign language to students with an Ohio Seal of Biliteracy. Students who have qualified for the Ohio Seal of Biliteracy by means of an International Baccalaureate or AP exam or who submit their ACE transcripts may be eligible to receive credit for the Ohio Seal of Biliteracy. For more information, visit the Credit Transfer website.

6. **Alternative proficiency measures**

   Students may have proficiency in a language for which no standardized test exists. In this case, students should contact the Department of Modern and Classical Language Studies to arrange for assessment by an approved native speaker of that foreign language (e.g., teacher, professor or certified translator), with the assessment method approved in advance by a department administrator.

**Core and Critical Reading Strategies Placement**

Kent State University regional campuses offer two courses to help students develop reading strategies to successfully complete college-level coursework — READ 00003 and READ 00006. A student placed into READ 00003 must take READ 00006 the following term. Both courses require a minimum C grade. Students who have taken the Accuplacer Classic or Next Generation at another institution within two years of their initial start date may opt to transfer that score to Kent State University.

Upper-Division Requirement

Most specialization in bachelor's degree programs is pursued through upper-division coursework. Upper-division courses are numbered 30000–49999 and expect both greater familiarity with the subject matter and greater intellectual sophistication. Students must complete the appropriate prerequisites in specified lower-division courses before entering upper-division courses. In general, baccalaureate programs require the successful completion of minimum 39 upper-division credit hours of coursework.

Workshops for Graduate Students

The Office of Continuing and Distance Education, in cooperation with academic departments, offers a variety of for-credit workshops. These workshops are especially designed to meet identified needs of various professions. Each workshop is set up to recognize the needs of the audience in terms of time, place, format and content.

A student holding a bachelor's degree from an accredited institution and who has been accepted by a workshop director for a specified workshop, institute or other special program offering graduate credit may be admitted as a special non-degree workshop student for the term of the workshop only. Prerequisites for admission are set by the instructional department. The temporary admission is valid for only one workshop consisting of a maximum of 12 credit hours. Students desiring to take other non-workshop graduate courses concurrently with the workshop or to do graduate work beyond the length of the workshop term must apply for admission to the appropriate college or school under regular procedures. A student may reapply for subsequent workshop participation under workshop admission regulations.

A maximum of 4 credit hours earned in graduate workshops may be applied to a graduate degree program. All workshops are graded S/U (satisfactory/unsatisfactory). Some departments may be more restrictive. Students are advised to consult their departments regarding application of workshop credit toward degree requirements.

Writing-Intensive Course Requirement

The purpose of the writing-intensive course (WIC) requirement is to assist undergraduates in becoming effective writers within their major discipline. Building on earlier writing courses, the WIC focuses on writing forms and standards used in the professional life of the discipline. Through these courses, students should understand and experience the ways in which writing shapes and enhances the acquisition and communication of knowledge.

All writing-intensive courses must meet the following criteria:

- Be designed, at least in part, to help students become effective writers in a specific discipline
- Involve a substantial amount of writing
- Provide at least one writing assignment where there is an opportunity for guided revision before grading occurs

Requirements

1. As part of the requirements for any baccalaureate, all students must satisfy the writing-intensive course requirement.

2. At least one upper-division course from the writing-intensive course list must be completed with a minimum C grade.

3. Students should fulfill the requirement by taking a course in the major. In rare instances, a student may use a writing-intensive course from another discipline if approved by the student's major department or school.

GLOSSARY OF ACADEMIC TERMS

Academic Advising
Advising helps students clarify their career goals, reach their maximum educational potential and achieve academic success. Academic advisors address student needs related to learning, personal development and career aspirations; recognize and respond to diverse individual needs and differences among students; and help students plan and implement academic programs of study in a manner that will ensure timely progress toward graduation.

Academic Standing
Academic status at institutions of higher education. Students with a cumulative 2.00 GPA or above are in good academic standing.

Academic Year
The academic year consists of two 16-week semesters – fall and spring.

Accreditation
An external review process by which experts authorize or give credentials indicating that standards and expectations have been met by academic programs or institutions.

Admissions Office
Information pertaining to the process of admission to the university is available from this office.

Adult Student
A student who is 21 years old or older and who has been out of high school for three years or more at the time of his/her first college enrollment. Further defined as any student whose primary life roles and responsibilities exist independent of the university and which, at times, may take precedence over the role of student.

Advanced Placement
Credit granted by Kent State for satisfactory scores attained through high school participation in this nationally standardized program. Contact the Transfer Center for information.

ALEKS
Assessment and Learning in Knowledge Spaces is a Web-based, artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course. ALEKS then instructs the student on the topics she is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS courses are very complete in their topic coverage and ALEKS avoids multiple-choice questions. A student who shows a high level of mastery of an ALEKS course will be successful in the actual course she is taking (Source: www.aleks.com)

Advisor
Professional advising staff member or a faculty member who provides students with information concerning courses, programs of study and other aspects of academic life.

Attempted Credit Hours
Students' total credit-hour registration, either for a specific term or cumulative for all terms. Attempted credit hours include courses for which students have received either a letter grade or other administrative mark (AU, IN, IP, NA, NF, NR, SF, W, etc.)

Audit
Audit is enrollment in a class where no grade or credit is received.

Board of Trustees
The board is made up of 11 trustees, two of whom are students at Kent State University. Trustees are appointed by the governor to proved for the proper maintenance and successful, continuous operation of the university (as specified by the Ohio Revised Code).

Board Plan
Food service plan operated by the university.

Bursar's Office
The university office where payments of tuition and fees are made.

Career Services Center
The university office providing assistance with career employment, career counseling, student employment and academic testing.

Catalog Year
A term identifying the catalog that contains the requirements defining a student's academic program. Initially, it is the Catalog in force during the student's first semester at Kent State University.

Catalog in Force
The University Catalog for the current academic year. Example: In fall semester 2015 and spring semester 2016, the Catalog in force is the 2015-2016 University Catalog.

Certificate Programs
Certificates are awarded to students who successfully complete a course of study designed to meet a specific need and that has been designated a Certificate Program and properly approved as such. These programs typically consist of no less than 15 credit hours and no more than 30.

Certification
Formal "licensing" of a professional program according to the standards of an external professional body.

Center for Student Involvement
The Center for Student Involvement (CSI) offers an array of resources that provide opportunities for leadership and participation in student-initiated projects and organizations.

College Level Examination Program (CLEP)
A testing program administered by the Career Services Center. The completion of these exams may result in college-level credit.

College
Academic organizational division of the university offering courses and curricular programs leading to baccalaureate and advanced degrees, as well as minors and certificates.

Colloquium
An academic seminar on a broad topic usually led by a different lecturer at each meeting.

Commuter Student
Students who attend Kent State but do not live on campus in a university residence hall.
Complete Term Withdrawal
Withdrawal from all courses is permitted through the published deadlines found on the University Registrar's website.

Concentration
An area of focus within a major usually encompassing several allied disciplines.

Co-requisite
Course(s) requiring simultaneous enrollment in another course. Example: PHY 13001, a lecture course, is a co-requisite for PHY 13021, a lab course.

Course Add or Drop
Adding or dropping a course from the student's class schedule.

Course Load
Total number of credit hours for which a student is registered during any semester.

Course Withdrawal
Process by which a student removes a course(s) from his/her schedule, subject to the deadlines published on the University Registrar's website. A mark of W will be recorded on the student's transcripts.

Credit-by-Examination (CBE)
Credit earned in selected approved courses by taking a departmental examination to test knowledge already possessed without previous course enrollment. Refer to the University Registrar's website for more information.

Credit Hours
Units based on contact hours in a learning environment that are acquired for completed coursework applied toward a degree or certificate.

Dean
The head of a division, faculty, college or school of a university.

Dean's List
In recognition of academic excellence, a Dean's List is compiled each academic semester. To qualify, students must have a grade point average in the semester of 3.40 or greater and must have completed 12 or more regular letter-graded credit hours by the end of that semester. This notation will be printed on the students' official transcript.

Degree
• Associate Degree: Two-year degree of a technical or general nature offered only on the Regional Campuses.
• Bachelor's Degree: Academic degree conferred by a university or college.
• Combined Baccalaureate and Master's Degree Programs: Programs of study available to students with outstanding undergraduate records or exemplary professional credentials.
• Master's Degree: Academic degree conferred by a university for completion of an integrated program of study at the graduate level beyond the bachelor's degree; usually involved one or more years of work and completion of a research project or thesis.
• Educational Specialist: Post-master's practitioner program. This is not an interim step between the master's and doctoral degrees, but provides preparation for a specialty position within the field of professional education.
• Doctoral Degree: Highest degree conferred by a university following advanced graduate study and research.

Department
Academic unit within a college.

A three-part orientation program designed for first-year students to familiarize them with Kent State University, and provide them with the tools necessary to enjoy a successful journey to graduation.

Discipline
Specific area of study; formally organized body of knowledge.

Dismissal
Specific area of study; formally organized body of knowledge.

Distance Learning
Any type of interactive education in which students communicate with faculty and other students via e-mail, electronic forums, video conferencing or another form of computer-based communication, rather than through face-to-face interaction.

Diversity Course Requirement
Coursework required of all baccalaureate-seeking students. Typically, students must complete two courses from the list of approved diversity courses, including at least one from the diversity list within the Kent Core.

Double Major
The pursuit of two or more programs of academic study for a single degree within the same college.

Dual Degree
The pursuit of programs of study in two different colleges within the university leading to degrees in both colleges. Students may also pursue two separate degrees within the same college.

Electives or General Electives
Classes pursued in addition to the collegial, departmental, major and other degree requirements.

Experiential Learning Requirement
The purpose of Kent State's experiential learning requirement (ELR) is to provide students with direct engagement in learning experiences that promote academic relevance, meaning, and an understanding of real-world issues. Experiential learning opportunities exist in a variety of course- and non-course-based forms and may include community service, service-learning, undergraduate research, study abroad/away, and culminating experiences such as internships, student teaching, and capstone projects, to name a few.

Faculty Senate
Faculty governing body that is primarily concerned with matters of university educational policies, curriculum, academic and professional standards, and the establishment, discontinuance and major alteration of academic programs. Possesses shared responsibilities and advisory responsibilities. May consider other matters pertaining to the welfare and mission of the university.

Financial Aid
Financial assistance for an eligible student; available in the form of grants, loans, scholarships and federal work-study employment.
**FLASHcard**
Identification card issued to all registered students. It is used for admittance to athletic, cultural and social events; borrowing of library materials; and purchasing goods and services on the Golden Flash debit plan or the Dining Services board plan.

**FLASHcash**
FLASHcash is a prepaid purchase plan for students, faculty, staff or anyone who frequently visits Kent State University. It works like a credit card in reverse. Students make an initial deposit to their account and charges are deducted as they make purchases.

**FlashLine**
FlashLine is the web-based portal (entryway) for Kent State students, faculty, staff and alumni. For help with FlashLine, contact the university Helpdesk at 330-672-HELP or visit the FlashLine information website.

**FlashLine User Name**
Login user name for most campus resources. Everything before @kent.edu in the e-mail address.

**First-Year Experience Course**
Program designed to familiarize new students with the university, their college and university policies and procedures.

**Free Application for Federal Student Aid (FAFSA)**
Financial information document submitted by an applicant for student financial aid; supplies information concerning income, assets, expenses and liabilities.

**Freshman**
An undergraduate student who has earned fewer than 30 credit hours.

**Full-Time Student**
Any undergraduate student enrolled in the university who is carrying a course load of 12 or more credit hours per semester. A full-time graduate student is one registered for 8 or more credit hours per semester.

**General Requirements**
General requirements address a broad range of matters such as degree requirements, requirements for graduation, residency requirements and academic standing.

**GPA (Grade Point Average)**
Grade point average is determined by the number of credit hours attempted at Kent State University and the grades received. The GPA is calculated to three places past the decimal point and not rounded.

**GPS Degree Audit**
The GPS includes a degree audit which is a summary of degree requirements merged with the academic record which provides a real-time assessment of progress toward graduation. The audit is organized in blocks of like requirements. The Degree Audit is the official list of all requirements for graduation.

**GPS Individualized Degree Plan**
Students create a Degree Plan that begins with the requirements in the Degree Audit, organized in a Roadmap format, but tailored for the student’s unique situation. The Degree Plan can be adjusted to fit the student’s needs, including shortening the time to graduation, adding summer terms or expanding your program length to accommodate a work schedule or family responsibilities.

**Graduate Student Senate**
Represents the concerns of the graduate student community of Kent State University and serves as an allocation body by providing funding to graduate students and graduate organizations for speakers, workshops, social events and professional travel.

**Graduation Planning System (GPS)**
A program that provides students with a roadmap to degree completion which includes a real-time degree audit and an individualized educational plan.

**Grant (Financial Aid)**
A nonrepayable award to an eligible student based upon determined financial needs and program criteria.

**Incomplete (IN mark)**
An administrative mark that may be given to students who are unable to complete the last three weeks of a semester because of factors beyond their control.

**In Progress (IP mark)**
A mark given to indicate that research, individual investigation or similar efforts are in progress and that a final grade will be given when all the work is completed.

**Individual Investigation**
A method of independent study that, if approved by the appropriate university authorities, allows the student to pursue topics of interest in a flexible time frame.

**Individualized Major**
Individually designed program of study developed in consultation with the dean of the college and with faculty recommendations. Kent State offers the individualized major within the Associate of Technical Study degree and the Bachelor of Integrative Studies degree.

**Intercollegiate**
Activities involving two or more colleges or universities.

**Interdisciplinary**
Course or program of study involving two or more major areas and departments of study.

**International Student**
A student who is not a citizen of the United States and who has entered the United States on a temporary basis for the purpose of enrolling in an educational institution.

**Internship**
A work experience in a position related to the academic field of preparation.

**Junior**
An undergraduate student who has earned between 60-89 credit hours.

**Kent Academic Progress System (KAPS)**
An automated degree audit system to monitor students’ progress toward completion of degree requirements.

**Kent Core**
The Kent Core is the foundation of the university’s mission to prepare students to live in today’s complex, global society. It broadens intellectual perspectives, fosters ethical and humanitarian values and prepares students for responsible citizenship and productive careers. Through this
learning experience, students develop the intellectual flexibility they need to adapt to an ever-changing world.

**Kent Core Coursework**
- Composition
- Mathematics and Critical Reasoning
- Humanities and Fine Arts
- Social Sciences
- Basic Sciences
- Additional Courses

**Kent State ID Number**
A 9-digit number that identifies students, faculty, staff, alumni and others in the Banner system.

**Late Registration**
Process of initial class enrollment for a given term once the term has begun. A late registration fee is assessed beginning the second week of classes.

**Liberal Education Requirements (LER) (Replaced by Kent Core fall 2010)**
In five areas to be completed during the first two years of study, the LER are designed to provide a common nucleus and an appropriate breadth of inquiry, understanding and perspective to the Kent State undergraduate education experience. It is essential, therefore, that students consult the Catalog descriptions for their college degree program.

**Licensure**
Formal "permission" of a professional program according to the standards of an external professional body—for example, the certification of graduates in approved curricula of the College of Education, Health, and Human Services.

**Lower Division Courses (10000, 20000)**
Are for freshmen, sophomores and others with little or no background in the discipline. Generally, these courses provide the understanding, foundation and preparation for more advanced study (although a pathway for more advanced study is not always required, and they may be ends in themselves).

**Major**
A subject of focus for academic study in which a student pursues a prescribed curriculum and is a formal degree candidate.

**Math Emporium**
A state-of-the-art learning center where students will interact with adaptive ALEKS software and a highly skilled instructional team. Students learn through an innovative, engaging and easy-to-use program designed to help them become comfortable and proficient in basic mathematics.

**Matriculation**
The process of being admitted into a group, especially a college or university.

**Minor**
Subject of focus for academic study in which a student pursues a prescribed curriculum and is a formal degree candidate.

**Noncredit**
Courses or programs for which no academic credit is given.

**Nonresident**
Student who has not established status as a resident of Ohio as defined by Ohio Board of Regents. Refer to the policy in the Policy Register on the Kent State website.

**Office of Student Conduct**
Responsible for addressing the adjudication of students who are accused of violating campus rules or policies, state laws, federal laws, and/or municipality disputes.

**OIG (Financial Aid)**
Ohio Instructional Grant; a nonrepayable award made by the Ohio Board of Regents to an eligible undergraduate student who is an Ohio resident. The OIG is applied to the cost of tuition and fees.

**Ombuds**
Swedish term meaning "representative." Person appointed by the university to assist students in resolving concerns, complaints and grievances through established channels.

**Part-Time Student**
Any undergraduate student enrolled in the university who is carrying a course load of fewer than 12 credit hours per semester; a graduate student enrolled in the university who is carrying a course load of fewer than 8 credit hours per semester.

**Pass-Fail**
System by which undergraduate students can take elective courses for a grade of pass or fail in lieu of a letter grade.

**Pell Grant**
A nonrepayable financial aid award provided by the federal government directly to an undergraduate student.

**Postundergraduate**
A student with a baccalaureate degree who is enrolling in additional undergraduate-level classes.

**Practicum**
A school or college course, especially one in a specialized field, designed to give the students supervised practical experience.

**Preprofessional**
Preparation for professional training through undergraduate programs of study.

**Prerequisite**
Course(s) or condition(s) required before enrollment in a more advanced class. Example: FR 13201 is a prerequisite for FR 13202.

**President's List**
In recognition of an extremely high level of academic excellence, a President's List is compiled each academic semester. To qualify, undergraduate students must have a grade point average in the semester of 4.00 and must have completed 15 or more credit hours (all of which have regular grades) by the end of that semester. This notation will be printed on the students' official transcripts.

**Probation (Academic)**
A warning to undergraduate students who fail to maintain a semester and/or overall grade point average of 2.00 or better. Failure to improve the academic record within a specific time may result in academic dismissal.

**Program**
Plan of academic study.
Provost
Senior vice president of academic affairs; chief academic officer of the university.

Quality Points
The number of points assigned per credit hour for each letter grade.

Registrar’s Office
The university office that plans and oversees registration activities, record maintenance, transcript preparation and academic testing.

Registration
Process of initial class enrollment for a given term.

Reinstatement
Process by which a student may gain reentry to the university after a dismissal.

Repeat for Recalculation
Students may repeat lower-division (10000-20000 level) courses, and the university will use only the highest grade in the calculation of the cumulative grade point average. The repeated credit hours will be added back in for the purposes of calculating institutional honors.

Requirement
Course or condition that must be fulfilled as part of a particular program.

Roadmap
A list of course requirements in a semester-by-semester layout that must be met for undergraduate students to graduate with a specific major. Roadmaps also identify courses and other milestones that are critical for students to complete in a particular semester to be on track for timely graduation.

ROTC
Reserve Officers Training Corps—program leading to commission as officer in military service in either the Air Force or Army.

Schedule Adjustment
A change to a class schedule for a student who has already enrolled in at least one course for the term. Deadlines for schedule adjustments are published on the University Registrar’s website.

School
Term applied to academic units within a particular college or to a single academic unit offering curricular programs leading to a baccalaureate or advanced degree.

Scholarship
A nonrepayable award to an eligible student based upon academic achievement and determined financial need or, in some cases, based upon academic achievement alone.

Semester
School term (about 16 weeks long) that is one-half of the academic year.

Semester Hour
Each unit of academic credit assigned to a course as the credit value for that course under the semester system is known as the credit hour. Generally, credit hours for a course are directly equivalent to the number of classroom contact hours per week.

Senior
An undergraduate student who has earned 90+ credit hours.

Sequence
Courses that must be taken in a definite order.

Sophomore
An undergraduate student who has earned 30-59 credit hours.

Student Legal Services
A non-profit law firm whose purpose is to explain and assist in resolving legal issues that a student may face.

Syllabus
An outline or a summary of the main points of text, lecture or course of study.

Symposium
A meeting or conference for discussion of topic, especially one in which the participants form an audience and make presentations.

Transcript
The accurate and complete record of a student’s academic coursework attempted at an institution, presented in either electronic format or paper format.

Transfer Module
Developed by the Ohio Board of Regents, a specific subset or the entire set of a college or university’s general education requirements (Kent Core). A Transfer Module completed at one Ohio college or university will automatically meet the requirements of the Transfer Module at the receiving Ohio institution, once the student is accepted. Students may be required, however, to meet additional general education requirements that are not included in the Transfer Module.

Transfer Student
Any student applying to Kent State University who has attended any institution of higher learning since leaving high school.

Transcript Coursework
Coursework approved for Kent State University students who attended another accredited institution.

Transient Student
Any student enrolled in another college or university who will attend Kent State University for one term.

Tuition
A fee for instruction, especially at a formal institution of learning.

Tutor
Person providing special study skills and assistance in a particular subject or academic program.

Undergraduate
A term applied to students who are pursuing an associate or bachelor’s degree as a freshmen, sophomores, juniors and seniors.

Undergraduate Overload
Enrollment for classes hour in excess of 18 during fall or spring semester, in excess of 6 credit hours during Summer I or III, or 10 credit hours during Summer II.

Undergraduate Student Government
Primary vehicle by which the undergraduate student body provides its input into the university community.
Upper Division Courses (3000, 40000)
Upper-division credit should be awarded for courses that are major
related with the specialization, breadth and depth in a particular field.
These courses typically have prerequisites because it is understood that
it is advanced study, and students need the proper knowledge before
taking the course.

Withdraw
See Course Withdrawal

Workshop
A credit or noncredit activity that focuses on a participant's professional
tasks. Instructional emphasis is given to mastery and applications of
knowledge, skills and attitudes that address a narrowly defined range of
problems or issues related to practice. All credit workshops are graded
satisfactory/unsatisfactory (S/U).

Work-Study (Financial Aid)
An employment program based upon determined financial need. An
eligible student may be employed on campus for not more than an
average of 20 credit hours per week to earn money to help pay for
educational costs.

Writing-Intensive Course Requirement
A graduation requirement for all undergraduate students requiring
completion of at least one upper-division course designed as "writing–
intensive" with a grade of C (2.000) or better.
