The Applied Data and Information minor allows students to obtain and develop the fundamental knowledge and skills necessary to be competitive in today's workforce in an increasingly data-driven economy and society. Students gain essential skills in data literacy and fluency while also learning about relevant applications in their respective majors and fields of interest. Specifically, students learn about data science from an information science perspective to obtain a holistic understanding of data with some key data science elements such as the following:

- Data lifecycle, which covers the various stages of data, from initial data creation to data storage, data sharing and use and data archiving or deletion;
- Standards and best practices for data collection, description, representation and management to make data more accessible, discoverable, retrievable and usable;
- Data digitization, preservation and archiving;
- Interdisciplinary approaches to data science;
- Data literacy and competencies in general, as well as in applied disciplinary context;
- User behavior associated with data systems and systems that collect data; and
- Data ethics and policies for safe, fair and empowered use of data, etc.

Some common jobs that the minor prepares students for include such occupational titles as data scientist, data analyst, decision support, data manager, data science specialist, data science associate, data science research associate and data science consultant.

**Admission Requirements**

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Explain the role and impact of data on people and society as well as the interdisciplinary and disciplinary nature of data science
2. Describe the information science approach to data in an applied area
3. Recognize various stages of data in the data lifecycle and what each stage entails
4. Obtain basic knowledge and skills associated with various stages of the data lifecycle
5. Identify and describe data standards, principles and best practices for collecting, curating, preserving and making data more accessible, discoverable, retrievable and usable
6. Describe research data management challenges and opportunities in archives, academic and public libraries and public life
7. Develop the skills to create actionable data management plans to support sustainable projects
8. Identify and describe issues and best practices in the creation, management, curation, access and reuse of research data.

Description
The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual program with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.

The Library and Information Science major includes the following optional concentration

- The Medical Librarianship optional concentration prepares students to work in medical and health sciences libraries; in the community; and as part of a health system, hospital, clinician office, academic center, government research agency or medical specialty organization. Students in the concentration intern at a medical library, which will allow them to apply their skills and knowledge, as well as to observe the typical daily activities and requirements of medical librarians.

Description

The Master of Science degree in User Experience Design prepares students for careers that require them to apply a solid understanding of usability, content strategy, information architecture and user research.

The user experience designer engages in a variety of design activities that help produce usable interfaces and help organizations meet business goals. User experience design addresses the structural, informational, psychological and emotional aspects of what makes a successful user interface, whether it is web, mobile, tablet or any other device.

At Kent State University, user experience design is thought of as a process where students learn, understand, imagine, evaluate and inform. The design team begins by gathering data/information about users, clients, the organizational culture, common tasks and work environments. After sufficient data/information is gathered, the team seeks to understand the context in which the project will be undertaken. This phase is the bridge between data collection and design. Design in the imagine phase involves brainstorming, iterative prototyping and critiquing. The design team needs to constantly evaluate their designs to see if they work in the real world. This may involve activities such as paper prototyping, high-fidelity interactive prototyping and usability testing. The results of design must be communicated to appropriate audiences. This informing process involves giving presentations to clients and stakeholders, report writing and other forms of communication.

Accreditation

National Association of Schools of Art and Design (NASAD)

Description
The Web-Enabled E-Learning Knowledge Management graduate certificate provides essential knowledge and skills to interested information professionals. Knowledge management is a business process that formalizes the management and use of an enterprise's intellectual assets. As the knowledge economy continues to take shape in the 21st century, the factors of production are shifting from physical financial capital to intellectual capital. In this environment, the success of organizations will depend on their ability to generate, adopt and diffuse knowledge. Knowledge management promotes a collaborative and integrative approach to the creation, capture, organization, access and use of information assets, including the tacit and knowledge of people.

Description
The Bachelor of Science degree in Digital Media Production educates students to create exciting fiction and non-fiction content for delivery in
today's most in-demand formats. Whether they want to produce the next award-winning podcast, write a hit streaming series, or influence millions with social media content, students learn from seasoned professionals using industry standard technology to tell their stories on screens big or small.

Many opportunities exist to collaborate with students from theatre and dance, game design, science, music, art, fashion and technology during the production of live TV, short films, audio series, documentaries and animated works.

Students also have the chance to work with Kent State’s TeleProductions operations, the nationally recognized Student Media outlets at the School, and even NPR affiliate WKSU.

With the added professional experience students earn from the required internship, they graduate ready to play a leading role in the entertainment industry of tomorrow.

Digital Media Production students may apply early to the M.A. degree in Media and Journalism and double count 9 credit hours of graduate credit toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Description
Journalists are reporters, watchdogs, storytellers. The Bachelor of Science degree in Journalism teaches students how to cover real stories that make a difference. Whether using a camera, a microphone, a smartphone or a laptop, students become journalists by doing journalism inside and outside the classroom.

Gaining critical skills that equip them for storytelling in all its forms, journalism students practice their craft in Kent State’s award-winning student media. Working with these outlets, students learn how to engage audiences where they “live,” on TV, radio, online, social media and in print.

Journalism students produce news and feature content on visual, digital and emerging platforms, and they apply what they’ve learned as part of the required professional internship.

With a grounding in ethics and an understanding of media’s role in democratic society, students graduate prepared to continue as journalists or apply their skills to other professions that value critical thinking, information gathering and the ability to make sense of it for others.

Journalism students may apply early to the M.A. degree in Media and Journalism and double count 9 credit hours of graduate credit toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Accreditation
Accrediting Council on Education in Journalism and Mass Communications (ACEJMC) provisionally accredited

*Note
Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description
The Master of Arts degree in Media and Journalism is designed to give students a solid background in preparation for a professional career. Students are able to take a mix of online and face-to-face courses that allow them to craft a graduate degree that reflects their career interest. Courses are dynamic, challenging and professionally relevant. With small class sizes, students are able to learn from their professors and from the experiences of their fellow classmates, many of whom are working media professionals or nationally recognized journalism educators.

The Media and Journalism major offers the following optional concentration:

- The Journalism Education concentration is intended for those seeking to teach or advise student journalists. The program is affiliated with Kent State’s Center for Scholastic Journalism, and faculty include some of the most-recognized high school journalism educators in the country. The coursework focuses on concepts and lessons that can be used in a teacher’s classroom right away, with a professional project as the culminating requirement.

Students not selecting the concentration work with their advisor to plan a course of study that meets their professional needs, with the culminating requirement of either a thesis or professional project.

The School of Media and Journalism provides its students with a strong foundation to achieve their goals in the rapidly changing media industry. All students take a series of core courses that provide the foundation for a career in media and journalism and develop a specialization through the selection of elective courses that can be within or outside of the school. One student may choose to hone skills as a multimedia journalist focusing on public affairs, while another may seek to develop expertise as a public relations professional for not-for-profit organizations.

*Note

Source of occupation titles and labor data is from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Description

The Bachelor of Science degree in Public Relations can take students from corporate boardrooms and creative agencies to sports arenas, the halls of Congress, global nonprofits, hospitals, fashion runways and beyond. Students graduate with a grounding in the practice of responsible advocacy and a firm grasp of the inclusive communication practices.

Kent State boasts the only public relations program in Ohio that is both certified by the Public Relations Society of America (PRSA) and accredited by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC).

This degree is rooted in professionalism, with a focus on developing writing, critical thinking, digital and visual communication skills, as well
as analytics and strategic multimedia storytelling. Students learn to deliver messages through social media, websites, podcasts, videos, press releases and other media tools, events, public policy and more.

Classes routinely involve researching, creating and presenting a public relations plan for real clients. Students build a strong portfolio through hands-on learning opportunities, including two student agencies, a required professional internship and public relations campus jobs. Kent State’s chapter of the Public Relations Student Society of America (PRSSA) and its members consistently win awards at national conferences, placing the chapter in the top tier nationwide.

Public Relation students may apply early to the M.A. degree in Media and Journalism and double count 9 credit hours of graduate credit toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

**Accreditation**

Accrediting Council on Education in Journalism and Mass Communications (ACEJMC) provisionally accredited; Public Relations Society of America (PRSA) - Certification in Education for Public Relations

**First-Year Students on the Regional Campuses:** First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. The projects utilize different compositional elements (abstract shapes, letterforms, images) as a way to learn the basic principles of two-dimensional design—hierarchy, unity, balance, contrast, alignment, repetition. Students will use several methods of design development—sketching, tracing, detailed drawings, computer renderings, research of existing work, class discussions and critiques. Software will be used to develop final compositions.

Description

The Information Design minor offers students a basic understanding of visual communication tools, theory, ethics and how to create visual solutions that communicate data and information effectively. Subjects covered include the creation of digital and print artifacts and an understanding of information design and how it is used in different industries, including business, science, communication, journalism and emerging media. This minor is expected to enhance and complement students’ respective majors.

Students complete a core of fifteen credit hours which includes introductory courses and a capstone course. Then, students are able to customize the minor to fit their curriculum needs by choosing six credit hours of minor electives from Emerging Media and Technology and/or Design courses. Students who want to improve their storytelling ability while strengthening technical skills in information design can choose from Emerging Media and Technology courses. Students who want to enhance their visual communication design and creative problem-solving skills can choose from Design courses.

Description

The Bachelor of Fine Arts degree in Photography provides the student with a comprehensive program of study, balancing a liberal arts education with studio offerings in digital photography. Grounded in formal, technical and conceptual skills building, the Photography major focuses on the profession of photography as it relates to commerce. The program builds a photography professional through experiential learning opportunities, as well as through required courses in design.

Programs in the College of Communication and Information are, by nature, innovative, interdisciplinary and collaborative, which is critical to both professional and scholarly disciplines. Students are educated to work at the intersections of communication, information and technology. Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

There are many study abroad/away opportunities. For more information contact the Office of Global Education.

Accreditation

Admission Requirements

Admission to this major is selective. The School of Visual Communication Design recognizes that competence in visual design, as well as intellectual capacity, are necessary qualities in students who plan to prepare for a career in visual communication design or photography. Therefore, the right is reserved to require evidence of achievement in photography and related areas from all students aspiring to enroll for the first time as majors in the school. Early admission is recommended.

The school director may impose additional requirements considered reasonable and necessary. Each transfer student will be evaluated individually in terms of his or her ability to perform within the program. A transfer applicant's strengths and deficiencies will be considered and his or her transfer credits will reflect that consideration.

Effective spring 2023, admission to the program will no longer be selective.

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admitted to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar's website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate an understanding of the ethics (and legal issues) closely associated with fields of visual communication.
2. Demonstrate an understanding of traditional hands-on skills relative to craftsmanship.
3. Demonstrate an understanding of the basic use of digital technologies as they relate to their areas of study.

Description

The Bachelor of Arts degree in Visual Communication Design prepares students for the graphic design and illustration professions. Students develop technical understanding and design skills in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms. Students produce work for print, motion, video, screen displays, and interactive experiences, as well as package design, exhibition design, and environmental wayfinding.

This program focuses on design and illustration in the context of a broad liberal arts program, giving students the flexibility to choose 20 percent of their coursework (with guidance). This provides the opportunity for students to take a variety of courses to complement their design degree. Students learn at the intersections of communication, information, and technology. The B.A. degree program is for students planning to attend a graduate program or plan to pair their visual communication design degree with another field of study.

For students looking to work as a design professional, the B.F.A. degree in Visual Communication Design is recommended.

Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

The director of the School of Visual Communication Design may impose additional requirements considered reasonable and necessary. Each transfer student will be evaluated individually in terms of his or her ability to perform within the program. A transfer applicant’s strengths and deficiencies will be considered and his or her transfer credits will reflect that consideration.

Progression Requirements

- Students must earn a minimum B- grade in VCD 13001 before enrolling in VCD 23001. VCD 13001 may be taken a maximum three times until a minimum B- grade is achieved.
- Students must earn a minimum B- grade in VCD 23001 before enrolling in VCD 33000.
- Students must maintain a 2.500 major GPA in order to continue taking VCD courses. Failure to do so at the end of one semester will result in a written warning with the option of repeating certain VCD courses in order to meet minimum grade and GPA requirements to continue. Failure to do so at the end of two consecutive semesters will result in not being permitted to enroll in VCD courses. Students in this situation will be contacted by an academic advisor to create an alternative plan of study with a new major.

Description
The Bachelor of Fine Arts degree in Visual Communication Design prepares students for design and illustration professions. Students develop technical proficiency and design expertise in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms using interactive media, environments and motion design. Students produce work for print, video, screen and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This major leads to a professional degree and focuses on intensive work in the visual arts. The B.F.A. degree consists of approximately two-thirds of the coursework in the creation and study of the visual arts, with the remainder in liberal/general studies. Because of the greater emphasis on upper-level studio courses, the B.F.A. degree allows students an opportunity to build greater expertise in a given area of the field. The B.F.A. degree is for students planning to pursue a career in visual communication design and want to leave Kent State with a strong portfolio.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

3 Courses taken as VCD Specialization Electives may not also count toward VCD Additional Electives.
4 Maximum 6 credit hours of VCD 43051 may be applied toward the VCD Additional Electives.
5 Students can apply COMM 15000 or MDJ 20001 toward the Communication and Information Core Electives if NOT already taken toward Additional Requirements.
6 If MDJ 20001 is completed, then 3 credit hours of Kent Core Social Sciences and 6 credit hours of Kent Core Additional is required. If COMM 15000 is completed, then 6 credit hours of Kent Core Social Sciences and 3 credit hours of Kent Core Additional is required.
7 A maximum of 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses may be applied toward the degree program.

Progression Requirements
- Students must earn a minimum B- grade in VCD 13001 before enrolling in VCD 23001. VCD 13001 may be taken a maximum three times until a minimum B- grade is achieved.
- Students must earn a minimum B- grade in VCD 23001 before enrolling in VCD 33000.
- Students must maintain a 2.700 major GPA in order to continue taking VCD courses. Failure to do so at the end of one semester will result in a written warning with the option of repeating certain VCD courses in order to meet minimum grade and GPA requirements to continue. Failure to do so at the end of two consecutive semesters will result in not being permitted to enroll in VCD courses. Students in this situation will be contacted by an academic advisor to create an alternative plan of study with a new major.

Graduation Requirements
Minimum Major GPA 2.700
Minimum Overall GPA 2.000
- A minimum B- grade may be required in some courses.
Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Minimum Total Credit Hours: 60

1 Successful completion of VCD 60009 is a requirement in every School of Visual Communication Design graduate program for both M.A. and M.F.A. students after the first semester or 12 credit hours of course completion. Successful completion of the examination designates the student as a candidate for the degree.

2 The thesis is a significant project or body of work done independently of other coursework. Students are expected to demonstrate the ability to conduct research or produce an original project in a discriminating and disciplined manner. The thesis topic should be one that will further the student’s knowledge and ability in the specialty by demonstrating skill as a researcher or professional designer/illustrator. The outcome should be an effort that serves as a foundation for the pursuit of independent work when the graduate program is completed. At this stage, students are expected to work in close consultation with their thesis advisor.

Graduation Requirements

- The Master of Fine Arts program requires the successful completion of 60 credit hours of graduate credit and requires a thesis.
- The final examination is at the completion of the studio or research thesis. The final examination is the presentation and defense of the thesis and is also an examination of the graduate student’s general comprehension of visual communication design. Graduate students are expected to follow the university schedule of deadlines for taking the final examination and presenting thesis materials.

College Policies

EHHS General

The non-degree EHHS General category is intended for students who are exploring programs in EHHS and are not yet ready to declare a major or do not meet the criteria for their intended major. Because a degree cannot be earned while in EHHS General, it is important that students declare a major before earning 45 credit hours to facilitate timely progress toward a degree. Students will not be permitted to continue in EHHS General after accumulating 45 credit hours.

Repeating Field Experience Courses in Teacher Education Programs

Teacher candidates are permitted to repeat a field experience course once (see major requirements for specific courses). If a teacher candidate is unsuccessful in completing OR fails to earn the required grade in a field experience course the first time, the teacher candidate will receive a warning and will be required to work with a faculty advisor in their academic unit to develop a plan for continuation. The required grade is a C or better in a course that awards a letter grade, or Satisfactory (S) in a course that awards an S/U grade. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. If the teacher candidate does not earn the required grade in the field experience course the second time, a hold will be placed on their account, preventing them from registering for classes until they change their major out of the education program.

Residence Requirement Policy for Non-Degree Teacher Education Licensure/Endorsement Preparation Programs

• Non-degree licensure (initial and additional) and endorsement programs that are a total of 15 credits or above: Students must complete 60% of the coursework at Kent State University, including the course that addresses the CAEP A.1.1 Standard as designated by the program area.
• Non-degree licensure (initial and additional) and endorsement programs that are less than 15 total credits: Students must complete 100% of the coursework at Kent State University.
• Students are permitted 6 years to complete licensure programs and 4 years to complete endorsement programs at Kent State University.
• Coursework transferred from another university cannot be more than 6 years old at the time the licensure/endorsement program is completed.
• Students who do not meet the residence requirements will not be recommended for licensure by Kent State University.

Professional Dispositions for Teacher Candidates

Professional dispositions are the professional attitudes, values, and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. The teacher education faculty believe that the following dispositions support student learning and development. Therefore teacher candidates are expected to demonstrate:

• Communication and Collaboration
• Fairness and Equity
• Ethical Behavior
• Professional Responsibility

These dispositions are assessed at least three times in a candidate’s program:

• Education in a Democratic Society course,
• a methods course with a field component, and
• student teaching.

In addition, a disposition assessment may be completed by a faculty member at any time a situation calls for it. A disposition is considered ‘acceptable’ if a candidate does not have an outstanding Professional Disposition Plan (PDPs) that requires improved performance in specified areas. A candidate may not progress through the teacher education program if they have any PDPs submitted and unresolved at the following three points:

• Applying for advanced study: If a student has an outstanding PDP at the time of application, a student will not be able to apply for advanced study until the PDP is rectified.
• Prior to the student teaching semester: All outstanding PDPs must be completed and cleared prior to the start of student teaching.
• End of student teaching semester: A student with an outstanding PDP during the student teaching semester will not successfully pass student teaching.

Professional Education Warning

Professional Education Warning for students in teacher licensure programs and the Community Health Education major must have a minimum 2.75 GPA to progress in their programs and ultimately graduate. Unless other factors are present, students who do not meet the prescribed conditions are required to transfer out of their declared major. An appeal of this decision is directed to the associate dean of undergraduate student services, College of Education, Health and Human Services, 304 White Hall.

Background Checks for Teacher Licensure Candidates

For field experience, student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency (“school/agency”) setting, the college requires candidates to
complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the student teaching/internship will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience/student teaching/culminating internship. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at www.ode.state.oh.us for more information about background check requirements for educators in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check.

Student Teaching
The application for student teaching is completed online through the College of Education, Health and Human Services’ student portal. Students will be required to complete the application during specified windows posted on the Vacca Office of Student Services’ (VOSS) website. Application windows will typically be accessible during the months of October and November in the fall semester and March and April in the spring semester. Failure to complete the application and submit the prerequisite training documents within the designated time frame may delay the student teaching placement. Depending on the program area, students will apply either 2 or 3 semesters prior to their anticipated student teaching semester. Students should meet with their academic advisor for details on which semester to apply.

Once the application is submitted, VOSS staff (or appropriate regional campus staff) will determine eligibility by reviewing coursework, GPA, disposition assessments, and other program area requirements. Specifically, staff will review the following:

- Coursework – aside from student teaching and inquiry seminar, all coursework in the program of study must be completed with the minimum grade required in each course (i.e., a ‘C’ or higher in a course where the program requirements prescribe a minimum grade of C).
- GPA – confirmation that the applicant has a 2.75 cumulative GPA or higher and meets the minimum major GPA required for their program as listed in the university catalog.
- Disposition Assessments – no outstanding Professional Disposition Plans (PDPs) are permitted. An applicant with an outstanding PDP must have it cleared before beginning student teaching.
- Program Area Requirements – applicant must have completed all program requirements for their major that are outlined and specified in the university catalog.

Students should meet with their faculty and/or academic advisor in VOSS for any clarifications. Written notification of eligibility will be emailed to each applicant.

Those eligible for student teaching are required to attend a mandatory meeting where additional information about student teaching is provided. Failure to attend this meeting may result in a delay of student teaching.

Placement forms, distributed at this meeting, need to be completed by the deadline.

The Clinical Experience Office will make the final decision about the placement site for the Kent Campus. Placement decisions at the Regional Campuses are made by the designated placement officer at each campus. Candidates are not to contact schools or potential mentors directly to make their own arrangements. Placements are generally made within a 50 mile radius of Kent State University. Student teaching is a full-time commitment and candidates are expected to follow the schedule of the cooperating teacher.

Education Licensure Application
Students in the teacher education programs must apply for State of Ohio Licensure within 12 months of program completion (defined by completion of all licensure program requirements). After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

If a student does not apply for their license within 6 years, they are subject to any additional state licensure requirements and are also subject to additional coursework based on changes in areas such as content, age of coursework and changes in program requirements. A minimum of 9 credit hours will be required to apply for licensure after 6 years of program completion.

Admission GPA for Undergraduate Students
For admissions, the College of Education, Health and Human Services considers a student to have established a Kent State University GPA after the student has successfully completed a minimum of 12 Kent State University credit hours. Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for admission into programs, Advanced Study, and the Professional phase based on their high school GPA for new freshmen, or transfer GPA for transfer students. Once a student has successfully completed a minimum of 12 Kent State University credit hours, only the student’s Kent State cumulative GPA will be considered for admission into a program, Advanced Study, and Professional Phase.

Students who have completed 12 or more credit hours of previous college-level coursework, either at Kent State University or at another accredited institution, need an overall GPA of 2.00 or higher to declare a College of Education, Health and Human Services majors, minors or certificates unless a higher minimum GPA is specified by the program. See specific programs in this catalog for more information on required minimum GPA to declare. Non-degree EHHS General can be declared without a minimum 2.00 overall GPA.

Transfer applicants who have completed fewer than 12 semester hours of college-level coursework will be evaluated on both collegiate and high school records.

Description  
The Education minor allows students pursuing a major other than teacher education to prepare for public school teaching. The minor provides the professional coursework necessary for graduates to seek an Ohio teaching license.

Admission Requirements  
Admission to the minor is selective, open only to students who have a minimum 2.500 overall GPA and are declared in a program area for which the state of Ohio issues a teaching license. Those majors at Kent State are the following; Biology; Spanish; Mathematics; Earth Science; American Sign Language; Classics (Latin concentration); Teaching English as a Second Language; French; and German.

The Education minor does not provide preparation for teacher licensure in English or individual social science areas (e.g., economics, geography, history, political science, psychology or sociology). Students wishing to pursue licensure in one of those areas should declare, instead, the Integrated Language Arts or Integrated Social Studies major. Students should contact a college advisor for more information.

To declare this minor, students must have attempted a minimum 12 credit hours at Kent State and earned a minimum 2.500 overall Kent State GPA. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

Program Learning Outcomes  
Graduates of this program will be able to:

1. Describe the Ohio Standards for the Teaching Profession  
2. Describe the Ohio Standards for Professional Development  
3. Describe the Ohio School Operating Standards

Description

The Ph.D degree in Cultural Foundations explores education through a range of disciplinary and interdisciplinary perspectives: philosophy of education, history of education, sociology of education, comparative/international education, anthropology of education, gender studies, multicultural studies and religious studies. Students examine the social contexts of education, with particular emphasis on critical questions concerning structural inequalities and considerations of access to
education, distribution of educational opportunity and successful navigation of educational systems; normative considerations about the purposes of education; and interpretive understandings of the nature of educational experience and the transformative potential of education.

Students in the doctoral program work closely with faculty to generate dissertation topics that seek to add something new to existing scholarship in their chosen area of study within the field of education.

Graduates have the knowledge, critical understandings and interpretive skills to analyze and assess educational theories, policies and practices, as well as to lead and promote innovative practices in a range of educational settings and social contexts. Recent graduates have embarked on new careers or been promoted in their existing institutions in governmental agencies, K-12 school systems, institutions of higher education and nongovernmental organizations, both nationally and internationally.

### Description

The Doctor of Education degree in Interprofessional Leadership engages
students in the study of leadership from an interprofessional perspective.
Given the complexity of 21st-century education and society, educators
and leaders in all fields must be prepared to address problems across
organizational boundaries. The objective of the degree is to develop
leaders who are scholarly practitioners. The program is framed around
questions of equity, ethics and social justice to foster leadership to
address to complex problems of practice. The goal is to prepare leaders
who can construct and apply knowledge to make a positive difference in
the lives of individuals, families, organization, and communities.

The Ed.D. degree in Interprofessional Leadership is cohort-based and
starts in the summer term. The program can be completed in three to four
years.
The Interprofessional Leadership major comprises the following concentrations:

- The **Athletic Training Education** concentration provides the opportunity for students to prepare for the rigors of academic positions in a college or university by blending discipline specific theory and practice strategies related to athletic training education. Students gain extensive knowledge in higher education as a whole while developing critical skills necessary to establish a strong foundation in athletic training educational leadership. Students complete a comprehensive project directly related to athletic training education that addresses a contemporary issue in the profession through purposeful research strategies to generate educational change within the discipline.

- The **Cultural Foundations of Education** concentration prepares students for leadership roles in educational settings seeking to address problems of practice that reflect broad societal problems and thus defy simple solutions. Immersion in the literature of the field of social foundations of education exposes students to historical, sociological anthropological and philosophical understandings, enabling them to contextualize problems of practice within and beyond their particular institutional setting. Students develop facility with conceptual, critical and normative modes of analysis needed to unpack contemporary problems of practice and propose approaches to addressing them in ways that do justice to their complexity. This concentration will appeal to students who are already grappling with these problems in institutional settings and to those who wish to prepare themselves for such roles.

- The **Curriculum and Instruction** concentration prepares students to be curriculum leaders and lead positive curricular change in their classrooms, schools and communities. Description
The Bachelor of Science degree in Sport Administration prepares students for careers in the sport industry through a balanced academic program and numerous practical experiences.

Students complete a core group of courses developed to exceed accreditation guidelines, and all students are required to complete one of the following minors:

• Business
• Data Analytics
• Finance
• International Business for Non-Business Majors
• Management for Non-Business Majors
• Marketing

The curricular balance of sport, business and sociological courses along with three required practical experiences make the program of study one that is cutting edge compared to other programs within the state of Ohio and across the country.
Admission Requirements

Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campus to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. Check with a regional campus admissions office to determine application requirements, as they may differ among campuses.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information, visit the admissions website for international students.
