ANTH 38789  FACES: HUMAN HEAD ANATOMY WITH A FORENSIC ART FOCUS (ELR)  
3 Credit Hours  
Summer Florence Institute course: Renaissance artists became anatomists in order to create more life-like portrayals of the human figure, and Italy was in the forefront of these developments. Our course begins with studying works by these artist/anatomists: Antonio Pollaiuolo, Leonardo da Vinci, Michelangelo, and others, through visits to the Galleria dell'Accademia and Museum of the Bargello and lectures. We will examine drawings, paintings and sculptures of faces by these artists, and gain an appreciation for how well they understood human anatomy. We will also visit La Specola Anatomical Collection (exquisite wax models copied from real corpses during the 17th century) since we are studying anatomy. In the classroom, students will study human skulls, and learn the form and function of the muscles of facial expression and mastication. We will pay close attention to features of the skull that ultimately give each face its unique qualities, and study the areas that indicate age and sex of the individual. Each student will sculpt the facial bones of a skull, using an exact replica cast as a model. In the last part of the course students learn the techniques of two-dimensional forensic facial reconstruction. Using knowledge of head anatomy, and tissue depth data from the literature, each student will prepare detailed sketches (one man, one woman) based on a photograph of his and her skull. We will also learn about changes to the face over the life span, and make sketches of older people based on photographs of them when young.

ARTh 42050 ART AND REVOLT IN THE NINETEENTH CENTURY 3 Credit Hours
(Slashed with ARTh 52050) The nineteenth century is one of the most dramatic time periods in Euro-American art history. Artists and viewers experienced a number of revolutions that profoundly changed the landscape of art and politics. More specifically, nineteenth-century art was created during a violent sweep of colonial expansion, a rise in industrialization, and a revolt against the French Salon. This course considers how artists responded to these social changes by exploring art movements in France and beyond across a wide range of artistic media—including spirit photographs, Moulin Rouge posters, and cemetery sculpture. Students will examine the most canonical nineteenth-century artists while also challenging their placement in the art history canon, which was established at the expense of women and people of color.

ARTh 42056 AMERICAN ART I: INDIAN WARS TO CIVIL WAR 3 Credit Hours
(Slashed with ARTh 52056) In this first section of American art history, students will explore the evolution of American art from European conquest through the American Revolution, and stretching to the Civil War. This time period in American history is characterized by waves of social unrest followed by periods of peace that American artists reflected and shaped in their work. The American-Indian Wars and the Trans-Atlantic slave trade also profoundly impacted the art and politics of the early United States, inspiring artists to support or protest conflicts in society with their art. Exchanges with African, Indigenous, as well as Asian and European peoples pervaded every aspect of art in the United States. In looking widely at objects such as paintings, clothing, food advertisements, and furniture, this class will examine debates about nationhood in early American art that exploded by the Civil War.
Prerequisite: Junior or senior standing.

ARTh 42057 AMERICAN ART II: CIVIL WAR TO CIVIL RIGHTS 3 Credit Hours
(Slashed with ARTh 52057) In this second section and in-depth study of American art history, students will explore shifts and advancements in American art since the closing of the Civil War. New styles in abstraction and technological innovations in photography, lithography, and cinema dramatically altered the trajectory of American art and resulted in an expansion of art museums and patronage. As the United States gained economic power and expanded its borders, American art was also profoundly influenced by movements such as French Impressionism and Mexican muralism, and shaped by artists as close as Canada and as far as Australia. While American artists were debating whether to welcome “foreign” influences in their work, debates over racial segregation and women's suffrage permeated art and politics on the homefront. In looking widely at objects such as paintings, photographs, silverware, and public monuments, this class will examine the art and visual culture of the United States from the Civil War to Civil Rights movement.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture

Students will also explore the contested concept of “race” as it intersects with the production and patronage of African American art. Furthermore, students will consider the benefits and pitfalls of the field and the ways in which art historians, critics, and curators have treated African American art in U.S. museums. By the end of this course, students will have a deeper understanding of African American art and its tangled identity politics.

ARTh 42064 DADA AND SURREALISM 3 Credit Hours
Using a roughly chronological approach, students examine the profound and lasting contributions made by the Dadaists and Surrealists, as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought with sincerity in spite of the often superficially simple or even sometimes nihilistic appearance of their efforts. Through an analysis of selected works from this period and their relevant precursors, an attempt will be made to define the progressive ideas which led to the dismantling of previous standards and the rise of an anti-art spirit which continues today in various guises. Primary documents are considered regularly to provide students with a wider appreciation for the variety of media (e.g., film, theater, typography) and the issues and characters involved.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture

ARTH 42065  FEMINIST AND QUEER ART AND CULTURAL THEORY 3 Credit Hours
(Slashed with ARTH 52065) This advanced and interdisciplinary art history course explores feminist and queer visual histories, with particular attention to related cultural theories. In addition to paradigmatic ideologies of difference and language, this course is based on indispensable and sometimes peripheral postmodern milieus such as politicized identities, economies and the body, the importance of feeling and the everyday, feminist-Marxist critiques of community and the state and notions of lived histories/narratives. In regard to structure, this is a reading intensive course designed to empower students with ‘influential' visual and textual languages, as well as knowledge of critical race, gender and sexuality studies. Readings, discussions, projects and knowledges-at-large, are applicable in the artist's studio and more broadly, in humanities scholarship.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture

ARTH 42069  NATIONS AND BORDERS 3 Credit Hours
(Slashed with ARTH 52069) Emphasizing art and visual culture since World War II, this course considers the phenomenon of the nation-state in the context of embodied borders and diasporas. From the historically charged U.S.-Mexico borderlands to the Berlin Wall that divided East and West Germany, modernity is characterized by the development of nations and subsequent nationalisms as well as the delineation of borders and boundaries—and, once unpacked, theoretical and physical embodiments become legible. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographic and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel’s occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.
Prerequisite: Junior or senior standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

From Joseph Paxton’s Crystal Palace to the Venice Biennale, students examine a globally-oriented history of landmark exhibitions that were designed to dazzle audiences for a few months before being dismantled. Sponsored by governments, the corporate sector, grassroots movements, or cultural actors, the motivations for these exhibitions are as varied as the actual format the exhibition takes. We discuss not only the framework and ideologies behind such projects, but also the legacies they have had on more permanent arts institutions, as well as criticisms levied against them by artists.

In addition to manifold moments in histories and theories of photography, course examines critical approaches to the history of art, including ecocriticism, feminism, critical race studies, queer studies and borderlands studies. Taking a historically-grounded and global approach to state production and displacement, critical texts—many of which are grounded in feminist and queer theories—will address various interpretations of boundaries, especially national and corporeal. We will explore the intellectual history of nation-building and subsequent textual analyses of geographical and embodied borders. We will also study specific art historical moments, such as the militarization of the U.S.-Mexico frontera, Israel's occupation of Palestine, treating East and West Berlin as metaphor and allegory, the borderlands of queer and black identities in the United States and present-day Euro-American imperialism. The course format consists of rigorous class discussions guided by readings and illustrated presentations.

ARTH 52166  HISTORIES AND THEORIES OF MODERN AND CONTEMPORARY ART  3 Credit Hours
This course examines both the visual and textual. As such we travel through contemporary moments such as Abstract Expressionism, Post-Painterly Abstraction, Nouveau Réalisme, Pop, Minimalism, Conceptual art and participatory art—to name a few. So too, this course entails a broad overview of critical and theoretical approaches often engaged by contemporary artists such as existentialism, psychoanalysis, structuralism, semiotics, feminist and queer theories, theories of modern sculpture, and theories of photography. When art and theory are taken together, modern and contemporary art underscores the cultural, sociopolitical and economic developments characteristic of the last half of the twentieth century. While time constraints restrict a consideration of every artist, a selection of practitioners will be addressed. That said, this course affirms the importance of questions rather than finite answers, celebrates ambiguity and neglects any attempt at surveying and summarizing the field of modern and contemporary art.

Clinical Education (CLI)

**CLI 80200 STANDARDIZED PATIENTS ROTATION** 1 Credit Hour
Offers second year students the opportunity to interview standardized patients and receive feedback on their patient interviewing and history recording skills which prepares them to function competently in a doctor/patient encounter. Some students find that interviewing patients comes naturally, while for others it is more a learned skill. The standardized patients are actors who have been coached to simulate actual patients so accurately that the simulation could possibly fool even a skilled clinician.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clinical Laboratory
Contact Hours: 4 other
Grade Mode: Satisfactory/Unsatisfactory

**CLI 80311 WOUND CARE** 4 Credit Hours
The clinical rotation provides students with an opportunity to become exposed to the clinical practice of wound care. Students have a unique opportunity to be involved in wound care patient management, which is an essential part of podiatric medical practice. Students develop skills in wound care patient management as well as communication skills. Students also develop cognitive reasoning skills so as to accurately diagnose comorbid conditions and develop treatment plans appropriate for each patient. Students are exposed to a variety of wound pathology during this clinical wound care rotation. A combination of physician-guided patient care and nursing lead discussion groups allow students to be exposed to many topics related to the essentials of wound patient management. Students are able integrate knowledge already gained in the classroom with clinical medicine.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.
Schedule Type: Clerkship
Contact Hours: 24 other
Grade Mode: Satisfactory/Unsatisfactory

**CLI 80312 FOOT AND ANKLE SURGERY I** 4 Credit Hours

**CLI 80315 SURGICAL SKILLS WORKSHOP** 4 Credit Hours
Provides students with the knowledge and hands-on training pertaining to the physical skills that are necessary to perform surgery of the foot and ankle. An effort is made to correlate didactic information learned in the classroom with the rationale behind why many surgical procedures are performed. Adequate demonstration of surgical skills are provided along with practice time and constructive performance feedback.
Prerequisite: Student must be enrolled in the Podiatric Medicine program.

**CLI 80320 RADIOLOGY ROTATION** 4 Credit Hours
Clinical rotations function by adapting and applying classroom information to real life, “hands-on” situations. A majority of foot complaints necessitate the taking and the reading of radiographs. As specialists of the foot and ankle, podiatricists are in a unique situation in being able to take and interpret radiographs in their own offices.
Radiographic analysis is therefore and integral component of podiatric medical education. The Radiology/Medical Imaging rotation focuses on those skills commonly performed by the podiatrist. This includes positioning and developing radiographs along with recognizing the most common pedal pathologies.

Grade Mode: Satisfactory/Unsatisfactory
CLI 80351  PODIATRIC MEDICINE/BIOMECHANICS (EUCLID)  4 Credit Hours
Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record their findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. This rotation also provides the student with the opportunity for observation and practice of examination skills required in performing a musculoskeletal and biomechanical evaluation. This involves the development of skill in obtaining a biomechanical/musculoskeletal history, arthrometric evaluation, visual gait analysis and musculoskeletal examination to include muscle strength testing, flexibility and range of motion. The student is also taught, and provided opportunities for practice, various methods of obtaining and evaluating proper biomechanical cast impressions of the feet for the purpose of fabricating orthotic devices. Emphasis in this rotation is on the practice and refinement of clinical evaluation and manual skills.

CCI 40389 DOCUMENTARY FILMMAKING (ELR) 3 Credit Hours
Documentary Filmmaking is a course characterized by the co-existence of theory and practice and the balance between the two. The theoretical aspect of the course has the purpose of providing information about general basics of film language, film history and the history of documentary filmmaking. It will provide the students the tools for being able to talk about ideas in terms of film language, through the analysis of existing documentaries and exercises shot by the students themselves. Without a good theoretical base, it would be difficult to find the right kind of themes, voices, styles and development. The practical aspect of the course is focused on teaching the students the use of technical equipment including still-cameras, video-cameras, lights, audio tools and post-production software. The course will be focused mainly on European Documentaries as a way of teaching the thematic and political difference between the cultures of the two continents. The combination of the theoretical and practical aspects will generate a solid base for the micro-production of well planned documentaries, which the students will develop, shoot, edit and screen.

CCI 40489 MULTIMEDIA EXPERIENTIAL LEARNING (ELR) 1 Credit Hour

The in-class meetings will help students to better focus on the different fieldtrips (Rome, Milan, American Cemetery in Florence and Chianti) that will take place during the semester by providing background information of the Italian context and by better understanding and making sense of the Italian culture. Additionally, students will also visit museums and exhibitions in the city of Florence. These visits will help students to make sense of the city and of the Italian culture.
