(Slashed with GEOG 49073 and GEOG 49073) The course aims to teach students basic concepts, skills, and tools for working with data in R. R is an open-source (free!) programming language for statistical computing and graphics that statisticians widely use, scientists, data miners, and geographers. The number of R users grows exponentially each year, contributing to a massive online community and countless free tutorials. This is a hands-on course designed for students with no programming experience. However, this course does not teach statistics: understanding of basic statistics and common statistical tests is assumed and prior coursework in statistics is encouraged. With the knowledge gained in this course, students will be ready to undertake their own data analysis in R and increase their efficiency through reproducible workflows.

Foreign Language College Requirement, B.A.
Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.1
To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:2

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.
2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Program Learning Outcomes
Graduates of this program will be able to:
1. Demonstrate an understanding of the environment and how it relates to human activity, human resource needs and human cognition.
2. Analyze the interconnections between environmental and human systems and how those play out in particular problem areas.
3. Evaluate how environmental problems are framed and how public attitudes and policies can be harnessed to provide solutions to environmental degradation.

Full Description
The Bachelor of Arts degree in Environmental Studies prepares students to integrate concepts and knowledge on environmental issues from across multiple disciplines and to communicate about these in important ways. Basic scientific knowledge about environmental processes is used to inform different social goals. Students develop a set of key competencies in earth systems science, environmental social science, human-natural systems and sustainability science to be able to solve specific environmental problems.

Environmental Studies students may apply early to the M.S. degree in Geography and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

1 As the capstone to the program, students will complete a practicum that is designed to provide practical experience in the application of MGISc degree course content in real-world professional settings. Students will select a professional project in consultation with their employer and program faculty and then will design, implement and report on their activities in a culminating professional paper.

Program Learning Outcomes
Graduates of this program will be able to:

1. Collect, edit, integrate, manage and analyze geospatial data.
2. Demonstrate skills and working knowledge of commercial and open source GIS application suites and utilities.
3. Identify, explain and analyze spatial patterns, relationships and processes.
4. Apply cartographic principles and techniques to create quality maps.
5. Apply critical and spatial thinking to solve geospatial problems with respect to theories, principles and practices of geographic information science and fields in the degree concentration areas.
6. Demonstrate good communication skills and ability to work in a team environment.

Full Description
The Master of Geographic Information Science degree provides students with skills that extend beyond simply understanding software features or capabilities. Students develop a more robust understanding of how GISc functions across different sectors and have a positive impact on some of the greatest global challenges today, including climate change, transportation, and public health. Students have the opportunity to design and manage geographic information technologies to develop and improve the tools and systems people rely on every day.

Graduates of the program are prepared for analytical and managerial positions that utilize geospatial technologies. Those positions can be found in a number of sectors, ranging from real estate and healthcare to disaster relief and finance.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Program Requirements

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Foreign Language College Requirement, B.A.
Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. ¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options ²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap
This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description
The Bachelor of Arts degree in Geography emphasizes a growing field that offers a wide range of career options. Geographers study both natural science and social science. Natural science topics include spatial patterns of rocks, soils, animals, plants, climate and weather. Social science topics include spatial patterns of culture, policy, conflict, demographics, economics, resources and waste, with an emphasis on investigating the intersection of human activity and environmental processes. Geographers use a variety of geospatial technologies to map the world in different ways from the global to the local.

Geographers use data (environmental and social statistics, interviews, textual and landscape analysis and archival documents) to describe natural and social patterns. They then apply their knowledge of human and environmental processes to analyze why these patterns exist.

Geographers work at the intersection of multiple disciplines — geology, ecology, climate science, urban planning, economics, sociology, computer science and the humanities — using this knowledge to examine spatial processes. Geographers use GIS software and remote sensing for spatial analysis and cartography.

Geography offers a unique way of seeing and understanding the world, combined with the ability to communicate this understanding to others. Geographers find work in the environmental sciences, GIS and mapping and working with people in planning and other government and non-profit agencies.

Geography students may apply early to the M.S. degree in Geography and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Geography - M.S.

About This Program
The Master of Science degree in Geography prepares graduate students for careers in both the academic field and non-academic jobs in various private and governmental agencies, such as urban/economic geography, social geography, physical/environmental geography and geographic information technology. Students learn geographic thought, research techniques and topical specialties while preparing to conduct original research.

Culminating Requirement

1 Geography coursework must be graded. Maximum 3 credit hours of GEOG 80998 may count towards the geography coursework. New students are strongly encouraged to take GEOG 70800 and GEOG 79701 within the first year of their enrollment, if they have not already taken similar courses at the master's level.

2 The cognate field must be in a department other than geography. Generally, cognate study is taken with the cognate member of the student's advisory committee.

3 Candidacy examinations are taken after the dissertation proposal is approved by the committee. This should be completed by the end of the second year of doctoral study. Each doctoral candidate, upon admission to candidacy, must register for GEOG 80199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter GEOG 80299, each semester, until all requirements for the degree have been met.

Graduation Requirements
Of the 30 credit hours of doctoral-level coursework required for the degree, students must complete a minimum of 18 credit hours that are letter graded.

Program Learning Outcomes
Graduates of this program will be able to:
1. Engage in independent research projects.
2. Acquire experiences in formulating research problems, reviewing relevant literature, designing research methodology, analyzing research data and formulating results from academic research.

HIST 62326 BETWEEN PLOWS AND SWORDS: U.S.-CHINA CULTURAL RELATIONS SINCE THE LATE 1700s 3 Credit Hours
(Slashed with HIST 82326) This seminar explores the beginning, evolution, transformation, and impact of U.S.-China cultural relations since the late 1700s. The United States and China have built a complex and dynamic relationship in the past two and a half centuries. Among the dimensions of that relationship, cultural relations were the oldest, deepest, and most consequential. While non-governmental organizations and individual Americans as well as Chinese played a crucial role in initiating and expanding cultural contacts between the two nations, government intervention and control were intensified over time, turning cultural relations into an instrument to achieve domestic as well as foreign policies goals. How did cultural contacts between the two nations begin? Who were the major players in the making of the Sino-American cultural relations? What were their major goals? How did the U.S. and the Chinese governments get involved in bilateral cultural contact and exchange? What impact did the expansion of cultural ties have on both societies? How were the U.S.-China cultural relations changed during the Cold War? What impact did the Cold War transformation have on cultural relations during and after rapprochement? By addressing these key questions, this course gives students a deeper understanding of the complexity and dynamics of U.S.-China relations.

HIST 62360 MARGINALITY AND POWER: HISTORY FROM BELOW 3 Credit Hours
(Slashed with HIST 82360) Who makes history? Every historian must grapple with this question and every generation of modern historians has answered this question in a different way. One response to this question is to write "history from below" and focus on the ways in which common people and historically marginalized groups have contributed to historical changes and developments in their societies and cultures. Throughout this course, we review some of the classic scholarship and new works that engage in the task of writing "history from below." Our goal is to understand how "history from below" has developed over the last few decades and to engage with the important questions about representation and agency that this approach to history raises. A variety of assignments serve to further our exploration of the topic and help us gain some practice not just in analyzing "histories from below," but also doing "history from below."

HIST 62415 RELIGION AND VIOLENCE IN THE MODERN WEST 3 Credit Hours
(Slashed with HIST 82415) This class explores the role of religion in conflict throughout the modern Atlantic World. It is commonly believed that Western societies underwent a process of secularization in the modern age. However, recent scholarship has proven that religious beliefs and behaviors have retained their power, popularity and causal agency. This course is designed to give graduate students an introduction to recent trends in the writing of the history of religion and violence. Religion will be taken as social, cultural and political history, rather than merely ecclesiastical or theological history. Violence will be taken as rhetoric and cultures of violence, as well as warfare and other acts of physical violence. We will start the class by discussion theories of religion, including "civil religion" as an alleged replacement faith in an era of secularity; sample current debates on the question of the religious causes of violence; then survey prominent monographs and articles that address this nexus historically.

HIST 62485  THE CIVIL WAR AS EXPERIENCED AND REMEMBERED 3 Credit Hours
(Slashed with HIST 82485) This course looks at the U.S. Civil War from the point of view of the men (and occasionally women) who marched, camped, fought, suffered and died during the four years of conflict and the decades after. After giving brief attention to the causes and political issues that led to war, the course focuses on the experiences and reactions of the people called upon to fight it. Rather than concentrate on the famous leaders and generals, students look at the officers and men, civilians and enslaved people, and other common folks on both sides who were thrust into the conflict. Some attention is paid to the guerrilla war, the draft, the POW experience, and the participation of African Americans and Native Americans. The second part of the course looks at memory, commemoration, and the effects of the war on many of these groups in the decades leading into the 20th century.

HIST 62500  REGIONAL IDENTITY AND OHIO HISTORY 3 Credit Hours
(Slashed with HIST 82500) As central as Ohio is in our national history, it is often underrepresented in standard historical narratives. This course explores the unfolding of more than two centuries of US history through the lens of the experience and understandings of residents of the State of Ohio. This changed perspective revisits many familiar themes -- indigenous histories, immigration, labor conflict, the Great Depression -- but moving our attention from the coast to the interior often places them in a revealing new light.

HIST 62505  SOCIAL MOVEMENTS IN THE 19TH-20TH CENTURY RUST BELT 3 Credit Hours
(Slashed with HIST 82505) This course explores the national and global history of social movements in the nineteenth and twentieth centuries through the lens of the great lakes region. While many social movements have focussed on the coasts, in fact the "Rust Belt" played a disproportionate role in fostering and populating radical movements from abolitionism to temperance to labor unionism as well as repressive movements like the Ku Klux Klan. Alternating between classic historical monographs and regional studies, the class interrogates the meaning of the region's sympathy to radical movements and also suggests a reconsideration of these movements through a new geographic focus.

HIST 82326 BETWEEN PLOWS AND SWORDS: U.S.-CHINA CULTURAL RELATIONS SINCE THE LATE 1700S  3 Credit Hours
(Slashed with HIST 62326) This seminar explores the beginning, evolution, transformation, and impact of U.S.-China cultural relations since the late 1700s. The United States and China have built a complex and dynamic relationship in the past two and a half centuries. Among the dimensions of that relationship, cultural relations were the oldest, deepest, and most consequential. While nongovernmental organizations and individual Americans as well as Chinese played a crucial role in initiating and expanding cultural contacts between the two nations, government intervention and control were intensified over time, turning cultural relations into an instrument to achieve domestic as well as foreign policies goals. How did cultural contacts between the two nations begin? Who were the major players in the making of the Sino-American cultural relations? What were their major goals? How did the U.S. and the Chinese governments get involved in bilateral cultural contact and exchange? What impact did the expansion of cultural ties have on both societies? How were the U.S.-China cultural relations changed during the Cold War? What impact did the Cold War transformation have on cultural relations during and after rapprochement? By addressing these key questions, this course gives students a deeper understanding of the complexity and dynamics of U.S.- China relations.

HIST 82360 MARGINALITY AND POWER: HISTORY FROM BELOW  3 Credit Hours
(Slashed with HIST 62360) Who makes history? Every historian must grapple with this question and every generation of modern historians has answered this question in a different way. One response to this question is to write “history from below” and focus on the ways in which common people and historically marginalized groups have contributed to historical changes and developments in their societies and cultures. Throughout this course, we review some of the classic scholarship and new works that engage in the task of writing "history from below." Our goal is to understand how "history from below" has developed over the last few decades and to engage with the important questions about representation and agency that this approach to history raises. A variety of assignments serve to further our exploration of the topic and help us gain some practice not just in analyzing "histories from below," but also doing "history from below."

HIST 82415  RELIGION AND VIOLENCE IN THE MODERN WEST  3 Credit Hours
(Slashed with HIST 62415) This class explores the role of religion in conflict throughout the modern Atlantic World. It is commonly believed that Western societies underwent a process of secularization in the modern age. However, recent scholarship has proven that religious beliefs and behaviors have retained their power, popularity and causal agency. This course is designed to give graduate students an introduction to recent trends in the writing of the history of religion and violence. Religion will be taken as social, cultural and political history, rather than merely ecclesiastical or theological history. Violence will be taken as rhetorics and cultures of violence, as well as warfare and other acts of physical violence. We will start the class by discussion theories of religion, including "civil religion" as an alleged replacement faith in an era of secularity; sample current debates on the question of the religious causes of violence; then survey prominent monographs and articles that address this nexus historically.

HIST 82485  THE CIVIL WAR AS EXPERIENCED AND REMEMBERED  3 Credit Hours
(Slashed with HIST 62485) This course looks at the U.S. Civil War from the point of view of the men (and occasionally women) who marched, camped, fought, suffered and died during the four years of conflict and the decades after. After giving brief attention to the causes and political issues that led to war, the course focus is on the experiences and reactions of the people called upon to fight it. Rather than concentrate on the famous leaders and generals, students look at the officers and men, civilians and enslaved people and other common folks on both sides who were thrust into the conflict. Some attention is paid to the guerrilla war, the draft, the POW experience and the participation of African Americans and Native Americans. The second part of the course looks at memory, commemoration and the effects of the war on many of these groups in the decades leading into the 20th century.
Prerequisite: Doctoral standing.

HIST 82500  REGIONAL IDENTITY AND OHIO HISTORY  3 Credit Hours
(Slashed with HIST 62500) As central as Ohio is in our national history, it is often underrepresented in standard historical narratives. This course explores the unfolding of more than two centuries of US history through the lens of the experience and understandings of residents of the State of Ohio. This changed perspective revisits many familiar themes - indigenous histories, immigration, labor conflict, the Great Depression -- but moving our attention from the coast to the interior often places them in a revealing new light.
Prerequisite: Doctoral standing.
Schedule Type: Seminar

Grade Mode: Standard Letter
HIST 82505  SOCIAL MOVEMENTS IN THE 19TH-20TH CENTURY RUST BELT  3 Credit Hours
(Slashed with HIST 62505) This course explores the national and global history of social movements in the nineteenth and twentieth centuries through the lens of the great lakes region. While many social movements have focussed on the coasts, in fact the "Rust Belt" played a disproportionate role in fostering and populating radical movements from abolitionism to temperance to labor unionism as well as repressive movements like the Ku Klux Klan. Alternating between classic historical monographs and regional studies, the class interrogates the meaning of the region’s sympathy to radical movements and also suggests a reconception of these movements through a new geographic focus.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.  

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

University Requirements

All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Full Description

The Bachelor of Arts degree in History provides a well-rounded educational experience in which students have the independence and flexibility to explore and develop their individual interests while getting a solid grounding in different approaches to historical research, writing and analysis.

The study of history offers insight into the complexity of the human experience by exploring the political, cultural, social, economic and environmental factors that have shaped the past and the present. The study of history also offers training in a range of skills, including how to find, evaluate, manage and synthesize multiple sources of information; how to think critically and analyze complex evidence; how to undertake independent research and manage time effectively; how to develop and present reasoned arguments supported by evidence; how to present information and arguments effectively in writing; and how to develop and deliver effective oral presentations. The skills and experiences gained through the study of history provide preparation for a variety of career tracks.

The History major is comprised of several elements. Lower-Division History Electives provide history majors with an overview of the major themes and developments in world history from human origins to the present and in the history of the United States from pre-colonization to the present. The required Historical Research Methods course introduces students to the main tools and techniques of doing history, while providing them with the opportunity to develop and refine the skills of historical research, writing and analysis to do well in their upper-division coursework. The History major also includes distribution requirements in two categories of upper-division courses. Area Studies Electives are a group of upper-division history courses in which the history of a place (state, nation or region) is the primary focus of the courses. Thematic Studies Electives are a group of upper-division history courses in which a specific topic or theme is the primary focus of the courses while the place and time period are secondary. The required Senior Seminar in History course is a capstone experience in which students develop, design and execute their own original historical research project that utilizes primary sources and engages with current historical scholarship.

Students in the History major are encouraged to undertake an internship for course credit to gain job experience and further strengthen their profile for their career after graduation.

Graduation Requirements

- Minimum B- grade is required in all specified courses.
- The culmination of the program's writing component for those students intending to go on to doctoral work is the completion of a substantial thesis based on original primary-source research and the oral defense of that thesis.

Program Learning Outcomes

Graduates of this program will be able to:

1. Analyze primary sources (texts, artifacts, images); locate, assess and analyze primary sources and incorporate those sources into original historical research projects with a high level of proficiency.
2. Conceptualize, research and write book reviews, annotated bibliographical essays, historiographical essays and research papers.
3. Dissect secondary sources in a variety of areas of historical specialization, and participate actively and positively in class discussions of those sources.
4. Understand that interpretation is one of the foundations of graduate-level study in the discipline, and offer their own interpretations of work both orally and in writing.

Full Description

The Master of Arts degree in History offers students the opportunity for advanced study in a variety of areas. Coursework emphasizes interpretation, methodology and original research. A student's program of study allows for the opportunity to conduct historical inquiry, research and analysis at the highest level. While students will be able to develop a core competence in their chosen field study, they will also study the histories of regions and times far removed from their central interests. Students may also pursue interdisciplinary work in cognate fields composed of courses in outside disciplines.

Students who anticipate continuing their graduate study beyond the M.A. degree should pursue one of the thesis tracks. Those who choose the thesis option, which is required of students on graduate assistantships, will produce a thesis based on original primary source research that engages a historiographically significant research question. Non-thesis options are available for those who do not expect to go on to doctoral work.

The program develops graduates who are educated scholar-citizens committed to historical empathy and in possession of critical thinking and communication skills honed by rigorous training.

The History major includes the following optional concentration:

- The History for Secondary School Teachers concentration is for educators interested in the advanced study of history. Coursework is focused on current scholarship and approaches to history. While the concentration's focus is not in history pedagogy, it is designed to encourage the application of current historical scholarship to the work responsibilities of the practicing teacher. The program provides school professionals with a structured but flexible approach to analyzing and teaching history while permitting interdisciplinary work in related fields or areas particularly relevant to students' professional objectives.

3. Relate one’s understanding of past time periods, places and themes to the circumstances of the present day.
4. Conduct basic research in both primary and secondary sources and analyze those sources in an argumentative essay.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

General Electives (total credit hours depends on earning 120 credit hours, including 39 upper-division credit hours) 10

Minimum Total Credit Hours: 120

1 Students who earn a minimum B- grade in ACCT 23020, ECON 22060, ECON 22061 and FIN 36053 will fulfill the Validation by Educational Experience (VEE) requirements jointly sponsored by the Society of Actuaries, Casualty Actuarial Society and Canadian Institute of Actuaries.
2 A minimum C grade must be earned to fulfill the writing-intensive requirement.
3 A course may only count for one requirement even though it may appear in more than one course list.

Graduation Requirements
Minimum Major GPA 2.000
Minimum Overall GPA 2.000

Foreign Language College Requirement, B.S.

• Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language. 1
• The Bachelor of Science in Medical Laboratory Science is exempt from this requirement. 2
• Minimum Elementary I and II of the same language 3

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond
Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

Program Learning Outcomes

Graduates of this program will be able to:

1. Reason mathematically by using precise definitions, articulating assumptions and reasoning logically to conclusions.
2. Engage effectively in problem solving by exploring examples, assessing the correctness of solutions and interpreting solutions in an actuarial context.
3. Define, interpret and apply standard actuarial notation, terminology and formulas.
4. Analyze various streams of cash flows, both certain and contingent.
5. Apply methods from probability, statistics and stochastic processes to the solution of problems in actuarial science, finance and economics.
6. Communicate solutions of mathematical problems clearly, both orally and in writing.
7. Employ commonly used computer programming languages and software packages to solve problems in actuarial science, finance and economics.
8. Demonstrate fundamental knowledge of finance, economics and accounting.

Full Description
The Bachelor of Science degree in Actuarial Mathematics prepares students for the actuarial profession. Actuaries are professionals who manage risk. They predict the likelihood of future events and model the financial impact of future scenarios. They find creative ways to mitigate the undesirable effects of future events. Although most actuaries are employed in the insurance and financial industries, many others work in the transportation, environmental, medical and manufacturing industries, as well as in government.

The Actuarial Mathematics major is highly interdisciplinary, integrating substantial coursework in business, computing and communications with a solid core of mathematics and statistics. Kent State University is one of only four institutions in Ohio to receive the "Universities and Colleges with Actuarial Programs-Advanced Curriculum" designation from the Society of Actuaries. The Kent State program prepares students for the first four of a series of examinations to receive professional certification as an actuary.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.
**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Graduation Requirements

Minimum Overall GPA: 2.000

- A minimum grade may be required in some courses

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.
- The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.
- Minimum Elementary I and II of the same language

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2 The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

Full Description

The Bachelor of Science degree in Applied Mathematics emphasizes the tools most useful in science, engineering and technology applications: mathematical modeling, scientific computing and probability and statistics.

Students may apply early to the M.S. in Applied Mathematics and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

The Applied Mathematics major comprises the following concentrations:

- The **Probability and Statistics** concentration emphasizes the mathematics underlying processes that involve randomness and the mathematical tools used in the analysis of data.

2 Each doctoral candidate, upon admission to candidacy, must register for MATH 87199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MATH 87299, each semester, until all requirements for the degree have been met. It is expected that candidates will present the results of their research in a defense open to students and faculty, at which the dissertation will be presented and defended before the dissertation committee.

Candidacy
This examination will be a comprehensive examination in the field of the major subject, and will be a substantially deeper test than the qualifying examination.

- Data Science - M.S.

Minimum Total Credit Hours: 30

Proposed Changes:

1. Adding a footnote to the elective list:
   Students may substitute one of these elective courses with a relevant graduate-level course in Data Science with the approval of their advisory committee or graduate coordinator.

2. Revising Culminating experience:
   Choose from the following:
   - DATA 69099 Capstone Project and DATA 69192 Graduate Internship
   - DATA 69099 Capstone Project and approved Graduate Elective
   - DATA 69199 Thesis I

Graduation Requirements

The culminating experience requirement is a master's thesis or an integrated learning experience.

The master's thesis requires a written thesis, a public defense of the thesis and approval by the student's supervisory committee. Students must form a master's thesis committee, which will include the advisor and at least two other graduate faculty members. The thesis topic and committee must be approved by the advisor and graduate coordinator. The final version of the thesis must be approved by the advisor, thesis committee and graduate coordinator.

The integrated learning experience may include a substantial capstone project or a capstone project and internship. Students must prepare a written document explaining and/or demonstrating their capstone project or internship activity and its significance. In addition, students must give a public presentation of their capstone project or internship, and the written document and presentation must be approved by their supervisory committee.

Program Learning Outcomes

Graduates of this program will be able to:

1. Ask the questions so that problems in a particular business or industrial situation become clear.
2. Determine if the problem may be addressed with data science methods and tools, and if yes, propose potential methods for solving the problems.
3. Make suggestions for how data science may be used to enhance the quality and value of currently existing products (whether the products are physical or methods) and how data science may be used in the development of new products.

Full Description

The Master of Science degree in Data Science provides a focus on developing scientists who will understand the theories, methods and tools of data science and apply data science to solving research and workplace questions in the natural, health and social sciences for businesses and industries.

Data science is a STEM discipline founded on the principles of mathematics and the sciences and developed through a synthesis of mathematics and computer science. One may think of data science as a blending together of methods and ideas from analysis, statistics, databases, big data, artificial intelligence, numerical analysis, graph theory and visualization for the purposes of finding information in data and applying that information to solving real-world problems.

Foreign Language College Requirement, B.A.
Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹
To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   • Intermediate I of the same language
   • ARAB 21401
   • ASL 19401
   • CHIN 25421
   • MCLS 10001
   • MCLS 20001
   • MCLS 20091
   • MCLS 21417
   • MCLS 21420
   • MCLS 22217
   • MCLS 28403
   • MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.
² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program's Coursework tab.

**Mathematics - B.S.**
Foreign Language College Requirement, B.S.

• Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.\(^1\)

• The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.\(^2\)

• Minimum Elementary I and II of the same language

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

ITAL 35340 BOCCACCIO'S DECAMERON IN TRANSLATION  3 Credit Hours
The Decameron, one of the most entertaining, beloved and imitated prose works ever written, is an accurate reflection of fourteenth-century life in Italy. Like Dante's Divine Comedy, this human comedy was written not only to delight, but also to instruct by exploring both our spiritual and our natural environment. Giovanni Boccaccio (1313-1375), considered by some typically medieval and by others one of the first truly modern literary figures to emerge from the darkness of the Middle Ages into the light of the Renaissance, shows himself, as author of the Decameron, to be both a passionate believer and a passionate critic as he reconstructs society, destroyed by the Black Plague, through the perfection of his 100-fold narrative. Boccaccio's Decameron, of course, generated a flourishing early modern tradition of proto-novelistic short-story collections (think of Marguerite de Navarre and Cervantes), but also provided substantial material for the nascent dramatic tradition (from Machiavelli's Mandragola to Shakespeare's All's Well). His biographical collection, Of Famous Women, was an indispensable source and model for the wide-spread debates on the status of women. His Genealogy of the Gentile Gods was a staple of the Renaissance mythographical tradition. This course is taught in English.

Some of the central topics of the course will include Dante's relationship to Florence, his use of classical, Christian and mythological personages, symbols and references; his views on the papacy and the empire, his relationship to the people he encounters and the unique aspects of his vision of the afterlife. In addition, we will focus on a variety of thematic concerns including Dante's understanding of poetry, grace, love and divine justice. Though primarily taught through a combination of lecture and discussion, the course will also focus on the use of art, film, music, performance, digital media and other interdisciplinary methods that have been used to interpret and further our understanding the Divine Comedy and its lasting fascination and influence. - To earn the degree, students must successfully show documentation of a proficiency level of either (a) Intermediate or above on the Sign Language Proficiency Interview (SLPI); or (b) a 2+ on the ASL Proficiency Interview (ASLPI); or (c) a PASS on the Ohio American Sign Language (ASL) Assessment for Teachers of World Languages (Subtests I and II).

**Program Note**

- Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Please see the program coordinator or your academic advisor for course planning.

**Foreign Language College Requirement, B.A.**

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:

- Intermediate I of the same language
- ARAB 21401
- ASL 19401
- CHIN 25421
- MCLS 10001
- MCLS 20001
- MCLS 20091
- MCLS 21417
- MCLS 21420
- MCLS 22217
- MCLS 28403
- MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

**Roadmap**

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website. Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.
Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

   All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level, (2) receiving credit through one of the alternative credit programs offered by Kent State University, or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

   Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Full Description

The Bachelor of Arts degree in Classics provides a foundation in the Western humanities while sharpening a student’s analytical skills and English vocabulary though the systematic study of the ancient languages. Colloquia are offered regularly, covering such thematic topics as violence, gender, sexuality and ancient Christianities.

The Classics major comprises the following concentrations:

- **The Greek concentration** offers opportunities for students to read original Greek texts by such authors as Plato and Homer to enrich their knowledge of classical languages. Students may select from a list of culture courses dealing with the art, archaeology, history, mythology and literature of the classical world.
- **The Latin concentration** offers opportunities for students to read original Latin texts by such authors as Cicero and Vergil to enrich their knowledge of classical languages. Students may select from a list of culture courses dealing with the art, archaeology, history, mythology and literature of the Classical world. Students in the Latin concentration are eligible to pursue teacher licensure at the secondary level.
- **The Classical Civilization concentration** is designed for students with a broad interest in the Classical world. The major offers a wide variety of diverse subjects, including the literature, art archaeology, history, law, religion, sport and mythology of the Classical world. The coursework is all in English, but students may take coursework in ancient Greek or Latin beyond the elementary level. The program provides students with a strong, general liberal arts education appropriate to many pursuits after college, including law, medicine, business, writing and publishing.
- **The Religion Studies concentration** is founded on the study of the ancient multicultural traditions of the Mediterranean peoples, whose multiple worldviews gave rise to religious traditions that, together with the classical heritage, shaped successive Western civilizations. Students begin with a core of classics courses, in order
to understand the cultural context within which the traditions of Second-Temple Judaism, Rabbinic Judaism and early Christianities arise. Concentration requirements form an introduction to the content of classical world religions, including major Eastern traditions and Islam, and to the study of religion as an academic discipline. Courses examine the classical and Western traditions in greater depth, explore the reception of and discourse about Western traditions with medieval and modern societies, or take a comparative approach to the examination of non-Western traditions. The program emphasizes critical thinking skills and provides a liberal arts education especially well-suited for those planning on careers as religious professionals.

Minimum Total Credit Hours: 120

---

1. Students who fulfill the language requirement in fewer than 14 credit hours as a result of starting their French studies in a course higher than FR 13201 will complete remaining credit hours with general electives. Many students begin their university studies with substantial proficiency in French and therefore, should begin their program of study with the first courses in the French major: FR 33211 and FR 33212. Other students may need to complete one or more of the prerequisite courses: FR 13201, FR 13202, FR 23201, FR 23202. Starting French studies in the appropriate course(s) is critical to on-time graduation. All students intending to major in French should contact a French faculty advisor in the department of Modern and Classical Language Studies for placement and advising information prior to enrolling in their first French course. Students entering the university with substantial knowledge of French should consider taking the College-Level Examination Program (CLEP) through which they may receive up to 14 credit hours of university credit. Students wishing to earn credit through CLEP should take the exam several weeks prior to enrolling in their first French course to ensure eligibility, timely granting of credits and timely placement into the correct French course(s).

2. MCLS 20091 may be taken with French advisor's approval. French teaching licensure candidates completing the Education minor should take MCLS 30420.

3. A minimum C grade must be earned to fulfill the writing-intensive requirement.

- All students in the French major must take the American Council on the Teaching of Foreign Languages (ACTFL) Oral Proficiency Interview, ACTFL Writing Proficiency Test and the French Outcomes Assessment Test, prior to being cleared for graduation. Information about the exams can be found on the ACTFL Website and the Language Testing International (LTI) website, the exclusive licensee of ACTFL.

### Program Note

- Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Visit the department's website for course offering projections and advising with course planning.

### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

**Roadmap**

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description

The Bachelor of Arts degree in French provides opportunity for students to study the language, literature and culture of France and Francophone countries. Students gain a respectable measure of competence in reading, writing and oral/aural skills in the French language. To help gain proficiency, students can attend a weekly French coffee hour. A conversation course sometimes involves speaking to people in France live via teleconferencing.

Students can take upper-division French courses abroad, either through Kent’s own year-long program with the University of Bordeaux or with any accredited study abroad program offered by another university. Such programs may be for one semester, one academic year, or one summer. They most benefit students who have already acquired a strong command of the language here before leaving, however.

Students who already have some proficiency in German through high school study should take the German Placement Test prior to their first advising appointment so they can enroll in the correct course(s). Students who have completed three or four years of high school German should see a German advisor for placement. Students lacking in sufficient proficiency for the first major courses (GER 31201 and GER 31211) can reach it by taking courses in the prerequisite sequence (GER 11201, GER 11202, GER 21201 and GER 21202) based on their placement score and high school training. A minimum C grade must be earned to fulfill the writing-intensive requirement.

- All students in the German major must take the American Council on the Teaching of Foreign Languages (ACTFL) Oral Proficiency Interview, ACTFL Writing Proficiency Test and the German Outcomes Assessment Test, prior to being cleared for graduation. ### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.1 To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options2:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

3. Read a wide variety of texts written for native speakers of German and not edited or adapted for non-native speakers.
4. Compose routine social correspondence and write cohesive summaries, narratives and descriptions of a factual nature in German.
5. Explain various facets of contemporary German-speaking cultures in depth in German.
6. Analyze aspects of the linguistic, ethnic, racial, religious, cultural and social diversity within German-speaking countries and communities in German.
7. Explain the historical and political context of German-speaking cultures.

Full Description
The Bachelor of Arts degree in German provides instruction designed to develop competence in oral and written communication; insights into language form, usage and meaning; and knowledge of German literature, cultural history and contemporary issues. Additionally, students are introduced to basic skills in German-to-English translation.

The flexibility of the major makes it easy for students to combine with a second major, such as the History, International Studies or Political Science major or another foreign language major.

Students wishing to teach may combine the German major with the Education minor to prepare for multi-age (K–12) teacher licensure in Ohio.

General Electives (total credit hours depends on earning 120 credit hours, including 39 upper-division credit hours) 50

Minimum Total Credit Hours: 120

1. Students who fulfill the language requirement in fewer than 14 credit hours as a result of starting their Russian studies in a course higher than RUSS 22202 will complete remaining credit hours with general electives. Students with previous Russian study or background knowledge should take the Russian Placement test and consult with a Russian faculty advisor for placement. Students lacking in sufficient major-level proficiency to take the first major course (RUSS 22201) can reach it by taking courses in the prerequisite sequence (RUSS 12201 and RUSS 12202). Students with sufficient Russian to place into higher semesters are not allowed to take RUSS 12201 or RUSS 12202.

2. Students must earn a minimum C grade in one course to fulfill the writing-intensive requirement.

3. Students planning to earn teaching licensure and declared in the Education minor should take MCLS 30420.

Graduation Requirements

Minimum Major GPA | Minimum Overall GPA
---|---
2.000 | 2.000

• All Russian Literature, Culture and Translation majors must take the American Council on the Teaching of Foreign Languages (ACTFL) Oral Proficiency Interview, ACTFL Writing Proficiency Test and the Russian Outcomes Assessment Test, prior to being cleared for graduation. Information about the exams can be found on the ACTFL Website and the Language Testing International (LSI) website, the exclusive licensee of ACTFL. B.A. in Russian Literature, Culture and Translation candidates should consult with their designated Russian faculty advisor for more information on arranging to take the proficiency exams.

Program Note

• Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Visit the department’s website for course offering projections and advising with course planning.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. 1 To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options: 2.

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   • Intermediate I of the same language
   • ARAB 21401
   • ASL 19401
   • CHIN 25421
   • MCLS 10001
   • MCLS 20001
   • MCLS 20091
   • MCLS 21417
   • MCLS 21420
All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

General Electives (total credit hours depends on earning 120 credit hours, including 39 upper-division credit hours)

Minimum Total Credit Hours: 120
Many students begin their university studies with substantial proficiency in Spanish and therefore, should begin their program of study with the first course in the Spanish major, SPAN 38211. Other students may need to complete one or more of the prerequisite courses: SPAN 18201, SPAN 18202, SPAN 28201, SPAN 28202.

Starting Spanish studies in the appropriate course(s) is critical to on-time graduation. All students intending to major in Spanish should contact a Spanish faculty advisor in the Department of Modern and Classical Language Studies for individualized placement and advising information prior to enrolling in their first Spanish course. Students entering the university with substantial knowledge of Spanish should consider taking the College-Level Examination Program (CLEP) through which they may receive up to 14 credit hours of university credit. Students wishing to earn credit through CLEP should take the exam several weeks prior to enrolling in their first Spanish course to ensure eligibility, timely granting of credits and timely placement into the correct Spanish course(s).

A minimum C grade must be earned to fulfill the writing-intensive requirement.

It is recommended that students who have declared the Education minor and students interested in declaring a double major with Translation take MCLS 30420.

- All students in the Spanish major are required to complete the American Council on the Teaching of Foreign Languages (ACTFL) Oral Proficiency Interview, ACTFL Writing Proficiency Test and the Spanish Outcomes Assessment Test, prior to being cleared for graduation. Information about the exams can be found on the ACTFL website and the Language Testing International (LTI) website, the exclusive licensee of ACTFL.

### Program Note

- Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Visit the department’s website for course offering projections and advising with course planning.

### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091

- MCLS 21417
- MCLS 21420
- MCLS 22217
- MCLS 28403
- MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

### Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Admission Requirements

Applications to the Russian concentration are not being accepted at this time.

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website. Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

- Students are expected to start in a course appropriate to their language proficiency level. Students lacking in sufficient proficiency to take the first concentration course can reach it by taking courses in the prerequisite sequence based on their placement score and high school training. One or more of the prerequisites may be waived with demonstrated proficiency through the Kent State placement test, AP, CLEP, International Baccalaureate, official ACTFL Proficiency Rating or another department-approved assessment.
- Students who fulfill the college language requirement in fewer than 8 credit hours as a result of proficiency, will complete remaining hours with general electives. Completion of first junior-level course completes the College of Arts and Sciences foreign language requirements.

Program Note

- Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Visit the department’s website for course offering projections and advising with course planning.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.
- The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.
- Minimum Elementary I and II of the same language

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

Full Description
The Bachelor of Science degree in Translation is a pre-professional program designed for students who are seeking the more professional focus and interdisciplinary breadth that the B.S. degree offers with the inclusion of a minor, double major or certificate to develop the skills needed to translate in a professional setting. It introduces the basics of translation theory as it applies to the actual practice of translation.

The requirement of a minor, certificate or second major enables students to acquire a level of expertise in a specific field in which they can specialize as translators. This degree also enables students to have a major and a minor that make them more competitive and prepares them for a sector that the U.S. Department of Labor projects as one of the fastest-growing sectors globally. Translation majors are strongly encouraged to undertake study in a country where their language concentration is spoken so that they can achieve the necessary proficiency level. Skills necessary include an excellent command of the source language, an excellent command of the target language, cultural knowledge, specialist knowledge, research competence, terminological competence, technological competence, an understanding of the translation industry and transfer competence.

Graduates may enter graduate programs in translation (the professional degree) or go on to work for government, business or industry, for translation agencies or as freelance translators.

The Translation major comprises the following concentrations:

- Arabic
- French
- German

- Russian - Applications to the Russian concentration are not being accepted at this time.
- Spanish

Many study abroad opportunities exist, including:

- France: Université Michel de Montaigne Bordeaux III, Bordeaux (all class standings, all majors/minors)
- Germany: Julius-Maximilian-Universität Würzburg, Würzburg (all class standings, all majors/minors)
- Germany: Universität Leipzig, Leipzig (intermediate German language proficiency required)
- Spain: Universidad Europea de Madrid, Madrid (all class standings, all majors/minors)
- Spain: Universidad Europea de Valencia, Valencia

PHIL 21002 INTRODUCTION TO FORMAL LOGIC (KMCR) 3 Credit Hours
This course is designed to sharpen students’ reasoning skills and to help them better understand the structure of reasoning in general. To do this, it introduces students to some formal languages, such as Propositional Logic and Predicate Logic, that represent the logical structure of deductive reasoning. Unlike natural languages such as English, these formal languages allow students to focus on the general structure of different types of arguments, without discussing the content of any particular argument. Course covers both the construction of formal proofs in these languages, and translation between them and English. The study of formal logic contributes to effective and persuasive reasoning, not only in philosophy, but in any discipline or context. It also provides effective tools for evaluating the strength of English-language arguments. The skills that students acquire in this course are thus widely applicable in their personal, professional and academic lives.

The course features selections from rationalists such as Descartes, Spinoza and Leibniz, and empiricists such as Locke, Berkeley and Hume, of the early modern philosophical period. The course explores the development of 19th century German idealism by thinkers such as Fichte, Hegel and Schelling, whose work was prompted by Kant’s transcendental idealism understood as critique or as the examination of the conditions for the possibility of knowledge acquisition as a touchstone for understanding the relationship among metaphysics, epistemology, ethics and political philosophy. The course thus begins with Kant’s critical project before turning to its reception and the various 19th century responses to it. Additional selections from Kant’s ethical and political writings may supplement this reading. The course may also cover additional figures, such as Schopenhauer, Nietzsche and Marx, whose work, in turn, is a response to German idealism itself.

About This Program
The Health Care Ethics minor is a concentration of courses offered by disciplines within the university concerned with health care practices and the education of health care practitioners. The minor heightens students' awareness of what constitutes ethical concerns, problems and activity from the perspectives of various kinds of health care practitioners, clients and institutions. Various views of what constitutes the ethical are examined so that students are alerted both to the conceptual dimension of ethical activity and to the existence of differing and conflicting modes of ethical reasoning.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:

- Intermediate I of the same language
- ARAB 21401
- ASL 19401
- CHIN 25421
- MCLS 10001
- MCLS 20001
- MCLS 20091
- MCLS 21417
- MCLS 21420
- MCLS 22217
- MCLS 28403
- MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description

The Bachelor of Arts degree in Philosophy gives students the opportunity to consider some of life’s biggest questions, such as:

- What is the nature of reality?
- What (if anything) can I know with certainty?
- What kind of life should I live?

Philosophy students read, discuss and analyze texts from a plurality of traditional philosophical areas of study in both Western and non-Western philosophies, written by diverse philosophers. They become familiar with contemporary and historical schools of thought and learn about the application of philosophy to other disciplines and professions. The Philosophy major provides intensive training in argumentative writing, careful reading as well as critical and creative thinking, while broadening students’ intellectual, cultural and personal horizons.

The flexibility of the major’s curriculum allows students to combine it with other majors or minors depending on their career interests. In this way, students can tailor their educational experience to provide excellent preparation for a wide range of careers, including law, business, medicine, technology, public relations, government, journalism, education, writing, editing, communications and social work.

Full Description
The Philosophy minor helps students develop skills such as critical thinking, careful reading and analysis of texts, argumentative and analytical writing, creative problem-solving, effective communication and global literacy — all of which are vital to success in a wide range of professions.
The minor provides excellent preparation for graduate school entrance exams (such as the GRE, LSAT and GMAT) and enhances the career preparation students obtain in their major field.

Philosophy minors develop these important skills while being introduced to a fascinating discipline which considers basic, timeless questions such as

- "What is the nature of reality?"
- "What (if anything) can I know with certainty?"
- "What kind of life should I live?"

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Graduation Requirements

Minimum Total Credit Hours: 39

1 Maximum 6 credit hours of PHY 40096 may be applied toward the major.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.
- The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.²
- Minimum Elementary I and II of the same language

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

² The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Demonstrate technical and cognitive skills important in a good physicist, including the following:
   a. Think critically and analytically.
   b. Define a problem and how to solve problems.
   c. Understand advanced mathematics (e.g., calculus and differential equations) and computer skills.
   d. Use, design and even build lab equipment.

2. Demonstrate the traits important in a good scientist, namely, hard working, creative, meticulous, persistence, tenacious and self-confidence.

3. Communicate results of their work to peers, to their instructors or supervisors, to various target groups within the physics community and to people outside the discipline.

**Full Description**

The Bachelor of Science degree in Physics is a professionally oriented program that serves as preparation either for graduate work in physics or for entrance into positions in a variety of industries or government service.

The Physics major comprises the following concentrations:

- **The Applied Physics** concentration prepares students for immediate entry into careers in industry. Course requirements include electronics, introduction to computer programming, and data analysis and computational physics techniques. While rooted in the basic principles of physics, this program is optimized for students concerned with the application of physics in practical devices and systems.

- **The Biological Sciences** concentration is interdisciplinary and for students with a strong interest in both physics and biology, who may wish to prepare for graduate study in biophysics or for work in a biotechnology company.

- **The Chemistry** concentration is interdisciplinary and designed for students with a strong interest in both physics and chemistry, who may wish to prepare for graduate study in chemical physics or for work in a high-technology materials-related research and development laboratory.

- **The Computer Science** concentration is interdisciplinary and provides a foundation in physics while emphasizing the use of computer...
software in scientific applications. Graduates are prepared for computer-related careers that require an understanding of the underlying science as well as knowledge of relevant computer applications.

• The **Entrepreneurship** concentration is interdisciplinary and designed to prepare physics majors for various aspects of starting or managing a scientific business.

• The **Mathematical Physics** concentration is interdisciplinary and provides students with a strong understanding of applied physical theory, its applications and the underlying mathematics. This training, valuable for start-up positions with a number of industries, may also serve as preparation for graduate work in either physics or mathematics.

• The **Pre-Medicine/Pre-Osteopathy/Pre-Podiatry** concentration is interdisciplinary and designed to prepare physics majors for further study leading to careers in medicine.

• The **Research** concentration prepares majors for further study at the graduate level. This program trains students in logical thinking and problem solving using both analytical and computational methods. It also furnishes students with a comprehensive understanding of the basic laws and principles that govern the physical world. Academic assessment and GRE scores keep the program up-to-date via curricular revisions. This program is a popular stepping stone to graduate degrees not only in physics, but also in engineering, astronomy/astrophysics and materials science.

Program Learning Outcomes

Graduates of this program will be able to:

1. Communicate the basic concepts of sustainable development policy approaches to global issues and their relevance to the student’s major field of study.
2. Articulate the importance of international cooperation for addressing global issues.
3. Articulate the importance of strong local, national and international public institutions for addressing global issues.

Full Description

The Global Issues undergraduate certificate examines a range of global issues through the framework of sustainable development, an approach to public policy-making that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainable development policies seek to address the world’s most pressing “wicked problems” through cooperative action as a global community. Examples include poverty, hunger, inequality, access to education, health and well-being, climate change and sustainable communities. The certificate is an excellent complement to any major and enables students to more fully understand how their major field of study can have a positive impact on the world around them.

**Foreign Language College Requirement, B.A.**

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Full Description

The Bachelor of Arts degree in Political Science empowers students to be engaged global citizens and informed consumers of information who are competitive in a range of careers. Graduates work in the public and private sectors across the United States and around the globe. Many also go on to graduate programs or to law school.

Students in the major are provided internship and study abroad opportunities, including two semester-long, 15-credit hour internship programs, one in Washington, D.C., and one in Columbus, Ohio. In addition, the Department of Political Science offers study-abroad courses in multiple countries during the summer, and students often also take advantage of Kent State programs in Florence, Italy, and Geneva, Switzerland. More information can be found on the Department of Political Science website.

The Political Science major comprises the following concentrations:

- The **American Politics** concentration investigates the political context of life in the United States in courses on public opinion, elections and the media, as well as Congress, the presidency, and the courts.
- The **International Relations-Comparative Politics** concentration focuses on international policy and politics, including aid and development, energy and oil, human rights and regions of the world (e.g., Latin America, the Middle East and Russia).
- The **General** concentration allows students to design their own specialization rather than choosing a specific area to concentrate.
- The **Public Policy** concentration explores how governments address major policy questions such as health care, environmental protection and foreign policy. Courses introduce students not only to policy questions and implications, but also to the skills involved in policy analysis.

Full Description

The Master of Arts degree in Political Science focuses broadly on the dynamics surrounding representation, equity, conflict, human rights, development and conflict resolution. Students delve into the scholarship on these dynamics (among others) in an interdisciplinary and theoretically sophisticated way, thinking about how the political process and government policy-making affect the lives of citizens, and how citizens influence those processes.

The Political Science major comprises the following concentrations:

• American Politics and Policy
• Conflict Analysis and Management
• Transnational and Comparative Politics

Political Science - Minor

College of Arts and Sciences
Department of Political Science

About This Program

The Political Science minor is for students who have an ongoing interest in politics — at the local, state, national or international level — but whose primary area of study does not allow a second major. Students study the general subject matter of political science and then advance to specialty areas that meet their own interests, needs and plans of study.

The Pre-Law minor provides a background for the study of law through challenging coursework that reinforces and extends the liberal arts foundation gained through the Kent Core. It prepares students for advanced analytical and writing dexterity, and introduces them to the social and governmental structures that underlie the law.

No specific course of study is required for admission to law school. Most law schools require a bachelor's degree for admission. The bachelor's degree may be from any discipline or college. Kent State University also has a number of 3+3 agreements with law schools in Ohio. Interested students should consult with the Pre-Law Center.

Law schools and alternative legal employment emphasize the value of reading comprehension, analytical skills, oral advocacy and a good command of written English. While these skills can be obtained in various ways, a general liberal arts background is recommended. Courses in English literature, American history and government are considered essential. Many pre-law students choose a major in political science, history, sociology, psychology, economics or English. A Bachelor of Integrative Studies degree is suitable if carefully planned.

Students considering law as a career should seek individual advising from the Pre-Law Center or in their major department. A list of pre-law advisors is available in the college office. Consultation with a pre-law advisor is urged, regardless of the student’s major, minor or college. The Pre-Law Center can also supply information on LSAT registration, pre-law planning guides, information on law school admissions and financial aid information. The center sponsors an inter-collegiate competitive Moot Court team; a Phi Alpha Delta legal fraternity; a pre-law club; and a Pre-Law Service, Citizenship and Justice living learning community, as well as law-related scholarships and legal internships.

Full Description
The Washington Program in National Issues was established in 1973 through the initiative of Washington-based alumni who sought to provide Kent State University undergraduates with a unique living and learning experience in the nation's capital.

The purpose of the program is to accomplish the following:
• Facilitate learning about the U.S. political system through briefings with government officials and other working professionals in Washington, DC
• Develop a personal understanding of the demands and rewards of the professional work world through an internship experience
• Encourage initiative through individualized research, which may involve resources at the Library of Congress, among other sit

Students participate in internships — in places such as Capitol Hill, in a governmental agency or with an interest group — and attend seminars. The program requires a semester-long residence in the Washington, DC, area. Alumni in the nation's capital continue to support the program by introducing students to the culture and serving as consultants and mentors.

**Candidacy Requirement**

- Students who have been admitted into the doctoral program will be considered for Ph.D. candidacy after they have met all requirements for the M.A. degree and have passed a qualifying examination in a major area of specialization in psychology.
- The Department of Psychological Sciences reserves the right to separate from the program a student who, in the opinion of a duly constituted departmental committee, is not likely to succeed professionally despite earning acceptable grades.
- Proficiency in a foreign language is not a requirement for the Ph.D. degree.
Graduation Requirements

- The program requires full-time continuous enrollment, including summers.
- Post-baccalaureate students are required to complete a minimum of four years of full-time attendance.

- Students must complete a supervised traineeship in a faculty-approved mental health facility outside the department, which involves a minimum of 1,000 hours. Additionally, a 2,000-hour internship in a setting approved by the American Psychological Association is required over a calendar year’s duration.
- The Department of Psychological Sciences will permit the waiving of program coursework if supported by appropriate graduate-level coursework for post-master’s students admitted to the program. Students may earn the Ph.D. degree with less than 113 credit hours but no less than 98 total credit hours.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate competencies in research methodologies specific to their area of interest.
2. Demonstrate competencies in teaching undergraduate courses.
3. Demonstrate competencies in providing psychological assessment and treatment services.

Full Description

The Ph.D. degree in Clinical Psychology prepares students to conduct research, to serve on college and university faculties and to provide a range of clinical services. The program adheres to the clinical scientist model of education and training, which is founded on the idea that the practice of psychology should be based on the science of psychology, and that practicing psychologists should be able to translate clinical observation into researchable questions and pursue new knowledge on the basis of their observations. Students are expected to develop an area of special expertise in research, and opportunities for specialized clinical training are offered.

In addition to general training in clinical psychology, students may receive specialized research and clinical training in one of the following areas: adult psychopathology, assessment, child, health or neuropsychology.

The Clinical Psychology major includes the following optional concentration:

- The Quantitative Methods of Psychology optional concentration trains individuals in some of the more recent developments of statistical science and, particularly, the application of these developments to real-world psychological data. One unique feature of the concentration is the focus on the application of quantitative methods in psychological research; although department faculty members have expertise in an area of statistics, they also conduct research in a substantive area of psychology. The concentration is intended for those students who intend to pursue academic careers, wherein the use of advanced quantitative methods in one’s own program of research is highly valued, and who also intend to teach undergraduate or graduate courses in statistical methods.

### Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.  
- The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.
- Minimum Elementary I and II of the same language

1. All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2. The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

Teaching Experience

- 1

Research Experience

- 3

1 Psychologists with strong quantitative skills often are expected to disseminate statistical knowledge to their colleagues; thus, students who pursue the concentration must have at least one practicum experience. This teaching experience can be as an instructor of an undergraduate course (PSYC 21621, PSYC 31684) or becoming the teaching assistant for the first-year graduate sequence.

2 Students must demonstrate mastery of quantitative methodology through the inclusion of an advanced technique as part of a milestone paper with sophisticated analyses, as determined by the student’s quantitative mentor. Specifically, students should demonstrate that they are able to appropriately conduct and interpret sophisticated statistical analyses. Note, however, that this requirement does not necessarily suggest that students need to develop a new statistical technique or methodology.

Candidacy Requirements

- Students who have been admitted into the doctoral program will be considered for Ph.D. candidacy after they have met all requirements for the M.A. degree and have passed a qualifying examination in a major area of specialization in psychology.
- The Department of Psychological Sciences reserves the right to separate from the program a student who, in the opinion of a duly constituted departmental committee, is not likely to succeed professionally despite earning acceptable grades.
- Proficiency in a foreign language is not a requirement for the Ph.D. degree.
Graduation Requirements

- The program requires full-time continuous enrollment.
- Post-baccalaureate students are required to complete a minimum of four years of full-time attendance.
- Doctoral program aspirants who do not hold a master’s degree upon starting the program must complete all the requirements for the master’s degree.
- Students must complete a first-year project and present it to faculty and graduate students during the fall of their second year.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate mastery of the current theories and significant empirical findings in a major area of psychological science. Mastery includes acquiring both an understanding of these materials as well as the ability to think critically about them.
2. Teach courses in psychological science.
3. Supervise and mentor undergraduate students in both research settings and in the classroom.
4. Design, execute, analyze and report empirical studies that make a significant contribution in a major area of psychological science.

Full Description

The Ph.D. degree in Psychological Science offers doctoral education and training in psychological science, with specializations in behavioral neuroscience, cognitive psychology, developmental psychology, social psychology and health psychology. The curriculum and other aspects of training offered by the Department of Psychological Sciences prepare students for careers in research and teaching. The program is strongly research-oriented.

The Psychological Science major includes the following optional concentration:

- The Quantitative Methods of Psychology optional concentration trains individuals in some of the more recent developments of statistical science and, particularly, the application of these developments to real-world psychological data. One unique feature of the concentration is the focus on the application of quantitative methods in psychological research; although department faculty members have expertise in an area of statistics, they also conduct research in a substantive area of psychology. The concentration is intended for those students who intend to pursue academic careers, wherein the use of advanced quantitative methods in one’s own program of research is highly valued, and who also intend to teach undergraduate or graduate courses in statistical methods.

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website. Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Counseling Careers Concentration
This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

University Requirements
All students in a bachelor's degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.
1. Describe the basic theoretical perspectives, principles, concepts, empirical findings and historical trends in psychology.
2. Understand and use fundamental data analysis techniques.
3. Understand and apply basic research methods/tools in psychology and evaluate the adequacy of research designs.
4. Write effectively in the discipline.
5. Recognize, understand and respect the complexity of sociocultural and international diversity.

Full Description

Students in the Bachelor of Arts in Psychology apply the science of understanding and explaining thoughts, emotions and behavior to solving real-world problems. Topics include stress, biological influences on behavior, growth and development of children and diagnosis and treatment of psychological disorders. Elective courses may be used to specialize in a number of areas of psychology and to gain hands-on experience in research labs. The degree prepares students for graduate school and employment in a range of fields, including clinical, applied and experimental areas of psychology and related fields such as education, law, human resources and health care.

The Psychology major includes the following optional concentrations:

- The Child Psychology concentration is designed for students who are interested specifically in children and adolescents. Topics include child development, psychological disorders of childhood and adolescence, children’s cognitive processes, personality development and child-related research experience. The concentration prepares students for graduate study and employment in a range of fields, including clinical psychology, school psychology, school counseling and employment in settings such as child development centers and related agencies.
- The Counseling Careers concentration is designed to prepare students for employment in a range of fields and for master’s-level study in all fields of counseling. Topics include human adjustment, stress and coping, human development, personality, psychological disorders, treatment and intervention techniques, psychometrics, psychopharmacology and clinical or counseling-related research experience.

Students interested in other career paths within psychology may pursue the major without a concentration.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.¹
- The Bachelor of Science in Medical Laboratory Science is exempt from this requirement.²
- Minimum Elementary I and II of the same language

1. All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2. The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs).

Full Description

The Master of Arts degree in Criminology and Criminal Justice is designed to challenge experienced and aspiring professionals who want to expand their scope of knowledge and move into career and leadership positions. The program prepares graduates as next-generation leaders in this complex, global, and interconnected field. The flexible online program is structured to fit the lives of full-time working professionals.

The Criminology and Criminal Justice major comprises the following concentrations:

- **The Global Security** concentration focuses on issues related to global security, U.S. national security policy and strategy, as well as transnational issues and the concerns of other countries or regions. It provides students with a strong foundation to confront the ever-changing, fast-paced, and challenging international security environment. With an emphasis on traditional and emerging transnational security threats, students are prepared for analytical, operational and leadership careers in global security in the public and private sectors. The goal is to produce a new generation of analysts, policymakers and scholars knowledgeable about the wide range of international and national security problems and foreign policy issues of the 21st century.

- **The Policing** concentration examines the historical ideas of police service and the lessons that can be learned from those ideas. Students learn about the research that has challenged traditional ideas and the implications of that research for revision. The program provides students the tools to analyze the implications of contemporary research to guide new innovations in policies, management, strategies and tactics of police service delivery.

- **The Victimology** concentration provides specialized knowledge about the scientific study of crime victims, their treatment within the criminal and juvenile justice systems, the legal rights of victims and victim assistance and restorative justice programs. This concentration will prepare students to develop and lead initiatives that help prevent victimization, to engage in victimological research and evaluation, and to respond to victims in culturally appropriate ways.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹ To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   • Intermediate I of the same language
   • ARAB 21401
   • ASL 19401
   • CHIN 25421
   • MCLS 10001

¹ Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

• MCLS 21417
• MCLS 21420
• MCLS 22217
• MCLS 28403
• MCLS 28404

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

2 Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap
This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description
The Bachelor of Arts degree in Criminology and Justice Studies takes an interdisciplinary approach to the study of crime, law and justice. The curriculum provides a firm understanding of the basic institutions of the criminal justice system. Students are also exposed to criminological theory and diversity courses, which help them understand the complex relationship between the individual, society and the criminal justice system. The program stresses effective writing and analytical skills. Students are afforded the opportunity to earn credit through internship placements.

Consultations with faculty and advisors enable students to make informed choices about which combination of courses will maximize their preparation for future careers and graduate education. Such specializations include policing; corrections; victimology; law and society; criminology and deviance; and justice and human relations.

Criminology and Justice Studies students may apply early to the M.A. degree in Criminology and Criminal Justice and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

About This Program
The Society, Health and Medicine minor exposes students to the sociocultural, political and organizational dimensions of health and medicine while also promoting an understanding of the social determinants of health.

Students combine core courses from medical sociology with a series of electives of their choosing. The minor is well suited to students with an academic interest in health, medicine or health disparities, as well as those pursuing careers in the health professions.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.\(^1\)

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options\(^2\):

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

\(^1\) All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

\(^2\) Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description

The Bachelor of Arts degree in Sociology provides broad training in the theories and methods that sociologists use to understand contemporary social issues and problems. Students are encouraged to think critically as they examine issues ranging from small group behavior to global social movements. The core curriculum focuses on social inequalities, social psychology and health and illness. In addition, the program offers courses on a variety of topics that include urban living, deviant behavior, religion and family.

Sociology students are increasingly interested in courses that prepare them for meaningful careers that change the world (Seemiller and Grace 2016). One only needs to look at Black Lives Matter or the Sunrise Movement to see evidence of this generational disposition. Sociology, as a discipline, provides students with rigorous coursework on social inequality and social change and helps students find careers in government, teaching, community organizing, non-governmental organizations and social work.

Students may work with faculty and advisors to pursue their own individualized specialization in such areas as medical sociology; social inequalities; sociological social psychology; social change and social justice; family and life course sociology; and social problems, deviance and crime.

Sociology students may apply early to the M.A. degree in Sociology and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

About This Program

The Sociology minor provides students with a broad understanding of the theoretical, methodological and substantive issues relevant to the field, as well as the tools necessary to apply this knowledge to other areas of study. Students explore the intersections between culture, social structure and individual behavior by examining issues related to social inequality, health and healthcare, deviance, families and family violence, urban communities, social psychology and more.

Minimum Total Credit Hours: 60

---

1. All students who entered the program with an M.A. degree earned at another institution must take SOC 72002. This course will not be waived.
2. Each doctoral candidate, upon admission to candidacy, must register for SOC 82199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for SOC 82199, and thereafter SOC 82299, each semester, until all requirements for the degree have been met. After completing the dissertation, students must successfully defend it in an oral examination. The exam will include an evaluation of theory, methodology, analysis and other topics relevant to the student’s specialty area.
3. Students who have already completed a master’s degree in sociology are required to take a minimum of 16 elective credit hours, 9 of which must be in a specialization area.
4. No more than 6 credit hours of SOC 72896 and/or SOC 72898 may be applied toward the degree as elective credit. No more than 6 credit hours of graduate-level coursework outside the department may be applied toward the degree as elective credit. These limits include courses taken while earning a master's degree in sociology.

**Candidacy Requirement**

To earn the Ph.D. degree, students must pass the doctoral candidacy examination. The examination will include an evaluation of theory, methodology, analysis and other topics relevant to the student's specialty area.

**Program Learning Outcomes**

Graduates of this program will be able to:

1. Demonstrate an advanced understanding of sociological theory by using it to better understand social phenomena and human behavior, develop new theoretical arguments and pose and attempt to answer research questions.
2. Demonstrate an advanced understanding of research methods in sociology, including both quantitative methods (e.g., survey, experimental) and qualitative methods (e.g., participant observation, content analysis).
3. Demonstrate an advanced understanding of statistics in application to social research, including advanced techniques (e.g., structural equation modeling, hierarchical linear modeling).
4. Demonstrate the ability to synthesize complex scientific literatures and execute sophisticated original research through the successful completion of a dissertation project.

**Full Description**

The Ph.D. degree in Sociology provides students with advanced training for research and teaching careers in higher education and for research-based careers in both the public and private sectors. The program offers specializations in criminology and deviance, the sociology of health and mental health, social inequalities (race, class, gender) and social psychology.

**Admission Requirements**

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**First-Year Students on the Kent Campus:** First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

**First-Year Students on the Regional Campuses:** First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent.

For more information on admissions, contact the Regional Campuses admissions offices.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

**Transfer Students:** Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s coursework tab.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

- All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

- Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Upon approval of the thesis topic, the student is required to register continuously for MTSC 60199 each semester for a total of 6 credit hours. A student who has completed the required 6 credit hours of MTSC 60199 but has not finished the thesis is expected, thereafter, to register continuously for MTSC 60299 each semester until all degree requirements are met. No more than 6 credit hours of MTSC 60199 may be counted toward completion of degree requirements. Credit hours earned in MTSC 60299 do not, under any circumstances, count toward the degree.

1 Each doctoral candidate, upon admission to candidacy, must register for MTSC 80199 for a total of 30 credit hours. It is expected that a doctoral candidate will continuously register for Dissertation I, and thereafter MTSC 80299, each semester, until all requirements for the degree have been met. A prospectus of the dissertation research project is required for all Ph.D. candidates. The prospectus is prepared jointly with the student’s dissertation advisor. The prospectus must be approved by the members of the student’s dissertation committee. A dissertation presenting and interpreting results of original research is required for the Ph.D. degree. Following acceptance of the dissertation by the dissertation committee, the final degree requirement is the satisfactory completion of the final oral exam (defense of dissertation) in front of a committee of graduate materials science faculty and representatives from other departments in the College of Arts and Sciences.
Graduation Requirements

Candidacy Requirement
In addition to satisfying the course work, students must pass the materials science candidacy examination. The examination is divided into two parts, a written exam and an oral exam.

The written exam is scheduled first, followed by the oral exam. The exams will cover the core courses of the materials science program taken during the first year. Students who do not pass the candidacy exam the first time may take it a second time. The first attempt at candidacy usually will take place in August, during the week before the start of the fall semester of the student's second year of study. The second attempt usually will take place in January, during the week before the start of the spring semester of the student's second year of study. A request for exception will be considered for medical reasons or for other unpredictable circumstances. Requests must be submitted in writing with supporting documentation prior to the test date and must be approved by the candidacy exam committee and by the director of the materials science program.

Students who fail the second attempt cannot continue towards the doctoral degree, but may complete the requirements for the Master of Science degree.

Program Learning Outcomes
Graduates of this program will be able to:

1. Develop an advanced understanding of the fundamental science of liquid crystals and related advanced materials and ability to apply acquired knowledge of physical and chemical properties of soft materials and devices such as liquid crystals, polymers, colloids and active matter.
2. Gain experience in presenting scientific data in research publications, articles, posters and oral presentations.
3. Apply acquired knowledge to the discovery of new advanced materials and development of advanced materials-based devices and applications.

Full Description
The Ph.D. degree in Materials Science provides students with extensive scientific training, cutting-edge research opportunities and engineering skills necessary for a variety of careers in academy and industry. Program faculty and students conduct research through Kent State’s participating departments and the Advanced Materials and Liquid Crystal Institute. Such research includes liquid crystal synthesis and molecular design; properties of liquid crystals and related advanced materials; lyotropic liquid crystals and bio-related materials, opto-electronics; and nanoscience and nanotechnologies. These important research foci are inherently interdisciplinary.

Full Description

The Ph.D. degree in Biomedical Sciences—Human Evolutionary Biology emphasizes a biological approach to research problems focusing on human and non-human anthropology. The program focuses on human anatomy and neuroanatomy, developmental biology, evolutionary genetics, mammalian physiology, paleontology and experimental archaeology. Many graduates use their training and teaching experience to enter anthropology or corporate teaching positions. Most graduates are also prepared to teach both human anatomy and other cognate fields (neuroanatomy, cell biology, physiology, genetics) in demand at most medical schools.

The Ph.D. degree is offered in consortium with Northeast Ohio Medical University (NEOMED). Faculty in the program are drawn from the departments of Anthropology and the Biological Sciences at Kent State and the Department of Anatomy and Neurobiology at NEOMED. This inter-departmental and inter-institutional structure provides significant resources to the doctoral candidates, including the Hammon-Todd human and primate skeletal collection, state-of-the-art laboratories for neuroanatomy, anatomy, genetics, paleontology, biomechanics and experimental archaeology. Additional resources are available to students through the Cleveland Museum of Natural History, the Cleveland Metroparks zoo and other local, national and international collaborative relationships.

Candidates for the Ph.D. are expected to engage, to the extent possible, in other activities that benefit their professional development. The teaching of laboratory and lecture course, as a appropriate is considered valuable, and each student should have this experience during their graduate career. This includes those students on non-teaching scholarships or research appointments during their tenure. Students should also seek membership in professional organizations, attend meetings to present research results and maintain currency in the relevant literature.

Full Description

The Master of Science degree in Biomedical Sciences–Physiology Interdisciplinary prepares graduates in areas that include cardiovascular, pulmonary, endocrine and neuroendocrine, reproductive or exercise physiology. In this context, emphasis is placed on an integrative approach for both research and graduate education. As with other program areas, the Biomedical Sciences–Physiology Interdisciplinary major takes advantage of the latest molecular and cellular techniques to address questions related to human diseases.

The M.S. degree is offered in consortium with Cleveland Clinic and Northeast Ohio Medical University (NEOMED). Faculty members are drawn from various departments at Kent State and the other two institutions. Although graduate work may be completed in any of the various research areas, faculty are listed in two general specializations: (1) environmental and comparative physiology and (2) cardiopulmonary and exercise physiology. Each specialization addresses different subject areas of physiology and each has an associated training faculty.

The degree program is research oriented and designed to provide students with a thorough grounding in physiological principles and techniques within several well-defined focus areas.

In focus are its traditions, its consequential contexts of struggle and protest, its pioneers, the multiple fields from which they came to this fresh-born academic hub. The course examines worldwide spread of WMST programs, their variant, evolving interests and work, the hounding, keenly felt disruptions and conflicts. WMST 30201 WITCHES: THE MONSTROUS FEMININE 3 Credit Hours
This course counterbalances student inquiry with lectures and materials at once grounded in women's and gender/sexuality studies and reliant on a range of interdisciplinary sources. The course centers two key touchstones: witch and monstrous feminine. Course trajectories traverse history, culture, religion, politics and academic and popular renderings to locate keys: hunts, trials, dynamics of allegation, guilt and innocence. The course aims to 'correct' traditions of objectification and typecasting by interrogating real subjectivities and the dimensionality of feminine, monstrous and witch.

WMST 30202 FEMINIST HUMOR: DISARMING LAUGHTER, DISRUPTIVE DISCOURSE 3 Credit Hours

The most fundamental pursuits are inductive in nature, grounding studies in actual discursive practice, the realities of women's politically-charged and personally-resonant humor, laughter and feminisms as they converge in contexts both private and public, mediated and live/face-to-face. Scholarship on feminist humor provides our final framing.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 30301 REPRESENTATIONS OF WOMEN AND FEMINISM IN POPULAR CULTURE 3 Credit Hours
The basic challenge of this course is that it requires the study of two things simultaneously: 'women' and 'women as represented' in popular culture. From the classic object of woman sexed and gendered, feminist study has evolved to also consider woman the subject, the autonomous person with agency within her environment. The course covers much ground: dominant narratives; the often-overlapping contexts of media, politics, morality and religion; the signs inherent in language and imagery; and the power asymmetry and embattled definitions of "woman." Throughout the course, we employ varied approaches that resist any one right answer, easy dogmatic conclusion or evaluation of the narratives.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 30302 GLOBAL FEMINISMS: A WORLD AND CENTURY OF WOMEN'S ACTIVISM 3 Credit Hours
This course explores real and diverse circumstances where feminisms have emerged. Over the semester, we examine feminist movements and their respective contexts; feminisms’ distinct directions of thought and action; individuals, groups and organizations that have participated in defining feminism; and finally, the connectivity that makes transnational feminist work possible. The course is grounded in sites of ‘agonizing and organizing’, as well as in those feminist narratives that search for cohesion even where there is tension. Finally, throughout the course, we embrace and explore complexities of unresolved issues: none more basic than the still controversial claim that women's rights are human rights.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
WMST 32323 RAPE CULTURE: RETHINKING DANGER, POWER, SEX AND FEMINIST FRAMINGS 3 Credit Hours
Nothing is simple, incontrovertible or ‘cool’ in ‘rape culture.’ The subject, act and discourse surrounding rape is embedded in culture and confounded by culture: by opinions, standpoints, simplistic arguments and personal and political interests. Feminist framings of ‘rape culture’ invite different inquiry: into mythology, ideology, theory and alternative interpretations of bodies in a given context. Famed feminist Andrea Dworkin interrogates rape culture’s center: powers practically guaranteed, moreover "exercised...[and] protected...by religion...by universities...[even] by [poets and artists], the unacknowledged legislators of the world." This course utilizes multiple approaches to study and interrogate ‘rape culture,’ each of which illuminates this inherently dark subject in new light.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
WMST 40992 PRACTICUM IN WOMEN’S STUDIES (ELR) 3 Credit Hours
(Repeatable for credit) An assignment at a private, public or nonprofit organization that centers on women’s issues such as education health and policy making. Arrangements must be made in the semester prior to registration.
Prerequisite: Special approval.
Schedule Type: Practical Experience
Contact Hours: 9 other
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement
WMST 41199 CAPSTONE IN WOMEN’S STUDIES (ELR) 3 Credit Hours
The capstone project is a guided undertaking that serves as culmination of students’ experiences. The emphasis is ‘putting it all together,’ integrating the Women’s Studies minor into ‘the bigger picture’: major(s), other concentrations, research, envisioned graduate study and/or vocation. WMST Capstone can be taken junior or senior year, contrived/structured by students in consultation with faculty advisor(s), ideally advisors from major and minor. Net outcome may be paper–senior thesis for students who desire such–presentation, curated portfolio of prior academic work.
Prerequisite: Junior Standing.
Schedule Type: Project or Capstone
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement
WMST 44321 PIVOTAL PRAXIS: EXPERIMENTS IN ACTIONABLE FEMINISM 3 Credit Hours
This course engages students at the pumping heart of the whole feminist story: its actual work. For feminists on the ground, pivotal praxis is feminism: getting the vote, demanding equality, wrangling through contentious issues, women’s marches and campaigns. In a word: practice. Experiments in practical, actional feminism. Our study probes ideas that hit streets as well as ideas born of “done things.” Under scrutiny are scenes: socio-political, cultural spaces wherein women enact change, determine outcomes recognized as feminist. These include but are not limited to the realpolitik of suffrage vs. anti-suffrage, consciousness-raising, the famed national women’s convention in Houston, internet activism, transversal coalition-building across boundaries/borders. The course provides opportunity for students’ own experiments and exercises in feminist praxis.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description

The Bachelor of Arts degree in Gender and Sexuality Studies takes a multidisciplinary and intersectional approach to examining ideas and processes that shape people’s understanding about gender, sexualities and bodies throughout space and time. Scholarly investigation and production in this discipline emerged from sociological inquiry on human sexuality as well as from feminist, LGBTQ and anti-racist histories and activism to combat social inequality. This program skillfully provides both the theoretical and the praxis of the field while integrating these different and contributing perspectives regarding gender and sexuality.

### Full Description

The History and Philosophy of Science minor prepares students from a variety of related disciplines to think about science as a social, historical and philosophical enterprise. It will prepare students for graduate work in history of science, philosophy of science and science and technology studies, as well as for careers in areas of public and educational policy related to science.

Science is arguably the supreme intellectual enterprise of our species. It pervades nearly every aspect of modern society. Scientific research is heavily funded by governments and private institutions; courses in science are requirements at every level of education; scientific accomplishments are honored with awards and prizes; museums display scientific achievements and inventions. Moreover, the sheer depth and breadth of scientific progress through human history is monumental. All of this raises questions about what science is, how it works, and how it manages to be as successful as it is. These questions define the discipline known as the history and philosophy of science, which aims to study science, to understand its goals and methods, its principles and practices and its failures and triumphs.

**Kent Core Composition**

1. Intermediate I and II of a second language
2. Elementary I and II of the same language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001

   - MCLS 28403

**Foreign Language College Requirement, B.A.**

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:

1. A minimum C grade must be earned to fulfill the writing-intensive requirement.
2. Students will meet with the International Studies advisor during the close of the third or beginning of the fourth semester to plan their path through electives in a way that offers coherence given their interests and goals.
3. Students may substitute a different study abroad experience with permission from the program coordinator.

**Minimum Total Credit Hours:**

120

1. All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.
Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

### Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language. \(^1\)

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options \(^2\):

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

\(^1\) All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

\(^2\) Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

### Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

### Program Learning Outcomes

Graduates of this program will be able to:

1. Acquire and employ new lenses of study into subjects and experiences and very names of "woman" or "women" in contexts wherein such a designation matters.
2. Employ new approaches to knowledge, new strategies of engagement with "others" as well as peers, new methods of research, new approaches to critical analysis and appraisal and new forms of praxis.
3. Converse — and become conversant — with multiple feminisms; divergent purposes; and the positions and directions of variant studies, histories and commentaries through aptly selected/combined lenses and filters born of women's studies traditions.
4. Interrogate and be able to continually interrogate the expansive lexicon of sexed- and gendered-terms to which "woman" as a question and "man" as a given gave rise.
5. Deepen, expand and invigorate the "thought and theory" that inform the several key fields that continue to inform, challenge and shape the unstaid, unstill universe of women's studies (e.g., sex, gender, feminism, intersectionality, identity politics, sisterhood, womanism).
6. Understand and build skills to engage in both feminist perspective-taking and actual praxis: the techniques and tools of navigating difference, seeking transversals, meeting demands of fieldwork and attaining goals.

### Full Description

The Women's Studies minor offers both diversity and depth of coursework, ranging from feminist humor to feminism as serious theory and world-making practice. Students can immerse themselves in experiential learning via internships and applied work.

Through inventive classes, facilitated engagement in discussion and carefully crafted opportunities for guided independent work, the minor embraces a logic of study initiated from many start-points; grounded in cores of feminist thought, substance and practice; enriched by multiple disciplines and capped by challenge.

The minor's curriculum aims to satisfy students' desire for both a solid foundation in women's studies and a taste of the diverse, complex and often contentious field. The minor's aim is to deliver coursework that speaks to students' very specific scholarly interests as well as to their passions and persuasions, both personal and political.

### World Literature and Cultures - Minor

**College of Arts and Sciences**  
School of Multidisciplinary Social Sciences and Humanities
About This Program

The World Literature and Cultures minor is dedicated to the interdisciplinary study of historical and contemporary literature, which is representative of a diversity of the world’s cultures. Students explore world literature and cultures with the aid of a variety of disciplinary methods of analysis and interpretation in the study of cultural texts and artifacts, as well as the interactions of the political, economic, cultural and social complexities with literature. The study of world literature and cultures is devoted to promoting a central trend among major research universities in the United States to engage in the critical integration of knowledge that cuts across the different disciplines, with sustained focus on the global study of cultures and literature, past and present.

PACS 60001  ADVANCED NEGOTIATION  3 Credit Hours
Conflict and negotiation are normal and unavoidable parts of life. This course goes beyond basic negation concepts like principled negotiation, focusing on topics including the psychology of negotiation, power, international relations, technology and other advanced topics. We cover issues of information asymmetry; power; ethics; and multi-party, iterative and collaborative negotiations. We use research in negotiation and research on prior case studies to illustrate topics. This course is highly interactive, focusing on experiential learning and education. Evaluation of performance includes experiential exams, reflection papers and written understanding and analysis of real-world negotiations. Simulations and games are used in class frequently to illustrate concepts.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

PACS 60002  ADVANCED MEDIATION  3 Credit Hours
This course provides students with a conceptual understanding of mediation as well as practical mediation skills. It enables them to work as intermediaries who can assist conflict parties to reflect on the sources and dynamics of their conflict; develop mutually acceptable solutions and foster constructive, sustainable relationships. The course starts with essential concepts and skills for mediating small-scale interpersonal conflicts. It then addresses more complex inter-group, multiparty conflicts as well as deep-rooted structural conflicts. Through class discussions on readings and simulation exercises, students tackle questions such as how to work on conflicts in which there are many competing issues, goals and priorities involved; how to mediate enduring, intractable conflicts over identity, value and social structure; and how to respond to serious ethical dilemmas and power asymmetry. To meet these challenges, students not only critique the popularized framework of interest-based principled negotiation/mediation, but also develop holistic, creative third-party contributions to systemic social change.
Prerequisite: PACS 60000; and PACS 60001; and graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

PACS 60003  COMMUNITY-BASED CONFLICT TRANSFORMATION  3 Credit Hours
This course is designed to expand your knowledge of and practice competency in group and community level dynamics and peacebuilding techniques, giving you the skills and knowledge to turn divisive situations into strengthened and connected communities. The course begins by introducing theories of group processes, engagement and peace building. It then focuses on using case studies and experiential learning to master the skills and understand the applications of group and community peace building techniques. Case studies range across the areas of education, democracy, leadership, restorative justice, community conflict resolution and institutional change. Examples of topics include: theories of group process, engagement, participation, efficacy, dynamics and contact; community conflict resolution process such as inter-group dialogue and race dialogue; institutional change and strategic planning including evaluation and intervention for institutions, facilitation, stakeholder identification, planning, best practices and consensus decision making, ground rules, fishbowls and debriefs; and democracy and restorative justice practices including deliberative democracy, circle process and alternatives to violence project (AVP). The final course project involves students in applying these skills in partnership with a local community organization, group or neighborhood to address a community need or conflict. This class is taught in a flipped format.

Students critically review relevant theoretical and policy literature and apply them to real-world case studies as part of participatory skill-building exercises. The course starts with an overview of essential development theories, models and actors in development practice. It examines relevant scholarly and policy debates on conflict-development links; the political economy of conflict and (uneven) development; relevant security issues (e.g., small arms proliferation, disarmament, demobilization and reintegration (DDR), security sector reform (SSR)); the relationships between natural resources, livelihoods and conflict; the roles of gender and youth in conflict and development; measures of effective development in conflict-affected societies; and development alternatives, as well as emerging critical debates on alternatives to development.

Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60006 POST-CONFLICT PEACEBUILDING 3 Credit Hours
Over the course of the past decade, peacebuilding has become the concept du jour of not only the field of conflict resolution and peace studies, but of the larger fields of international relations, development studies, transitional justice and a host of other subfields and portions of area studies. This is partly due to the fact that peacebuilding has become somewhat of a monster, enveloping and consuming different approaches to conflict resolution, international relations and development studies; to the point that almost any activity addressing those involved or suffering from conflicts can be included under its umbrella. However, given that the concept was originally coined to help address the tasks necessary to implement peace, this class largely, though not wholly, focuses on post-conflict peacebuilding and how different actors at different levels have roles to play in achieving sustainable peace in communities, regions and within states. We examine the concepts that make up peacebuilding, the manners in which peacebuilding efforts have been implemented by actors at multiple levels and the problems associated with dominant approaches to the topic.
Prerequisite: PACS 60000; and graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60007 PRAXIS IN CONFLICT-SENSITIVE DEVELOPMENT 3 Credit Hours
This course enables students to build the practical skills necessary to advance socially responsible and sustainable development across conflict-affected societies and regions. A key concept explored throughout the course is conflict sensitivity - a sustained, iterative process of analyzing social conflict as a context of development work; understanding the interactions between the context and the development intervention; and making use of the understanding to maximize positive program impacts and minimize negative impacts. Students apply a range of theories to skill-building exercises in order to learn how to practice conflict-sensitive development. Through these experiential exercises, students think through the entirety of the development program cycle - from needs assessment to proposal development, fundraising, program implementation, capacity building, report writing, monitoring and evaluation and project phase-out. In each of these steps, students examine how to practice cultural sensitivity, stakeholder inclusion, local ownership and sustainability in a context-specific, adaptive manner. Case studies highlight essential themes selected from the Sustainable Development Goals (SDGs), a United Nations-sponsored list of 17 development goals such as poverty alleviation, food security, health, education, gender equity and climate change action. The course also opens dialogue on how to go beyond the conventional framework of conflict-sensitivity to realize conflict-transformative development.
Prerequisite: PACS 60000; and graduate standing.
Pre/corequisite: PACS 60005.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60008 LEADERSHIP FOR PEACEFUL CHANGE 3 Credit Hours
This course introduces a series of group discussions and experiential learning exercises designed to enable students to critically reflect on the lessons from their preceding coursework, gain additional practitioner skills and prepare for a career in the field. The experiential learning exercises include a multi-stakeholder simulation in which student teams make use of their skills to examine and address the complexity of real-world challenges. The themes explored throughout the seminar are: (1) collaborative, inclusive and ethical leadership capable of empowering people and groups to realize peaceful social change, (2) crisis management of unexpected events and security challenges, (3) integrative thinking to draw upon diverse theories, methods and skills, (4) the ability to develop theory-informed practices and advance theories derived from practical experiences to demonstrate adaptive leadership, and (5) illustrative examples of, perspectives on and planning for career development, life-work balance and self-care, all of which are essential for building successful careers in the field.
Prerequisite: PACS 60000; and graduate standing.

PACS 60042  PUBLIC SECTOR CONFLICT TRANSFORMATION  3 Credit Hours
This course examines the many ways that conflict and decision-making are made in the public sector. Some methods of public interaction and decision-making are familiar and well-studied. Others are less so, despite their increasing use in a variety of policy domains and other circumstances. Such is the case with conflict resolution, which is now broadly used across the United States and internationally on multiple levels and by multiple groups with differing aims. This course explores the varied applications in public policy of conflict resolution principles, including negotiated rule making, public sector dispute resolution, mediation, collaborative problem solving, democratic governance, community-based planning and consensus building.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
PACS 60070 CONFLICT TRANSFORMATION AND RECONCILIATION 3 Credit Hours
(Cross-listed with POL 60507)(Slashed with POL 70507) Over the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict towards various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda’s Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.
Prerequisite: Graduate standing.
Pre/corequisite: PACS 60000.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60071 SOCIETY TECHNOLOGY AND SECURITY 3 Credit Hours
This course engages with current debates on the relationship between society, technology, peace and security, focusing particularly on military and dual-use technologies. The course begins by analyzing the literature on how technology shapes societies and how societies shape technology. This includes consideration of the way societies influence the emergence and application of particular technologies and the way understandings of military technological categories (e.g., pariah weapons, precision weapons) have been socially constructed. The module then examines how states and societies have responded to the policy and governance challenges presented by the development and trade in established weapons categories. This includes analysis of the history of disarmament initiatives, movements and agreements as well as the new field of ‘humanitarian disarmament’. It also includes examination of recent initiatives aimed at limiting weapons proliferation and armed violence in conflict-ridden societies. The remainder of the course is devoted to exploring the legal, normative and policy debates over the use of modern and emerging technologies. This includes examination of the governance implications of new developments in fields such as biotechnology, nanotechnology, cyber-warfare and drones.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60072 ENVIRONMENTAL CHANGE AND CONFLICT 3 Credit Hours
This course examines the varied theoretical and policy challenges involved in addressing the intersection between changes in the environment; the governance and sustainability of natural resources and ecosystems; and the prevention, management and resolution of conflict. It traces the history and development of environmental security and environmental peacebuilding, building a solid foundation in key theories, terminology and concepts, such as the relationship between natural resources and conflict (including scarcity vs. abundance, access and governance); the redefinition of security and securitization of the environment; slow- vs. sudden-onset climate change and displacement; and environmental cooperation in peacekeeping, peacemaking, peacebuilding and contemporary conflict resolution. Students have a working knowledge of important international laws and policies governing the protection of the environment in relation to armed conflict and engage in critical discussions at the intersection of conflict issues and trends in environmental change, such as green militarization and small arms proliferation, environmental crimes and surveillance, fortress conservation and conservation conflicts, the role of gender and youth, human rights and environmental defenders, climate justice and conflict-sensitive climate adaptation. Students apply the knowledge and skills developed in the course to the development of environmental security assessments, peace and conflict impact assessments and foresight analyses.
Prerequisite: Graduate standing.
Schedule Type: Lecture

2. Demonstrate knowledge through the ability to connect, analyze and communicate a wide range of social justice issues and challenges with the environment and peace.
3. Identify or propose peaceful or nonviolent approaches that comprehensively address environmental problems and social and ecological injustices.
Full Description

The Environment, Peace and Justice minor meets a number of different goals, responding to students’ interests and the growing need to prepare them with the conceptual and theoretical foundations and applied skills to address challenges to both peace and the environment in tandem.

Challenges to both peace and the environment are often deeply interrelated, with one impacting the other and feeding back. For example, where environmental degradation unevenly impacts already-marginalized communities and becomes a source of conflict, or when the breakdown of peace due to historical or protracted injustice impacts the environment and our ability to protect it in nonviolent ways. Globally, justice is a well-recognized pillar of both sustainable development and sustainable peace, emphasizing that these challenges need to be met in integrated ways.

The program emphasizes an interdisciplinary approach by drawing on relevant courses offered through different departments to offer a minor that can complement a range of majors.

**Foreign Language College Requirement, B.A.**

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.\(^1\)

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options\(^2\):

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
   - Intermediate I of the same language
   - ARAB 21401
   - ASL 19401
   - CHIN 25421
   - MCLS 10001
   - MCLS 20001
   - MCLS 20091
   - MCLS 21417
   - MCLS 21420
   - MCLS 22217
   - MCLS 28403
   - MCLS 28404

\(^1\) All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

\(^2\) Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

**Roadmap**

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

The country has responded to the challenges of post-genocide reconstruction, and how it is addressing contemporary environmental challenges.

The Peace and Conflict Studies comprises two concentrations:

- **The Applied Conflict Transformation** concentration focuses on the domestic dynamics of peace, including human relations, organizational conflict and conflict resolution, group and community conflict transformation. Students specialize in a wide range of electives (e.g., peace psychology, public sector conflict transformation, peace education). This concentration provides students with knowledge and applied skills necessary to pursue a career in fields such as mediation, arbitration and dispute resolution; in the service and social and community service sector; or in roles in businesses, non-profits and government entities that requires skills of mediation and conflict resolution (e.g., human resources).

- **The Peace, Conflict and Development** concentration explores the intersection between peace, conflict and development in fragile or insecure states and societies around the world. Students examine policy and practice in the fields of international conflict prevention, international peacekeeping, post-conflict peace-building, sustainable development and good governance. Students specialize in a wide range of electives, including on issues such as environmental change and conflict, reconciliation after conflict and the global governance of military technologies. This concentration is designed to appeal to those students wishing to obtain work in fields and organizations dealing with the local and international dimensions of peace, conflict and development in the global south, including governments, international organizations, international development and humanitarian-relief non-governmental organizations (NGO).

### About This Program

The Peace and Conflict Studies minor gives students a solid background in the theory and skills of managing conflicts in constructive, not destructive ways. Students learn how to apply skills that are not only useful in a variety of workplace settings, but in everyday life and relationships as well.

The minor especially is beneficial for students with a major or interest in business, communication studies, criminology and justice studies, nursing, public health, psychology, political science and sociology. However, because the skills taught are life skills, this minor matches up well with many majors.

### Full Description

The Master of Arts degree in Peace and Conflict Studies is designed for students interested in gaining the knowledge and practical skills necessary to become a professional peace practitioner, one who is equipped to promote peaceful change and social justice whether in the local community, across the country or at the international level.

Students have the opportunity to learn at the School of Peace and Conflict Studies, Kent State’s ‘living memorial’ to the four students killed on May 4, 1970, and one of the oldest and most well-known institutions for the study of peace and conflict. Students work with faculty who are leading experts in their field and with students from all over the world — all of whom are dedicated to building peaceful local communities, societies and states in a time of increasing incivility, rancor and conflict.

In the program, students examine the causes and consequences of violence; develop methods for preventing, resolving and transforming conflicts; and critically analyze the values and institutions of peace. Students study relevant academic and policy literature and develop an advanced understanding of the field. Above all, however, they embark on a multidisciplinary program with a strong focus on experiential learning, the development of advanced skills relevant to the field (e.g., mediation, conflict analysis, project management), training in leadership and career planning for future employment, whether as a peace practitioner or researcher.

Through the school’s partnership with the Center for Conflict Management at the University of Rwanda, students have the opportunity to undertake a study abroad course in Africa to examine both how the country has responded to the challenges of post-genocide
Admission Requirements
Admission to a minor is open to students declared in a bachelor’s degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Mission of the College
The College of Communication and Information is the only one in the nation that offers degree programs from five distinct but interrelated fields of study – media, design, communication, information and digital technologies.

Students want to pursue their interests and engage with their talents — and the college is here to help them do just that. The evolution of digital and electronic media has blurred the distinctions among communication and information disciplines. With degree programs in the most relevant fields today and a range of interdisciplinary courses, students will be prepared for the new information and digital media landscape. Whether students are designers, public speakers or tech experts, the cross curricular majors and minors in the college will help them develop the media, advocacy, web and design skills to succeed and grow — and still graduate on time.

Using academic texts and case studies, students also critically consider how social movements use and interact with the media, the role of media in covering social movements, the benefits and risks of media coverage and the evolving line between journalism and advocacy. Students have the opportunity to analyze social change stories of their choosing, develop and present a substantive social change case study, engage in direct action for causes that matter to them and engage in collective action tactics related to a social change campaign.

CCI 40289  ITALIAN CINEMA (ELR)  3 Credit Hours
The course introduces the student to the world of Italian Cinema. In the first part the class will be analysing Neorealism, a cinematic phenomenon that deeply influenced the ideological and aesthetic rules of film art. In the second part we will concentrate on the films that mark the decline of Neorealism and the talent of 'new' auteurs such as Fellini. The last part of the course will be devoted to the cinema from 1970's to the present in order to pay attention to the latest developments of the Italian industry. The course is a general analysis of post-war cinema and a parallel social history of this period using films as 'decoded historical evidence'. Together with masterpieces such as Open city and The bicycle thief the screenings will include films of the Italian directors of the 'cinema d'autore' such as Life is Beautiful and the 2004 candidate for the Oscar for Best Foreign Film, I am not scared. The class will also analyse the different aspects of Film making both in Italian and the U.S. industry where I had the pleasure to work for many years in the Editing Department on Films such as The dead poet society and The Godfather part 3. The Films in DVD format are dubbed in English or sub-titled.

CCI 40389  DOCUMENTARY FILMMAKING (ELR)  3 Credit Hours
Documentary Filmmaking is a course characterized by the co-existence of theory and practice and the balance between the two. The theoretical aspect of the course has the purpose of providing information about general basics of film language, film history and the history of documentary filmmaking. It will provide the students the tools for being able to talk about ideas in terms of film language, through the analysis of existing documentaries and exercises shot by the students themselves. Without a good theoretical base, it would be difficult to find the right kind of themes, voices, styles and development. The practical aspect of the course is focused on teaching the students the use of technical equipment including still-cameras, video-cameras, lights, audio tools and post-production software. The course will be focused mainly on European Documentaries as a way of teaching the thematic and political difference between the cultures of the two continents. The combination of the theoretical and practical aspects will generate a solid base for the micro-production of well planned documentaries, which the students will develop, shoot, edit and screen.

CCI 40489 MULTIMEDIA EXPERIENTIAL LEARNING (ELR) 1 Credit Hour
The Multimedia Experiential Learning course is designed to allow students a deeper understanding of their study abroad experience in Italy and in Florence more in particular, by designing, developing and editing multimedia products about their academic and extra academic experiences. Each semester students are engaged in different activities and consequently have to produce different products: magazines, videos, articles, blog entries, communication campaigns etc. Students will practice an activity of processing information related to their everyday life experiences, visits of exhibitions and museums and meetings with professionals by regularly developing content/stories about these experiences as well as about events taking place in Florence and the other cities visited during their time abroad. The in-class meetings will help students to better focus on the different fieldtrips (Rome, Milan, American Cemetery in Florence and Chianti) that will take place during the semester by providing background information of the Italian context and by better understanding and making sense of the Italian culture. Additionally, students will also visit museums and exhibitions in the city of Florence. These visits will help students to make sense of the city and of the Italian culture.
