Women’s Studies (WMST)

WMST 20101  INTRODUCTION TO WOMEN’S STUDIES: TRADITIONS,
TRAJECTORIES, TROUBLES  3 Credit Hours
The course introduces students to Women’s Studies - what it studies,
how it came into being, what happened next. In focus are its traditions, its
consequential contexts of struggle and protest, its pioneers, the multiple
fields from which they came to this fresh-born academic hub. The course
examines worldwide spread of WMST programs, their variant, evolving
interests and work, the hounding, keenly felt disruptions and conflicts.
We sample key scholarship with staying power; we peruse pieces across
an interdisciplinary range; we visit early ideas now fallen out of favor,
relegated to archives and/or bins. We also, importantly, consider how rifts
and various troubles led to crucial metamorphoses as well as new fields.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

**Grade Mode:** Standard Letter

WMST 30201 **WITCHES: THE MONSTROUS FEMININE** 3 Credit Hours  
This course counterbalances student inquiry with lectures and materials at once grounded in women’s and gender/sexuality studies and reliant on a range of interdisciplinary sources. The course centers two key touchstones: witch and monstrous feminine. Course trajectories traverse history, culture, religion, politics and academic and popular renderings to locate keys: hunts, trials, dynamics of allegation, guilt and innocence. The course aims to ‘correct’ traditions of objectification and typecasting by interrogating real subjectivities and the dimensionality of feminine, monstrous and witch.  
**Prerequisite:** None.  
**Schedule Type:** Lecture  
**Contact Hours:** 3 lecture  
**Grade Mode:** Standard Letter

WMST 30202 **FEMINIST HUMOR: DISARMING LAUGHTER, DISRUPTIVE DISCOURSE** 3 Credit Hours  
This course utilizes four key terms to set its directions of inquiry: humor, laughter, discourse and feminist. The most fundamental pursuits are inductive in nature, grounding studies in actual discursive practice, the realities of women's politically-charged and personally-resonant humor, laughter and feminisms as they converge in contexts both private and public, mediated and live/face-to-face. Scholarship on feminist humor provides our final framing.  
**Prerequisite:** None.  
**Schedule Type:** Lecture  
**Contact Hours:** 3 lecture  
**Grade Mode:** Standard Letter

WMST 30301 **REPRESENTATIONS OF WOMEN AND FEMINISM IN POPULAR CULTURE** 3 Credit Hours  
The basic challenge of this course is that it requires the study of two things simultaneously: 'women' and 'women as represented' in popular culture. From the classic object of woman sexed and gendered, feminist study has evolved to also consider woman the subject, the autonomous person with agency within her environment. The course covers much ground: dominant narratives; the often-overlapping contexts of media, politics, morality and religion; the signs inherent in language and imagery; and the power asymmetry and embattled definitions of “woman.” Throughout the course, we employ varied approaches that resist any one right answer, easy dogmatic conclusion or evaluation of the narratives.  
**Prerequisite:** None.  
**Schedule Type:** Lecture  
**Contact Hours:** 3 lecture  
**Grade Mode:** Standard Letter

WMST 30302 **GLOBAL FEMINISMS: A WORLD AND CENTURY OF WOMEN’S ACTIVISM** 3 Credit Hours  
This course explores real and diverse circumstances where feminisms have emerged. Over the semester, we examine feminist movements and their respective contexts; feminists’ distinct directions of thought and action; individuals, groups and organizations that have participated in defining feminism; and finally, the connectivity that makes transnational feminist work possible. The course is grounded in sites of ‘agonizing and organizing,’ as well as in those feminist narratives that search for cohesion even where there is tension. Finally, throughout the course, we embrace and explore complexities of unresolved issues: none more basic than the still controversial claim that women’s rights are human rights.  
**Prerequisite:** None.  
**Schedule Type:** Lecture  
**Contact Hours:** 3 lecture  
**Grade Mode:** Standard Letter

WMST 32323 **RAPE CULTURE: RETHINKING DANGER, POWER, SEX AND FEMINIST FRAMINGS** 3 Credit Hours  
Nothing is simple, incontrovertible or ‘cool’ in ‘rape culture.’ The subject, act and discourse surrounding rape is embedded in culture and confounded by culture: by opinions, standpoints, simplistic arguments and personal and political interests. Feminist framings of ‘rape culture’ invite different inquiry: into mythology, ideology, theory and alternative interpretations of bodies in a given context. Famed feminist Andrea Dworkin interrogates rape culture's center: powers practically guaranteed, moreover “exercised... [and] protected... by religion ... by universities ... [even] by [poets and artists], the unacknowledged legislators of the world.” This course utilizes multiple approaches to study and interrogate ‘rape culture,’ each of which illuminates this inherently dark subject in new light.  
**Prerequisite:** None.  
**Schedule Type:** Lecture  
**Contact Hours:** 3 lecture  
**Grade Mode:** Standard Letter
**WMST 40992  PRACTICUM IN WOMEN'S STUDIES (ELR)  3 Credit**

**Prerequisite:** Special approval.

**Schedule Type:** Practical Experience

**Contact Hours:** 9 other

**Grade Mode:** Standard Letter

**Attributes:** Experiential Learning Requirement

**WMST 41199  CAPSTONE IN WOMEN'S STUDIES (ELR)  3 Credit**

Hours
The capstone project is a guided undertaking that serves as culmination of students' experiences. The emphasis is 'putting it all together,' integrating the Women's Studies minor into 'the bigger picture': major(s), other concentrations, research, envisioned graduate study and/or vocation. WMST Capstone can be taken junior or senior year, contrived/structured by students in consultation with faculty advisor(s), ideally advisors from major and minor. Net outcome may be paper--senior thesis for students who desire such--presentation, curated portfolio of prior academic work.

**Prerequisite:** Junior Standing.

**Schedule Type:** Project or Capstone

**Contact Hours:** 3 lecture

**Grade Mode:** Standard Letter

**Attributes:** Experiential Learning Requirement

**WMST 44321  PIVOTAL PRAXIS: EXPERIMENTS IN ACTIONABLE FEMINISM  3 Credit Hours**

This course engages students at the pumping heart of the whole feminist story: its actual work. For feminists on the ground, pivotal praxis is feminism: getting the vote, demanding equality, wrangling through contentious issues, women's marches and campaigns. In a word: practice. Experiments in practical, actional feminism. Our study probes ideas that hit streets as well as ideas born of "done things." Under scrutiny are scenes: socio-political, cultural spaces wherein women enact change, determine outcomes recognized as feminist. These include but are not limited to the realpolitik of suffrage vs. anti-suffrage, consciousness-raising, the famed national women's convention in Houston, internet activism, transversal coalition-building across boundaries/borders. The course provides opportunity for students' own experiments and exercises in feminist praxis.

**Prerequisite:** None.

**Schedule Type:** Lecture

**Contact Hours:** 3 lecture

**Grade Mode:** Standard Letter

The Bachelor of Business Administration degree in Accounting is designed to provide students with a solid foundation in accounting theory and practice necessary for entry-level accounting positions and career advancement. It encompasses a common body of concepts, conventions, principles and theories essential to the professional competency of the certified public accountant, controller, industrial accountant, institutional accountant and governmental accountant.

Accounting students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

In addition, students may apply toward a five-year program that leads to both the B.B.A. degree in Accounting and the Master of Science in Accounting degree. The two-degree, five-year program meets the requirements for admission of graduates to the Uniform CPA Examination. Requirements differ in different states, and students should check with the state board of accountancy for requirements.

Full Description

The Bachelor of Business Administration degree in Economics equips students with a variety of skills sought by employers, including
conceptualizing and solving problems; locating, organizing and using relevant information; and analytical ability.

In their junior year, students learn microeconomic and macroeconomic theory and take an econometrics class to learn basic analytical skills. Students then take a series of electives that deal with vital current topics relevant to many careers in which these theories and skills are applied, such as U.S. financial and banking system; the economic relations between the United States and foreign countries; government spending and taxation policies; and the U.S. health system and policy options.

During their senior year, students take a capstone course that utilizes and applies the theory, skills and institutional knowledge learned in the program.

Economics students may apply early to either the M.B.A. degree or the Master of Arts in Economics degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information. Undergraduate students applying to the combined program with the Master of Arts in Economics degree must have a minimum 3.200 overall Kent State GPA.

Full Description

The Finance minor allows students to gain some familiarity with financial management, as well as with the financial system of institutions and markets in which firms must operate. Some knowledge of finance is necessary to understand and work in most businesses and organizations. Profits and value creation are the “bottom lines” to which companies direct their efforts. Some acquaintance with investment techniques may help students in managing their personal finances.

The Finance minor is particularly useful for business students in other majors who take the requisite courses, and for other students who desire to acquire some understanding of finance without having to take all the core business school requisites. Both groups are exposed to important fundamentals, yet they also will have the flexibility to consider several areas of finance.

Full Description
The Business Analytics graduate certificate provides individuals — especially those without analytics job titles or responsibilities but with the burning desire for the field — the opportunity to familiarize themselves with this ever-growing and versatile discipline. The certificate program also enables these individuals to augment their knowledge base beyond their chosen professions and improve their value to their employers and businesses, or marketability if they choose to change jobs.

The premise of the certificate program is to provide graduates a firm grasp of important analytical techniques and the knowledge of how to best implement, interpret and communicate them in a variety of business contexts. This goal is pursued using a "Three-Foci Model" design that integrates data analysis, information and data management and decision-making and leadership. Full Description

The Bachelor of Business Administration degree in Computer Information Systems provides students with a focus on digital transformation management and/or the design of innovative information systems that are commonly used in organizations to create business value. This up-to-date major offers a techie-for-future IT and business managers structure starting with an introduction to information systems (IS) and emerging digital technologies (e.g., social media, mobile, cloud computing, business data analytics, Internet of Things, artificial intelligence, machine learning, blockchain). The major continues providing the foundations and hands-on activities to use IS and digital technologies for solving business problems. The academic backbone of the major concludes with the pillars of business modeling and agile design, artificial intelligence-based innovation, and providing the IT and business managerial skills to build solutions for businesses.

Students can complete two possible major elective tracks: Designing Innovative Information Systems or Digital Transformation Management. Alternatively, the student can customize the major elective path by selecting 12 credit hours from the list of major electives in a flexible and student-centric way. The Digital Transformation track focuses on providing the knowledge and managerial skills related to managing cybersecurity, managing agile digital transformation projects and on how to lead and manage digital transformation. The Designing Innovative Information Systems track focuses on providing the technical foundations and skills to design innovative programs and apps, design innovative server-side systems and design databases and data governance.

Students may participate in an internship (elective course), which may involve a summer or a semester of paid professional experience in industry. Internship experience helps show the relevance of on-campus courses to professional work, helps students focus their career plans, and often enables students to secure better jobs upon graduation.

Computer Information Systems students may apply early to the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Program Learning Outcomes

Graduates of this program will be able to:

1. Perform effectively in digital transformation management and information systems design projects.
2. Navigate and use emerging digital technologies and platforms.
3. Design, code, and implement information systems, databases, and applications on-premise and in the cloud.
5. Bridge, integrate, deploy, and manage cybersecurity and data governance across various information systems and analytics systems.
6. Lead and manage digital transformation projects, and design and integrate digital technology solutions.

---

**Full Description**

The Master of Business Administration degree prepares students for responsible leadership positions in private, nonprofit and public organizations. Upon completion of the M.B.A. degree, graduates demonstrate a global mindset and competence in critical thinking, digital technology, communication, teamwork and ethical and sustainable management.

The program welcomes students from the full range of undergraduate degrees. Regardless of their undergraduate education, students will find a challenging program designed to prepare them for management positions in organizations.

The degree is structured for full-time/in-person and full-time or part-time online students:

- The full-time/in-person program is targeted to early career professionals, both nationally and internationally, who wish to jump-start their business career, and to those who wish to make a business-related career change. The program operates in cohorts so that students proceed through the sequence of required courses as a group. Students take six to seven courses each semester (offered in eight-week modules) and are expected to participate in experiential activities such as internships, mentoring and professional development activities. Delivery of the program is accelerated; students are able to earn the M.B.A. degree in 12 to 16 months.
- The online program is designed for those who want maximum flexibility in pursuing their M.B.A. degree. Students can take courses to suit their life: from one course at a time to a full-time course load. This is an ideal program for professionals who intend to keep working full-time while pursing the M.B.A., and for those students who want to pursue their M.B.A. without commuting to campus.

The Business Administration major includes the following optional concentrations:

- The **Accounting** concentration allows students to specialize their degree with courses in managerial and financial accounting, business valuation using financial statements and international accounting. Completion of this concentration is not sufficient to sit for the CPA exam in Ohio unless the student has an undergraduate accounting major.
- The **Business Analytics** concentration allows students to gain the technical, analytical, communication, decision-making and leadership skills needed to glean useful information from data to make strategic business decisions.
- The **Digital Transformation** concentration prepares students for a more dynamic, modular and techie-savvy world.
- The **Finance** concentration allows students to specialize their degree with advanced courses in investments, financial markets and institutions, real estate and other related areas.
- The **Healthcare Administration** concentration provides business students with knowledge of the healthcare setting that will support their capacity to work effectively in a variety of healthcare organizations.
- The **Human Resource Management** concentration allows students to specialize their degree with advanced topics in employee selection and appraisal, organizational analysis and the opportunity for real-world applications.
The Information Systems concentration allows students to specialize their degree with advanced topics in database management systems, emerging hardware and software technology and other related area courses. Applications to the Information Systems concentration are not being accepted at this time.

The International Business concentration allows students to specialize their degree with courses in accounting, marketing, finance and strategy with an international focus. Study abroad options are possible, with no language skills required.

The Organizational Leadership concentration allows students to develop advanced skills that will support their capacity to lead in higher level positions.

Students may pursue an online stackable certificate pathway to the M.B.A. by completing the Leadership and Management graduate certificate, the Quantitative Business Management graduate certificate and a set of remaining courses to earn the M.B.A. degree. Students who choose a Business Analytics, Financial, Human Resource Management, International Business or Organizational Leadership concentration can take one additional course and stack an additional graduate certificate in Business Analytics, Financial Management, Human Resource Management, International Business or Leading Through Challenge.

The following dual degree programs with the M.B.A. are possible. A separate application must be submitted for each program.

- **Dual degree with the Doctor of Podiatric Medicine degree** prepares students to run their own Podiatric Medicine practice. Students can view admission requirements for each program on their respective catalog page.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website. Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

**About This Program**
The International Business minor introduces students to cultural issues of a broad, global nature. Students are encouraged to participate in study-abroad programs to complement their studies. Global business is fast becoming an important part of the U.S. economy. The world that college graduates are facing will essentially be a borderless world. This suggests a need to be trained for employment that will have international implications. Whether students take a major in business, fashion design and merchandising, the hard sciences, English or education, some training in global outreach, cultural diversity and "business cultures" will be necessary.

Leadership styles, organizational structure and behavior and a global perspective form the common ground between the military and business. The Military and Leadership Studies minor provides an overview of management, leadership and international business. Students will gain military perspective through hands-on experience as well as coursework. The interdisciplinary minor is open to all students.

A minor in Military and Leadership Studies allows students who have completed specialized ROTC or military service courses to receive credit for this training. Normally, these courses are applied as electives within a degree program. The minor provides proof on a student’s transcript that they have specialized in the area of Military and Leadership Studies.

About This Program
The Entrepreneurship for Business Majors minor brings an entrepreneurial perspective to students' major in business. Entrepreneurship is more than a set of tools and techniques for starting and growing a business. It is a mindset, a creative way of looking at opportunities, a passion, doing what one loves, a challenge, persistence and creating wealth and operating a business, whether one owns it or not. Students in the minor are immersed in the entrepreneurial process through coursework, entrepreneurial projects and exposure to many entrepreneurs in the community. Students are prepared for the various aspects of starting a business, acquiring a business, corporate entrepreneurship or working for a small business.

Full Description
The Bachelor of Business Administration degree in Entrepreneurship provides students with the academic background and experiential opportunities needed to view business opportunities from an entrepreneurial perspective. The program helps students recognize market and business opportunities and learn when to seize them or take action, all while operating within the context of limited resources and creating value for the customer.

The program contains numerous opportunities to experience entrepreneurship firsthand. During their senior year, students earn course credit by launching and running a business of their own creation. A practicum can earn students credit while developing their own business or assisting entrepreneurs with their business. Students have many opportunities to meet experienced entrepreneurs who discuss their successes and failures in business. Courses in the major are hands-on, with experiential learning central to the course format.

Entrepreneurship students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Entrepreneurship for Business Majors - Minor

About This Program

The Entrepreneurship for Non-Business Majors minor brings an entrepreneurial perspective to students’ major fields of study. Entrepreneurship is more than a set of tools and techniques for starting and growing a business. It is a mindset, a creative way of looking at opportunities, a passion, doing what one loves, a challenge, persistence and creating wealth and operating a business, whether one owns it or not. Students in the minor are immersed in the entrepreneurial process through coursework, entrepreneurial projects and exposure to many entrepreneurs in the community. Students are prepared for the various aspects of starting a business, acquiring a business, corporate entrepreneurship or working for a small business.

Kent Core Composition 6 6

Kent Core Social Sciences (must be from two disciplines) 3

Minimum Total Credit Hours: 120

1 A minimum C grade must be earned to fulfill the writing-intensive requirement. Should students earn below a minimum C grade in MMTG 35011 they are required to repeat the course during the following fall semester to alleviate skill deficits, and they will not be eligible to progress in the major.
A student changing to a program in the college, transferring, or incoming students with college credits may be waived out of BUS 10123 if:

1. 30 or more credit hours have been earned and any two classes (from ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053) have successfully been completed.

2. 60 or more credit hours have been earned and the student has successfully completed one course from (ACCT 23020, ACCT 23021, FIN 26074, MGMT 24163, MKTG 25010 or CIS 24053).

3. At the discretion of the dean’s office, the student has sufficient breadth and depth of knowledge in a business field (as demonstrated by a CLEP exam or Credit by Exam) but does not meet the requirements listed above.

Students can take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002. Students are required to take MATH 11012 or MATH 12002 if they change their major to, or want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics. Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

Students who have taken MATH 10041 for another program may use it as a substitute for BA 24056.

Minimum C grade required in ENG 21011 or HONR 20197.

Students may take or use any course at any level as long as the minimum 39-credit hours requirement for upper-division courses is satisfied for graduation with a B.B.A. Although not required, an education abroad experience is encouraged as a general elective. Exceptions: Maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses may be counted toward the 120 total credit hours or 39-upper-division-credit-hour graduation requirement. General elective courses may be selected from any area and at any level provided students do not go over the PWS restriction and they satisfy the 39 credit hours upper-division requirements. Any other exceptions must be approved by the assistant dean.

Progression Requirements

- Minimum 2.000 overall GPA
- Minimum C grade in COMM 15000, ENG 21011, MATH 11010, MKTG 25010 and MMTG 35011

- The curriculum is to be taken in sequence. Not all courses are offered each semester. Students should obtain from the department a copy of the schedule of course sequencing.
- Only three Managerial Marketing major (3/45000) courses may be repeated and counted toward the major. Exceptions require the approval of the department chair. All attempts count in the computation of the major, upper-division business and overall GPA.
- Entrepreneurship majors who are also majoring in Managerial Marketing, and who have taken ENTR 37045, are not required to take MMTG 35030 for the Managerial Marketing major. However, a double major in entrepreneurship and Managerial Marketing cannot waive ENTR 37045 by taking MMTG 35030.
- Managerial Marketing majors who are also majoring in Entrepreneurship and who have taken MMTG 35011 are not required to take ENTR 37040; however, an Entrepreneurship major cannot waive the required MMTG 35011 course by taking ENTR 37040 because MMTG 35011 is a writing-intensive course.
- Students who have passed MMTG 35030 will not receive graduation credit for MKTG 45046 or ENTR 37045.
- Students who have passed MMTG 45039 will not receive graduation credit for MKTG 45045.
- Students must complete at least 50 percent of business credit hours (required for the business degree) in-residence on a Kent State University campus.
- Students must complete two measures of outcomes assessment as specified by the college for complete satisfaction of the B.B.A.
Roadmap

This roadmap is a recommended semester-by-semester plan of study for this major. However, courses designated as critical (!) must be completed in the semester listed to ensure a timely graduation.

Full Description

The Bachelor of Business Administration degree in Managerial Marketing prepares students to be marketing practitioners by helping them to fully develop the analytical, decision-making and communications (written and oral) skills used and valued by individuals working in this field. Faculty engage each student in active learning through hands-on assignments, case studies, projects with real businesses, and dynamic interactions with the faculty member and other students in the classroom. Each course aims to strengthen writing skills by emphasizing logical flow, persuasiveness and succinctness. Because coursework is sequential and integrated, each course builds upon prior classes to give students a comprehensive body of knowledge, skills and abilities.

The objective of this program is to educate students to function effectively in business environments where they will have to make autonomous decisions and be required to take action on their own initiative.

Managerial Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Kent Core Social Sciences (must be from two disciplines) 3
Kent Core Basic Sciences (must include one laboratory) 6-7

**Minimum Total Credit Hours:** 120

1. Students who change their major from Managerial Marketing to Marketing, may use (a) MMTG 35011 in place of MKTG 35030, (b) MMTG 35021 in place of MKTG 35050 and (c) MMTG 45023 in place of MKTG 35035.

2. Students who have a double major with Entrepreneurship and who have completed ENTR 37045 are not required to take MKTG 45046 for the Marketing major. However, students in the double major cannot waive ENTR 37045 for the Entrepreneurship major by taking MKTG 45046.

3. Students who have taken MATH 10041 for another program may use it in place of BA 24056.

4. Transfer students, new students with college credit and continuing students who have changed their program to a B.B.A. degree may be waived out of BUS 10123 if one of the following occurs:
   - They earned 30 or more credit hours and completed two of the following courses: ACCT 23020, ACCT 23021, CIS 24053, FIN 26074, MGMT 24163 and/or MKTG 25010.
   - They earned 60 or more credit hours and completed one of the following courses: ACCT 23020, ACCT 23021, CIS 24053, FIN 26074, MGMT 24163 or MKTG 25010.

5. Students may take MATH 10051 or PHIL 21002 in place of MATH 11012 or MATH 12002. Taking MATH 10051 or PHIL 21002 will not replace a low grade in either MATH 11012 or MATH 12002. Students are required to take MATH 11012 or MATH 12002 if they change their major to, or want to double major in, Economics or Finance and/or intend to declare a minor in Data Analytics. Students who intend to enroll in certain graduate programs and/or are working toward Phi Beta Kappa status are highly encouraged to take MATH 11012 or MATH 12002.

6. Minimum C grade is required in ENG 21011 or HONR 20197.

7. Maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses may be counted toward the 120 total credit hours or 39 upper-division-credit-hour graduation requirement. General elective courses may be selected from any area and at any level provided students do not go over the PWS restriction, and they satisfy the 39 credit hour upper-division requirements. A minor (business or non-business) is encouraged. Any other exceptions must be approved by the assistant dean. The Bachelor of Business Administration degree in Marketing provides a general approach that can be applied in a wide range of areas of business (e.g., for profit, nonprofit, service and manufacturing). The program addresses the breadth within the marketing field through courses (e.g., consumer behavior, marketing research, international marketing, personal selling, advertising and promotion management) that provide the student with an appreciation of all central topic areas in the field.

The Marketing major offers students the opportunity to have a generalist's perspective or to focus on one of four concentrations. Students gain a working knowledge of the theory and practice of marketing and learn the tasks involved in the analysis, planning, implementation and control of marketing programs that result in strategies and tactics used by businesses to sell products to consumers and other businesses.

The Marketing major includes the following concentrations:

- The **Entrepreneurial Marketing** optional concentration is designed to equip students with the skills and knowledge needed to lead successful sales teams, manage customer relationships, and drive revenue growth.
- The **Social Media and Digital Marketing** optional concentration focuses on harnessing the power of data to make informed marketing decisions and optimize marketing strategies.
- The **Sales Management** optional concentration is designed to teach students how to create and implement effective digital marketing campaigns through a strong online presence across various platforms, this concentration will allow students to explore the world of digital marketing and social media.

Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

### Marketing - Minor

Department of Marketing and Entrepreneurship

#### About This Program

The Marketing minor helps students develop the perspectives and skills necessary to understand consumers and to provide customer satisfaction. In today's highly competitive business environment, successful managers must have a strong focus on providing customer satisfaction as well as the ability to research consumer needs, wants and desires; understand what these mean in terms of company offerings; and communicate the benefits of their products or services effectively. Students completing the minor should be equipped to bring a marketing orientation to both profit and not-for-profit organizations.

#### Program Delivery

- **Delivery:** In person
- **Location:** Kent Campus
The Marketing minor is not accepting students at the Stark Campus at this time.

Admission Requirements
The Marketing minor is not accepting students at the Stark Campus at this time.

1. ENGR 48099 and ENGR 48199 must be taken during the same academic year. ENGR 48099 is only offered during the fall semester and ENGR 48199 is only offered during the spring semester.
2. A minimum C grade must be earned to fulfill the writing-intensive requirement.
3. Students who desire to change their major to Aerospace Engineering or Mechatronics Engineering should take PHY 23101 and PHY 23102. Failing to do so may result in additional coursework.
4. Applicants to this program should understand that this is a math-intensive program. Students admitted to the program are expected to demonstrate prerequisite knowledge on a math placement exam (the ALEKS exam) prior to starting their first semester. Students who do not obtain the minimum score required to place into ALEKS exam) prior to starting their first semester. Students who do not obtain the minimum score required to place into MATH 12011 are at risk of delaying graduation.
5. Students who desire to change their major to Aerospace Engineering or Mechatronics Engineering should take MATH 11022 and MATH 12002. Failing to do so will result in additional coursework.

Program Learning Outcomes

Graduates of this program will be able to:

1. Apply knowledge, techniques, skills and modern tools of mathematics, science, engineering and technology to solve broadly defined engineering problems appropriate to the discipline.
2. Design systems, components or processes meeting specified needs for broadly defined engineering problems appropriate to the discipline.
3. Successfully navigate the ever-changing trajectory of the world, practicing compassion as they strive to meet their personal career goals.

Full Description

The Bachelor of Science degree in Aeronautical Systems Engineering Technology successfully prepares graduates of the future to work in multi-disciplinary teams in aeronautical, systems and other engineering technology fields in ways that positively improve efficiency, reduce waste and increase sustainability. The program prepares graduates to enter careers in the design, installation, manufacturing, testing, evaluation, technical sales, and maintenance of aeronautical/aerospace systems. Students gain technical expertise in engineering materials, statics, strength of materials, applied aerodynamics, applied propulsion, and electronics. Graduates have strengths in the analysis, applied design, development, implementation and oversight of more advanced aeronautical/aerospace systems and processes.

Students may apply early to the Master of Engineering Technology degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Aerospace Engineering - B.S.

College of Aeronautics and Engineering

About This Program

Aerospace engineers are at the forefront of exciting advances in rockets, advanced air-mobility, drone development and logistics and advanced aircraft. Our program prepares students to contribute to these exciting developments through theoretical and practical courses; internships; group projects; and a multiple major, two-semester capstone experience.

Examples of Possible Careers and Salaries*

Aerospace engineers

- 2.8% slower than the average
- 66,400 number of jobs
- $118,610 potential earnings
Mechanical engineers
- 3.9% about as fast as the average
- 316,300 number of jobs
- $90,160 potential earnings

Architectural and engineering managers
- 2.6% slower than the average
- 198,100 number of jobs
- $149,530 potential earnings

Accreditation
The Bachelor of Science degree in Aerospace Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org, under the General Criteria and the Program Criteria for Aerospace Engineering and Similarly Named Programs.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to the Aerospace Engineering major is selective.

New Students: Admission into this major requires:
- Minimum 3.0 high school GPA
- Clear demonstration of an ability to be placed directly into MATH 12002 (or its equivalent); this will occur if the student is currently taking or has taken a calculus, pre-calculus or trigonometry course with a minimum C grade

Note: Admission to this program is contingent on students successfully placing into MATH 12002. Those who do not will have their major changed to Aeronautical Systems Engineering Technology prior to their freshman year.

Students who do not meet the above requirements for Aerospace Engineering will be admitted to the Aeronautical Systems Engineering Technology major, provided they meet the minimum program requirements.

Current Students: Students accepted into the Aeronautical Systems Engineering Technology major may request a change in major to Aerospace Engineering as soon as placement into MATH 12002 has been demonstrated (prior to the beginning of freshman year). Otherwise, students may request to change their major to Aerospace Engineering after their freshman year if they meet the following criteria:
- Minimum 3.000 overall Kent State GPA
- Minimum C grade in both MATH 12002 and PHY 23101

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE score or minimum 100 Duoling English score, or by completing the ELS level 112 Intensive Program. For more information on international admission visit the admissions website for international students.

Transfer Students: Admission into the Aerospace Engineering major requires the following:
- Minimum 12 credit hours in college-level coursework
- Minimum 3.000 overall GPA
- Minimum C grade in both MATH 12002 and PHY 23101 (or their equivalents)

Transfer students who have completed fewer than 12 credit hours of college-level coursework will be evaluated on both collegiate and high school records and must submit a final high school transcript.

### Full Description

The Bachelor of Science degree in Aerospace Engineering successfully prepares the aerospace engineers of the future to work in multidisciplinary teams to design products and perform research in innovative ways to affect positive change on a regional, national and global scale. The program focuses on the application of engineering principles to the design, manufacturing and functionality of aerospace vehicles such as aircraft, missiles, and spacecraft. Students gain an in-depth knowledge of aerodynamics, engineering materials and processes, structures, propulsion, flight mechanics and control, while being exposed to orbital mechanics, space structures and rocket propulsion.

Applicants to this program should understand that this is a math-intensive program.

Students may apply early to the M.S. degree in Aerospace Engineering and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Full Description

The Bachelor of Science degree in Air Traffic and Airspace Management is part of the Federal Aviation Administration’s Air Traffic-Collegiate Training Initiative (AT-CTI) to provide a broad education in several areas of aviation to operate the National Airspace System in the 21st century. The Air Traffic and Airspace Management major offers practical simulation-based training to prepare students for professional work in air traffic control and management. Graduates have the knowledge and skills to work as air traffic controllers, managers or numerous other types of professionals operating in the National Airspace System.

The mission of the Bachelor of Science degree in Air Traffic and Airspace Management is to prepare students for success in numerous aviation-related fields, including those that are emerging such as advanced air mobility (AAM), space traffic management (upper class E traffic management) and remote and automated operations. Students receive specialized education and training to help them earn employment and advancement in air traffic control (ATC). Additionally, this program focuses on disciplines such as aircraft dispatch (14 CFR Part 65), AAM and many more.

Students may apply early to the M.S. degree in Aviation Management and Logistics and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Aircraft Dispatch - Minor

College of Aeronautics and Engineering
www.kent.edu/cae

About This Program

The Aircraft Dispatch minor prepares students to take the written, oral and practical exams leading to the issuance of an aircraft dispatch certificate. An aircraft dispatcher plans for weather, routing, fuel, cargo and special situations. They coordinate with air traffic control, maintenance, crew scheduling and gate agents, and issue a dispatch package to the pilot-in-command. A dispatcher monitors the flight from gate-to-gate and communicates with the crew about any information concerning the flight.

The College of Aeronautics and Engineering is accredited as a "Certified School" by the Foundry Educational Foundation (fefinc.org).

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college
preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

**First-Year Students on the Regional Campuses:** First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the University Catalog’s admissions website for international students.

**Transfer Students:** Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

**Former Students:** Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website. Admission policies for undergraduate students may be found in the University Catalog’s Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Choose from the following: 23-24

- Applied Engineering and Technology Management
- Foundry Technology

**Minimum Total Credit Hours:** 120

1. Some course options may require coursework outside of this program.
2. A minimum C grade must be earned to fulfill the writing-intensive requirement.
3. Applicants to this program should understand that this is a math-intensive program. Students admitted to the program are expected to demonstrate prerequisite knowledge on a math placement exam (the ALEKS exam) prior to starting their first semester. Students who fail to obtain the minimum score required to place into the required math courses are at risk of delaying graduation.

The Bachelor of Science degree in Applied Engineering successfully

Full Description

The Bachelor of Science degree in Applied Engineering successfully prepares graduates to apply basic engineering principles, engineering skills and management practices using a systems approach to provide leadership and solve applied technical problems that provide solutions addressing societal needs and challenges. The program provides students instruction in basic math and science, engineering principles, processes, project management and personnel management. Students learn in the classroom, as well as through hands-on experiments and real-world internships.

The degree program can also function as a completer degree for students with an associate degree in engineering technology.

The Applied Engineering major comprises the following concentrations:

- The Applied Engineering and Technology Management concentration provides a focus on the application of management, design and technical skills for system integration; the execution of new product designs; the improvement of manufacturing processes; and the management and direction of physical and/or technical functions of an organization. Students also understand materials, facility design, quality and safety.
- The Foundry Technology concentration prepares students for employment in the metal casting industry. Students complete coursework in materials and processes, cast metals, metallurgy and material science, solid modeling and solidification. In addition, students apply their knowledge and skills in the capstone course on foundry tooling and pattern making. They also gain experience with programmable logic controllers, hydraulics, pneumatics and computer-aided manufacturing.

Students may apply early to the Master of Engineering Technology degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program Policy in the University Catalog for more information.

Aviation Management and Logistics - M.S.
Students with no previous aviation weather experience are required to take AERN 65400 as an elective. Minimum credit hours for electives depends on meeting total 30 credit hours for degree.

Maximum 6 credit hours of AERN 65092 and AERN 65496, combined, may be applied toward degree.

Students who are planning to advance to a doctorate or are interested specifically in research may complete a thesis in place of the capstone with advisor approval. Students selecting the thesis must continually register for AERN 65199 for maximum 6 credit hours toward the degree (students may need to register for AERN 65299 to complete the thesis requirement; however, those credit hours do not, whatsoever, count toward the degree). With the thesis, students will complete the M.S. degree at 34 credit hours.

The capstone consists of a scholarly paper or project that integrates knowledge attained through coursework and research experience. Students may undertake original empirical research, case studies, reports or research results, theoretical or applied designs of logistical systems. The capstone may include improvements on existing systems or completion of a project from an identified client. Students are engaged in workplace or internship applications of the capstone or empirical analysis of an aviation management and logistics system.

Program Learning Outcomes
Graduates of this program will be able to:

1. Design, build, analyze and manage logistical systems at aviation organizations engaged in the transport of people and goods via air transport.
2. Perform management functions at an executive level overseeing the processes of an aviation organization.
3. Model and forecast logistical strategies for domestic and international aviation operations.
4. Analyze and manage safety systems, human error analysis and decision-making.

Dual Degree with Master of Business Administration
Students have the opportunity to complete a dual degree program with the M.S. degree in Aviation Management and Logistics and the M.B.A. degree in Business Administration. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

The dual M.S./M.B.A. degree program prepares students for responsible leadership positions and provides an integrated business and aviation management and logistics education with an emphasis on regional, national and global implications in the field of aviation.

Full Description
The Master of Science degree in Aviation Management and Logistics prepares graduates to perform at an advanced level in organizations that move people and/or goods via air transport.

Students in the program examine the business of aviation logistics and its role in the global supply chain. In addition, they learn techniques necessary to understand and develop an aviation logistics model for...
producing an accurate and effective forecast for demand of aviation services.

Students are given practical experience in the negotiating, vetting and managing of vendor and labor contracts. They also learn the economic, regulatory, political, geographical and human-centric challenges facing the industry today, including profit strategies, human-error interventions tactics and post-9/11 security legislation concerning air cargo operations.

Safety policy, risk management, assurance and safety promotion are the key focus areas, and students take an in-depth study of the concepts, principals, design, implementation and administration of aviation safety management systems. As weather events are so disruption to an aviation organization, students gain an understanding of hazardous weather and the products to predict weather impact on aviation operations.

**Full Description**

The Bachelor of Science degree in Computer Engineering Technology prepares students with problem solving skills and computer technology foundational knowledge to engineer solutions in CET fields. The program provides students with the opportunity to study computer systems and software-hardware interface so that they are capable of analyzing the problems in the computer and networking industry and producing computer engineering, networking and software solutions. The major's curriculum includes materials necessary for students to be eligible for industry certifications (e.g., Cisco, Microsoft, CompTIA) for career advancement.

Computer engineering technologists focus on hardware or software issues. When companies need custom applications and network systems designed, they call the computer engineering technologist. In this age of heavy computer usage, with companies using computers for a large variety of functions, the computer engineering technologist is invaluable in keeping equipment running, updating software, maintaining connectivity and interfacing with users.

Computer engineering technologists typically work for large companies, installing, testing, operating and maintaining the computer networking. They may also find employment with companies that sell computers, at computer repair stores or at independent emergency repair facilities.
Other common work locations include computer and peripheral manufacturing facilities, computer distribution facilities, computer research facilities and educational institutions.

Students may apply early to the Master of Engineering Technology degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Admission to the Cybersecurity Engineering major is selective.

New Students: Admission into this major requires:

- Minimum 3.0 high school GPA
- Clear demonstration of an ability to be placed directly into MATH 12002 (or its equivalent); this will occur if the student is currently taking or has taken a calculus, pre-calculus or trigonometry course with a minimum C grade.

Note: Admission to this program is contingent on students successfully placing into MATH 12002. Those who do not will have their major changed to Computer Engineering Technology prior to their freshman year.

Students who do not meet the above requirements for Cybersecurity Engineering will be admitted to the Computer Engineering Technology major, provided they meet the minimum program requirements.

Current Students: Students accepted into the Computer Engineering Technology major may request a change in major to Cybersecurity Engineering as soon as placement into MATH 12002 has been demonstrated (prior to the beginning of freshman year). Otherwise, students may request to change their major to Cybersecurity Engineering after their freshman year if they meet the following criteria:

- Minimum 3.000 overall Kent State GPA
- Minimum C grade in both MATH 12002 and PHY 23101

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE score or minimum 100 Duoling English score, or by completing the ELS level 112 Intensive Program. For more information on international admission visit the admissions website for international students.

Full Description
The Bachelor of Science degree in Cybersecurity Engineering prepares students with problem solving skills and a resourceful mindset to tackle cybersecurity threats in engineering systems. The program provides students with a working knowledge of analysis and evaluation of components and systems with respect to security and to maintaining operations in the presence of risks and threats, with an emphasis on engineered systems. Students gain the understanding and skills necessary to address security issues pertaining to stakeholder needs and requirements (from a system engineering perspective) considering the lifecycle of the system from the outset. Design and development of systems, their components and associated networks to increase trustworthiness is a driving concern.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements
The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent.

For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information, visit the admissions website for international students.

Transfer Students: Students who have attended any other educational institution after graduating from high school must apply as undergraduate transfer students. For more information, visit the admissions website for transfer students.

Former Students: Former Kent State students or graduates who have not attended another college or university since Kent State may complete the reenrollment or reinstatement form on the University Registrar’s website.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Some programs may require that students meet certain requirements before progressing through the program. For programs with progression requirements, the information is shown on the program’s Coursework tab.

Effective for fall 2025 admission, admission to the Mechanical Engineering Technology major will be selective.

New Students: Effective for fall 2025 admission, admission into this major will require a minimum 2.700 unweighted high school GPA. Students who do not meet this requirement will be admitted to the Applied Engineering and Technology Management concentration of the Applied Engineering major. Students may change their major to Mechanical Engineering Technology after satisfying the below requirements for current students.

Current Students: Effective for fall 2025 admission, students may change their major to Mechanical Engineering Technology if they meet the following criteria:
  • Minimum 2.500 overall Kent State GPA

1. A minimum C grade must be earned to fulfill the writing-intensive requirement.
2. Students who desire to change their major to Aerospace Engineering or Mechatronics Engineering should take PHY 23101 and PHY 23102. Failing to do so may result in having to retake physics to complete your degree.
3. Applicants to this program should understand that this is a math-intensive program. Students admitted to the program are expected to demonstrate prerequisite knowledge on a math placement exam (the ALEKS exam) prior to starting their first semester. Students who do not obtain the minimum score required to place into the required math courses are at risk of delaying graduation.

Full Description

The Bachelor of Science degree in Mechanical Engineering Technology prepares graduates with knowledge across engineering technology disciplines for professional careers in mechanical, robotic systems, hydraulics, pneumatics, automation and other related fields that provide solutions to broadly defined challenges. The program teaches design, operation, installation, maintenance, and analysis of machinery. This is an engineering technology degree that focuses on hands-on applications and not a traditional mechanical engineering degree. The program prepares students to become technical professionals in current and emerging fields using mechanical and computer-aided engineering. Students learn to develop innovative solutions to problems encountered in manufacturing.

Applicants to this program should understand that this is a math-intensive program.

Students may apply early to the Master of Engineering Technology degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission to the Mechatronics Engineering major is selective.

New Students: Admission into this major requires:

- Minimum 3.0 high school GPA
- Clear demonstration of an ability to be placed directly into MATH 12002 (or its equivalent); this will occur if the student is currently taking or has taken a calculus, pre-calculus or trigonometry course with a minimum C grade

Note: Admission to this program is contingent on students successfully placing into MATH 12002. Those who do not will have their major changed to Mechatronics Engineering Technology prior to their freshman year.

Students who do not meet these requirements will be admitted to the Mechatronics Engineering Technology major, provided that they meet those major requirements.

Current Students: Students accepted into the Mechatronics Engineering Technology major may request a change in major to Mechatronics Engineering as soon as placement into MATH 12002 has been demonstrated (prior to the beginning of freshman year). Otherwise, students may request to change their major to Mechatronics Engineering after their freshman year if they meet the following criteria:
• Minimum 3.000 overall Kent State GPA
• Minimum C grade in both MATH 12002 and PHY 23101

**International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE score or minimum 100 Duolingo English score, or by completing the ELS level 112 Intensive Program. For more information on international admission visit the admissions website for international students.

**Transfer Students:** Admission into this major requires:
• Minimum 12 credit hours in college-level coursework
• Minimum 3.000 overall GPA
• Minimum C grade in both MATH 12002 and PHY 23101 (or their equivalents)

Transfer students who have completed less than 12 credit hours of college-level coursework will be evaluated on both collegiate and high school records and must submit a final high school transcript.

Full Description

The Bachelor of Science degree in Mechatronics Engineering successfully prepares graduates with knowledge across engineering disciplines for professional careers in mechatronics, controls, robotics, automation and other engineering fields that provide solutions to technical challenges and address societal needs. The program integrates mechanical, electrical, computer and controls engineering to understand automated machinery, specifically, how to design it and how to make it work. Mechatronics engineering revolves around the design, construction and operation of automated systems, robots and intelligent products, which result from the integration of software and hardware.

Using automated systems is becoming more popular for operating equipment or machinery on manufacturing lines, boilers and aircraft to reduce labor costs, increase precision and accuracy and provide quality and safety for workers. Mechatronic devices can be found in agriculture, hospitals, buildings, homes, automobiles, manufacturing plants, the toy and entertainment industry and in aids for the elderly and disabled.

Applicants to this program should understand that this is a math-intensive program.

Students may apply early to the M.S. degree in Mechatronics Engineering and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.

1 A minimum C grade must be earned to fulfill the writing-intensive requirement.

2 Students wishing to take the full year capstone option (ENGR 48099 and ENGR 48199) should understand that the sequence must be taken during consecutive semesters. ENGR 48099 is only offered during the fall semester and ENGR 48199 is only offered during the spring semester.

3 Students who wish to change their major to Mechatronics Engineering must take PHY 23101 and PHY 23102. Failing to do so will result in additional coursework.

4 Applicants to this program should understand that this is a math-intensive program. Students admitted to the program are expected to demonstrate prerequisite knowledge on a math placement exam (the ALEKS exam) prior to starting their first semester. Students who fail to obtain the minimum score required to place into MATH 12011 or MATH 11022 are at risk of delaying graduation.

1 A minimum C grade must be earned to fulfill the writing-intensive requirement.

Progression Requirements
Students must pass all required flight training and associated flight theory courses with a minimum C grade. Failure to complete all requirements may result in students being deemed not being permitted to continue in the Professional Pilot major; those students will be advised to change their program to the Aeronautical Studies major with the Professional Pilot minor.

Flight Training Courses: Beyond AERN 15751, all students are required to have and maintain a minimum 2.500 overall GPA to continue in flight courses. Students must complete all flight courses by the end of the semester following that in which they enrolled. In other words, if a student enrolls in a flight course in the fall, they must complete the course no later than the end of the following spring semester. This requirement is subject to waiver by the academic program director. In the absence of an authorized waiver, students who fail to complete any flight course by the end of the subsequent semester after course enrollment will receive a failing grade (F) and a complete forfeiture of the balance of the flight fees. Students who wish a refund of flight fees are required to withdraw from their flight course by the withdrawal deadlines established by the Office of the University Registrar. Flight fees will be refunded in accordance with the University policy regarding student fee refunds, policy number 3342-7-06. Students must complete the commercial certificate and instrument rating at Kent State to be eligible for the FAA’s R-ATP certificate.

Students in Flight Training Courses must comply with the University Code of Student Conduct, Federal Aviation Regulations and policies outlined in the Kent State University Flight Operations Manual. Failure to comply may result in punitive actions, issuance of a failing course grade and/or dismissal from the Professional Pilot major.

### Full Description

The Bachelor of Science degree in Professional Pilot is designed for students who aspire to become professional pilots. This program stresses subjects associated with flight systems, propulsion, structures and electronics. Students entering this program should have a strong desire for excellence in aviation, as well as the flying skills required of a professional pilot.

The mission of the Bachelor of Science degree in Professional Pilot is to prepare students to become professional pilots and enable them to obtain Federal Aviation Administration certificates and ratings required for...
giving flight and ground instruction and commercial and instrument operations in federally regulated commercial aviation operations.

Students may apply early to the M.S. degree in Aviation Management and Logistics and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program policy in the University Catalog for more information.
