Through careful implementation of health analytics, hospitals can transform unwieldy amalgamations of data into information that can: improve patient outcomes, increase safety, enhance operational efficiency and support public health. Given the immense size of the data challenge, the distinctness and geographic spread of many healthcare-related activities, and the fact that so many healthcare activities are conducted by different entities which must interact with each other, there is really no other way to provide operations management tools necessary to deliver personalized medicine and to control spiraling costs. Since clinical analytics is an immature discipline, we carefully examine the practices of those institutions that are standard setters in the industry.

### Full Description

When employers are asked what they look for in new hires, communication skills top the list every time. The key to the Bachelor of Arts degree in Communication Studies is flexibility. The curriculum allows students to design an individual, communication-based program of coursework that prepares them for the future. The Communication Studies major provides students with the knowledge, skills and abilities to succeed across professional industries — from government and business to nonprofits and education. The program's mission is to teach students to communicate effectively, lead responsibly, understand how communication affects identities, communities and cultures, think analytically and reason critically.

The Communication Studies major comprises the following concentrations (both of which are offered in-person or fully online):

- The **Applied Communication** concentration allows students to gain expertise in organizational communication, advanced presentational speaking, professional writing and visual design. Students combine theoretical knowledge and technical skills while mastering professional tasks such as conducting training seminars, creating web content, designing promotional materials, managing communication campaigns and writing press releases.
- The **Communication Studies—General** concentration features flexibility and choice. Students create a personalized plan of study tailored to their specific academic interests and career goals in areas such as global and intercultural communication, advocacy, social media, corporate communication and workplace consulting, presentational and motivational speaking, campaign design and more. This concentration is appropriate for those who have diverse academic interests. It permits students to take courses across the schools in the College of Communication and Information and provides space for electives that students could use to pursue a minor in another discipline.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

- Master of Arts degree in Communication Studies
- Master of Arts degree in Media and Journalism
- Master of Arts degree in Visual Communication Design
- Master of Library Information Science degree in Library and Information Science
- Master of Science degree in Emerging Media and Technology
- Master of Science degree in Health Informatics
- Master of Science degree in Knowledge Management
- Master of Science degree in User Experience

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

Full Description

The Web Design and Development minor allows students to develop the fundamental skills needed to pursue jobs in web development, web design and related fields. Students learn technical applications and skills in problem solving, design, user experience, creative applications and coding. Students have the opportunity to use new and emerging technologies to design engaging multimedia experiences, improve existing systems, and study digital social structures. They will also gain experience working in diverse teams and communicating goals, needs, and processes to peers, clients, and consumers.

Web developers are software engineers who understand not only the full technological “stack” that powers modern websites, but who are also conversant in and able to make connections between the design, content and business aspects of web development. Web developers work with content providers, visual designers, and user experience designers. They are coders who use languages such as HTML, CSS, Python, Javascript, MySQL, PHP as well as frameworks used in web development such as Ruby or React. Web developers are also familiar with Content Management Systems, used to ensure that content and services can be delivered to end users. Please see the Web Programming minor offered by the Department of Computer Science in the College of Arts & Sciences for a distinct program with greater emphasis on back-end programming and database management.

HI 60411  CLINICAL ANALYTICS  3 Credit Hours
(Slashed with HI 80411) The use of well-defined and well-integrated clinical analytics throughout the healthcare value chain can be transformative. Through careful implementation of health analytics, hospitals can transform unwieldy amalgamations of data into information that can: improve patient outcomes, increase safety, enhance operational efficiency and support public health. Given the immense size of the data challenge, the distinctness and geographic spread of many healthcare-related activities, and the fact that so many healthcare activities are conducted by different entities which must interact with each other, there is really no other way to provide operations management tools necessary to deliver personalized medicine and to control spiraling costs. Since clinical analytics is an immature discipline, we carefully examine the practices of those institutions that are standard setters in the industry.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HI 60412  CLINICAL DECISION SUPPORT  3 Credit Hours
(Slashed with HI 80412) Provides a practical survey of clinical decision support systems that collect clinical data and enable the transition to clinical knowledge in real world applications intended to improve quality and safety of patient care. As an emerging subset of Health Informatics, PHI is practiced by individuals, governmental and nongovernmental organizations at the international, national, regional, state and local levels. PHI deals with the collection and analysis of vital statistics data through surveillance; information creation; information storage and retrieval; visualization and graphics; dissemination; use of information for policy, decision making and trend tracking. The purpose of this course is to provide students with an introductory overview of the vast and dynamic field of PHI, including definitions, approaches, competencies, applications and informatics principles applied in public health settings.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

HI 60418 CLINICAL ANALYTICS II 3 Credit Hours
As the volume and complexity of health data continues to grow, analysis of that data requires more advanced tools to transform that data into meaningful information for clinical decisions. Not only is data from electronic medical records (EMRs) growing at a rapid pace but new types of data are available for analysis, such as, genomic data and patient generated data. These advanced analytic tools break down into three areas, each of which will be examined in this course: new data warehousing techniques to manage big data, new analytic tools including cognitive computing and predictive analytics and new ways to visualize the data. All of these techniques transform the raw data into use cases, such as, population health, precision medicine and clinical decision support using artificial intelligence and machine learning which will also be addressed in this course.

Full Description

The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual program with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.

The Library and Information Science major includes the following optional concentrations:
The Archival Studies optional concentration prepares students to work with records and other materials of historical value in a variety of settings, including special collections in libraries, government and corporate archives, as well as archival collections found in museums, historical societies and other heritage institutions. Students are encouraged to pursue internship opportunities to enhance their understanding of archival principles and gain valuable practical experience. This concentration follows the recommendations of the Society of American Archivists for graduate archival education programs.

The Medical Librarianship optional concentration prepares students to work in medical and health sciences libraries; in the community; and as part of a health system, hospital, clinician office, academic center, government research agency or medical specialty organization. Students in the concentration intern at a medical library, which will allow them to apply their skills and knowledge, as well as to observe the typical daily activities and requirements of medical librarians.

Full Description

The Journalism Education graduate certificate is for high school teachers who currently work as advisers in scholastic media programs in their high schools, as well as media professionals seeking to take graduate coursework to facilitate teaching in the post-secondary space. The certificate is fashioned using information and guidelines from the School of Media and Journalism’s Center for Scholastic Journalism, a national clearinghouse for information for and about student journalists and their advisers, a research center on issues affecting scholastic media and an advocate for student press freedom.

Coursework in the certificate combines the pedagogy and media content students need and they can take to their classrooms from day one. From coaching a novice journalism student in news norms and routines, to sharing strategies for protecting students’ First Amendment rights, students learn what they need to know to be effective journalism educators and advisers at the high school and post-secondary levels.

Students can complete this certificate in as little as two semesters.

Full Description

The Master of Arts degree in Media and Journalism is designed to give students a solid background in preparation for a professional career. Students are able to take a mix of online and face-to-face courses that allow them to craft a graduate degree that reflects their career interest. Courses are dynamic, challenging and professionally relevant. With small class sizes, students are able to learn from their professors and from the experiences of their fellow classmates, many of whom are working media professionals or nationally recognized journalism educators.

The Media and Journalism major offers the following optional concentration:

• The Journalism Education concentration is intended for those seeking to teach or advise student journalists. The program is affiliated with Kent State’s Center for Scholastic Journalism, and faculty include some of the most-recognized high school journalism educators in the country. The coursework focuses on concepts and lessons that can be used in a teacher’s classroom right away, with a professional project as the culminating requirement.

Students not selecting the concentration work with their advisor to plan a course of study that meets their professional needs, with the culminating requirement of either a thesis or professional project. The School of Media and Journalism provides its students with a strong foundation to achieve their goals in the rapidly changing media industry. All students take a series of core courses that provide the foundation for a career in media and journalism and develop a specialization through the selection of elective courses that can be within or outside of the school. One student may choose to hone skills as a multimedia journalist focusing on public affairs, while another may seek to develop expertise as a public relations professional for not-for-profit organizations.

Full Description

The Information Design minor offers students a basic understanding of visual communication tools, theory, ethics and how to create visual solutions that communicate data and information effectively. Subjects covered include the creation of digital and print artifacts and an understanding of information design and how it is used in different industries, including business, science, communication, journalism and
emerging media. This minor is expected to enhance and complement students’ respective majors.

Students complete a core of fifteen credit hours which includes introductory courses and a capstone course. Then, students are able to customize the minor to fit their curriculum needs by choosing six credit hours of minor electives from Emerging Media and Technology and/or Design courses. Students who want to improve their storytelling ability while strengthening technical skills in information design can choose from Emerging Media and Technology courses. Students who want to enhance their visual communication design and creative problem-solving skills can choose from Design courses.

Programs in the College of Communication and Information are, by nature, innovative, interdisciplinary and collaborative, which is critical to both professional and scholarly disciplines. Students are educated to work at the intersections of communication, information and technology. Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

Students may apply early to the following master’s degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program Policy in the University Catalog for more information.

- Master of Arts degree in Communication Studies
- Master of Arts degree in Media and Journalism
- Master of Arts degree in Visual Communication Design
- Master of Library Information Science degree in Library and Information Science
- Master of Science degree in Emerging Media and Technology
- Master of Science degree in Health Informatics

University Requirements

All students in a bachelor’s degree program at Kent State University must complete the following university requirements for graduation.

NOTE: University requirements may be fulfilled in this program by specific course requirements. Please see Program Requirements for details.

Full Description

The Bachelor of Arts degree in Visual Communication Design prepares students for the graphic design and illustration professions. Students develop technical understanding and design skills in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms. Students produce work for print, motion, video, screen displays and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This program focuses on design and illustration in the context of a broad liberal arts program, giving students the flexibility to choose 20 percent of their coursework (with guidance). This provides the opportunity for students to take a variety of courses to complement their design degree. Students learn at the intersections of communication, information, and technology. The B.A. degree program is for students planning to attend a graduate program or plan to pair their visual communication design degree with another field of study.

Through a core of diverse theory-and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

Students may apply early to the following master’s degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor’s/Master’s Degree Program Policy in the University Catalog for more information.

- Master of Arts degree in Communication Studies
- Master of Arts degree in Media and Journalism
- Master of Arts degree in Visual Communication Design
- Master of Fine Arts degree in Visual Communication Design
- Master of Library Information Science degree in Library and Information Science
- Master of Science degree in Emerging Media and Technology
- Master of Science degree in Health Informatics
- Master of Science degree in Knowledge Management
- Master of Science degree in User Experience

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college’s International Study Programs.

Failure to do so at the end of two consecutive semesters will result in not being permitted to enroll in VCD courses. Students in this situation will be contacted by an academic advisor to create an alternative plan of study with a new major.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate an understanding of the ethics (and legal issues) closely associated with fields of visual communication.
2. Demonstrate an understanding of traditional hands-on skills relative to craftsmanship.
3. Demonstrate an understanding of the basic use of digital technologies as they relate to their areas of study.
4. Demonstrate an ability to create visual response to communication problems, including understanding of hierarchy, typography, aesthetics, composition and construction of meaningful images.

Full Description

The Bachelor of Fine Arts degree in Visual Communication Design prepares students for design and illustration professions. Students develop technical proficiency and design expertise in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms using interactive media, environments and motion design. Students produce work for print, video, screen and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This major leads to a professional degree and focuses on intensive work in the visual arts. The B.F.A. degree consists of approximately two-thirds of the coursework in the creation and study of the visual arts, with the remainder in liberal/general studies. Because of the greater emphasis on upper-level studio courses, the B.F.A. degree allows students an opportunity to dedicate more time to developing their portfolios. The B.F.A. degree is for students planning to pursue a career in visual communication design and graphic design.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

- Master of Arts degree in Communication Studies
- Master of Arts degree in Media and Journalism
- Master of Arts degree in Visual Communication Design
- Master of Fine Arts degree in Visual Communication Design
- Master of Library Information Science degree in Library and Information Science
- Master of Science degree in Emerging Media and Technology
- Master of Science degree in Health Informatics
- Master of Science degree in Knowledge Management
- Master of Science degree in User Experience

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

College Policies

EHHS General
The non-degree EHHS General category is intended for students who are exploring programs in EHHS and are not yet ready to declare a major or do not meet the criteria for their intended major. Because a degree cannot be earned while in EHHS General, it is important that students declare a major before earning 45 credit hours to facilitate timely progress toward a degree. Students will not be permitted to continue in EHHS General after accumulating 45 credit hours.

Repeating Field Experience Courses in Teacher Education Programs
Teacher candidates are permitted to repeat a field experience course once (see major requirements for specific courses). If a teacher candidate is unsuccessful in completing OR fails to earn the required grade in a field experience course the first time, the teacher candidate will receive a warning and will be required to work with a faculty advisor in their academic unit to develop a plan for continuation. The required grade is a C or better in a course that awards a letter grade, or Satisfactory (S) in a course that awards an S/U grade. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. If the teacher candidate does not earn the required grade in the field experience course the second time, a hold will be placed on their account, preventing them from registering for classes until they change their major out of the education program.

Residence Requirement Policy for Non-Degree Teacher Education Licensure/Endorsement Preparation Programs
• Non-degree licensure (initial and additional) and endorsement programs that are a total of 15 credits or above: Students must complete 60% of the coursework at Kent State University, including the course that addresses the CAEP A.1.1 Standard as designated by the program area.
• Non-degree licensure (initial and additional) and endorsement programs that are less than 15 total credits: Students must complete 100% of the coursework at Kent State University.
• Students are permitted 6 years to complete licensure programs and 4 years to complete endorsement programs at Kent State University.
• Coursework transferred from another university cannot be more than 6 years old at the time the licensure/endorsement program is completed.
• Students who do not meet the residence requirements will not be recommended for licensure by Kent State University.

Professional Dispositions for Teacher Candidates
Professional dispositions are the professional attitudes, values, and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. The teacher education faculty believe that the following dispositions support student learning and development. Therefore, teacher candidates are expected to demonstrate:

• Communication and Collaboration
• Fairness and Equity
• Ethical Behavior
• Professional Responsibility

These dispositions are assessed at least three times in a candidate’s program:
• Education in a Democratic Society course,
• a methods course with a field component, and
• student teaching.

In addition, a disposition assessment may be completed by a faculty member at any time a situation calls for it. A disposition is considered ‘acceptable’ if a candidate does not have an outstanding Professional Disposition Plan (PDPs) that requires improved performance in specified areas. A candidate may not progress through the teacher education program if they have any PDPs submitted and unresolved at the following three points:

• Applying for advanced study: If a student has an outstanding PDP at the time of application, a student will not be able to apply for advanced study until the PDP is rectified.
• Prior to the student teaching semester: All outstanding PDPs must be completed and cleared prior to the start of student teaching.
• End of student teaching semester: A student with an outstanding PDP during the student teaching semester will not successfully pass student teaching.

Professional Education Warning
Professional Education Warning for students in teacher licensure programs and the Community Health Education major must have a minimum 2.75 GPA to progress in their programs and ultimately graduate. Unless other factors are present, students who do not meet the prescribed conditions are required to transfer out of their declared major. An appeal of this decision is directed to the associate dean of undergraduate student services, College of Education, Health and Human Services, 304 White Hall.

Background Checks for Teacher Licensure Candidates
For field experience, student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency (“school/agency”) setting, the college requires candidates to
complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the student teaching/internship will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience/student teaching/culminating internship. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at www.ode.state.oh.us for more information about background check requirements for educators in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check.

Student Teaching

The application for student teaching is completed online through the College of Education, Health and Human Services’ student portal. Students will be required to complete the application during specified windows posted on the Vacca Office of Student Services’ (VOSS) website. Application windows will typically be accessible during the months of October and November in the fall semester and March and April in the spring semester. Failure to complete the application and submit the prerequisite training documents within the designated time frame may delay the student teaching placement. Depending on the program area, students will apply either 2 or 3 semesters prior to their anticipated student teaching semester. Students should meet with their academic advisor for details on which semester to apply.

Once the application is submitted, VOSS staff (or appropriate regional campus staff) will determine eligibility by reviewing coursework, GPA, disposition assessments, and other program area requirements. Specifically, staff will review the following:

- Coursework – aside from student teaching and inquiry seminar, all coursework in the program of study must be completed with the minimum grade required in each course (i.e., a ‘C’ or higher in a course where the program requirements prescribe a minimum grade of C).
- GPA – confirmation that the applicant has a 2.75 cumulative GPA or higher and meets the minimum major GPA required for their program as listed in the university catalog.
- Disposition Assessments – no outstanding Professional Disposition Plans (PDPs) are permitted. An applicant with an outstanding PDP must have it cleared before beginning student teaching.
- Program Area Requirements – applicant must have completed all program requirements for their major that are outlined and specified in the university catalog.

Students should meet with their faculty and/or academic advisor in VOSS for any clarifications. Written notification of eligibility will be emailed to each applicant.

Those eligible for student teaching are required to attend a mandatory meeting where additional information about student teaching is provided. Failure to attend this meeting may result in a delay of student teaching. Placement forms, distributed at this meeting, need to be completed by the deadline.

The Clinical Experience Office will make the final decision about the placement site for the Kent Campus. Placement decisions at the Regional Campuses are made by the designated placement officer at each campus. Candidates are not to contact schools or potential mentors directly to make their own arrangements. Placements are generally made within a 50 mile radius of Kent State University. Student teaching is a full-time commitment and candidates are expected to follow the schedule of the cooperating teacher.

Education Licensure Application

Students in the teacher education programs must apply for State of Ohio Licensure within 12 months of program completion (defined by completion of all licensure program requirements). After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

If a student does not apply for their license within 6 years, they are subject to any additional state licensure requirements and are also subject to additional coursework based on content, age of coursework and changes in program requirements. A minimum of 9 credit hours will be required to apply for licensure after 6 years of program completion.

Admission GPA for Undergraduate Students

For admissions, the College of Education, Health and Human Services considers a student to have established a Kent State University GPA after the student has successfully completed a minimum of 12 Kent State University credit hours. Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for admission into programs, Advanced Study, and the Professional phase based on their high school GPA for new freshmen, or transfer GPA for transfer students. Once a student has successfully completed a minimum of 12 Kent State University credit hours, only the student’s Kent State cumulative GPA will be considered for admission into a program, Advanced Study, and Professional Phase.

Students who have completed 12 or more credit hours of previous college-level coursework, either at Kent State University or at another accredited institution, need an overal GPA of 2.00 or higher to declare a College of Education, Health and Human Services majors, minors or certificates unless a higher minimum GPA is specified by the program. See specific programs in this catalog for more information on required minimum GPA to declare. Non-degree EHHS General can be declared without a minimum 2.00 overall GPA.

Transfer applicants who have completed fewer than 12 semester hours of college-level coursework will be evaluated on both collegiate and high school records.

Undergraduate Graduation Requirements

- Students declared in a teacher licensure major or minor must earn a minimum C grade in all major/minor and professional coursework.
• Students declared in the Education minor must earn minimum 2.500 content GPA.
• Students may apply a maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses toward their degree.
• Students may apply a maximum of 4 credit hours of variable-titled workshop (xxx93) toward an undergraduate degree. Identical workshop topics that are repeated for credit will not count towards graduation requirements. All workshops are graded S/U (satisfactory/unsatisfactory). Some program areas may be more restrictive. Students are advised to consult their program regarding application of workshop credit toward degree requirements.

To see graduation requirements for a specific program, please select a major from the undergraduate program listing.

Requirements for Admission to Advanced Study

Admission to advanced study is required of all teacher education initial licensure majors and minors prior to enrolling in upper-division education courses. Upon completion of coursework as determined by program area, students should have satisfied the prerequisites for admission to advanced study. Students must submit an application for advanced study by the second Friday of the term during which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which “Admission to Advanced Study” is a prerequisite. All students apply for Advanced Study through the College of Education, Health and Human Services Student Portal which can be accessed through the Vacca Office of Student Services web page. Students in teacher education majors and minors must be officially admitted to advanced study to take upper-division professional coursework.

Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to initial teacher licensure, with the exception of Trade and Industrial Education majors who obtained initial licensure through the Alternative Resident Educator Licensure Program (teachers recruited from business and industry).

Requirements for Admission to Advanced Study

To manage enrollment and deliver high-quality programs, the faculty will select the most qualified applicants for admission based upon evaluation of academic success (cumulative GPA) at Kent State University, non-academic criteria and other specific program criteria.

Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.
