Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Full Description

The Web Design and Development minor allows students to develop the fundamental skills needed to pursue jobs in web development, web design and related fields. Students learn technical applications and skills in problem solving, design, user experience, creative applications and coding. Students have the opportunity to use new and emerging technologies to design engaging multimedia experiences, improve existing systems, and study digital social structures. They also gain experience working in diverse teams and communicating goals, needs and processes to peers, clients and consumers.

Web developers are software engineers who understand not only the full technological "stack" that powers modern websites, but who are also conversant in and able to make connections between the design, content and business aspects of web development. Web developers work with content providers, visual designers and user experience designers. They are coders who use languages such as HTML, CSS, Python, Javascript, MySQL, PHP as well as frameworks used in web development such as Ruby or React. Web developers are also familiar with Content Management Systems, used to ensure that content and services can be delivered to end users.

For a distinct program with greater emphasis on back-end programming and database management, see the Web Programming minor.

Full Description

The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual program with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.

The Library and Information Science major includes the following optional concentrations:

- The **Archival Studies** optional concentration prepares students to work with records and other materials of historical value in a variety of settings, including special collections in libraries, government and corporate archives, as well as archival collections found in museums, historical societies and other heritage institutions. Students are encouraged to pursue internship opportunities to enhance their understanding of archival principles and gain valuable practical experience. This concentration follows the recommendations of the Society of American Archivists for graduate archival education programs.
- The **Medical Librarianship** optional concentration prepares students to work in medical and health sciences libraries; in the community; and as part of a health system, hospital, clinician office, academic center, government research agency or medical specialty organization. Students in the concentration intern at a medical library, which will allow them to apply their skills and knowledge, as well as

to observe the typical daily activities and requirements of medical librarians.

Full Description

Journalists are reporters, watchdogs, storytellers. The Bachelor of Science degree in Journalism teaches students how to cover real stories that make a difference. Whether using a camera, a microphone, a smartphone or a laptop, students become journalists by doing journalism inside and outside the classroom.

Gaining critical skills that equip them for storytelling in all its forms, journalism students practice their craft in Kent State's award-winning student media. Working with these outlets, students learn how to engage audiences where they "live," on TV, radio, online, social media and in print.

Journalism students produce news and feature content on visual, digital and emerging platforms, and they apply what they've learned as part of the required professional internship.

With a grounding in ethics and an understanding of media's role in democratic society, students graduate prepared to continue as journalists or apply their skills to other professions that value critical thinking, information gathering and the ability to make sense of it for others.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

The Journalism Education graduate certificate is for high school teachers who currently work as advisers in scholastic media programs in their high schools, as well as media professionals seeking to take graduate coursework to facilitate teaching in the post-secondary space. The certificate is fashioned using information and guidelines from the School of Media and Journalism's Center for Scholastic Journalism, a national clearinghouse for information for and about student journalists and their advisers, a research center on issues affecting scholastic media and an advocate for student press freedom.

Coursework in the certificate combines the pedagogy and media content students need and they can take to their classrooms from day one. From coaching a novice journalism student in news norms and routines, to sharing strategies for protecting students' First Amendment rights, students learn what they need to know to be effective journalism educators and advisers at the high school and post-secondary levels.

Students can complete this certificate in as little as two semesters.

Full Description

The Master of Arts degree in Journalism Education is intended for those seeking to teach or advise student journalists. The program is affiliated with Kent State's Center for Scholastic Journalism, and faculty include some of the most-recognized high school journalism educators in the country.

The program provides continuing education opportunities to high school teachers who are responsible for teaching and advising an array of student media content, including school social media channels, yearbook, school newspaper, video and photography. The program also serves practicing journalists who are transitioning to teaching in the higher education arena.

The curriculum focuses on foundational knowledge in media and journalism, as well as pedagogical practices that students can apply to secondary and post-secondary teaching environments. The program highlights the core concepts of First Amendment press freedom, media literacy and the role of media in society — scaffolding that knowledge with content creation skills across an array of media platforms. Interwoven with those knowledge areas and skillsets are best practices in the teaching of scholastic media to high school and college students.

Students complete a culminating integrated learning experience through designated course assignments from each of the six core courses. Each of the six assignments give the student the opportunity to create a deliverable suitable for use in a classroom setting such as a lesson plan, class activity, handbook or instruction manual or other asset.

Full Description

The Bachelor of Science degree in Public Relations can take students from corporate boardrooms and creative agencies to sports arenas, the halls of Congress, global nonprofits, hospitals, fashion runways and beyond. Graduates even work from home as a community advocate, consultant or social media influencer.

Kent State boasts the only public relations program in Ohio that is both certified by the Public Relations Society of America (PRSA) and accredited by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC). Kent State's chapter of the Public Relations Student Society of America (PRSSA) and its members consistently win awards at national conferences, placing the chapter in the top tier nationwide.

Coursework in the Public Relations major focuses on developing skills in writing, critical thinking, digital, social media and visual communication; as well as analytics and strategic multimedia storytelling. Classes routinely involve researching, creating and presenting a public relations plan for real clients. Students learn to deliver messages through social media, websites, podcasts, videos, press releases and other media tools, events, public policy and more. Students build a strong portfolio through hands-on learning opportunities, including two student agencies, a required professional internship and public relations campus jobs. They graduate with a grounding in the practice of responsible advocacy and a firm grasp of inclusive-communication practices.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

Full Description

The Bachelor of Arts degree in Visual Communication Design prepares students for the graphic design and illustration professions. Students develop technical understanding and design skills in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms. Students produce work for print, motion, video, screen displays and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This program focuses on design and illustration in the context of a broad liberal arts program, giving students the flexibility to choose 20 percent of their coursework (with guidance). This provides the opportunity for students to take a variety of courses to complement their design degree. Students learn at the intersections of communication, information, and technology. The B.A. degree program is for students planning to attend a graduate program or plan to pair their visual communication design degree with another field of study.

Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State’s campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Full Description

The Bachelor of Fine Arts degree in Visual Communication Design prepares students for design and illustration professions. Students develop technical proficiency and design expertise in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms using interactive media, environments and motion design. Students produce work for print, video, screen and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This major leads to a professional degree and focuses on intensive work in the visual arts. The B.F.A. degree consists of approximately two-thirds of the coursework in the creation and study of the visual arts, with the remainder in liberal/general studies. Because of the greater emphasis on upper-level studio courses, the B.F.A. degree allows students an opportunity to dedicate more time to developing their portfolios. The B.F.A. degree is for students planning to pursue a career in visual communication design and graphic design.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

College Policies

Admission GPA for Undergraduate Students

For admissions, the College of Education, Health and Human Services considers a student to have established a Kent State University GPA after the student has successfully completed a minimum of 12 Kent State University credit hours. Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for admission into programs, Advanced Study, and the Professional phase based on their high school GPA for new freshmen, or transfer GPA for transfer students. Once a student has successfully completed a minimum of 12 Kent State University credit hours, only the student's Kent State cumulative GPA will be considered for admission into a program, Advanced Study, and Professional Phase.

Students who have completed 12 or more credit hours of previous college-level coursework, either at Kent State University or at another accredited institution, need an overal GPA of 2.00 or higher to declare a College of Education, Health and Human Services majors, minors or certificates unless a higher minimum GPA is specified by the program. See specific programs in this catalog for more information on required minimum GPA to declare. Non-degree EHHS General can be declared without a minimum 2.00 overall GPA.

Transfer applicants who have completed fewer than 12 semester hours of college-level coursework will be evaluated on both collegiate and high school records.

Background Checks for Teacher Licensure Candidates

For field experience, student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency ("school/agency") setting, the college requires candidates to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the student teaching/internship will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience/student teaching/culminating internship. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at www.ode.state.oh.us for more information about background check requirements for educators in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check.

Education Licensure Application

Students in the teacher education programs must apply for State of Ohio Licensure within 12 months of program completion (defined by completion of all licensure program requirements) . After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

If a student does not apply for their license within 6 years, they are subject to any additional state licensure requirements and are also subject to additional coursework based on changes in areas such as content, age of coursework and changes in program requirements. A minimum of 9 credit hours will be required to apply for licensure after 6 years of program completion.

EHHS General

The non-degree EHHS General category is intended for students who are exploring programs in EHHS and are not yet ready to declare a major or do not meet the criteria for their intended major. Because a degree cannot be earned while in EHHS General, it is important that students declare a major before earning 45 credit hours to facilitate timely progress toward a degree. Students will not be permitted to continue in EHHS General after accumulating 45 credit hours.

Graduate Certificate Policy

- Students seeking a graduate certificate must maintain a minimum 3.000 grade point average. A graduate certificate student who receives a combination of more than 8 credit hours of B- or lower grades, or more than 4 credit hours of grades lower than C is subject to dismissal. Students who are unable to maintain academic standards of the College are subject to dismissal for academic

reasons. Grades of C- or below are not counted toward completion of the certificate.

- Certificates must be completed within six years after the first graduate enrollment.
- No more than 2 credit hours of workshop may be used toward a certificate.
- Before being eligible to be awarded a Certificate, students must be admitted to the Certificate program.
- Students currently in a graduate degree program may also apply to a certificate program. Their degree seeking coursework may be applied to the certificate coursework with advisor approval. The courses must be completed within six years and satisfy certificate course requirements.
- Students who have a previous graduate degree and are not currently seeking another graduate degree may transfer a maximum 6 credit hours with advisor approval. These credits may include hours from another KSU program, or from another accredited institution, if the following conditions are met:
  - courses were at the graduate level
  - a grade of "A" or "B" was earned
  - credit will be less than six years old at the time the certificate is conferred at Kent
  - student was admitted as a graduate student at the time the course was taken.
- Some program areas may be more restrictive. Students are advised to consult their program.

Professional Education Warning

Professional Education Warning for students in teacher licensure programs and the Community Health Education major must have a minimum 2.75 GPA to progress in their programs and ultimately graduate. Unless other factors are present, students who do not meet the prescribed conditions are required to transfer out of their declared major. An appeal of this decision is directed to the associate dean of undergraduate student services, College of Education, Health and Human Services, 304 White Hall.

Professional Dispositions for Teacher Candidates

Professional dispositions are the professional attitudes, values, and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. The teacher education faculty believe that the following dispositions support student learning and development. Therefore teacher candidates are expected to demonstrate:

- Communication and Collaboration
- Fairness and Equity
- Ethical Behavior
- Professional Responsibility

These dispositions are assessed at least three times in a candidate's program:

- Education in a Democratic Society course,
- a methods course with a field component, and
- student teaching.

In addition, a disposition assessment may be completed by a faculty member at any time a situation calls for it. A disposition is considered 'acceptable' if a candidate does not have an outstanding Professional Disposition Plan (PDPs) that requires improved performance in specified areas. A candidate may not progress through the teacher education program if they have any PDPs submitted and unresolved at the following three points:

- Applying for advanced study: If a student has an outstanding PDP at the time of application, a student will not be able to apply for advanced study until the PDP is rectified.
- Prior to the student teaching semester: All outstanding PDPs must be completed and cleared prior to the start of student teaching.
- End of student teaching semester: A student with an outstanding PDP during the student teaching semester will not successfully pass student teaching.

Repeating Field Experience Courses in Teacher Education Programs

Teacher candidates are permitted to repeat a field experience course once (see major requirements for specific courses). If a teacher candidate is unsuccessful in completing OR fails to earn the required grade in a field experience course the first time, the teacher candidate will receive a warning and will be required to work with a faculty advisor in their academic unit to develop a plan for continuation. The required grade is a C or better in a course that awards a letter grade, or Satisfactory (S) in a course that awards an S/U grade. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. If the teacher candidate does not earn the required grade in the field experience course the second time, a hold will be placed on their account, preventing them from registering for classes until they change their major out of the education program.

Requirements for Admission to Advanced Study

Admission to advanced study is required of all teacher education initial licensure majors and minors prior to enrolling in courses designated as advanced study courses. Upon completion of coursework as determined by program area, students must apply during the term which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which "Admission to Advanced Study" is a prerequisite.

Application Dates

Fall Semester:

- Application window: August 1 to September 1
- Term to begin advanced study courses: Spring semester

Spring Semester:

All students apply for Advanced Study through the College of Education, Health and Human Services Student Portal which can be accessed through the Vacca Office of Student Services web page.

Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to initial teacher licensure, with the exception of students in the Career Tech Teacher Education certificate who obtain initial licensure through the Alternative Resident Educator Licensure Program (teachers recruited from business and industry).

Requirements for Admission to Advanced Study

To deliver high-quality programs, faculty will select the most qualified applicants for admission based upon evaluation of academic success (overall GPA) at Kent State University, non-academic criteria and other specific program criteria.

Students may be required to reapply if they postpone advanced study coursework or withdraw from their courses for one year or more.

Student Teaching

The application for student teaching is completed online through the College of Education, Health and Human Services' student portal. Students will be required to complete the application during specified

windows posted on the Vacca Office of Student Services' (VOSS) website. Application windows will typically be accessible during the months of October and November in the fall semester and March and April in the spring semester. Failure to complete the application and submit the prerequisite training documents within the designated time frame may delay the student teaching placement. Depending on the program area, students will apply either 2 or 3 semesters prior to their anticipated student teaching semester. Students should meet with their academic advisor for details on which semester to apply.

Once the application is submitted, VOSS staff (or appropriate regional campus staff) will determine eligibility by reviewing coursework, GPA, disposition assessments, and other program area requirements. Specifically, staff will review the following:

- Coursework – aside from student teaching and inquiry seminar, all coursework in the program of study must be completed with the minimum grade required in each course (i.e., a 'C' or higher in a course where the program requirements prescribe a minimum grade of C).
- GPA – confirmation that the applicant has a 2.75 cumulative GPA or higher and meets the minimum major GPA required for their program as listed in the university catalog.

Admission Requirements

Admission to the minor is selective, open only to students who have a minimum 2.500 overall GPA and are declared in a program area for which the state of Ohio issues a teaching license. Those majors at Kent State are the following: Biology; Spanish; Mathematics; Earth Science; American Sign Language; Classics (Latin concentration); Teaching English as a Second Language; French; and German.

The Education minor does not provide preparation for teacher licensure in English or individual social science areas (e.g., economics, geography, history, political science, psychology or sociology). Students wishing to pursue licensure in one of those areas should declare, instead, the Integrated Language Arts or Integrated Social Studies major. Students should contact a college advisor for more information.

To declare this minor, students must have attempted a minimum 12 credit hours at Kent State and earned a minimum 2.500 overall Kent State GPA. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

Progression Requirements

- Students must meet all professional requirements for admission to advanced study.
- To manage enrollment and deliver high-quality programs, the faculty will select the most qualified applicants for admission based upon evaluation of academic success (overall GPA) at Kent State University; non-academic criteria and other specific program criteria.
- Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

Graduation Requirements

Minimum Minor GPA	Minimum Overall GPA
2.000	2.500

- Based on program requirements, credits may exceed the minimum required for the minor. When a difference exists between the two colleges' major requirements in teaching fields, students must also complete the specific major sequences required by the College of Education, Health and Human Services. This ensures that the students will meet licensure requirements.
- Those pursuing an Education minor must be admitted to advanced study prior to student teaching. For complete student teaching information, refer to the Clinical Experience/Student Teaching website through EHHS Vacca Office of Student Services.
- Minimum 2.500 overall GPA and 2.500 major GPA are required for advanced study, student teaching, graduation and licensure. All courses in the minor must be completed with a minimum C or S grade. Some majors may have a higher GPA required, see advisor.
- Minimum 6 credit hours in the minor must be upper-division coursework (30000 and 40000 level).
- Minimum 6 credit hours in the minor must be outside of the course requirements for any major or other minor the student is pursuing.
- Minimum 50 percent of the total credit hours for the minor must be taken at Kent State (in residence).

Program Learning Outcomes

Graduates of this program will be able to:

1. Describe the Ohio Standards for the Teaching Profession.
2. Describe the Ohio Standards for Professional Development.
3. Describe the Ohio School Operating Standards.
4. Describe the Ohio Value Added Progress Dimension(s).
5. Demonstrate knowledge and skills consistent with their content standards.
6. Demonstrate knowledge and skills identified in CAEP Standards.

Admission GPA for Undergraduate Students

For admissions, the College of Education, Health and Human Services considers a student to have established a Kent State University GPA after the student has successfully completed a minimum of 12 Kent State University credit hours. Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for admission into programs, Advanced Study, and the Professional phase based on their high school GPA for new freshmen, or transfer GPA for transfer students. Once a student has successfully completed a minimum of 12 Kent State University credit hours, only the student's Kent State cumulative GPA will be considered for admission into a program, Advanced Study, and Professional Phase.

Students who have completed 12 or more credit hours of previous college-level coursework, either at Kent State University or at another accredited institution, need an overal GPA of 2.00 or higher to declare a College of Education, Health and Human Services majors, minors or certificates unless a higher minimum GPA is specified by the program. See specific programs in this catalog for more information on required minimum GPA to declare. Non-degree EHHS General can be declared without a minimum 2.00 overall GPA.

Transfer applicants who have completed fewer than 12 semester hours of college-level coursework will be evaluated on both collegiate and high school records.

Background Checks for Teacher Licensure Candidates

For field experience, student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency ("school/agency") setting, the college requires candidates to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the student teaching/internship will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience/student teaching/culminating internship. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at www.ode.state.oh.us for more information about background check requirements for educators in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check.

Education Licensure Application

Students in the teacher education programs must apply for State of Ohio Licensure within 12 months of program completion (defined by completion of all licensure program requirements) . After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

If a student does not apply for their license within 6 years, they are subject to any additional state licensure requirements and are also subject to additional coursework based on changes in areas such as content, age of coursework and changes in program requirements. A minimum of 9 credit hours will be required to apply for licensure after 6 years of program completion.

Professional Education Warning

Professional Education Warning for students in teacher licensure programs and the Community Health Education major must have a minimum 2.75 GPA to progress in their programs and ultimately graduate. Unless other factors are present, students who do not meet the prescribed conditions are required to transfer out of their declared major. An appeal of this decision is directed to the associate dean of undergraduate student services, College of Education, Health and Human Services, 304 White Hall.

Professional Dispositions for Teacher Candidates

Professional dispositions are the professional attitudes, values, and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. The teacher education faculty believe that the following dispositions support student learning and development. Therefore teacher candidates are expected to demonstrate:

- Communication and Collaboration
- Fairness and Equity
- Ethical Behavior
- Professional Responsibility

These dispositions are assessed at least three times in a candidate's program:

- Education in a Democratic Society course,
- a methods course with a field component, and
- student teaching.

In addition, a disposition assessment may be completed by a faculty member at any time a situation calls for it. A disposition is considered 'acceptable' if a candidate does not have an outstanding Professional Disposition Plan (PDPs) that requires improved performance in specified areas. A candidate may not progress through the teacher education program if they have any PDPs submitted and unresolved at the following three points:

- Applying for advanced study: If a student has an outstanding PDP at the time of application, a student will not be able to apply for advanced study until the PDP is rectified.
- Prior to the student teaching semester: All outstanding PDPs must be completed and cleared prior to the start of student teaching.
- End of student teaching semester: A student with an outstanding PDP during the student teaching semester will not successfully pass student teaching.

Repeating Field Experience Courses in Teacher Education Programs

Teacher candidates are permitted to repeat a field experience course once (see major requirements for specific courses). If a teacher candidate is unsuccessful in completing OR fails to earn the required grade in a field experience course the first time, the teacher candidate will receive a warning and will be required to work with a faculty advisor in their academic unit to develop a plan for continuation. The required grade is a C or better in a course that awards a letter grade, or Satisfactory (S) in a course that awards an S/U grade. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. If the teacher candidate does not earn the required grade in the field experience course the second time, a hold will be placed on their account, preventing them from registering for classes until they change their major out of the education program.

Requirements for Admission to Advanced Study

Admission to advanced study is required of all teacher education initial licensure majors and minors prior to enrolling in courses designated as advanced study courses. Upon completion of coursework as determined by program area, students must apply during the term which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which "Admission to Advanced Study" is a prerequisite.

Requirements for Admission to Advanced Study

To deliver high-quality programs, faculty will select the most qualified applicants for admission based upon evaluation of academic success (overall GPA) at Kent State University, non-academic criteria and other specific program criteria.

Statements can be found on the student portal.

Student Teaching

The application for student teaching is completed online through the College of Education, Health and Human Services' student portal. Students will be required to complete the application during specified windows posted on the Vacca Office of Student Services' (VOSS) website. Application windows will typically be accessible during the months of October and November in the fall semester and March and April in the spring semester. Failure to complete the application and submit the prerequisite training documents within the designated time frame may delay the student teaching placement. Depending on the program area, students will apply either 2 or 3 semesters prior to their anticipated student teaching semester. Students should meet with their academic advisor for details on which semester to apply.

Once the application is submitted, VOSS staff (or appropriate regional campus staff) will determine eligibility by reviewing coursework, GPA, disposition assessments, and other program area requirements. Specifically, staff will review the following:

- Coursework – aside from student teaching and inquiry seminar, all coursework in the program of study must be completed with the minimum grade required in each course (i.e., a 'C' or higher in a course where the program requirements prescribe a minimum grade of C).
- GPA – confirmation that the applicant has a 2.75 cumulative GPA or higher and meets the minimum major GPA required for their program as listed in the university catalog.
- Disposition Assessments – no outstanding Professional Disposition Plans (PDPs) are permitted. An applicant with an outstanding PDP must have it cleared before beginning student teaching.
- Program Area Requirements – applicant must have completed all program requirements for their major that are outlined and specified in the university catalog.

Students should meet with their faculty and/or academic advisor in VOSS for any clarifications. Written notification of eligibility will be emailed to each applicant.

Those eligible for student teaching are required to attend a mandatory meeting where additional information about student teaching is provided. Failure to attend this meeting may result in a delay of student teaching. Placement forms, distributed at this meeting, need to be completed by the deadline.

The Clinical Experience Office will make the final decision about the placement site for the Kent Campus. Placement decisions at the Regional Campuses are made by the designated placement officer at each campus. Candidates are not to contact schools or potential mentors directly to make their own arrangements. Placements are generally made within a 50 mile radius of Kent State University. Student teaching is a full-time commitment and candidates are expected to follow the schedule of the cooperating teacher.

Professional Portfolio

Students present a professional portfolio upon the completion of coursework. The portfolio will include elements of selected coursework that best represents the student's learning prior to moving onto the dissertation in practice. Students prepare the portfolio in an online format and defend to a committee of two faculty members from within the concentration. Once the portfolio has been successfully defended, the students move on to the final requirement: the dissertation in practice. Students propose a dissertation in practice that addresses a complex problem of practice. Students conduct an inquiry project to make a positive impact on the problem of practice.

Full Description

The Doctor of Education degree in Interprofessional Leadership engages students in the study of leadership from an interprofessional perspective. Given the complexity of 21st-century education and society, educators and leaders in all fields must be prepared to address problems across organizational boundaries. The objective of the degree is to develop leaders who are scholarly practitioners. The program is framed around questions of equity, ethics and social justice to foster leadership to address to complex problems of practice. The goal is to prepare leaders who can construct and apply knowledge to make a positive difference in the lives of individuals, families, organization and communities.

The Ed.D. degree is cohort-based and starts in the summer term. The program can be completed in three to four years.

The Interprofessional Leadership major comprises the following concentrations:

- The **Cultural Foundations of Education** concentration prepares students for leadership roles in educational settings seeking to address problems of practice that reflect broad societal problems and thus defy simple solutions. Immersion in the literature of the field of social foundations of education exposes students to historical, sociological anthropological and philosophical understandings, enabling them to contextualize problems of practice within and beyond their particular institutional setting. Students develop facility with conceptual, critical and normative modes of analysis needed to unpack contemporary problems of practice and propose approaches to addressing them in ways that do justice to their complexity. This concentration will appeal to students who are already grappling with these problems in institutional settings and to those who wish to prepare themselves for such roles.
- The **Curriculum and Instruction** concentration prepares students to be curriculum leaders and lead positive curricular change in their classrooms, schools and communities. Students attain the knowledge and skills necessary to identify, conceptualize and research important problems related to the practice of curriculum development, curriculum leadership and curriculum evaluation. Additionally, students learn to develop, implement and evaluate solutions that are informed by currently available theory and research in curriculum and instruction.
- The **Educational Technology** concentration prepare leaders who are conversant in critical research, theories and methods in educational technology to facilitate positive change in their professional settings. The concentration is designed to help students advance their knowledge in educational technology research to implement educational technology initiatives in educational and business environments using research-informed and data-driven decisions.
- The **Leadership in Educational Contexts** concentration provides education in multidisciplinary perspectives on leadership throughout the range of educational contexts. The concentration prepares students to lead positive change through their work as ethical- and social justice-oriented scholarly practitioners. Concentration coursework focuses on advanced leadership theories and skills, as well as on sociocultural contexts of education organizations and systems. This concentration is appropriate for leaders and emerging leaders in PK-12 schooling, higher education and other organizations in which non-formal, informal and formal education takes place.
- The **Special Education** concentration prepares students for leadership roles in improving the practice of special education, from birth to adulthood. Students attain the knowledge and skills necessary

to identify and conceptualize important problems related to the practice of special education, and to develop, implement and evaluate solutions that are informed by the best available research and theory in special education and related disciplines. This concentration provides doctoral level training to anyone seeking to lead positive change in how special education and related services are provided to learners with disabilities.
