Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2 The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Learning Outcomes

Graduates of this program will be able to:

1. Reason mathematically by using precise definitions, articulating assumptions and reasoning logically to conclusions.
2. Engage effectively in problem solving by exploring examples, assessing the correctness of solutions and interpreting solutions in an actuarial context.
3. Define, interpret and apply standard actuarial notation, terminology and formulas.
4. Analyze various streams of cash flows, both certain and contingent.
5. Apply methods from probability, statistics and stochastic processes to the solution of problems in actuarial science, finance and economics.
6. Communicate solutions of mathematical problems clearly, both orally and in writing.
7. Employ commonly used computer programming languages and software packages to solve problems in actuarial science, finance and economics.
8. Demonstrate fundamental knowledge of finance, economics and accounting.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Actuarial Mathematics prepares students for the actuarial profession. Actuaries are professionals who manage risk. They predict the likelihood of future events and model the financial impact of future scenarios. They find creative ways to mitigate the undesirable effects of future events. Although most actuaries are employed in the insurance and financial industries, many others work in the transportation, environmental, medical and manufacturing industries, as well as in government.

The Actuarial Mathematics major is highly interdisciplinary, integrating substantial coursework in business, computing and communications with a solid core of mathematics and statistics. Kent State University is one of only four institutions in Ohio to receive the "Universities and Colleges with Actuarial Programs-Advanced Curriculum" designation from the Society of Actuaries. The Kent State program prepares students for the first four of a series of examinations to receive professional certification as an actuary.

Students may apply early to the Master of Arts in Economics degree and double count 9 credit hours of graduate courses toward both degree programs. See the **Combined Bachelor's/Master's Degree Program Policy** in the University Catalog for more information.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Applied Mathematics emphasizes the tools most useful in science, engineering and technology applications: mathematical modeling, scientific computing and probability and statistics.

The Applied Mathematics major comprises the following concentrations:

- The **Applied Mathematics** concentration emphasizes the classical aspects of the discipline, which are rooted in mathematical modeling and applications in the sciences. It couples well with the Physics minor or major.
- The **Computational Mathematics** concentration is designed for students with interests in numerical modeling and scientific computing. It pairs well with the Computer Science minor or major.
- The **Financial Mathematics** concentration prepares students for graduate programs in mathematical or computational finance or financial engineering.
- The **Probability and Statistics** concentration emphasizes the mathematics underlying processes that involve randomness and the mathematical tools used in the analysis of data.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

Program Learning Outcomes

Graduates of this program will be able to:

1. Ask the questions so that problems in a particular business or industrial situation become clear.
2. Determine if the problem may be addressed with data science methods and tools, and if yes, propose potential methods for solving the problems.

3. Make suggestions for how data science may be used to enhance the quality and value of currently existing products (whether the products are physical or methods) and how data science may be used in the development of new products.

Full Description

The Master of Science degree in Data Science provides a focus on developing scientists who will understand the theories, methods and tools of data science and apply data science to solving research and workplace questions in the natural, health and social sciences for businesses and industries.

Data science is a STEM discipline founded on the principles of mathematics and the sciences and developed through a synthesis of mathematics and computer science. One may think of data science as a blending together of methods and ideas from analysis, statistics, databases, big data, artificial intelligence, numerical analysis, graph theory and visualization for the purposes of finding information in data and applying that information to solving real-world problems.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific

exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2 The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Mathematics comprises core areas in algebra (number systems, equations, discrete structures), analysis (functions, limits, continuous processes), geometry (space, shape, form) and associated generalizations and abstractions.

The B.S. degree program is recommended for students interested in a flexible option of careers or graduate study in mathematics. Coupled with the Education minor, the program can lead to Ohio teacher licensure.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

About This Program

The Ph.D. degree in Pure Mathematics is for students interested in becoming professional scholars, college and university teachers or independent workers in private, industrial or government research institutions. Kent State's pure mathematics Ph.D. program is one of six in the state public university system, and one of only two in Northeast Ohio.

In broad terms, the faculty areas of research lie in functional and harmonic analysis, convex and algebraic geometry, Lie representation theory, approximation theory, finite groups, character theory, number theory and probability and stochastic processes. Original research in pure mathematics is required, and the Ph.D. dissertation must be orally defended. Two years of graduate coursework and three years of research are typical.

ITAL 35340 BOCCACCIO'S DECAMERON IN TRANSLATION 3 Credit Hours
The Decameron, one of the most entertaining, beloved and imitated prose works ever written, is an accurate reflection of fourteenth-century life in Italy. Like Dante's Divine Comedy, this human comedy was written not only to delight, but also to instruct by exploring both our spiritual and our natural environment. Giovanni Boccaccio (1313-1375), considered by some typically medieval and by others one of the first truly modern literary figures to emerge from the darkness of the Middle Ages into the light of the Renaissance, shows himself, as author of The Decameron, to be both a passionate believer and a passionate critic as he reconstructs society, destroyed by the Black Plague, through the perfection of his 100-fold narrative. Boccaccio's Decameron, of course, generated a flourishing early modern tradition of proto-novelistic short-story collections (think of Marguerite de Navarre and Cervantes), but also provided substantial material for the nascent dramatic tradition (from Machiavelli's Mandragola to Shakespeare's All's Well). His biographical collection, Of Famous Women, was an indispensable source and model for the wide-spread debates on the status of women. His Genealogy of the Gentile Gods was a staple of the Renaissance mythographical tradition. This course is taught in English.

Some of the central topics of the course will include Dante's relationship to Florence, his use of classical, Christian and mythological personages, symbols and references; his views on the papacy and the empire, his relationship to the people he encounters and the unique aspects of his vision of the afterlife. In addition, we will focus on a variety of thematic concerns including Dante's understanding of poetry, grace, love and divine justice. Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in American Sign Language presents American sign language as a culture- and community-based language that interacts with other world languages. Through techniques — including immersion and bilingual-bicultural comparison classes, community interaction, research, lab activities and use of digital video technology — students gain documented proficiency in American sign language, validity within the deaf community and networking within the professional community.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in French provides opportunities for students to study the language, literature and culture of France and Francophone countries. Students gain a respectable measure of competence in reading, writing and oral/aural skills in the French language. To help gain proficiency, students can attend a weekly French coffee hour.

Students can take upper-division French courses abroad, either through Kent's own program with the Paris Institute or with any accredited study abroad program offered by another university. Such programs may be for one semester, one academic year or one summer. However, they most benefit students who have already acquired a strong command of the language here before leaving.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete the following:

1. Elementary I and II of any language (or equivalent) **and**
2. One of the following options:
   a. Intermediate I and II of the same language
   b. Elementary I and II of a second language
   c. Any combination of two courses from the following list:
      i. Intermediate I of the same language
      ii. One to two college-level course(s) completed outside the United States
      iii. Courses: ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer courses. This may be accomplished in one of three ways:

1. Passing a course beyond Elementary I through Intermediate II level
2. Receiving credit through one of the alternative credit programs offered by Kent State University
3. Demonstrating language proficiency comparable to Elementary II of a foreign language

Certain programs may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need a particular language proficiency.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in German provides instruction designed to develop competence in oral and written communication; insights into language form, usage and meaning; and knowledge of German literature, cultural history and contemporary issues. Additionally, students are introduced to basic skills in German-to-English translation.

The flexibility of the major makes it easy for students to combine with a second major, such as the History, International Studies or Political Science major or another foreign language major.

Students wishing to teach may combine the German major with the Education minor to prepare for multi-age (K–12) teacher licensure in Ohio.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
2.000	2.000

- Students must declare and graduate with a minor, certificate or second major to earn the B.S. degree in Translation Studies.
- Students are expected to start in a course appropriate to their language proficiency level. Students lacking in sufficient proficiency to take the first concentration course can reach it by taking courses in the prerequisite sequence based on their placement score and high school training. One or more of the prerequisites may be waived with demonstrated proficiency through the Kent State placement test, AP, CLEP, International Baccalaureate, official ACTFL Proficiency Rating or another department-approved assessment.
- Students who fulfill the college language requirement in fewer than 8 credit hours as a result of proficiency will complete remaining hours with general electives. Completion of first junior-level course completes the College of Arts and Sciences foreign language requirement.

Program Note

- Some courses in the Department of Modern and Classical Language Studies are offered on a rotating basis, and course availability may change at any time. Students should see the program coordinator or academic advisor for course planning.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

[1] All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

[2] The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Translation is a pre-professional program designed for students who are seeking the more professional focus and interdisciplinary breadth that the B.S. degree offers with the inclusion of a minor, double major or certificate to develop the skills needed to translate in a professional setting. It introduces the basics of translation theory as it applies to the actual practice of translation.

The requirement of a minor, certificate or second major enables students to acquire a level of expertise in a specific field in which they can specialize as translators. This degree also enables students to have a major and a minor that make them more competitive and prepare them for a sector that the U.S. Department of Labor projects as one of the fastest-growing sectors globally. Translation majors are strongly encouraged to undertake study in a country where their language concentration is spoken so that they can achieve the necessary proficiency level. Skills necessary include an excellent command of the source language, an excellent command of the target language, cultural knowledge, specialist knowledge, research competence, terminological competence, technological competence, an understanding of the translation industry and transfer competence.

Graduates may enter graduate programs in translation (the professional degree) or go on to work for government, business, industry or translation agencies, or as freelance translators.

The Translation major comprises the following concentrations:

- Arabic

Philosophy (PHIL)

PHIL 11001 INTRODUCTION TO PHILOSOPHY (DIVG) (KHUM) 3 Credit Hours
An introduction to the diverse methods and subject matters in philosophy. Topics may include: What are the arguments for the existence of God? Do humans have free will? Can we know anything with certainty, and how do we know anything at all? Is what we see real, or might it be only an illusion? What makes a person a person - their mind, or their physical attributes? Is the mind the brain, or is it something else?
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Diversity Global, Kent Core Humanities, TAG Arts and Humanities, Transfer Module Humanities

PHIL 11009 CRITICAL THINKING (KADL) 3 Credit Hours
Critical thinking is essential to every aspect of life, whether reading a news report or editorial, examining a contract or other legal document, or entering into a debate. This course teaches the strategies of “cognitive self-defense” that allow students to see past false claims and avoid being deceived by misleading rhetorical strategies. The course also examines the role of argument in reasoning, including types of arguments and the ways in which mistakes in reasoning can lead us astray. Examples from everyday life illustrate the sorts of complex reasoning that are a crucial part of practical decision-making.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Kent Core Additional, TAG Arts and Humanities

PHIL 20095 SPECIAL TOPICS 3 Credit Hours
(Repeatable for credit) Sophomore level course with variable content of philosophical interest.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PHIL 21001 INTRODUCTION TO ETHICS (DIVG) (KHUM) 3 Credit Hours
What makes an action morally right or morally wrong, and who gets to decide? Is ethics about performing actions that are morally right, or is it about being a virtuous person? This course examines at least three competing theories about ethics, including challenges to each theory. Students get to decide which theory they think is best, but every theory presents its own strengths and weaknesses.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Diversity Global, Kent Core Humanities, TAG Arts and Humanities, Transfer Module Humanities

PHIL 21002 INTRODUCTION TO FORMAL LOGIC (KMCR) 3 Credit Hours
This course is designed to sharpen students' reasoning skills and to help them better understand the structure of reasoning in general. To do this, it introduces students to some formal languages, such as Propositional Logic and Predicate Logic, that represent the logical structure of deductive reasoning. Unlike natural languages such as English, these formal languages allow students to focus on the general structure of different types of arguments, without discussing the content of any particular argument. Course covers both the construction of formal proofs in these languages, and translation between them and English. The study of formal logic contributes to effective and persuasive reasoning, not only in philosophy, but in any discipline or context. It also provides effective tools for evaluating the strength of English-language arguments. The skills that students acquire in this course are thus widely applicable in their personal, professional and academic lives.
Prerequisite: Minimum 35 ALEKS math score; or minimum 22 ACT math score; or minimum 530 SAT math score; or MATH 00022 with a minimum C grade.
Schedule Type: Lecture

Grade Mode: Standard Letter

PHIL 30025 ENVIRONMENTAL PHILOSOPHY (ELR) 3 Credit Hours
An examination of philosophical issues in environmental studies, including topics such as animal ethics and the sources of our food; the value of nature and environmental aesthetics; sustainability and biodiversity; ecofeminism, social justice and radical ecology; and the human response to climate change. PHIL 31011 ANCIENT PHILOSOPHY 3 Credit Hours
Examination of ancient philosophy, including Greek philosophers such as Plato and Aristotle, and those who inherited their philosophy. The ancients made the move from explanation based on myth to philosophical explanation. What did that move involve? How did the ancient philosophers answer questions about the nature of reality, what exists, the reliability of the senses and the types of things in the world? How did they conceive of the good life?
Prerequisite: PHIL 11001 or PHIL 21001; and PHIL 11009 or PHIL 21002 or PHIL 41038.

PHIL 31012 EARLY MODERN PHILOSOPHY 3 Credit Hours
The course features selections from rationalists such as Descartes, Spinoza and Leibniz, and empiricists such as Locke, Berkeley and Hume, of the early modern philosophical period. How did these differences shape their wider views of the world?
Prerequisite: PHIL 11001 or PHIL 21001; and PHIL 11009 or PHIL 21002 or PHIL 41038.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PHIL 31013 LATE MODERN PHILOSOPHY 3 Credit Hours
The course explores the development of 19th century German idealism by thinkers such as Fichte, Hegel and Schelling, whose work was prompted by Kant's transcendental idealism understood as critique or as the examination of the conditions for the possibility of knowledge acquisition as a touchstone for understanding the relationship among metaphysics, epistemology, ethics and political philosophy. The course thus begins with Kant's critical project before turning to its reception and the various 19th century responses to it. Additional selections from Kant's ethical and political writings may supplement this reading. The course may also cover additional figures, such as Schopenhauer, Nietzsche and Marx, whose work, in turn, is a response to German idealism itself.

As such, the course focuses on issues such as gender identity, sexual difference, the sex and gender binaries, gendered experience, trans embodiment, and LGBTQI marginalization. The course asks whether, and if so, how, feminist theory (more broadly) and feminist philosophy (more narrowly) could draw on canonical philosophical texts, traditions, and figures. Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in Philosophy gives students the opportunity to consider some of life's biggest questions, such as:

- What is the nature of reality?
- What (if anything) can I know with certainty?
- What kind of life should I live?

Philosophy students read, discuss and analyze texts from a plurality of traditional philosophical areas of study in both Western and non-Western philosophies, written by diverse philosophers. They become familiar with contemporary and historical schools of thought and learn about the application of philosophy to other disciplines and professions. The Philosophy major provides intensive training in argumentative writing, careful reading as well as critical and creative thinking, while broadening students' intellectual, cultural and personal horizons.

The flexibility of the major's curriculum allows students to combine it with other majors or minors depending on their career interests. In this way, students can tailor their educational experience to provide excellent preparation for a wide range of careers, including law, business, medicine, technology, public relations, government, journalism, education, writing, editing, communications and social work.

- Students who lack background preparation in a specific area will be required to take an undergraduate course and earn a minimum B grade in that course as a prerequisite to further graduate study. The student's advisory group, in consultation with the graduate coordinator, will determine which course prerequisites are needed.
- No more than one-half of a graduate student's coursework may be taken in 50000-level courses.
- Grades below C are not counted toward completion of requirements for the degree.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate knowledge of the history of philosophy from the classical period to the present day, of the various fields of philosophical inquiry and of central philosophical questions, both historical and contemporary.
2. Articulate and defend their positions through philosophical argumentation in both written and oral form.
3. Successfully navigate the professional academic world and prepare strong applications to doctoral programs, if they choose to continue their studies after completion of the master's degree.

Full Description

The Master of Arts degree in Philosophy offers intensive, in-depth study of philosophy, with particular attention to the diversity and plurality of philosophical methods, perspectives and traditions and their relation to other disciplines.

Most graduates go on to pursue doctoral degrees in philosophy, while others are seeking a terminal master's degree in philosophy to supplement and enhance their careers or their work in other disciplines.

The graduate program stresses both breadth and depth and offers students the option of a thesis or a non-thesis research project as a culminating experience.

Full Description

The Philosophy minor helps students develop skills such as critical thinking, careful reading and analysis of texts, argumentative and analytical writing, creative problem solving, effective communication and global literacy, all of which are vital to success in a wide range of professions.

The minor provides excellent preparation for graduate school entrance exams (such as the GRE, LSAT and GMAT) and enhances the career preparation students obtain in their major field.

Philosophy minors develop these important skills while being introduced to a fascinating discipline which considers basic, timeless questions such as:

- "What is the nature of reality?"
- "What (if anything) can I know with certainty?"
- "What kind of life should I live?"

About This Program

The Bachelor of Arts degree in Physics prepares students for such varied fields as secondary education, patent law, science journalism or interdisciplinary science careers. The core requirements permit a large number of elective courses, which allow students to complete a minor or second major in preparation for an interdisciplinary career. This program is well suited for those with a strong interest not only in science, but also a non-science field. Students completing the program may choose to continue their physics studies at the graduate level.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete the following:

1. Elementary I and II of any language (or equivalent) **and**
2. One of the following options:
   a. Intermediate I and II of the same language

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer courses. This may be accomplished in one of three ways:

1. Passing a course beyond Elementary I through Intermediate II level
2. Receiving credit through one of the alternative credit programs offered by Kent State University
3. Demonstrating language proficiency comparable to Elementary II of a foreign language

Certain programs may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need a particular language proficiency.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Graduation Requirements

Minimum Major GPA	Minimum Overall GPA

- The following courses may not count towards the Physics major requirements: PHY 11030, PHY 21040, PHY 21041, PHY 21430 and PHY 21431.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

[1] All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

[2] The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Physics is a professionally oriented program that serves as preparation either for graduate work in physics or for entrance into positions in a variety of industries or government service.

The Physics major comprises the following concentrations:

- The **Applied Physics** concentration prepares students for immediate entry into careers in industry. Course requirements include electronics, introduction to computer programming, and data analysis and computational physics techniques. While rooted in the basic principles of physics, this program is optimized for students concerned with the application of physics in practical devices and systems.
- The **Biological Sciences** concentration is interdisciplinary and for students with a strong interest in both physics and biology, who may wish to prepare for graduate study in biophysics or for work in a biotechnology company.
- The **Chemistry** concentration is interdisciplinary and designed for students with a strong interest in both physics and chemistry, who may wish to prepare for graduate study in chemical physics or for work in a high-technology materials-related research and development laboratory.
- The **Computer Science** concentration is interdisciplinary and provides a foundation in physics while emphasizing the use of computer software in scientific applications. Graduates are prepared for computer-related careers that require an understanding of the underlying science as well as knowledge of relevant computer applications.
- The **Entrepreneurship** concentration is interdisciplinary and designed to prepare physics majors for various aspects of starting or managing a scientific business.
- The **Mathematical Physics** concentration is interdisciplinary and provides students with a strong understanding of applied physical theory, its applications and the underlying mathematics. This training, valuable for start-up positions with a number of industries, may also serve as preparation for graduate work in either physics or mathematics.
- The **Pre-Medicine/Pre-Osteopathy/Pre-Podiatry** concentration is interdisciplinary and designed to prepare physics majors for further study leading to careers in medicine.
- The **Research** concentration prepares majors for further study at the graduate level. This program trains students in logical thinking and problem solving using both analytical and computational methods. It also furnishes students with a comprehensive understanding of the basic laws and principles that govern the physical world. Academic assessment and GRE scores keep the program up-to-date via curricular revisions. This program is a popular stepping stone to graduate degrees not only in physics, but also in engineering, astronomy/astrophysics and materials science.

POL 60507 CONFLICT TRANSFORMATION AND RECONCILIATION 3 Credit Hours
(Cross-listed with PACS 60070)(Slashed with POL 70507) Throughout the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict toward various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda's Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

(Slashed with PACS 60070 and POL 60507) Throughout the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict toward various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda's Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.

1. Communicate the basic concepts of sustainable development policy approaches to global issues and their relevance to the student's major field of study.
2. Articulate the importance of international cooperation for addressing global issues.
3. Articulate the importance of strong local, national and international public institutions for addressing global issues.

Full Description

The Global Issues undergraduate certificate examines a range of global issues through the framework of sustainable development, an approach to public policy-making that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Sustainable development policies seek to address the world's most pressing "wicked problems" through cooperative action as a global community. Examples include poverty, hunger, inequality, access to education, health and well-being, climate change and sustainable communities. The certificate is an excellent complement to any major and enables students to more fully understand how their major field of study can have a positive impact on the world around them.

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in Political Science empowers students to be engaged global citizens and informed consumers of information who are competitive in a range of careers. Graduates work in the public and private sectors across the United States and around the globe. Many also go on to graduate programs or to law school.

Students in the major are provided internship and study abroad opportunities, including two semester-long, 15-credit hour internship programs, one in Washington, D.C., and one in Columbus, Ohio. In addition, the Department of Political Science offers study abroad courses in multiple countries during the summer, and students often also take advantage of Kent State programs in Florence, Italy, and Geneva, Switzerland. More information can be found on the Department of Political Science website.

The Political Science major comprises the following concentrations:

- The **American Politics** concentration investigates the political context of life in the United States in courses on public opinion, elections and the media, as well as Congress, the presidency and the courts.
- The **International Relations-Comparative Politics** concentration focuses on international policy and politics, including aid and development, energy and oil, human rights and regions of the world (e.g., Latin America, Middle East, Russia).
- The **General** concentration allows students to design their own specialization rather than choosing a specific area to concentrate.
- The **Public Policy** concentration explores how governments address major policy questions such as health care, environmental protection and foreign policy. Courses introduce students not only to policy questions and implications, but also to the skills involved in policy analysis.

Full Description

The Master of Arts degree in Political Science focuses broadly on the dynamics surrounding representation, equity, conflict, human rights, development and conflict resolution. Students delve into the scholarship on these dynamics (among others) in an interdisciplinary and theoretically sophisticated way, thinking about how the political process and government policy-making affect the lives of citizens, and how citizens influence those processes.

The Political Science major comprises the following concentrations:

- American Politics and Policy
- Conflict Analysis and Management

About This Program

The Political Science minor is for students who have an ongoing interest in politics — at the local, state, national or international level — but whose primary area of study does not allow a second major. Students study the general subject matter of political science and then advance to specialty areas that meet their own interests, needs and plans of study.

Full Description

The Pre-Law minor provides a background for the study of law through challenging coursework that reinforces and extends the liberal arts foundation gained through the Kent Core. It prepares students for advanced analytical and writing dexterity, and introduces them to the social and governmental structures that underlie the law.

No specific course of study is required for admission to law school. Most law schools require a bachelor's degree for admission. The bachelor's degree may be from any discipline or college. Kent State University also has a number of 3+3 agreements with law schools in Ohio. Interested students should consult with the Pre-Law Center.

Law schools and alternative legal employment emphasize the value of reading comprehension, analytical skills, oral advocacy and a good command of written English. While these skills can be obtained in various ways, a general liberal arts background is recommended. Courses in English literature, American history and government are considered essential. Many pre-law students choose a major in political science, history, sociology, psychology, economics or English. A Bachelor of Integrative Studies degree is suitable if carefully planned.

Students considering law as a career should seek individual advising from the Pre-Law Center or in their major department. A list of pre-law advisors is available in the college office. Consultation with a pre-law advisor is urged, regardless of the student's major, minor or college. The Pre-Law Center can also supply information on LSAT registration, pre-law planning guides, information on law school admissions and financial aid information. The center sponsors an inter-collegiate competitive Moot Court team; a Phi Alpha Delta legal fraternity; a pre-law club; and a Pre-Law Service, Citizenship and Justice living learning community, as well as law-related scholarships and legal internships.

Full Description

The Washington Program in National Issues was established in 1973 through the initiative of Washington-based alumni who sought to provide Kent State University undergraduates with a unique living and learning experience in the nation’s capital.

The purpose of the program is to accomplish the following:

- Facilitate learning about the U.S. political system through briefings with government officials and other working professionals in Washington, DC
- Develop a personal understanding of the demands and rewards of the professional work world through an internship experience
- Encourage initiative through individualized research, which may involve resources at the Library of Congress, among other sit

Students participate in internships — in places such as Capitol Hill, in a governmental agency or with an interest group — and attend seminars. The program requires a semester-long residence in the Washington, DC, area. Alumni in the nation's capital continue to support the program by introducing students to the culture and serving as consultants and mentors.

Specifically, students should demonstrate that they are able to appropriately conduct and interpret sophisticated statistical analyses. Note, however, that this requirement does not necessarily suggest that students need to develop a new statistical technique or methodology.

Candidacy Requirement

- Students who have been admitted into the doctoral program will be considered for Ph.D. candidacy after they have met all requirements for the M.A. degree and have passed a qualifying examination in a major area of specialization in psychology.

Full Description

The Ph.D. degree in Clinical Psychology prepares students to conduct research, to serve on college and university faculties and to provide a range of clinical services. The program adheres to the clinical scientist model of education and training, which is founded on the idea that the practice of psychology should be based on the science of psychology, and that practicing psychologists should be able to translate clinical observation into researchable questions and pursue new knowledge on the basis of their observations. Students are expected to develop an area of special expertise in research, and opportunities for specialized clinical training are offered.

In addition to general training in clinical psychology, students may receive specialized research and clinical training in one of the following areas: adult psychopathology, assessment, child, health or neuropsychology.

The Clinical Psychology major includes the following optional concentration:

- The **Quantitative Methods of Psychology** optional concentration trains individuals in some of the more recent developments of statistical science and, particularly, the application of these developments to real-world psychological data. One unique feature of the concentration is the focus on the application of quantitative methods in psychological research; although department faculty

members have expertise in an area of statistics, they also conduct research in a substantive area of psychology. The concentration is intended for those students who intend to pursue academic careers, wherein the use of advanced quantitative methods in one's own program of research is highly valued, and who also intend to teach undergraduate or graduate courses in statistical methods.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

1 All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

2 The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Policies
Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

1 Psychologists with strong quantitative skills often are expected to disseminate statistical knowledge to their colleagues; thus, students who pursue the concentration must have at least one practicum experience. This teaching experience can be as an instructor of an undergraduate course (PSYC 21621, PSYC 31684) or becoming the teaching assistant for the first-year graduate sequence.

2 Students must demonstrate mastery of quantitative methodology through the inclusion of an advanced technique as part of a milestone or independent project that has been approved by the student's quantitative mentor. Students should either (a) complete a thesis/dissertation that has a strong quantitative component or (b) publish a first-authored quantitative-focused paper or a first-authored content paper with sophisticated analyses, as determined by the student's quantitative mentor. Specifically, students should demonstrate that they are able to appropriately conduct and interpret sophisticated statistical analyses. Note, however, that this requirement does not necessarily suggest that students need to develop a new statistical technique or methodology.

Candidacy Requirements

- Students who have been admitted into the doctoral program will be considered for Ph.D. candidacy after they have met all requirements for the M.A. degree and have passed a qualifying examination in a major area of specialization in psychology.
- The Department of Psychological Sciences reserves the right to separate from the program a student who, in the opinion of a duly constituted departmental committee, is not likely to succeed professionally despite earning acceptable grades.
- Proficiency in a foreign language is not a requirement for the Ph.D. degree.

Full Description

The Ph.D. degree in Psychological Science offers doctoral education and training in psychological science, with specializations in behavioral neuroscience, cognitive psychology, developmental psychology, social psychology and health psychology. The curriculum and other aspects of training offered by the Department of Psychological Sciences prepare students for careers in research and teaching. The program is strongly research-oriented.

The Psychological Science major includes the following optional concentration:

- The **Quantitative Methods of Psychology** optional concentration trains individuals in some of the more recent developments of statistical science and, particularly, the application of these developments to real-world psychological data. One unique feature of the concentration is the focus on the application of quantitative methods in psychological research; although department faculty members have expertise in an area of statistics, they also conduct research in a substantive area of psychology. The concentration is intended for those students who intend to pursue academic careers, wherein the use of advanced quantitative methods in one's own program of research is highly valued, and who also intend to teach undergraduate or graduate courses in statistical methods.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete the following:

1. Elementary I and II of any language (or equivalent) **and**
2. One of the following options:
   a. Intermediate I and II of the same language
   b. Elementary I and II of a second language
   c. Any combination of two courses from the following list:
      i. Intermediate I of the same language
      ii. One to two college-level course(s) completed outside the United States
      iii. Courses: ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer courses. This may be accomplished in one of three ways:

1. Passing a course beyond Elementary I through Intermediate II level
2. Receiving credit through one of the alternative credit programs offered by Kent State University
3. Demonstrating language proficiency comparable to Elementary II of a foreign language

Certain programs may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need a particular language proficiency.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

Students in the Bachelor of Arts in Psychology apply the science of understanding and explaining thoughts, emotions and behavior to solving real-world problems. Topics include stress, biological influences on behavior, growth and development of children and diagnosis and treatment of psychological disorders. Elective courses may be used to specialize in a number of areas of psychology and to gain hands-on experience in research labs. The degree prepares students for graduate school and employment in a range of fields, including clinical, applied and experimental areas of psychology and related fields such as education, law, human resources and health care.

The Psychology major includes the following optional concentrations:

- The **Child Psychology** concentration is designed for students who are interested specifically in children and adolescents. Topics include child development, psychological disorders of childhood and adolescence, children's cognitive processes, personality development and child-related research experience. The concentration prepares students for graduate study and employment in a range of fields, including counseling for children, clinical psychology1, school psychology, school counseling and employment in settings such as child development centers and related agencies.
- The **Counseling Careers** concentration is designed to prepare students for employment in a range of fields and for master's-level study in all fields of counseling and clinical psychology.[1] Topics include human adjustment, stress and coping, human development, personality, psychological disorders, treatment and intervention techniques, psychometrics, psychopharmacology and clinical or counseling-related research experience.

Students interested in other career paths within psychology may pursue the major without a concentration.[1]

[1] Students who wish to pursue a PhD in clinical or experimental psychology will want to plan their coursework and hands-on activities (research and internships) carefully to increase their chances of admission to the PhD.

Foreign Language College Requirement, B.S.

- Students pursuing the Bachelor of Science degree in the College of Arts and Sciences must complete 8 credit hours of foreign language.[1]
- The following programs are exempt from this requirement: The Bachelor of Science in Cybercriminology and the Bachelor of Science in Medical Laboratory Science.[2]
- Minimum Elementary I and II of the same language

[1] All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 8 credit hours and two courses, they will complete remaining credit hours with general electives.

[2] The Bachelor of Science in Medical Laboratory Science exemption exists under another college policy (Three-Plus-One Programs). The Bachelor of Science in Cybercriminology exemption is due to its extensive collaboration with and contribution from the Information Technology program in the College of Applied and Technical Studies, which does not have a foreign language requirement.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Science degree in Psychology is designed to prepare students for graduate study in psychology, medicine, and related fields. Topics include stress and trauma, neural basis of learning and memory, social and biological influences on mental and physical health, growth and development of children and diagnosis and treatment of psychological disorders. Students evaluate and interpret data and gain

hands-on experience through internships or conducting research. Elective courses may be used to specialize in a number of areas of psychology and related fields such as neuroscience. The degree prepares students for graduate study and employment in a range of fields, including clinical psychology, research and experimental areas of psychology such as cognitive science and behavioral neuroscience and related fields such as medicine and neuroscience.

The Psychology major includes the following optional concentrations:

- The **Child Psychology** concentration is designed to prepare students for graduate study in clinical psychology, research and experimental areas of psychology, school counseling, developmental psychology, school psychology or related disciplines that require knowledge of interpersonal relationships and human development. Topics include child development, psychological disorders of childhood and adolescence, children's cognitive processes, personality development and child-related research experience.
- The **Pre-Medicine/Pre-Podiatry** concentration prepares students to take the Medical College Admission Test (MCAT) and have the required prerequisites necessary for applying to medical school.

Students may declare the program with no concentration and develop a plan of study to meet their career path within psychology.

The program prepares graduates as next-generation leaders in this complex, global, and interconnected field. The flexible online program is structured to fit the lives of full-time working professionals.

The Criminology and Criminal Justice major comprises the following concentrations:

- The **Global Security** concentration focuses on issues related to global security, U.S. national security policy and strategy, as well as transnational issues and the concerns of other countries or regions. It provides students with a strong foundation to confront the ever-changing, fast-paced, and challenging international security environment. With an emphasis on traditional and emerging transnational security threats, students are prepared for analytical, operational and leadership careers in global security in the public and private sectors. The goal is to produce a new generation of analysts, policymakers and scholars knowledgeable about the wide range of international and national security problems and foreign policy issues of the 21st century.
- The **Policing** concentration examines the historical ideas of police service and the lessons that can be learned from those ideas. Students learn about the research that has challenged traditional ideas and the implications of that research for revision. The program provides students the tools to analyze the implications of contemporary research to guide new innovations in policies, management, strategies and tactics of police service delivery.
- The **Victimology** concentration provides specialized knowledge about the scientific study of crime victims, their treatment within the criminal and juvenile justice systems, the legal rights of victims and victim assistance and restorative justice programs. This concentration will prepare students to develop and lead initiatives that help prevent victimization, to engage in victimological research

and evaluation, and to respond to victims in culturally appropriate ways.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in Criminology and Justice Studies takes an interdisciplinary approach to the study of crime, law and justice. The curriculum provides a firm understanding of the basic institutions of the criminal justice system. Students are also exposed to criminological theory and diversity courses, which help them understand the complex relationship between the individual, society and the criminal justice system. The program stresses effective writing and analytical skills. Students are afforded the opportunity to earn credit through internship placements.

Consultations with faculty and advisors enable students to make informed choices about which combination of courses will maximize their preparation for future careers and graduate education. Such specializations include policing; corrections; victimology; law and society; criminology and deviance; and justice and human relations.

Criminology and Justice Studies students may apply early to the M.A. degree in Criminology and Criminal Justice and double count 9 credit

hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

About This Program

The Society, Health and Medicine minor exposes students to the sociocultural, political and organizational dimensions of health and medicine while also promoting an understanding of the social determinants of health.

Students combine core courses from medical sociology with a series of electives of their choosing. Electives cut across many disciplines and content areas, allowing students to design a minor that aligns with their academic and career goals. The minor is well suited to students with an academic interest in health, medicine or health disparities, as well as those pursuing careers in the health professions.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students.

First-Year Students on the Kent Campus: First-year admission policy on the Kent Campus is selective. Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. For more information on admissions, contact the Regional Campuses admissions offices.

International Students: All international students must provide proof of proficiency of the English language (unless they meet specific exceptions) through the submission of an English language proficiency test score or by completing English language classes at Kent State's English as a Second Language Center before entering their program. For more information, visit the admissions website for international students.

Former Students: Former Kent State students who have not attended another institution since Kent State and were not academically dismissed will complete the re-enrollment process through the Financial, Billing and Enrollment Center. Former students who attended another college or university since leaving Kent State must apply for admissions as a transfer or post-undergraduate student.

Transfer Students: Students who attended an educational institution after graduating from high school or earning their GED must apply as transfer students. For more information, visit the admissions website for transfer students.

Admission policies for undergraduate students may be found in the University Catalog's Academic Policies.

Students may be required to meet certain criteria to progress in their program. Any progression requirements will be listed on the program's Coursework tab

Full Description

The Bachelor of Arts degree in Sociology provides broad training in the theories and methods that sociologists use to understand contemporary social issues and problems. Students are encouraged to think critically as they examine issues ranging from small group behavior to global social movements. The core curriculum focuses on social inequalities, social psychology and health and illness. In addition, the program offers courses on a variety of topics that include urban living, deviant behavior, religion and family.

Sociology students are increasingly interested in courses that prepare them for meaningful careers that change the world (Seemiller and Grace 2016). One only needs to look at Black Lives Matter or the Sunrise Movement to see evidence of this generational disposition. Sociology, as a discipline, provides students with rigorous coursework on social inequality and social change and helps students find careers in government, teaching, community organizing, non-governmental organizations and social work.

Students may work with faculty and advisors to pursue their own individualized specialization in such areas as medical sociology; social inequalities; sociological social psychology; social change and social justice; family and life course sociology; and social problems, deviance and crime.

Sociology students may apply early to the M.A. degree in Sociology and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

Sociology - Minor

College of Arts and Sciences
Department of Sociology and Criminology
www.kent.edu/sociology

About This Program

The Sociology minor provides students with a broad understanding of the theoretical, methodological and substantive issues relevant to the field, as well as the tools necessary to apply this knowledge to other areas of study. Students explore the intersections between culture, social structure and individual behavior by examining issues related to social inequality, health and healthcare, deviance, families and family violence, urban communities, social psychology and more.

The skills developed in the Sociology minor allow students to connect their own life experiences to the experiences of other people, communities and cultures.

Program Policies

Foreign Language Requirements

In general, students may elect any foreign language taught through the Department of Modern and Classical Language Studies. However, certain majors, concentrations and minors require specific languages or limit the languages from which students may choose. In addition, students who plan to pursue graduate study may need particular languages for that study. In such cases, students should seek the advice of the appropriate department before selecting a language.

Progress Toward Fulfillment

College of Arts and Sciences students are encouraged to begin meeting the foreign language requirement as early as possible in their program to ensure timely degree completion.

Mandatory Outcomes Assessment

In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Bachelor of Arts degree in Economics equips students with a variety of skills sought by employers, including conceptualizing and solving problems and locating, organizing and analyzing relevant data.

In their junior year, students learn microeconomic and macroeconomic theory and take an econometrics class to learn data analysis skills. Students then take a series of electives that deal with vital current topics relevant to many careers in which these theories and skills are applied, such as the U.S. financial and banking system, economic relations between the United States and foreign countries; government spending and taxation policies; and the U.S. health system and policy options.

In their senior year, students take a capstone course that utilizes and applies the theory, skills and institutional knowledge learned in the program.

Kent State University offers both this B.A. degree, as well as a B.B.A. degree in Economics.

Economics students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

Full Description

The Ph.D. degree in Biomedical Sciences–Human Evolutionary Biology emphasizes a biological approach to research problems focusing on human and non-human anthropology. The program focuses on human anatomy and neuroanatomy, developmental biology, evolutionary genetics, mammalian physiology, paleontology and experimental archaeology. Many graduates use their training and teaching experience to enter anthropology or corporate teaching positions. Most graduates are also prepared to teach both human anatomy and other cognate fields (neuroanatomy, cell biology, physiology, genetics) in demand at most medical schools.

The Ph.D. degree is offered in consortium with Northeast Ohio Medical University (NEOMED). Faculty in the program are drawn from the departments of Anthropology and the Biological Sciences at Kent State and the Department of Anatomy and Neurobiology at NEOMED. This inter-departmental and inter-institutional structure provides significant resources to the doctoral candidates, including the Hammon-Todd human and primate skeletal collection, state-of-the-art laboratories for neuroanatomy, anatomy, genetics, paleontology, biomechanics and experimental archaeology. Additional resources are available to students

through the Cleveland Museum of National History, the Cleveland Metroparks zoo and other local, national and international collaborative relationships.

Candidates for the Ph.D. are expected to engage, to the extent possible, in other activities that benefit their professional development. The teaching of laboratory and lecture course, as a appropriate is considered valuable, and each student should have this experience during their graduate career. This includes those students on non-teaching scholarships or research appointments during their tenure. Students should also seek membership in professional organizations, attend meetings to present research results and maintain currency in the relevant literature.

Full Description

The Master of Science degree in Biomedical Sciences–Physiology Interdisciplinary prepares graduates in areas that include cardiovascular, pulmonary, endocrine and neuroendocrine, reproductive or exercise physiology. In this context, emphasis is placed on an integrative approach for both research and graduate education. As with other program areas, the Biomedical Sciences–Physiology Interdisciplinary major takes advantage of the latest molecular and cellular techniques to address questions related to human diseases.

The M.S. degree is offered in consortium with Cleveland Clinic and Northeast Ohio Medical University (NEOMED). Faculty members are drawn from various departments at Kent State and the other two institutions. Although graduate work may be completed in any of the various research areas, faculty are listed in two general specializations: (1) environmental and comparative physiology and (2) cardiopulmonary and exercise physiology. Each specialization addresses different subject areas of physiology and each has an associated training faculty.

The degree program is research oriented and designed to provide students with a thorough grounding in physiological principles and techniques within several well-defined focus areas.

Thereafter, it is expected that a doctoral candidate will continuously register for BMS 80299 each semester until all requirements for the degree have been met. As soon after completion of candidacy examination as possible, the dissertation committee will be established, consisting of the guidance committee and an outside discipline member – a graduate faculty member from another department at Kent State University or another program of the School of Biomedical Sciences. The student will submit to this committee their prospectus for the dissertation. The format of the prospectus will parallel that utilized for NIH grant proposals (without biographical, budget and facilities information). The dissertation committee may elect to examine the candidate on the proposal and may accept it as submitted or reject it with specific reasons and recommendations for reformulation.

Full Description

The Ph.D. degree in Biomedical Sciences–Physiology Interdisciplinary prepares graduates in areas that include cardiovascular, pulmonary, endocrine and neuroendocrine, reproductive or exercise physiology. In this context, emphasis is placed on an integrative approach for both research and graduate education. As with other program areas, the physiology program takes advantage of the latest molecular and cellular techniques to address questions related to human diseases.

The Ph.D. degree is offered in consortium with Cleveland Clinic and Northeast Ohio Medical University. Faculty members are drawn from various departments at Kent State and the other two institutions. Although graduate work may be completed in any of the various research areas, faculty are listed in two general specializations: (1) environmental and comparative physiology and (2) cardiopulmonary and exercise physiology. Each specialization addresses different subject areas of physiology and each has an associated training faculty.

The degree program is research oriented and designed to provide students with a thorough grounding in physiological principles and techniques within several well-defined focus areas.

Gender and Sexuality Studies (GSS)

GSS 10100 INTRODUCTION TO GENDER AND SEXUALITY STUDIES 3 Credit Hours
This course explores gender and sexuality studies from a multidisciplinary perspective. This course examines the cultural, social and biological constructs of sex and gender and interrogates the structures — governmental, familial, religious and social — that have informed historical and current thinking about sex and gender. This course includes global histories and definitions of gender and sexuality across time and place, and asks students to ponder: why is gender a primary organizing societal principle, and how do race, class, sexuality and disability status intersect with it?
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

GSS 30500 METHODOLOGIES AND PRAXIS IN GENDER AND SEXUALITY STUDIES 3 Credit Hours
This course provides an arena for individual and group inquiry as well as conversations on methodologies and practices in gender studies pedagogy and research with emphases on multi-, inter- and transdisciplinary approaches. The topics reflect the crucial linkage between knowledge as we do knowledge, ethics as we embrace ethics, practices and traditions as they play and accrue within the real academic endeavors of the fields which converge and diverge in gender studies and its closely kindred variants. This course offers different methodological entrance points of use and value. At once, we study their deployment in actual practice. Moving beyond research practice, the course considers, too, the multifaceted praxes of scholars, teachers and cohorts of all kinds involved in the actional vision, mission, strategies, tactical planning and programmings, record-keeping, self-appraisals and archives at the heart of gender and sexuality studies.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture

Introduces students to the myriad of ways in which they are individually and collectively connected to the global community. Looking specifically at ways in which people are interconnected as consumers, patients, donors and participants in discourse, the course introduces students to the concepts, institutions and dynamics of globalization. Through assignments that focus on important global issues and engage students directly with the global community, students (a) learn how to engage the global community as informed consumers of information, (b) understand the basic structure of the global political arena, (c) learn how to engage actively and consciously within that arena and (d) understand the ways in which their daily behavior impacts global trends.
Prerequisite: None.

INTS 30001 "TRUE FACTS": MAKING SENSE OF YOUR WORLD 3 Credit Hours
How can you find a reliable answer to a question you are curious about? “Research methods” sometimes seems like an intimidating subject, but it is really just a chance to think about how to find good answers to important questions. Scholars use a wide variety of methods, and this course provides an introduction to many of them, preparing students to be informed, critical consumers of information; to succeed in future research projects; and to take additional methods courses with confidence if they choose.

What is the everyday experience of economic life like in these and other conditions? What can that tell us about how markets work on the local, national and global levels?
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

INTS 30301 HUMAN SECURITY 3 Credit Hours
For a century or more, leaders around the globe have defined “national security” narrowly, focusing nearly entirely on perceived threats of physical violence against the systems they led. A less state-centric and more person-centric conceptualization of security recognizes that the threats to human security include not only violence against a state or economic system. Food insecurity, for instance, whether caused by famine, poverty, maldistribution of resources or structural disparities in access (for instance, so called “food deserts”) undermines the security not only of individuals, but communities and, thereby, leadership. Climate change has caused land erosion and, thereby, resource evolution and depletion in various parts of the globe, leaving whole communities (and thereby states) economically and physically vulnerable. This course explores multiple dimensions of human (in)security, examines related policies and stretches analytic muscles in considering potential solutions to causes of insecurity.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

INTS 30501 ORDER AND RESISTANCE 3 Credit Hours
When the hierarchies of economic systems or state institutions are unresponsive to the needs of society, movements develop to resist the prevailing ruling order. Sometimes social movements seek to empower and include new members of society. Other times they mobilize on constructed grievances that seek to maintain untenable social exclusions. Whether demanding more equality or something else, these ordinary people in social movements enter a conversation with the people who govern them and have the full weight of the state apparatus behind them. This course reflects on this process of social struggle in order to understand the political, economic and social costs of supporting the continued exclusion of certain groups. It aims to understand political change and violence as a struggle played out between state authorities and social movements. After examining case studies of such state-society struggles from around the world, students are guided to consider what role they can each play to constructively contribute to the global society.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

INTS 30570 PALESTINE AND ISRAEL (DIVG) 3 Credit Hours

WMST 20101 INTRODUCTION TO WOMEN'S STUDIES: TRADITIONS, TRAJECTORIES, TROUBLES 3 Credit Hours
The course introduces students to Women's Studies - what it studies, how it came into being, what happened next. In focus are its traditions, its consequential contexts of struggle and protest, its pioneers, the multiple fields from which they came to this fresh-born academic hub. The course examines worldwide spread of WMST programs, their variant, evolving interests and work, the hounding, keenly felt disruptions and conflicts. We sample key scholarship with staying power; we peruse pieces across an interdisciplinary range; we visit early ideas now fallen out of favor, relegated to archives and/or bins. We also, importantly, consider how rifts and various troubles led to crucial metamorphoses as well as new fields.

This course opens an arena within which to study real engagements of thinkers, theorists, their thoughts, theories, arguments, critical appraisals, etc. as they have emerged, developed and contended. WMST 30201 WITCHES: THE MONSTROUS FEMININE 3 Credit Hours
This course counterbalances student inquiry with lectures and materials at once grounded in women's and gender/sexuality studies and reliant on a range of interdisciplinary sources. The course centers two key touchstones: witch and monstrous feminine. Course trajectories traverse history, culture, religion, politics and academic and popular renderings to locate keys: hunts, trials, dynamics of allegation, guilt and innocence. The course aims to 'correct' traditions of objectification and typecasting by interrogating real subjectivities and the dimensionality of feminine, monstrous and witch.
Prerequisite: None.

Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 30202 FEMINIST HUMOR: DISARMING LAUGHTER, DISRUPTIVE DISCOURSE 3 Credit Hours

The most fundamental pursuits are inductive in nature, grounding studies in actual discursive practice, the realities of women's politically-charged and personally-resonant humor, laughter and feminisms as they converge in contexts both private and public, mediated and live/face-to-face. Scholarship on feminist humor provides our final framing.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 30301 REPRESENTATIONS OF WOMEN AND FEMINISM IN POPULAR CULTURE 3 Credit Hours
The basic challenge of this course is that it requires the study of two things simultaneously: 'women' and 'women as represented' in popular culture. From the classic object of woman sexed and gendered, feminist study has evolved to also consider woman the subject, the autonomous person with agency within her environment. The course covers much ground: dominant narratives; the often-overlapping contexts of media, politics, morality and religion; the signs inherent in language and imagery; and the power asymmetry and embattled definitions of “woman.” Throughout the course, we employ varied approaches that resist any one right answer, easy dogmatic conclusion or evaluation of the narratives.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 30302 GLOBAL FEMINISMS: A WORLD AND CENTURY OF WOMEN'S ACTIVISM 3 Credit Hours
This course explores real and diverse circumstances where feminisms have emerged. Over the semester, we examine feminist movements and their respective contexts; feminists' distinct directions of thought and action; individuals, groups and organizations that have participated in defining feminism; and finally, the connectivity that makes transnational feminist work possible. The course is grounded in sites of 'agonizing and organizing,' as well as in those feminist narratives that search for cohesion even where there is tension. Finally, throughout the course, we embrace and explore complexities of unresolved issues: none more basic than the still controversial claim that women's rights are human rights.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

WMST 32323 RAPE CULTURE: RETHINKING DANGER, POWER, SEX AND FEMINIST FRAMINGS 3 Credit Hours
Nothing is simple, incontrovertible or 'cool' in 'rape culture.' The subject, act and discourse surrounding rape is embedded in culture and confounded by culture: by opinions, standpoints, simplistic arguments and personal and political interests. Feminist framings of 'rape culture' invite different inquiry: into mythology, ideology, theory and alternative interpretations of bodies in a given context. Famed feminist Andrea Dworkin interrogates rape culture's center: powers practically guaranteed, moreover "exercised… [and] protected… by religion … by universities … [even] by [poets and artists], the unacknowledged legislators of the world." This course utilizes multiple approaches to study and interrogate 'rape culture,' each of which illuminates this inherently dark subject in new light.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

WMST 41199 CAPSTONE IN WOMEN'S STUDIES (ELR) 3 Credit Hours
The capstone project is a guided undertaking that serves as culmination of students' experiences. The emphasis is 'putting it all together,' integrating the Women's Studies minor into 'the bigger picture': major(s), other concentrations, research, envisioned graduate study and/or vocation. WMST Capstone can be taken junior or senior year, contrived/structured by students in consultation with faculty advisor(s), ideally advisors from major and minor. Net outcome may be paper--senior thesis for students who desire such--presentation, curated portfolio of prior academic work.
Prerequisite: Junior Standing.
Schedule Type: Project or Capstone
Contact Hours: 3 lecture
Grade Mode: Standard Letter
Attributes: Experiential Learning Requirement

WMST 44321 PIVOTAL PRAXIS: EXPERIMENTS IN ACTIONABLE FEMINISM 3 Credit Hours
This course engages students at the pumping heart of the whole feminist story: its actual work. For feminists on the ground, pivotal praxis is feminism: getting the vote, demanding equality, wrangling through contentious issues, women's marches and campaigns. In a word: practice. Experiments in practical, actional feminism. Our study probes ideas that hit streets as well as ideas born of "done things." Under scrutiny are scenes: socio-political, cultural spaces wherein women enact change, determine outcomes recognized as feminist. These include but are not limited to the realpolitik of suffrage vs. anti-suffrage, consciousness-raising, the famed national women's convention in Houston, internet activism, transversal coalition-building across boundaries/borders. The course provides opportunity for students' own experiments and exercises in feminist praxis.
Prerequisite: None.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

Full Description

The Bachelor of Arts degree in Gender and Sexuality Studies takes a multidisciplinary and intersectional approach to examining ideas and processes that shape people's understanding about gender, sexualities and bodies throughout space and time. Scholarly investigation and production in this discipline emerged from sociological inquiry on human sexuality as well as feminist, LGBTQ and anti-racist histories and activism to combat social inequality. This program skillfully provides both the theoretical and praxis of the field while integrating these different and contributing perspectives regarding gender and sexuality.

At the heart of women's studies are women's demands for recognition—as capable scholars hungry to know—about themselves, their untold histories, their currently silenced voices, often invisible lives. Program Learning Outcomes

Graduates of this program will be able to:

1. Acquire and employ new lenses of study into subjects and experiences and very names of "woman" or "women" in contexts wherein such a designation matters.
2. Employ new approaches to knowledge, new strategies of engagement with "others" as well as peers, new methods of research, new approaches to critical analysis and appraisal and new forms of praxis.
3. Converse — and become conversant — with multiple feminisms; divergent purposes; and the positions and directions of variant studies, histories and commentaries through aptly selected/combined lenses and filters born of women's studies traditions.
4. Interrogate and be able to continually interrogate the expansive lexicon of sexed- and gendered-terms to which "woman" as a question and "man" as a given gave rise.
5. Deepen, expand and invigorate the "thought and theory" that inform the several key fields that continue to inform, challenge and shape the unstaid, unstill universe of women's studies (e.g., sex, gender, feminism, intersectionality, identity politics, sisterhood, womanism).
6. Understand and build skills to engage in both feminist *perspective-taking* and actual *praxis*: the techniques and tools of navigating difference, seeking transversals, meeting demands of fieldwork and attaining goals.

Full Description

The Women's Studies minor offers both diversity and depth of coursework, ranging from feminist humor to feminism as serious theory and world-making practice. Students can immerse themselves in experiential learning via internships and applied work.

Through inventive classes, facilitated engagement in discussion and carefully crafted opportunities for guided independent work, the minor embraces a logic of study initiated from many start-points; grounded in

cores of feminist thought, substance and practice; enriched by multiple disciplines and capped by challenge.

The minor's curriculum aims to satisfy students' desire for both a solid foundation in women's studies and a taste of the diverse, complex and often contentious field. The minor's aim is to deliver coursework that speaks to students' very specific scholarly interests as well as to their passions and persuasions, both personal and political.

PACS 60001 ADVANCED NEGOTIATION 3 Credit Hours
Conflict and negotiation are normal and unavoidable parts of life. This course goes beyond basic negation concepts like principled negotiation, focusing on topics including the psychology of negotiation, power, international relations, technology and other advanced topics. We cover issues of information asymmetry; power; ethics; and multi-party, iterative and collaborative negotiations. We use research in negotiation and research on prior case studies to illustrate topics. This course is highly interactive, focusing on experiential learning and education. Evaluation of performance includes experiential exams, reflection papers and written understanding and analysis of real-world negotiations. Simulations and games are used in class frequently to illustrate concepts.
Prerequisite: Graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

PACS 60002 ADVANCED MEDIATION 3 Credit Hours
This course provides students with a conceptual understanding of mediation as well as practical mediation skills. It enables them to work as intermediaries who can assist conflict parties to reflect on the sources and dynamics of their conflict; develop mutually acceptable solutions and foster constructive, sustainable relationships. The course starts with essential concepts and skills for mediating small-scale interpersonal conflicts. It then addresses more complex inter-group, multiparty conflicts as well as deep-rooted structural conflicts. Through class discussions on readings and simulation exercises, students tackle questions such as how to work on conflicts in which there are many competing issues, goals and priorities involved; how to mediate enduring, intractable conflicts over identity, value and social structure; and how to respond to serious ethical dilemmas and power asymmetry. To meet these challenges, students not only critique the popularized framework of interest-based principled negotiation/mediation, but also develop holistic, creative third-party contributions to systemic social change.
Prerequisite: PACS 60000; and PACS 60001; and graduate standing.
Schedule Type: Seminar
Contact Hours: 3 other
Grade Mode: Standard Letter

PACS 60003 COMMUNITY-BASED CONFLICT TRANSFORMATION 3 Credit Hours
This course is designed to expand your knowledge of and practice competency in group and community level dynamics and peacebuilding techniques, giving you the skills and knowledge to turn divisive situations into strengthened and connected communities. The course begins by introducing theories of group processes, engagement and peace building. It then focuses on using case studies and experiential learning to master the skills and understand the applications of group and community peace building techniques. Case studies range across the areas of education, democracy, leadership, restorative justice, community conflict resolution and institutional change. Examples of topics include: theories of group process, engagement, participation, efficacy, dynamics and contact; community conflict resolution process such as inter-group dialogue and race dialogue; institutional change and strategic planning including evaluation and intervention for institutions, facilitation, stakeholder identification, planning, best practices and consensus decision making, ground rules, fishbowls and debriefs; and democracy and restorative justice practices including deliberative democracy, circle process and alternatives to violence project (AVP). The final course project involves students in applying these skills in partnership with a local community organization, group or neighborhood to address a community need or conflict. This class is taught in a flipped format.

PACS 60006 POST-CONFLICT PEACEBUILDING 3 Credit Hours
Throughout the course of the past decade, peacebuilding has become the concept du jour of not only the field of conflict resolution and peace studies, but of the larger fields of international relations, development studies, transitional justice and a host of other subfields and portions of area studies. This is partly due to the fact that peacebuilding has become somewhat of a monster, enveloping and consuming different approaches to conflict resolution, international relations and development studies to the point that almost any activity addressing those involved or suffering from conflicts can be included under its umbrella. However, given that the concept was originally coined to help address the tasks necessary to implement peace, this class largely, though not wholly, focuses on post-conflict peacebuilding and how different actors at different levels have roles to play in achieving sustainable peace in communities and regions and within states. We examine the concepts that make up peacebuilding, the manners in which peacebuilding efforts have been implemented by actors at multiple levels and the problems associated with dominant approaches to the topic.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60007 PRAXIS IN CONFLICT-SENSITIVE DEVELOPMENT 3 Credit Hours
This course enables students to build the practical skills necessary to advance socially responsible and sustainable development across conflict-affected societies and regions. A key concept explored throughout the course is conflict sensitivity - a sustained, iterative process of analyzing social conflict as a context of development work; understanding the interactions between the context and the development intervention; and making use of the understanding to maximize positive program impacts and minimize negative impacts. Students apply a range of theories to skill-building exercises in order to learn how to practice conflict-sensitive development. Through these experiential exercises, students think through the entirety of the development program cycle - from needs assessment to proposal development, fundraising, program implementation, capacity building, report writing, monitoring and evaluation and project phase-out. In each of these steps, students examine how to practice cultural sensitivity, stakeholder inclusion, local ownership and sustainability in a context-specific, adaptive manner. Case studies highlight essential themes selected from the Sustainable Development Goals (SDGs), a United Nations-sponsored list of 17 development goals such as poverty alleviation, food security, health, education, gender equity and climate change action. The course also opens dialogue on how to go beyond the conventional framework of conflict-sensitivity to realize conflict-transformative development.
Prerequisite: PACS 60000; and graduate standing.
Pre/corequisite: PACS 60005.
Schedule Type: Lecture
Contact Hours: 3 lecture

PACS 60042 PUBLIC SECTOR CONFLICT TRANSFORMATION 3 Credit Hours
This course examines the many ways that conflict and decision-making are made in the public sector. Some methods of public interaction and decision-making are familiar and well-studied. Others are less so, despite their increasing use in a variety of policy domains and other circumstances. Such is the case with conflict resolution, which is now broadly used across the United States and internationally on multiple levels and by multiple groups with differing aims. This course explores the varied applications in public policy of conflict resolution principles, including negotiated rule making, public sector dispute resolution, mediation, collaborative problem solving, democratic governance, community-based planning and consensus building.

PACS 60070 CONFLICT TRANSFORMATION AND RECONCILIATION 3 Credit Hours
(Cross-listed with POL 60507)(Slashed with POL 70507) Throughout the past 30 years, many states and societies have negotiated complicated transitions from authoritarianism, widespread human rights violations and intractable civil conflict toward various degrees of justice, truth-telling, reconciliation and democracy. Some have done it well and some have not; policy certainly matters in this politically potent arena. For example, political memory and accountability may be swept under the public rug—doing so may, or may not, trip up an experiment in democracy. Alternatively, truth-telling and justice may, or may not, be a springboard for reconciliation, healing and citizen empowerment. In this course, we focus on the policies and mechanisms used to constructively confront impunity and come to terms with past horrors. We analyze various international institutions like war crimes tribunals and truth commissions and various local mechanisms like Rwanda's Gacaca courts. We also study the differing roles of reparations paid to victims for past injustices, amnesties granted to former government officials, immunity being traded for truth-telling about the past and the impacts of commemoration and memorialization.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60071 SOCIETY TECHNOLOGY AND SECURITY 3 Credit Hours
This course engages with current debates on the relationship between society, technology, peace and security, focusing particularly on military and dual-use technologies. The course begins by analyzing the literature on how technology shapes societies and how societies shape technology. This includes consideration of the way societies influence the emergence and application of particular technologies and the way understandings of military technological categories (e.g., pariah weapons, precision weapons) have been socially constructed. The module then examines how states and societies have responded to the policy and governance challenges presented by the development and trade in established weapons categories. This includes analysis of the history of disarmament initiatives, movements and agreements as well as the new field of 'humanitarian disarmament'. It also includes examination of recent initiatives aimed at limiting weapons proliferation and armed violence in conflict-ridden societies. The remainder of the course is devoted to exploring the legal, normative and policy debates over the use of modern and emerging technologies. This includes examination of the governance implications of new developments in fields such as biotechnology, nanotechnology, cyber-warfare and drones.
Prerequisite: Graduate standing.
Schedule Type: Lecture
Contact Hours: 3 lecture
Grade Mode: Standard Letter

PACS 60072 ENVIRONMENTAL CHANGE AND CONFLICT 3 Credit Hours
This course examines the varied theoretical and policy challenges involved in addressing the intersection between changes in the environment; the governance and sustainability of natural resources and ecosystems; and the prevention, management and resolution of conflict. It traces the history and development of environmental security and environmental peacebuilding, building a solid foundation in key theories, terminology and concepts, such as the relationship between natural resources and conflict (including scarcity vs. abundance, access and governance); the redefinition of security and securitization of the environment; slow- vs. sudden-onset climate change and displacement; and environmental cooperation in peacekeeping, peacemaking, peacebuilding and contemporary conflict resolution. Students have a working knowledge of important international laws and policies governing the protection of the environment in relation to armed conflict and engage in critical discussions at the intersection of conflict issues and trends in environmental change, such as green militarization and small arms proliferation, environmental crimes and surveillance, fortress conservation and conservation conflicts, the role of gender and youth, human rights and environmental defenders, climate justice and conflict-sensitive climate adaptation. Students apply the knowledge and skills developed in the course to the development of environmental security assessments, peace and conflict impact assessments and foresight analyses.

Full Description

The Environment, Peace and Justice minor meets a number of different goals, responding to students' interests and the growing need to prepare them with the conceptual and theoretical foundations and applied skills to address challenges to both peace and the environment in tandem.

Challenges to both peace and the environment are often deeply interrelated, with one impacting the other and feeding back. For example, where environmental degradation unevenly impacts already-marginalized communities and becomes a source of conflict, or when the breakdown of peace due to historical or protracted injustice impacts the environment and our ability to protect it in nonviolent ways. Globally, justice is a well-recognized pillar of both sustainable development and sustainable peace, emphasizing that these challenges need to be met in integrated ways.

The program emphasizes an interdisciplinary approach by drawing on relevant courses offered through different departments to offer a minor that can complement a range of majors.

Admission decisions are based upon cumulative grade point average, strength of high school college preparatory curriculum and grade trends. Students not admissible to the Kent Campus may be administratively referred to one of the seven regional campuses to begin their college coursework. For more information, visit the admissions website for first-year students.

First-Year Students on the Regional Campuses: First-year admission to Kent State's campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, is open to anyone with a high school diploma or its equivalent. In addition to the other General Requirements of the college, candidates for an undergraduate degree in the College of Arts and Sciences are required, as a condition of graduation, to participate in an outcomes assessment. These outcomes assessments are conducted by each undergraduate degree program in the College of Arts and Sciences.

Full Description

The Master of Arts degree in Peace and Conflict Studies is designed for students interested in gaining the knowledge and practical skills necessary to become a professional peace practitioner, one who is equipped to promote peaceful change and social justice whether in the local community, across the country or at the international level.

Students have the opportunity to learn at the School of Peace and Conflict Studies, Kent State's 'living memorial' to the four students killed on May 4, 1970, and one of the oldest and most well-known institutions for the study of peace and conflict. Students work with faculty who are leading experts in their field and with students from all over the world — all of whom are dedicated to building peaceful local communities, societies and states in a time of increasing incivility, rancor and conflict.

In the program, students examine the causes and consequences of violence; develop methods for preventing, resolving and transforming conflicts; and critically analyze the values and institutions of peace. Students study relevant academic and policy literature and develop an advanced understanding of the field. Above all, however, they embark on a multidisciplinary program with a strong focus on experiential learning, the development of advanced skills relevant to the field (e.g., mediation, conflict analysis, project management), training in leadership and career planning for future employment, whether as a peace practitioner or researcher.

Through the school's partnership with the Center for Conflict Management at the University of Rwanda, students have the opportunity to undertake a study abroad course in Africa to examine both how the country has responded to the challenges of post-genocide reconstruction, and how it is addressing contemporary environmental challenges.

The Peace and Conflict Studies comprises two concentrations:

- The **Applied Conflict Transformation** concentration focuses on the domestic dynamics of peace, including human relations, organizational conflict and conflict resolution, group and community conflict transformation. Students specialize in a wide range of electives (e.g., peace psychology, public sector conflict transformation, peace education). This concentration provides students with knowledge and applied skills necessary to pursue a career in fields such as mediation, arbitration and dispute resolution; in the service and social and community service sector; or in roles in businesses, non-profits and government entities that requires skills of mediation and conflict resolution (e.g., human resources).
- The **Peace, Conflict and Development** concentration explores the intersection between peace, conflict and development in fragile or insecure states and societies around the world. Students examine policy and practice in the fields of international conflict prevention, international peacekeeping, post-conflict peace-building, sustainable development and good governance. Students specialize in a wide range of electives, including on issues such as environmental change and conflict, reconciliation after conflict and the global governance of military technologies. This concentration is designed to appeal to those students wishing to obtain work in fields and organizations dealing with the local and international dimensions of peace, conflict and development in the global south, including governments, international organizations, international development and humanitarian-relief non-governmental organizations (NGO).

CCI 40389 DOCUMENTARY FILMMAKING (DIVG) (ELR) 3 Credit Hours

Documentary Filmmaking is a course characterized by the co-existence of theory and practice and the balance between the two. The theoretical aspect of the course has the purpose of providing information about general basics of film language, film history and the history of documentary filmmaking. It will provide the students the tools for being able to talk about ideas in terms of film language, through the analysis of existing documentaries and exercises shot by the students themselves. Without a good theoretical base, it would be difficult to find the right kind of themes, voices, styles and development. The practical aspect of the course is focused on teaching the students the use of technical equipment including still-cameras, video-cameras, lights, audio tools and post-production software. The course will be focused mainly on European Documentaries as a way of teaching the thematic and political difference between the cultures of the two continents. The combination of the theoretical and practical aspects will generate a solid base for the micro-production of well planned documentaries, which the students will develop, shoot, edit and screen.

About This Program

The Media Advocacy minor prepares students to explore advocacy as both a professional discipline and an act of engaged citizenship by equipping them with theoretical and applied approaches for achieving meaningful social, political and cultural change through the use of media tools and concepts. The minor will deepen student understanding of individual activism, group advocacy and social movements. The required and elective courses will help students understand how to apply story-based strategies to create shared meaning, draw attention to societal issues and organize others to take action. It will also prepare students to understand how media shape individual decision making, public discourse and public opinion.

Full Description

When employers are asked what they look for in new hires, communication skills top the list every time. The key to the Bachelor of Arts degree in Communication Studies is flexibility. The curriculum allows students to design an individual, communication-based program of coursework that prepares them for the future. The Communication Studies major provides students with the knowledge, skills and abilities to succeed across professional industries — from government and business to nonprofits and education. The program's mission is to teach students to communicate effectively, lead responsibly, understand how communication affects identities, communities and cultures, think analytically and reason critically.

The Communication Studies major comprises the following concentrations (both of which are offered in-person or fully online):

- The **Applied Communication** concentration allows students to gain expertise in organizational communication, advanced presentational speaking, professional writing and visual design. Students combine theoretical knowledge and technical skills while mastering professional tasks such as conducting training seminars, creating web content, designing promotional materials, managing communication campaigns and writing press releases.
- The **Communication Studies–General** concentration features flexibility and choice. Students create a personalized plan of study tailored to their specific academic interests and career goals in areas such as global and intercultural communication, advocacy, social media, corporate communication and workplace consulting, presentational and motivational speaking, campaign design and more. This concentration is appropriate for those who have diverse academic interests. It permits students to take courses across the schools in the College of Communication and Information and provides space for electives that students could use to pursue a minor in another discipline.

Students may apply early to the following master's degree programs and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

- Master of Arts degree in Media and Journalism
