Accreditation

The B.S. degree in Music Technology is approved by the National Association of Schools of Music.

* Source of occupation titles and labor data comes from the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook. Data comprises projected percent change in employment over the next 10 years; nation-wide employment numbers; and the yearly median wage at which half of the workers in the occupation earned more than that amount and half earned less.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special

talents and adult students who graduated from high school three or more years ago.

Admission to this major is selective. To be admitted to the Music Technology major, students audition their primary instrument and/or with a portfolio and complete theory and keyboard placement tests.

International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions to waive) by earning a minimum 71 TOEFL iBT score, minimum 6.0 IELTS score, minimum 47 PTE score or minimum 100 DET score, or by completing the ELS level 112 Intensive English Program. For more information on international admission visit the admissions website for international students.

- ¹ A minimum C grade must be earned to fulfill the writing-intensive requirement.
- ² Major ensemble (eight separate semesters): All music technology majors must enroll in an ensemble appropriate to their major performance area. Two credit hours must be taken in major ensemble. Major ensemble credit can be earned for MUS 25011 and MUS 25225, as approved by faculty. Students may choose to complete the remaining 6 credit hours with MUS 35213, or 4 credit hours with MUS 35213 or major ensemble and 2 credit hours with ensemble electives (such as MUS 25311 and MUS 45231 for students whose instrument is guitar) as approved by faculty.
- ³ Applied studio musicianship (four semesters and 8 credit hours): Students must meet the Sophomore Proficiency requirement after two semesters and the Senior Proficiency requirement for graduation.
- ⁴ Students register for MUS 36913 for all other popular music instruments not listed.
- ⁵ Students who have completed the Applied Studio Musicianship and Applied Music requirement on piano may replace requirement with Music (MUS) electives.

Program Learning Outcomes

Graduates of this program will be able to:

1. Function as competent and versatile professional studio musicians who perform in diverse commercial music venues.
2. Compose and arrange music.
3. Create appropriate sound for visual media.
4. Create music productions of professional quality.
5. Produce professional audio recordings, both live and in studio, from start to finish.

Full Description

The Bachelor of Science degree in Music Technology prepares students as musicians within a broad field of constantly changing technology. Students study in courses that develop expertise in music computer technology for application in the recording industry, audio-engineering and music production.

The development of music technology has had an enormous impact on the music industry. There are many career opportunities for talented musicians in music technology. Skilled musicians can apply formal training to recording careers, studio performance, arranging or producing and live performances. Opportunities are also available in non-traditional, contemporary popular music venues, the movie industry, television, multi-media events and music for advertising, as well as traditional performing arts venues. The growth of music technology has made knowledge and experience in this area a necessity for all students preparing for a career in any area of the music industry. To compete effectively in the contemporary music world, one must possess a strong traditional music background, plus the technical expertise required to make the most of a rapidly changing and developing technology.

The Music Technology major comprises the following concentrations:

- The **Audio Recording** concentration provides students the opportunity to learn advanced audio recording techniques.
- The **Music Production** concentration provides students the opportunity to learn how to use technology to realize creative work such as original music, arranging and production.
- The **Performance** concentration provides students who want to perform the necessary technological tools to succeed in the modern music industry.
