HDF 61199	THESIS I ²	
Minimum Total Credit Hours:		32

teaching positions in the social services, junior and community colleges and cooperative extension and/or for pursuing doctoral-level study.

- ¹ The master's project is intended for students who do not plan to continue graduate work beyond the master's degree, and provides the opportunity to approach research and theory in a more applied manner. The presentation and interpretation of original research is not required. However, approval of the intended project by the student's master's project committee is required, as is the successful completion of an oral final examination conducted by the master's project committee.
- ² The thesis is intended for research-oriented students and is designed to provide the opportunity to conduct original research. Approval of a thesis proposal by the student's thesis committee is required, as is the successful completion of an oral final examination conducted by the thesis committee.

Program Learning Outcomes

Graduates of this program will be able to:

1. Identify physical, intellectual, emotional, and social dimensions of human life within their respective disciplines; recognize the unique strengths and needs of individuals and families; and apply knowledge of human development and family relationships through involvement with and study of diverse populations.
2. Communicate their ideas in oral presentations and written papers; demonstrate an understanding of theories, methods, and principles of research pertaining to human development and family relationships; and access scholarly sources of information and critically evaluate the quality of empirical research pertaining to human development and family relationships.
3. Demonstrate proficiency in developmental and family research methods and relevant statistical analyses; and an understanding of program development, delivery and evaluation pertaining to human development and family relationships.
4. Independently complete a master's thesis or master's project that reflects an understanding of the interrelationship between theory, research, and practice.

Full Description

The Master of Arts degree in Human Development and Family Science provides students with advanced knowledge in the fields of family sciences and human development and the opportunity to develop multidisciplinary research and community outreach skills.

Coursework enables students to apply to become Certified Family Life Educators. Courses focus on current research and practice in human development and family science with an emphasis on family theories and processes; family life education; the reciprocal influences of family, school, work and community contexts; development across the lifespan; and the strengths and needs of diverse populations.

The program emphasizes both basic and applied research. Student participation in interdisciplinary research and community outreach projects is encouraged. Graduates are prepared for leadership and
